About This Catalog

The requirements specified in this catalog apply to students who commence their studies at Ithaca College during the 2023-2024 academic year and who remain in continuous enrollment at the institution until they graduate. If requirements are changed, students may elect to comply with the new requirements or to remain under the requirements by which they are governed at the time of the change. The choice should be made in consultation with your academic advisor and your Dean's office for review and approval.

Students who change their major are bound by the regulations for their new major that are in effect the semester they officially begin studies in that program.

Students who withdraw and are subsequently readmitted are bound by program and degree requirements in force during the academic year in which they are readmitted. See the statement on return after suspension under "Academic Standards (p. 648)."

The student should be aware that some information in the catalog may change. It is recommended that students considering enrollment check with the school director to determine if there is any change from the information provided in the catalog. In addition, a catalog will contain information on the school's teaching personnel and courses/curricula offered. Please be advised that the State Education Department separately licenses all teaching personnel and independently approves all courses and curricula offered. Therefore, it is possible that courses/curricula listed in the school's catalog may not be approved at the time that a student enrolls in the school or the teaching personnel listed in the catalog may have changed. It is again recommended that the student check with the school director to determine if there are any changes in the courses/curricula offered or the teaching personnel listed in the catalog.

Important Declarations

NON-DISCRIMINATION STATEMENT

The College recruits, hires, and promotes on the basis of individual qualifications and performance. It is the policy of Ithaca College that discrimination on the grounds of age, disability, marital status, national origin, race, color, religion, sex, sexual orientation, gender identity or expression, or military status will not exist in the admission or access to, or treatment or employment in, any program, activity, area, or operation of the College. Concerns regarding known or suspected instances of disability-based discrimination may be brought to the attention of the Director of Benefits Compliance, in the Office of Human Resources, at humanresources@ithaca.edu or (607) 274-8000. Any inquiries concerning the College's non-discrimination policies on sexual harassment or other forms of sex discrimination may be directed to Ithaca College's Title IX Coordinator, Linda Koenig, at lkoenig@ithaca.edu or (607) 274-7761; or to the U.S. Department of Education, Office of Civil Rights. For more information on the Office of Civil Rights, please visit the Office of Civil Rights website.

Photographs

Ithaca College and its representatives on occasion take photographs and video footage of individuals or groups in public venues and spaces on campus, including but not limited to exterior walkways, performance and athletic areas, and classrooms. This statement serves as public notice of the College's intent to do so and by participating in a program of Ithaca College, you—or your parent/guardian if you are under 18 years of age—grant Ithaca College, and its employees and agents, the right to make, use, and publish in whole or in part any recorded footage in which your name, likeness, image and/or voice may be included. Ithaca College shall have complete ownership of such recordings in which you or your performance or contribution appears. If you should object to the use of your likeness, image or voice, you have the right to withhold its release by filling out a form at the Office of the Registrar.

Accuracy

Every effort has been made to ensure that the information in this catalog is accurate and complete. However, errors are possible, and changes such as the addition or cancellation of courses may occur during the academic year. The College reserves the right to correct these or other errors in the catalog and to make changes in degree requirements, course offering regulations, and procedures as educational or financial considerations require. For the most up-to-date information, contact the appropriate department offices.

Mission and Vision

Vision Statement

A global destination for bold thinkers seeking to build thriving communities

Mission Statement

Educate, engage, and empower through theory, practice, and performance

Values

Academic Excellence • Respect and Accountability • Innovation • Sustainability • Equity

All of these values are interrelated and equally critical to accomplishing Ithaca College's vision and mission.

Academic Excellence

Ithaca College views academic excellence as the integration of theory, practice, and performance. The College's unique fusion of the liberal arts and professional programs assumes that knowledge needs to inform and be informed by hands-on experience, real-life application, and concrete action. Curricular and co-curricular activities should provide all community members with opportunities to develop, debate, and critically evaluate strategies to address complex problems.

Respect and Accountability

Mutual care, respect, and accountability are expected in all facets of institutional life. Ithaca College values every community member's dignity and seeks to create a social environment where everyone can flourish and be their authentic self. As members of a thriving community, we demonstrate practices that foster a sense of belonging, shared responsibility, collaboration, innovation, and achievement. Accountability to Ithaca College's values and policies gives us the opportunity to consider the consequences of our actions, to self-examine, and to find ways to restore trust and forgiveness when harm is caused. A culture of care and love grows when we respectfully engage in learning opportunities that help us shift out of our presumed paradigms.

Innovation

A culture of innovation enables us to remain forward thinking, nimble, and adaptable to social and technological change. When people from diverse backgrounds and experiences are empowered to exchange ideas and collaboratively problem-solve, innovation grows, creativity sparks, and institutional and personal goals are achieved. Collaboration between the professional and liberal arts traditions cultivates academic excellence in the spirit of theory, practice, and performance.

Sustainability

Adopting institutional strategies that offer ecological and resource-based sustenance to the people and places of Ithaca College ensure its futurity. Sustainability means increasing our usage of renewable energy sources and reducing our carbon footprint because we understand the impact of our decisions on the community and the planet. It means practicing good stewardship of financial resources. It means fostering connections among students, faculty, staff, alumni, and administrators to serve the public good. We activate critical thinking, scholarly inquiry, professional skills, and performance in order to positively impact, sustain, and advance our local and global communities.

Equity

We adopt an equity framework that proactively seeks to make Ithaca College accessible, affordable, and inclusive for all people, especially those impacted by systemic disadvantage, marginalization, and exclusion. This endeavor requires resource allocation as well as organizational structures that facilitate equity. It demands adopting strategies for increasing the representational diversity of students, faculty, and staff who are currently underrepresented in higher education. It also means implementing inclusive policies and practices proven to foster the retention, belonging, and advancement of people who face systemic disadvantages and discrimination based on race, gender, sexual orientation, religion, ability, and national origin. Finally, an equity

framework assumes inclusive decision-making processes, transparency, and accountability as the primary ways of working together.

Academic Calendar

All Semester Academic Calendars

The Ithaca College academic calendars for fall, winter, spring, and summer semesters may be found on the Office of the Registrar Calendar website (<https://www.ithaca.edu/registrar/calendars/>).

Residence Hall Openings and Closings

Residence hall openings may be found at the Office of Residential Life Move-In website (<https://www.ithaca.edu/residential-life/living-campus/move-in/>) and closings may be found at the Office of Residential Life Move-Out website. ¹ New York State teacher certification program

Graduate Degree Programs

Registered by the Regents of the University of the State of New York

School of Business

- Entertainment and Media Management, M.B.A. (p. 734) (HEGIS Code:0506)
- Accounting, M.S. (p. 734) (HEGIS Code: 0502)

School of Health Sciences and Human Performance

- Athletic Training, M.S. (p. 748) (HEGIS Code: 1299.30)
- Exercise and Sport Sciences, M.S. (HEGIS Code: 0835) (*No additional students are being admitted to this program as of Fall 2022*)
 - Exercise and Sport Sciences, M.S. with Thesis (<https://catalog.ithaca.edu/graduate/exercise-sport-sciences/exercise-sport-sciences-master-science-degree-thesis/>)
 - Exercise and Sport Sciences, M.S. without Thesis (<https://catalog.ithaca.edu/graduate/exercise-sport-sciences/exercise-sport-sciences-master-science-degree-without-thesis/>)
- Occupational Therapy, M.S. (p. 767) (HEGIS Code:1208)
- Physical Therapy, D.P.T. (p. 776) (HEGIS Code:1212)
- Physician Assistant Studies, M.S. (p. 781) (HEGIS Code: 1299.10)
- Speech-Language Pathology with Teaching Certification, M.S. (p. 786)¹ (HEGIS Code:1220)
- Speech-Language Pathology, M.S. (p. 787)

School of Humanities and Sciences

- Adolescence Education 7-12, M.A.T. (p. 738)¹ (HEGIS Code:0803)
- For certification in:
- Biology 7-12
 - Chemistry 7-12
 - English 7-12
 - French 7-12
 - Mathematics 7-12
 - Physics 7-12

- Social Studies 7-12
- Spanish 7-12
- Agricultural Education, M.A.T. (p. 739)
- Art Education, M.A.T. (p. 740) (HEGIS: 0833)
- Childhood Education, M.S. (p. 740)¹ (HEGIS Code:0802)

School of Music, Theatre, and Dance

- Music Education (M.M. or M.S.) (p. 759) (HEGIS Code: 0832)

Credits may be earned in summer sessions during June, July, and August. More information may be obtained from the graduate studies website (<http://www.ithaca.edu/gps/gradprograms/>).

¹ New York State teacher certification program

Certificate Programs

Registered by the Regents of the University of the State of New York

School of Business

- International Business, Certificate (p. 266) (HEGIS Code:5004)

Minors and Concentrations

Minors and concentrations are structured plans of study consisting of a minimum of five courses for at least 15 credits. Successful completion of a minor or concentration is recorded on the transcript if the student has registered for the program as required. See "Admission to a Minor or Concentration" in the "Graduation and Program Regulations (p. 655)" section.

The difference between the two plans of study is that a minor is outside the specific discipline in which the student is majoring; a concentration is within the student's major discipline. Concentrations are available in a number of programs. Students should consult with their advisers on eligibility requirements and planning for graduation.

Minors are available in each school, as follows:

School of Business

- Accounting (p. 242)
 - Accounting Minor (p. 251)
- Business Administration (p. 252)
 - Business Minor (p. 265)
 - Business Analytics Minor (p. 265)
 - Entrepreneurship & Innovation Minor (p. 265)
 - Finance Minor (p. 265)
 - International Business Studies Minor (p. 265)
 - Marketing Minor (p. 266)
 - Pre-MBA Minor (p. 266)
 - Certificate in International Business (p. 266)

Roy H. Park School of Communications

- Department of Media Arts, Sciences, and Studies (p. 271)
 - Documentary Studies and Production Major - B.A. (p. 283)
 - Animation Minor (p. 286)
 - Audio Production Minor (p. 287)
 - International Communications Minor (p. 287)

- Still Photography Minor (p. 287)
- Writing for Film, Television, & Emerging Media Minor (p. 287)
- Department of Journalism (p. 287)
 - Journalism Minor (p. 290)
- Department of Strategic Communication (p. 290)
 - Advertising, Public Relations, and Marketing Communications Major - B.S. (p. 296)
 - Advertising, Public Relations, and Marketing Communications Minor (p. 298)
 - Communication Management and Design Minor (p. 298)
 - Live Event Design and Management Minor (p. 298)

School of Health Sciences and Human Performance

- Department of Exercise Science and Athletic Training (p. 307)
 - Exercise Science Minor (p. 319)

 - Sociology Minor (p. 478)
- Women's, Gender, and Sexuality Studies (p. 478)
 - Women's, Gender, and Sexuality Studies Minor (p. 479)
- Department of World Languages, Literatures, and Cultures (p. 479)
 - French and Francophone Studies Minor (p. 491)
 - German Area Studies Minor (p. 491)
 - Italian Studies Minor (p. 491)
 - Spanish Minor (p. 491)
 - Linguistics Minor (p. 492)
 - Translation Studies Minor (p. 492)
- Department of Writing (p. 492)
 - Writing Minor (p. 498)
- Interdisciplinary Minors (p. 498)
 - Anthropology Minor (p. 498)
 - Counseling Minor (p. 498)
 - Global Premodern Studies Minor (p. 499)
 - Latin American and Caribbean Studies Minor (p. 499)
 - Media Literacy Minor (p. 500)
 - Muslim Cultures Minor (p. 501)
 - Neuroscience Minor (p. 501)

School of Music, Theatre, and Dance

- Music Performance (p. 525)
 - Music Education and Performance Major – B.M. (p. 555)
 - Jazz Studies Concentration (p. 574)
- Music (p. 587)
 - Music Minor (p. 592)
- Theatre and Dance Performance (p. 592)
 - Dance Minor (p. 603)
- Theatre Studies (p. 614)
 - Theatre Minor (p. 622)

Degrees Awarded

Each of the undergraduate degree programs offered by Ithaca College requires a minimum of 120 credit hours and a certain number of liberal arts credits as specified by the New York State Education Department. Only courses specifically designated for this purpose may

count as liberal arts credit; they are marked “LA” in this catalog and in the semester course lists, the *Browse Courses* and *Browse Course Catalog*, available publicly on Homer (<https://homerapps.ithaca.edu/StudentRegistrationSsb/ssb/registration/>). Those not so designated are marked “NLA” in this catalog and in the semester course lists. Courses listed without LA or NLA designations are under review.

The **bachelor of arts (B.A.)** degree combines a major focus in one of the basic disciplines with breadth of study across the traditional liberal arts fields. Through planned study of representative subjects in the humanities, natural sciences, social sciences, and fine arts, students encounter the intellectual landmarks and become familiar with the basic methods of investigation, analysis, and expression of each area. Majoring in one of these fields affords the opportunity to develop greater sophistication and depth in an area of particular interest. *As specified by the New York State Education Department, the B.A. degree requires a minimum of 75 percent liberal arts credits.*

The **bachelor of fine arts (B.F.A.)** degree places particular emphasis on the media and techniques of creative expression. Courses in theory and aesthetic analysis encourage students to explore new modes of expression and to develop an ability to critique their own and others’ work. Individual and small-group instruction in special techniques helps students perfect their individual talents and demonstrate them in scheduled exhibitions or performances. Liberal arts electives enable students to attain a breadth of knowledge in other disciplines. *As specified by the New York State Education Department, the B.F.A. degree requires a minimum of 25 percent liberal arts credits.*

The **bachelor of music (B.M.)** degree combines a variety of music courses to provide a solid base from which to pursue study of a specific area, such as music education, music performance, composition, jazz studies, or recording. *As specified by the New York State Education Department, the B.M. degree requires a minimum of 25 percent liberal arts credits.*

The **bachelor of science (B.S.)** degree integrates study in one of the professional areas, or one of the natural or social sciences, with designated support courses from other areas. In this closely structured program, students combine analytical methods developed in the classroom with practical application of these methods in a laboratory or internship setting. The intent of this degree is to provide an intensive exploration of theory, method, and research within the student’s chosen field. Electives in liberal arts disciplines complement the specialization and foster understanding and appreciation of the interrelation of the humanities and sciences. *As specified by the New York State Education Department, the B.S. degree requires a minimum of 50 percent liberal arts credits.*

For more information about degree programs and requirements, see “Graduation and Program Regulations (p. 655).”

Integrative Core Curriculum

Chrystyna Dail, Director and Associate Professor

Amy Quan, Coordinator of Ithaca Seminar and Associate Professor

Mission and Program Outcomes

The Integrative Core Curriculum (ICC) is Ithaca College’s liberal education program, which contributes, along with students’ curricular experiences in the major, elective offerings, and out-of-class experiences, to achieving the College’s expectation that Ithaca College graduates should become

integrative thinkers, critical and analytical problem solvers, and reflective learners. To achieve these expectations, students completing the ICC will:

1. Address a topic, issue, problem area, or human challenge using a combination of concepts, theories, and/or methods from multiple perspectives or fields of study;
2. Apply concepts, theories, methods, or skills to analyze new questions or complex problems; and
3. Engage in and communicate self-reflection about their learning in the Integrative Core Curriculum, their chosen major discipline, and their overall Ithaca College experience.

The ICC is intentionally designed to be integrative. Students will be asked to reflect throughout the program on how the various courses in their ICC experience fit together and how they connect with other learning experiences.

The ICC is comprised of: The Ithaca Seminar; Themes and Perspectives courses; Academic Writing, Diversity, Quantitative Literacy, and Writing Intensive courses; and the culminating ICC capstone course. Student achievement of ICC program outcomes will be documented and demonstrated through submission and assessment of reflective artifacts throughout their ICC coursework.

Requirements of the ICC

Code	Title	Credits
	Ithaca Seminar	4
	Themes and Perspective Courses ¹	9-16
	Creative Arts (CA)	
	Humanities (HM)	
	Natural Sciences (SC)	
	Social Sciences (SO)	
	Additional Requirements ²	12
	Academic Writing (WRTG 10600 or ICSM 10800)	
	Writing Intensive (WI)	
	Diversity (DV)	
	Quantitative Literacy (QL)	
	ICC Capstone (CP)	0-6
	Total Credits	25-38

¹ Students must take a Themed course in each of the four Perspectives to meet the “Themes and Perspectives Courses” requirement. Students whose major designates one Perspective as being fulfilled by the major will be required to complete Themed Perspectives courses in the other three Perspectives and will have their degree evaluation reflect fulfillment of the major-designated Perspective. Please note that a change of major may result in changes to the Perspectives course requirements, so check with your advisor for details.

² Additional requirements may be more than 12 credits depending on courses taken.

Ithaca Seminar (4 credits)

The Ithaca College student’s introduction into the ICC begins in the first semester with an Ithaca Seminar. These courses are interdisciplinary seminars that address a variety of transition to college issues while supporting students’ ability to (1) develop and evaluate ideas and arguments; and (2) identify and articulate assumptions that underlie an idea, argument, or creative work.

Themes and Perspectives Courses (9-16 credits)

The Themes and Perspectives model is a central, distinctive component of the ICC. This coursework is based on the premise that an Ithaca College education prepares students to engage with key challenges of our time (“Themes”), and that these complex challenges are best approached and analyzed through a variety of conceptual approaches or “Perspectives.” The student selects a series of Themes and Perspectives-designated liberal arts courses that make the experience of this portion of their ICC study intentional, integrative, and relevant. A **Theme** in the Ithaca College Integrative Core Curriculum (ICC) is a topic, issue, problem area, or human challenge that captures core Ithaca College values and strengths and invites interdisciplinary, critical, or analytical investigation (e.g., Power and Justice—which focuses on the roots and redressing of societal inequities; The Quest for a Sustainable Future—which explores the causes and potential remedies of the global climate crisis; Inquiry, Imagination and Innovation—which plumbs the depths of creative response to the human condition). A **Perspective** is a disciplinary lens through which these salient Themes can productively be studied (e.g., Creative Arts, Humanities, Social Sciences, Natural Sciences). Students are required to complete a 9-16 credit Themes and Perspectives course experience. Students may choose to pursue a single Theme for exploration across the four Perspectives courses, or they may explore multiple Themes to integrate topics, issues, problem areas, or human challenges of their choice across their areas of curiosity. Students may not apply courses used to satisfy the Themes and Perspectives requirement to their primary major, unless their major has designated one Perspective as being fulfilled by completion of that major.

To complete the Themes and Perspectives sequence, students complete a series of Themed courses (choosing a single theme or multiple themes) addressing each of four Perspectives: Creative Arts, Humanities, Natural Science, and Social Science.

- At the decision of the department housing a major, some majors can fulfill up to one of the four Perspectives, as described above, but additional Perspectives cannot be fulfilled by primary major courses. Additionally, while an individual course may be designated with multiple Perspectives, any individual course may count toward only one Perspective in the student’s degree evaluation.

ICC Theme courses, designated in each of the Perspectives below, focus on ways humans interact with the world and provide students with multiple approaches to understand life on earth and the central issues of our time. For each perspective, one student outcome focuses on methods or processes used in the perspective. A second outcome addresses how examining the world contributes to the student’s own life or intellectual development, and a third outcome concerns understanding how the perspective contributes to understanding broader social, cultural, and/or historical issues.

Creative Arts Perspective (CA) (minimum 3 credits from designated courses or major)

Courses taught from a creative arts perspective focus on the methods and materials used to create performances, literary texts, visual works, or built forms and the understanding of the aesthetic conventions and theoretical, social, historical, political, or economic contexts surrounding these works.

Humanities Perspective (HM) (minimum 3 credits from designated courses or major)

Courses taught from a humanities perspective seek to understand the human experience through analysis, interpretation, and

reflection, engaging students in the particulars of individual experiences, texts, or other artifacts.

Natural Sciences Perspective (SC) (minimum 3 credits from designated courses or major)

Courses taught from a natural sciences perspective focus on scientific theories that explain experimentally verifiable physical or biological phenomena and the methodological processes used to conduct these observations as epitomized by scientific methods.

Social Sciences Perspective (SO) (minimum 3 credits from designated courses or major)

Courses taught from a social sciences perspective seek to understand how particular human experiences can be seen as general characteristics and patterns. The focus is on how social forces shape and determine human action. Courses in this perspective apply theoretical, analytical, and empirical tools in the study of individuals, groups, and institutions.

Additional Requirements

Academic Writing (minimum of 3 credits)

The Academic Writing requirement is designed to help students develop as writers and is typically fulfilled by completion of WRTG 10600. Students who score 4 or 5 on the AP examination in English Literature and Composition or English Language and Composition will receive credit for WRTG 10600 and will satisfy the Academic Writing requirement. Students who score a 4, 5, 6, or 7 on the IB English A (HL) exam will receive credit for WRTG 10600 and will satisfy the Academic Writing requirement. The Ithaca Seminar numbered ICSM 10800 also fulfills this requirement.

Diversity (DV) (minimum of 3 credits from designated courses)

Diversity goes beyond the mere acknowledgement of difference to address the systematic silencing of marginalized people as we work toward creating a more just world. Diversity encompasses multiple dimensions, including but not limited to *race, ability, nationality, ethnicity, religion, geographic origin, class, sexual orientation and identities, gender, gender identities and expressions, and age*, allowing us to learn about the world through these perspectives.

Courses with a diversity designation are designed with the understanding that diverse perspectives have been historically excluded from the core curriculum. These courses promote students’ critical engagement with issues arising from the historical exclusion of oppressed voices. As such, courses with a diversity designation enhance student awareness of current and past injustices, as well as the potential role of diversity in enriching society.

Quantitative Literacy (QL) (minimum of 3 credits from designated courses)

Quantitative Literacy (QL) is the ability to reason with quantitative concepts for the purpose of understanding the world. In a data and information-saturated world, citizens need quantitative skills to understand commonplace and complex issues, and to be able to formulate and ask intelligent questions of experts. Concepts related to quantitative literacy include, but are not limited to, measurement, logic, number sense including different magnitudes, the difference between percentage and percent change, sampling and error, and graphical representation of data and information.

Courses with a QL designation will draw their motivation for quantitative work from the personal, social, and scientific

issues they seek to address. Such courses will help students to develop the ability and habits of mind to investigate and interpret quantitative information, critique it, reflect upon it, and apply it, all in the context of the issues that motivate the course.

Writing Intensive (WI) (minimum of 3 credits from designated courses)

All students must successfully complete one Writing Intensive (WI) course. The overarching goals of WI courses are to develop students' abilities to use writing as a pathway of making meaning within a specific subject area and a means of participating in ongoing conversations within a particular academic or professional community. Students must fulfill the Academic Writing requirement before enrolling in a WI course.

ICC Capstone (CP) (0-6 credits from designated courses)

An ICC capstone experience is required for all students; this capstone may be a stand-alone course or integrated into a departmental capstone experience. As part of the capstone experience, students will complete a reflective artifact addressing the question, "What has my learning in the Integrative Core Curriculum contributed to my education and how is that learning related to my major and other learning experiences?"

Liberal Arts Coursework

The Integrative Core Curriculum is comprised principally of liberal arts courses. Students may, as part of their degree programs, be required to complete additional liberal arts courses as part of their major requirements and degree type. Students should refer to the degree requirements in their catalog and in DegreeWorks to confirm all liberal arts courses required as part of their programs.

Information specifically related to transfer may be found in this catalog in the Student Information section.

For additional information about the ICC, including specific courses that are part of the program, please visit the Ithaca College ICC Website (<https://www.ithaca.edu/icc/>).

Exploratory Program

Students who wish to investigate a variety of academic disciplines before selecting a major may enter Ithaca College through the Exploratory Program. Exploratory students work one-on-one with dedicated faculty advisers who help them choose courses from the liberal arts and pre-professional curricula at the College and who guide them through the exploration of areas of interest to discern the best course of study.

During their time in the program, exploratory students are subject to the same academic regulations as all Ithaca College students and are encouraged to take advantage of all the College resources open to the general student population. In using the Integrative Core Curriculum as a means of structured exploration, they are actively progressing toward determining their major while completing the foundations of an Ithaca College degree.

Exploratory Program students are well positioned to identify a major and a career path that match their evolving strengths and interests. Exploratory students are assigned a faculty adviser who is also the professor in one of their first semester courses. This helps to ensure frequent contact and the opportunity to build a relationship on which the adviser can offer more specific, individualized academic guidance.

Careful planning is necessary to transfer to credit-intensive programs, so exploratory students must consult closely with members of the IC advising support network, including their faculty adviser, the Director of the Exploratory Program, and the Dean's office(s) of the respective school(s). Students may remain in the Exploratory Program through the end of the sophomore year, or until they have earned a maximum of 60 credits, at which time they are required to declare a major.

To learn more, please visit the Exploratory Program website (<https://www.ithaca.edu/academics/exploratory-program/>).

Featured Exploratory course: IISP 10500

Pre-Law

PRE-LAW ADVISING

Students who are considering law school after college may prepare for the study of law by completing any of the regular majors at Ithaca College. Law schools do not stipulate specific pre-law courses of study but recommend that students develop skills in critical thinking, comprehension and expression with words, as well as critical understanding of the human institutions and values with which the law deals.

Ithaca College provides pre-law advising to students in any academic major at the college who are interested in a post-baccalaureate path in law. The pre-law advisor provides students with access to extensive resources, including personalized counseling, to help determine if law school and the legal profession meets their interests, and if so, the best way to achieve their goals. The pre-law advisor also helps students to set up individualized timelines based on the student's personal goals. Students also have opportunities to meet IC staff, faculty, and alumni who have become successful attorneys and to speak with IC alumni who are currently in law school. Specific information on law schools is also available from the Center for Career Exploration and Development. Students may learn more on the Pre-Law Advising web page (<https://www.ithaca.edu/center-career-exploration-and-development/pre-law-advising/>).

Pre-Medical Sciences

Students who wish to prepare for health science professions – dentistry, medicine (M.D. or D.O.), optometry, physician assistant, nursing/nurse practitioner, veterinary medicine – may do so at Ithaca College in a variety of ways. No specific major is required to prepare for these professions, but students must complete several semesters of coursework in biology, general or inorganic chemistry, and/or organic chemistry. Coursework in anatomy and physiology, physics, and microbiology is also required for certain professions. Students should also demonstrate competency in mathematics and statistics, and basic knowledge in biochemistry, psychology, and sociology for required entrance exams such as the MCAT.

Most medical science graduate schools also expect coursework in English and/or writing, and social sciences/humanities (e.g., psychology, sociology, art, history, philosophy, etc.). To enhance competitiveness, students are encouraged to pursue advanced coursework in biology, chemistry, physics, and mathematics.

Students interested in the medical sciences professions should inform their academic advisor, contact the chairperson of the Health Professions Advisory Committee (<https://www.ithaca.edu/academics/school-humanities-and-sciences/pre-health-options/>), and research

prerequisite requirements as early as possible in their academic career. This will ensure that their academic programs are planned to meet all requirements for professional school by the end of the senior year and in time for the professional schools' admissions tests.

Accounting (ACCT)

ACCT 22400 Accounting for the Real World (NLA)

Theory and procedures used to gather financial information and to present formal financial statements of a business enterprise. Emphasis on analyzing decision-making situations and the use of quantitative techniques used in financial and managerial accounting. Enrollment limited to non-business and non-accounting majors. (Y)
3 Credits

ACCT 22500 Financial Accounting (NLA)

Introduction to the basic measurement and reporting concepts underlying the accounting system for communicating financial information to users external to the organization and to internal managers. Topics include information processing, review of financial statements, the role of ethics in accounting decisions, and valuation and reporting issues for assets, liabilities, stockholders' equity, revenues, and expenses. Sophomores who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: One course in Business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT). (F,S,Y)
2 Credits

ACCT 22600 Management Accounting (NLA)

Study of the uses of accounting information in managerial decision making, planning, and control within the firm. Areas examined are cost estimation; budgets; short-, intermediate-, and long-term planning; product costing; and special reports for managerial use. Emphasizes the uses of accounting outputs in the decision-making process rather than the concepts and methodology of accumulating accounting information. Projects include the use of basic computerized spreadsheets. (F,S,Y)
2 Credits

ACCT 30700 Commercial Law (NLA)

Introduction to commercial law concepts. Topics include common law contracts and sales contracts under the UCC, business entity selection, formation, operation, and termination, and the rights and obligations of owners and management; determining employee versus independent contractor status, and why it matters; agency law; creditor-debtor law (including secured transactions, mortgages, and bankruptcy); and anti-bribery laws. Emphasis on the application of legal concepts to solve problems. (Y)
4 Credits

ACCT 31500 Cost Analysis and Decision Making (NLA)

A study of various cost systems, theories, and models of cost and revenue behavior. The course focuses on cost management, cost analysis, and both structured and unstructured decision making with cost information. Product costing and the interface with the financial reporting system will also be covered. Prerequisites: ACCT 22600; junior standing. (S,Y)
3 Credits

ACCT 32000 Accounting Information Systems (NLA)

Acquaints students with the functions, design, implementation, and documentation of information systems. The general topic of information systems, focusing on accounting applications (both financial and managerial), is covered. Extended coverage of transaction processing, internal controls, and computer security. Prerequisites: COMP 11000 or COMP 17100; ACCT 22600; junior standing. (IRR)
3 Credits

ACCT 34500 Intermediate Accounting I (NLA)

This course covers essential topics related to balance sheet valuation and income measurement. Includes an overview of generally accepted accounting principles, financial statements, cash, accounts receivable, inventories, operating assets, current and long-term liabilities, cash flows, and revenue recognition. Prerequisites: ACCT 22500; sophomore standing. (F,Y)
3 Credits

ACCT 34600 Intermediate Accounting II (NLA)

This course is a continuation of ACCT 34500 Intermediate Accounting I. It covers complex topics related to balance sheet valuation and income measurement and includes both topical coverage and reporting considerations. Students are expected to deal with detailed pronouncements and the advanced concepts in Intermediate Accounting, such as accounting for pensions, income taxes, earnings per share, and accounting changes. Reporting issues and requirements are also covered. Prerequisite: ACCT 34500 and sophomore standing. (S,Y)
3 Credits

ACCT 39700 Selected Topics in Accounting (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

ACCT 40200 Advanced Accounting (NLA)

In-depth analytical study of special problems in financial accounting. Continuous emphasis is placed on the relationship between theory and practice to reflect the latest professional pronouncements. Highly technical topics related to corporation, partnership, government, and not-for-profit organizations, including consolidation, branch and consignment, reorganization and liquidation, foreign transactions, and essentials of accounting for governmental and not-for-profit organizations. Prerequisites: ACCT 34600. (IRR)
Attributes: UND
3 Credits

ACCT 40600 Auditing (NLA)

Theory of independent examinations of financial statements. Discussion of relationships with clients; working papers; audit procedures, including evaluations of internal control; accounting principles; preparation of reports; accountant's liability; and professional ethics. Prerequisites: ACCT 34500; junior standing. (F,Y)
3 Credits

ACCT 49300 Tax Accounting (NLA)

Introductory course in taxation covering structure of present tax law; bases for income tax computations; and concepts of gross income, adjusted gross income, deductions, exemptions, and credits. Emphasis is on tax questions and problems relating to individuals. A student may not receive credit for both this course and ACCT 31100. Prerequisites: ACCT 22500; junior standing. (F,Y)
3 Credits

ACCT 49400 Advanced Tax Accounting (NLA)

Advanced study of income tax provisions relating to individuals, corporations, and partnerships. Sophisticated tax provisions, such as corporate liquidations, capital charges, stock options, and pension plans. Solutions to complex tax problems through use of a tax service; practical experience in locating applicable code sections, regulations, IRS rulings, and court decisions; class presentations. Prerequisites: ACCT 49300; junior standing. (IRR)
Attributes: UND
3 Credits

ACCT 49600 Practicum in Tax Accounting (NLA)

Supervised work experience in tax return preparation and tax advocacy that mirrors tax practice in accounting firms. Students undertake an intensive course preparing tax forms for individuals and must successfully pass the IRS VITA volunteer tax preparer exam. Students then are responsible for maintaining the professional requirements of the established tax practice. Tax returns are computerized and electronically filed. Students and faculty utilizing collaborative learning strategies provide tax advocacy and disseminate information to taxpayers who have English as a second language. Professional skills are emphasized. Prerequisites: ACCT 49300 or junior standing with instructor permission. (S,Y)

Attributes: SL
3 Credits

ACCT 49700 Selected Topics: Accounting (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

ACCT 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

ACCT 49900 Independent Study: Accounting (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,IRR,U,Y)

1-3 Credits

Anthropology (ANTH)

ANTH 10100 Anthropology of the World: Explorations in Cultural and Biological Diversity (LA)

Introduces cultural and biological diversity through the integrative and holistic approach of cultural anthropology, linguistics, biological anthropology, and archaeology. Explores how people from different cultures, both past and present, understand, navigate, and interact with their worlds. Introduces the basics of evolutionary theory and explores the ecology and behavior of humans, their ancestors and their primate relatives. Examines archaeological evidence of key moments in our history, e.g. advent of bipedalism, the origins of agriculture, and the creation of cities and states. (F,S,Y)

Attributes: ESE, SC, SO, TIDE, TIII

3 Credits

ANTH 10300 Biological Anthropology (LA)

Introduces the study of humans as biological beings, including evolutionary principles, primate behavior, the fossil record of human evolution, and biological variation in modern populations resulting from various factors. (F,S,Y)

Attributes: 2A, NS, SC, TIII

3 Credits

ANTH 10400 Cultural Anthropology (LA)

Explores the diversity of the world's societies, including "primitive" hunter-gatherer societies, herding pastoralists, peasant agriculturalists, and industrial peoples in rural and urban places. It emphasizes the role of culture in shaping human adaptations and human actions, and promotes understanding of other cultures. This course examines the way anthropologists do fieldwork, and looks at the contributions anthropology can make to an understanding of modernization, social change, urbanization, race relations, and cross-cultural communication. Reflecting the research experiences of individual professors, different sections of this course emphasize different cultures or regions of the world. (F,S,Y)

Attributes: 1, G, SO, SS, TIDE, TWOS

3 Credits

ANTH 10700 World Archaeology (LA)

Discusses the major achievements of prehistoric humans – from the beginning of culture circa 2.5 million years B.C. to the rise of the earliest civilizations a few thousand years ago. (F,S,Y)

Attributes: 1, G, H, SO, SS, TIII, TWOS

3 Credits

ANTH 11500 Box Office Archaeology: Movies, Mummies, and the Real Indiana Jones (LA)

Explores film-based consideration of archaeology and archaeologists. Focuses on how archaeology is portrayed in visual media through time, and how media have affected archaeology, the human past, and popular culture. The romanticized image of archaeology is compared with scientific realities, specifically the nature of archaeological data, theory, field methods, and analytical techniques. (S,Y)

Attributes: SO, SS, TIII

3 Credits

ANTH 19000 Selected Topics in Anthropology (LA)

Special courses may be offered at the introductory level that encompass broad anthropological interest or issues. This course may be repeated for credit for different selected topics. (IRR)

Attributes: 1, G, H, SS

3 Credits

ANTH 21100 Introduction to Primates (LA)

This is a survey course of the mammalian order Primates (lemurs, monkeys, and apes). After an introduction to general primate evolution, taxonomy, phylogeny, and characteristics, a different taxonomic group is reviewed each week. Topics such as the geographic distribution, anatomy, behavior, ecology, and conservation status of the focal taxa are discussed. Students also learn behavioral observation methodology and conduct a zoo study on the nonhuman primate and topic of their choice. This course satisfies the biological anthropology requirement. Prerequisites: ANTH 10300 or BIOL 12200 or BIOL 27100. (IRR) Attributes: 2A, AN2, NS 3 Credits

ANTH 22600 East Asia: Gender and Identity (LA)

Study of race and gender relations in East Asia from a comparative perspective that goes beyond dichotomies of East and West. Examination of the dynamics of gender and race in the contemporary world. This course satisfies the cultural anthropology requirement. Prerequisites: ANTH 10400. (IRR) Attributes: AAPL, AASE, AN3, AN4, SS, WGS 3 Credits

ANTH 22800 Critical Issues in Asian America (LA)

Focuses on Asian American experiences and identities past and present within the framework of anthropological concepts including ethnicity, race, authenticity, and transnationalism. This course satisfies the cultural anthropology requirement. Prerequisites: ANTH 10400. (IRR) Attributes: AACH, AASE, AN3, RPRE, SO, SS, TIDE, TPJ 3 Credits

ANTH 24000 Environmental Archaeology: Human Impact in the Past and Present (LA)

This course examines the interrelationship between humans and their environments from a long-term archaeological perspective. This course emphasizes archaeological, geological, and botanical methods and analytical techniques used for long-term environmental reconstruction. Cross-listed as ENV5 24000. Students may not earn credit for ENV5 24000. This course satisfies the archaeology requirement. Prerequisite: ANTH 10400 or ANTH 10700. (S,Y) Attributes: ABSS, AN1, ENSS, ENVE, ESSS, SS 3 Credits

ANTH 25000 Human Biological Diversity (LA)

Focuses on human biological variation from a biocultural perspective that examines the interplay between cultural, biological, and environmental variables. Topics covered will include traits of inheritance, human biological variability and behavior, and adaptations/maladaptations to various ecosystems and sociocultural environments. This course satisfies the biological anthropology requirement. Prerequisites: One of the following: ANTH 10300, ANTH 10400, BIOL 12100, BIOL 12200, BIOL 27100. (E,S) Attributes: 2A, AN2, ESE, NS, SC, SO, TPJ 3 Credits

ANTH 25500 The Human Journey: Exploring Our Evolution (LA)

This course examines how humans evolved anatomically, biologically, behaviorally, and culturally (e.g., tool technologies) over the last seven million years. The course tracks major events and evidence for human origins, with an emphasis on the reconstruction of behavior from paleontological and anatomical remains, and reviews recent finds, examines casts of fossils, and discusses the evidence for competing theories concerning our hominid ancestors. Prerequisites: One of the following: ANTH 10300, BIOL 12100, BIOL 12200, BIOL 22700. (F,O) Attributes: 2A, AN2, NS, SC, TWOS 4 Credits

ANTH 26000 Anthropology of Sex and Gender (LA)

Examines anthropological approaches to the study of sex (the genetic distinctions among male, female, intersex, and other biological variants), and gender (the socially and culturally constructed ideas about masculine, feminine, and gender variations beyond the binary). References evolutionary theory (e.g., sexual selection), primatology models, human origins research, gender differences in the public and private domain, feminist theory, cross-cultural gender variance, sexuality, gender identity, the controversy over sex differences in learning, and gender stereotypes in the media. This course counts toward the theory requirement for majors. Prerequisites: ANTH 10300 or ANTH 10400. (IRR) Attributes: AN2, AN3, AN4, DV, ESE, SC, SO, TIDE, TPJ, WGS 3 Credits

ANTH 27500 North American Archaeology (LA)

A survey of the origin and development of native North American cultural from their appearance on the continent to their contact with Europeans. In addition to describing North American culture history, the course aims to instill in students an appreciation for the diversity and accomplishments of Native American cultures. Topics to be discussed include when humans arrived in North America, the origins of agriculture, and the rise of complex societies. This course satisfies the archaeology requirement. Prerequisites: ANTH 10400 or ANTH 10700. (Y) Attributes: 1, 2A, AN1, H, NACH, SS 3 Credits

ANTH 29000 Seminar in World Ethnography: Selected Topics (LA)

Focus on particular geographic areas not generally covered in other upper-level regional courses, such as Polynesia, Latin America, and the Middle East. Prerequisites: ANTH 10400. (Y) Attributes: AACI, SS, WGS 3 Credits

ANTH 30200 Ethnographic Field Methods (LA)

Explores the ways that cultural anthropologists obtain and interpret ethnographic data during fieldwork. Topics include history of anthropological methods; methods of collecting and analyzing data; ethics of research; and creating a research proposal. Prerequisites: ANTH 10400 and one 200 level anthropology course. Anthropology majors only. (S, Y) Attributes: ESTS, SS 4 Credits

ANTH 30500 Archaeological Methods and Techniques (LA)

Focus on the ways that archaeologists discover, analyze, interpret, and explain the lifestyles of past cultures. The course is arranged in the way that archaeologists approach the solution of a research problem. Topics include the nature of archaeological evidence, how data are obtained through survey and excavations, the many kinds of analysis that archaeologists use to identify past lifeways, the techniques of dating sites, and how entire prehistoric culture systems are reconstructed. Also included are discussions of the use of theory in explaining cultural change and cultural processes, the field of cultural resources management, and ethics in archaeology. Prerequisites: ANTH 10400 or ANTH 10700 and either one 200-level anthropology course or junior standing and one additional social science course. (F,E) Attributes: NS 4 Credits

ANTH 30800 Methods in Field Primatology (LA)

Provides training in the various stages of the research process used in the study of primate behavioral ecology. Includes laboratory instruction on observational methodology and ecological assessment, applied through a series of associated exercises. Includes guidance on developing research topics and hypotheses, data collection, analyses, and presentation of research results. Students will conduct a research project in primatology. Students are responsible for nominal fees associated with laboratory field trips. Prerequisites: ANTH 10300 and one 200-level course in BIOL, ANTH, or ENVS. (F,O)

Attributes: QL

4 Credits

ANTH 31100 Primate Behavior and Ecology (LA)

Primates are among the most social animals. Why do nonhuman primates behave as they do? This course seeks to answer this question by reviewing the extensive variation in primate behavior and ecology and the evolutionary basis of the differences. The emphasis is on understanding the adaptive significance of the many diverse facets of primate social behavior within an ecological context. The class highlights current research issues in the field of primate behavioral ecology and examines how research is conducted and reported. Students will conduct a zoo observation study on the nonhuman primate and behavioral topic of their choice. This course satisfies the biological anthropology requirement. Prerequisites: ANTH 10300 and either ANTH 21100 or BIOL 27100. (IRR)

Attributes: 2A, AN2, AN4, NS

3 Credits

ANTH 31500 Animals & Human Exceptionalism (LA)

Explores the historical and current relationship between nonhuman animals and humans, focusing on anthropogenic influences on animal welfare, conservation, and interpretations of animal cognition and emotions. Examines the concept of human exceptionalism, the belief that humans have special status or value among all biodiversity based on our unique capacities, and how this has influenced societal attitudes and actions towards nonhuman animals, both wild and domestic, in different parts of the world. Discusses how the evolutionary success of the human species has negatively impacted animal species globally. Prerequisites: Any ANTH course at 200-level or higher. (O,S)

Attributes: AN2, AN3

3 Credits

ANTH 32000 Anthropology of Religion (LA)

The religious experience from the standpoint of ethnographic field studies and from various theoretical approaches. Examines the relationships among religion, culture, and society. Explores the evolution of the anthropological study of religion. This course satisfies the cultural anthropology and theory requirements for Anthropology majors. Prerequisites: ANTH 10400. (IRR)

Attributes: AN3, AN4, RSEA, SS

3 Credits

ANTH 33500 Women and Culture (LA)

The lives of women vary considerably cross-culturally. This course explores the nature of this variation as well as the cultural construction of gender roles. Special attention is given to the relationship between gender roles and economics, politics, power, authority, religion, and family life. Using case studies from various regions of the world, including the United States, the course examines how women's lives are affected by their social status, race, ethnicity, and position in the life cycle. This course satisfies the cultural anthropology requirement for majors.

Prerequisites: ANTH 10400; Sophomore standing. (IRR)

Attributes: 1, AN3, SS, WGS, WGS3

3 Credits

ANTH 37000 Applied Anthropology (LA)

Examination of a major new career field in anthropology, comparing the activist role of the applied anthropologist with the research orientation of much of the discipline. Manner in which the perspectives, field methods, and cultural knowledge of anthropologists have been applied in planning, implementing, and evaluating economic and social change projects. Case studies documenting the complexity of projects suggest the risks, demands, and challenges of applied anthropology, as well as the potential for ethical conflict and failure. This course satisfies the cultural anthropology requirement. Prerequisites: ANTH 10400 and either one 200-level anthropology course or junior standing and one other social science course. (F or S,Y)

Attributes: AN3, AN4, ENSS, ESSS, SS

3 Credits

ANTH 37100 Field School in Biological Anthropology (NLA)

This field course involves travel to an off-campus location to learn about one (or more) subdisciplines within the subfield of biological anthropology. Field schools may focus on anatomy, forensic anthropology, paleoanthropology, primatology, or another subdiscipline. Students will employ the methods used by researchers in the field and actively collect data. Students also will learn how to summarize data and present results. May be repeated up to a maximum of six credit hours. Additional costs to students will include travel to field site, living expenses, and research-related activities. Prerequisites: Permission of instructor. May be taken for one to six credits, depending on the nature of the field school. (IRR)

Attributes: 2A

1-6 Credits

ANTH 37400 Archaeological Field School (NLA)

Experience in archaeological fieldwork. Training in the basic techniques of archaeological research design, reconnaissance, survey, mapping, excavation, and basic field laboratory methods. Use of a transit, laying out of grids, and identification of different kinds of archaeological data, such as ceramics, lithics, features, and ecofacts will be covered.

Prerequisites: ANTH 10400 or ANTH 10700, and either a 200-level anthropology course or junior standing with one additional course in the social or natural sciences. Travel and living expenses will be responsibility of student. (SUM, IRR)

6 Credits

ANTH 37500 Environmental Anthropology (LA)

Examination of the cultural dimensions of the sustainable use and management of natural resources in the context of global efforts to effect social change and economic development. Much of the focus is on less-developed countries' indigenous peoples, rural peasants, urban underclass, and their ethnoecologies. Critical attention is also paid to industrialized nations' impact on peoples and cultures of the third world and to their role as dominant forces in establishing global environmental policy. Included in the course are case studies of the United States' "culture of consumption," an examination of the relationship between development and the environment, and a discussion of public policy alternatives. This course satisfies the cultural anthropology requirement and counts towards the theory requirement for majors. Prerequisites: ANTH 10400 and either one 200-level anthropology course or junior standing and one other social science course. (F or S,Y)

Attributes: 1, AN3, AN4, ENSS, ENVE, ESSS, G, SS
3 Credits

ANTH 38300 Anthropology of the Body (LA)

Examination of analytic concepts of the body and embodiment from various theoretical perspectives (including feminist, Marxist, and phenomenological theories). Focus on ethnographic examples of the ways that the body is socially and culturally constructed within and across cultures. This course satisfies the cultural anthropology requirement and counts towards the theory requirement for majors. Prerequisite: ANTH 10400; junior standing. (IRR)

Attributes: AN3, AN4, SS, WGS, WGS3
3 Credits

ANTH 38400 Forensic Anthropology (LA)

Introduction to the scientific principles and cultural context of forensic investigations. Review of archaeological and osteological approaches that contribute to the search, recovery, identification, and interpretation of the remains of deceased individuals. Combination of lectures, labs, and mock investigation exercises. This course satisfies the biological anthropology requirement. Prerequisites: ANTH 10300, BIOL 11500, BIOL 11900, BIOL 12000, BIOL 12100, or BIOL 12200; and one ANTH course at level 2. (IRR)

Attributes: AN2, NS
4 Credits

ANTH 38800 Origins of Agriculture (LA)

The development and spread of agriculture arguably changed the course of human history more than any other single cultural process. This seminar reviews the history of thought and debate concerning the development of prehistoric agriculture and the processes of plant cultivation and domestication. Emphasis is placed on recent interdisciplinary developments in ethnobotany and archaeobotany that allow detailed, complex scientific evidence to be considered. Readings and discussion include historical pieces, theoretical treatises, and regional case studies from around the world. Students will learn of the diversity of anthropological theory in the context of the study and analysis of one of humanity's fundamental lifeway changes. This course satisfies the archaeology requirement. Prerequisites: ANTH 10400, ANTH 10700, or BIOL 12200 and either one 200-level anthropology course or junior standing and one additional social science course. (IRR)

Attributes: AN1, AN3, AN4, SS
3 Credits

ANTH 39000 Seminar on Anthropological Issues (LA)

Consideration of central issues in contemporary anthropological research. Recent seminars have dealt with politics, educational systems, and economic development. Prerequisites: ANTH 10400; two courses in the social sciences. (Y)

Attributes: AN1, SS
3 Credits

ANTH 41100 Primate Conservation (LA)

This course explores the distribution, diversity, abundance, and rarity of lemurs, monkeys, and apes. It investigates how human behavior such as habitat disturbance and hunting impact primate populations. Issues to be discussed include various conservation strategies and tactics employed to protect our closest-living relatives, for example, taxon and area priorities, captive breeding, restocking and reintroduction, and ecotourism. Prerequisites: ANTH 31100; or ANTH 21100 and permission of instructor. (IRR)

Attributes: 2A, AN2, NS, WI
3 Credits

ANTH 45800 Research in Anthropology (NLA)

Provides students an opportunity to conduct individual research in any of the subfields that are not fieldwork, such as laboratory analysis, text analysis, tape transcription, or library research on a specific topic. Prerequisites: ANTH 30200, ANTH 30500, or ANTH 30600, and completion of H&S dean's independent study/internship form. May be repeated up to a maximum of six credits. (F, S and SUM, Y)

1-6 Credits

ANTH 45900 Internship in Anthropology (NLA)

Provides students an opportunity to conduct individual research that is not fieldwork in any of the subfields and under the supervision of a professional. Internships are arranged individually at the student's request with an instructor and a sponsoring agency. Prerequisites: ANTH 10300, ANTH 10400, or ANTH 10700, permission of instructor, and completion of H&S dean's office internship form. Can be repeated to a maximum of six credits. (F, S and SUM, Y)

1-6 Credits

ANTH 46000 Advanced Readings in Anthropology (LA)

Arrangements are initiated by the student interested in a topic not covered by regular course offerings. Prerequisites: One ANTH course at 20000-level or above and one ANTH course at 30000-level or above; permission of instructor. (F-S)

Attributes: UND
1-4 Credits

ANTH 47500 Ethnographic Fieldwork/Research (LA)

An alternative to ANTH 47001 for advanced anthropology students with a focus in cultural anthropology whose research plans would benefit from a more individualized approach. The independent research or fieldwork may be conducted within or away from the Ithaca area under supervision by an anthropology faculty member. Prerequisites: ANTH 30200; consultation with and permission of instructor. (F-S,Y)

Attributes: NASE, RPRE, UND
1-6 Credits

ANTH 47600 Archaeological Fieldwork/Research (LA)

An alternative to ANTH 47002 for advanced anthropology students with a focus in archaeology whose research plans would benefit from a more individualized approach. The independent research or fieldwork may be conducted within or away from the Ithaca area under supervision by an anthropology faculty member. Prerequisites: ANTH 30500; consultation with and permission of instructor. (F-S,Y)

Attributes: UND

1-6 Credits

ANTH 47700 Biological Anthropology Fieldwork/Research (LA)

An alternative to ANTH 47004 for advanced anthropology students with a focus in biological anthropology whose research plans would benefit from a more individualized approach. The research or fieldwork may be conducted within or away from the Ithaca area under supervision by an anthropology faculty member. Prerequisites: ANTH 30600; consultation with and permission of instructor. (F-S,Y)

Attributes: UND

1-6 Credits

ANTH 47900 Anthropology Fieldwork/Research (LA)

Provides advanced anthropology students the opportunity to engage in team-based or independent research projects under the supervision and guidance of a faculty member. Projects can be in any field of anthropology; students must have taken a methods course to be able to succeed in this project-based course. Prerequisites: At least one course with an ANM attribute. (O,S)

3 Credits

ANTH 49500 Anthropology Capstone (NLA)

Provides an integrative and holistic summary of student's anthropological training. Major themes and issues in the subfields of anthropology will be discussed, and the relationships between the field and the department's curriculum and the student's coursework, including fieldwork, will be analyzed. Discussion of career opportunities, preparation for postgraduate work, and skills assessment will be conducted as well. Fulfills the ICC Capstone requirement. (F)

Attributes: CP

2 Credits

Art (ART)

ART 10100 Theory and Practice: Play and Exploration (LA)

Exploration of the artist's ability for serious 'play' and focused creative discovery. Through hands-on exercises, individualized projects, research, and written work, beginning art students learn how to develop an individual path of inquiry and discovery. Includes consideration of the artist's socio-historical context in the development of strong studio practice. (F,Y)

1 Credit

ART 11000 Introduction to Drawing: Seeing the World (LA)

Training in perception and the imagination as they relate to drawing. Exploration of several media techniques, methods and frameworks including historical and contemporary approaches. (F,S,Y)

Attributes: CA, TIDE, TMBS, TPJ

4 Credits

ART 11100 Introduction to Drawing: Triple Eye (LA)

Why do we draw? How did drawing come about? What can we learn about the world through drawing it? This course explores how we communicate - logically, emotionally and spiritually - through images. Empowered with this understanding, we produce drawings that represent our own inquiries, innovations and imaginings in a studio art environment. (F,S,Y)

Attributes: CA, TIII

4 Credits

ART 11200 Introduction to Drawing: Map It (LA)

Focuses on the fundamentals of drawing as a process that can be used to understand and interpret one's world and its various complex systems. Engages students in methods of generating, organizing, editing, and critiquing two-dimensional imagery to explore the potential of art and imagery to communicate about how people intersect with, participate in, and create various systems. (F,S,Y)

Attributes: CA, TWOS

4 Credits

ART 12000 Two-Dimensional Design (LA)

A course dealing with fundamentals of design on a flat surface and providing perceptual, as well as technical, understanding of formal elements employed in producing works of art. (F,S,Y)

Attributes: 3B, CA, FA, MC, TWOS

4 Credits

ART 12400 Images In Context: Photo-based Multiples and Books (LA)

A hands-on opportunity to explore how images create new meaning through their context. Using digital and analog processes, students work with sourced photo-based imagery, self-generated photos, and scanning to create books and multiples in which meaning is constructed through arrangement, intervention, and other visual strategies. Emphasis is on development of digital software skills for image manipulation (Adobe Photoshop) and layout and production (Adobe InDesign). (IRR)

4 Credits

ART 14000 Introduction to Painting (LA)

A studio course in the fundamentals of oil painting. Methods and materials of painting, basics of color, composition, form, and spatial organization. Hands-on introduction to techniques, materials and processes used in contemporary and historical painting. (F,S,Y)

4 Credits

ART 14100 Introduction to Painting: From Wilderness to Wasteland (LA)

This course teaches observational oil painting skills as a way to reflect on our cultural and personal relationship to the environment. Students will be guided in creating paintings that communicate the complexity of environmental issues today. Consideration given to the genre of landscape painting and how representations of nature in painting have come to shape how we conceive of sustainability. (F,S,Y)

Attributes: CA, TQSF

4 Credits

ART 14200 Introduction to Painting: Identities Re-Imagined (LA)

Exploration of the purpose, meaning, and cultural context of painting, with a focus on the relationship of painting to both personal and social identity. Hands-on introduction to techniques, materials and processes used in contemporary and historical painting. Students will produce a portfolio of paintings of their own explorations of re-imagined identity, and participate in group critiques, class discussions, demonstrations, meetings with visiting artists, and field trips to museums or galleries. (F,S,Y)

Attributes: CA, TIDE

4 Credits

ART 15000 Introduction to Sculpture (LA)

Explores the purpose, meaning, and cultural contexts of contemporary sculpture through hands-on assignments, incorporating traditional and non-traditional techniques and processes. Students produce a portfolio of sculptural works demonstrating personal explorations and expressions. Students participate in group critiques, class discussions, demonstrations, meetings with visiting artists, and field trips to museums or galleries. (F,S,Y)

4 Credits

ART 15100 Introduction to Sculpture: Imagining Identities (LA)

Explores the purpose, meaning, and cultural contexts of contemporary sculpture with focus on imagining identities through hands-on assignments, incorporating traditional and non-traditional techniques and processes. Students will produce a portfolio of sculptural works demonstrating personal explorations and expressions of identity. Students participate in group critiques, class discussions, demonstrations, meetings with visiting artists, and field trips to museums or galleries. (F,S,Y)

Attributes: CA, TIDE

4 Credits

ART 16000 Introduction to Print Media (LA)

Introduction to lithography and relief printmaking in the context of contemporary art and the historical traditions of the medium. Sustained creative dialogue combined with hands-on projects in the study of print media techniques including basic digital imaging. (F,S,Y)

Attributes: CA, TPJ

4 Credits

ART 16100 Introduction to Print Media: Sustainable Practice (LA)

This class is an exploration of printmaking and paper-making media in the context of contemporary art and the ongoing development of media culture with a focus on sustainability. Students consider artists who communicate issues of social justice with sustainable and low-impact practices and materials, create paper and prints using recycled materials, and develop activist artworks that promote the social dimensions of sustainability. (F,Y)

Attributes: CA, TQSF

4 Credits

ART 21000 Intermediate Drawing (LA)

Students build on observational work begun in introductory drawing classes, while also going beyond the "rules" of representation and approaching composition new ways. Students study the historical and cultural contexts of drawing while developing an intermediate skill set in drawing. May be repeated once for a total of Prerequisites: Any ART 11XXX. (F,S,Y)

4 Credits

ART 21200 Figure Drawing (LA)

This course explores contemporary and historical approaches to drawing the human form. Problems dealing with anatomy, movement, mass, volume, value and composition are covered as well as historical and conceptual frameworks. Prerequisites: Any ART 11XXX. (F,S,Y)

4 Credits

ART 21900 Intermediate Drawing: Selected Topics (LA)

Content topics vary in order to engage students in different contemporary approaches to drawing. Students will build on observational work begun in introductory drawing classes, while approaching composition and mark-making in a variety of new ways. May repeated once for a total of Prerequisites: Any ART 11xxx. (IRR)

4 Credits

ART 22500 Graphic Design I (LA)

Explores the fundamental principles of graphic design. Emphasis on conceptual problem solving, an integration of typography, image, layout, research, and presentation. Serves as an introduction to design concepts and media common to advertising and commercial applications such as Adobe Suite. Prerequisite: ART 12000. (F,S,Y)

4 Credits

ART 22600 Typography and Design (LA)

This course focuses on the unique role of typography as a powerful means to present information. Course topics include the history of typography and printing press processes, with a special emphasis on how typography changed and shifted in the early 20th century. Students investigate letter-form structure and classification systems, use of typographic contrast in composition, and structure with the grid and alignment. Prerequisites: ART 22500. (S,Y)

4 Credits

ART 22900 Intermediate Graphic Design: Selected Topics (LA)

Content topics vary in order to engage students in different approaches to graphic design. Students will build on work begun in Graphic Design I, while approaching design in a variety of new ways. Course is repeatable up to Prerequisites: ART 22500. (IRR)

4 Credits

ART 24000 Intermediate Painting (LA)

This course explores contemporary approaches to painting. Students build on traditional painting techniques while breaking "rules" of representation. Students study the historical and conceptual contexts of painting while developing an intermediate skill set in painting. May be repeated once for a total of Prerequisites: Any ART 14xxx. (F,S,Y)

4 Credits

ART 24900 Intermediate Painting: Selected Topics (LA)

Content topics vary in order to engage students in different approaches to contemporary painting. Students will build on work begun in introductory painting classes, while approaching the medium in a variety of new ways. May be repeated once for a total of Prerequisites: Any ART 14xxx. (IRR)

4 Credits

ART 25000 Intermediate Sculpture (LA)

This course explores traditional and non-traditional materials while experimenting with form and space and pursuing visual literacy through personalized content expression. Students study the historical and cultural contexts of sculpture while developing intermediate skill levels. May be repeated once for a total of Prerequisites: Any ART 15XXX. (F,S,Y)

4 Credits

ART 25900 Intermediate Sculpture: Selected Topics (LA)

Content topics vary in order to engage students in different approaches to contemporary sculpture. Projects and topics build on the creative work and skills taught in introductory sculpture classes, while approaching form and space in a variety of new ways. May be repeated once for a total of Prerequisites: Any ART 15xxx. (IRR)

4 Credits

ART 26000 Intermediate Print Media (LA)

This course explores contemporary approaches to multiples that includes the changing relationship between accessibility, authorship and audience, and dissemination. Students practice traditional techniques such as lithography, intaglio, and silkscreen, as well as digital and photographic processes, refining their visual voice and developing individualized content and bodies of work. May be repeated once for a total of Prerequisites: Any ART 16XXX. (F,S,Y)

4 Credits

ART 26200 Intermediate Book Arts (LA)

This course explores contemporary approaches to multiples that includes the changing relationship between accessibility, authorship and audience, and dissemination. Students practice traditional techniques such as lithography, intaglio, and silkscreen, as well as digital and photographic processes, refining their visual voice and developing individualized content and bodies of work. May be repeated once for a total of Prerequisites: Any 3 or ART 1xxxx. (IRR)
4 Credits

ART 26900 Intermediate Print Media: Selected Topics (LA)

Content topics vary in order to engage students in different approaches to contemporary printmaking. Building upon the skills and content work begun in their introductory printmaking classes, students will deepen their approach to creating multiples in a variety of new ways. May be repeated once for a total of Prerequisites: Any ART 16xxx. (IRR)
4 Credits

ART 28000 Digital Studio I (LA)

This course explores contemporary approaches to art making that incorporate digital techniques into the studio practice and establish digital media as its own art form. Students study the historical and cultural context of the relationship between art and technology, originality and reproducibility. Prerequisites: Any 3 or ART 1xxxx. (F,S,Y)
4 Credits

ART 30000 Theory and Practice 3: Professional Practices (NLA)

Exploration of the professional dimension of art making for art majors and minors. Preparation for thesis work, advanced professional study, and careers in art. Topics include development of artist statements, resume writing, documenting work, developing a studio practice and artist's website. Class culminates in curation, organization and installation of an exhibition. Prerequisites: ART 20000; Two other ART classes at level 2 or above; junior standing. (S,Y)
3 Credits

ART 30100 Theory and Practice: Contemporary Theories in Art (LA)

Examines the global art world and contemporary theories of art, such as post-structuralism, feminism, and post-colonialism. Focuses on application of theoretical and critical frameworks to artistic practice and production through readings, presentations, and hands-on activities. Prerequisites: Two 200-level ART courses. (F,Y)
4 Credits

ART 31000 Advanced Drawing (LA)

Students build upon skills developed at the intermediate level in drawing, discovering how contemporary drawing exists in an expanded field. Students further develop their ability to conceptualize the relationship between form and content, and conduct independently guided work. May be repeated twice for a total of Prerequisites: Any ART 21xxx. (F,S,Y)
4 Credits

ART 31900 Advanced Drawing: Selected Topics (LA)

Content topics vary in order to engage students in advanced approaches to contemporary drawing. Students build on work developed in intermediate drawing classes, while establishing a more independent approach to their art production. May be repeated twice for a total of Prerequisites: Any ART 21xxx. (IRR)
4 Credits

ART 32500 Graphic Design II (LA)

Further study of graphic design principles and their application to comprehensive problem solving. Study of essential design language to broaden understanding of the field of visual communication. Students explore how graphic design is a personal, social, political, and cultural activity, and investigate production in current visual media. Students build a portfolio based on studio assignments. Expanded knowledge of Adobe Suite. Prerequisites: ART 22500. (F,S,Y)
4 Credits

ART 32700 Graphic Design III (LA)

Further study of graphic design principles and their application to independent problem solving. Students design and create independent visual communication projects that push the boundaries of graphic design. Students research how graphic design is a personal, social, political, and cultural activity, and investigate production in current visual media. Students build an independent portfolio based on personal goals and sensibilities. May be repeated once for a total of Permission of instructor required. Prerequisites: ART 32500. (IRR)
4 Credits

ART 32900 Advanced Graphic Design: Selected Topics (LA)

Content topics vary in order to engage students in advanced approaches to graphic design. Students will build on work developed in intermediate graphic design classes, while establishing a more advanced approach to their design practice. Course is repeatable up to Prerequisites: ART 32500. (IRR)
4 Credits

ART 34000 Advanced Painting (LA)

This course combines contemporary approaches to painting that may include hybrid approaches such as mixed media, painting on found substrates, working in series, and installation painting. Students learn to push the painting practice further in skill and content by honing individualized strategies, research skills and bodies of work in the contemporary context. May be repeated twice for a total of Prerequisites: Any ART 24xxx. (F,S,Y)
4 Credits

ART 34900 Advanced Painting: Selected Topics (LA)

Content topics vary in order to engage students in advanced approaches to contemporary painting. Students will build on work developed in intermediate painting classes, while establishing a more independent approach to their art production. May be repeated twice for a total of Prerequisites: Any ART 24xxx. (IRR)
4 Credits

ART 35000 Advanced Sculpture (LA)

In this advanced sculpture course, individual sensibilities and personal content are at the forefront and dictate the material choices. Along with further practice with traditional and non-traditional materials and methods, projects address contemporary world issues, interdisciplinary connections and sculptural installations. May be repeated twice for a total of Prerequisites: Any ART 25xxx. (F,S,Y)
4 Credits

ART 35900 Advanced Sculpture: Selected Topics (LA)

Content topics vary in order to engage students in advanced approaches to contemporary sculpture. Students will build on work developed in intermediate sculpture classes, while establishing a more independent approach to their studio practice. May be repeated twice for a total of Prerequisites: Any ART 25xxx. (IRR)
4 Credits

ART 36000 Advanced Print Media (LA)

This course explores, at an advanced level, contemporary approaches to multiples that includes the changing relationship between accessibility, authorship and audience, and dissemination. Students expand on traditional techniques such as lithography, intaglio, and silkscreen by incorporating digital and photographic processes into their work, refining their visual voice and developing individualized content and bodies of work. May be repeated twice for a total of twelve credits. Prerequisites: Any ART 16xxx and ART 26xxx. (F,S,Y)
4 Credits

ART 36200 Advanced Book Arts (LA)

This course explores, at an advanced level, contemporary approaches to multiples that includes the changing relationship between accessibility, authorship and audience, and dissemination. Students expand on traditional techniques such as lithography, intaglio, and silkscreen by incorporating digital and photographic processes into their work, refining their visual voice and developing individualized content and bodies of work. May be repeated once for a total of Prerequisites: Any ART 16xxx and ART 26xxx. (IRR)
4 Credits

ART 36900 Advanced Print Media: Selected Topics (LA)

Content topics vary in order to engage students in advanced approaches to contemporary print media. Students will build on work developed in intermediate print media classes, while establishing a more independent approach to their studio practice. May be repeated twice for a total of Prerequisites: Any ART 16xxx and ART 26xxx course. (IRR)
4 Credits

ART 38000 Digital Studio II (LA)

We are requesting a change from 3cr. to 4cr. for this course in order to align the actual time spent in the course with the credits earned. Studio art courses are currently scheduled to meet twice a week for 2 hrs. and 40 min, a total of 320 minutes/week. In addition to these lengthy class meetings, students are expected to spend 6 hours on supplemental, outside of class, work each week. Because students and faculty are already exceeding the required minimum time per semester than is required by the Carnegie unit formula for a 4-credit courses, there are no additional changes to the curriculum or student learning outcomes necessitated by this shift. This change reduces the discrepancy between the workload and credit hours for students, creating more transparent expectations. Faculty already receive 4cr. of workload for these courses due to contact hours, so this also resolves the discrepancy in credits between students and faculty. Prerequisites: ART 28000. (IRR)
Attributes: MC
4 Credits

ART 39900-39901 Independent Study: Art (LA)

Advanced projects under specifically directed tutelage. Projects to be arranged between instructor and students. Offered on demand only. May be repeated two times for a total of Prerequisites: Permission of instructor. (F,S,Y)
Attributes: UND
1-4 Credits

ART 40000 Theory and Practice 4: Contemporary Theories of Art (LA)

In this culminating course for art majors, students learn about the global art world and contemporary theories of art in order to apply critical frameworks to their artistic practice and/or teaching pedagogy. Through readings and discussions, different critical frameworks for considering artistic production are explored, including post-structuralism, feminism, and post-colonialism. Restricted to students majoring in Art (B.A., B.F.A.) and Art Education. Prerequisites: ART 30000. (F,Y)
Attributes: CP
3 Credits

ART 40100 Theory and Practice: Professional Practices (LA)

Exploration of the professional dimension of art making for art majors. Development of studio thesis work, advanced professional study, and careers in art. Topics include development of artist statements, resume writing, developing a studio practice and an artist's website. Class culminates in curation, organization, and installation of an exhibition. Prerequisites: ART 30100. (F,Y)
4 Credits

ART 40200 Senior Project (LA)

Completion of an independent body of work, culminating in an exhibition, written thesis, and public artist's talk. The aim is to develop a rigorous studio-based practice and cultivate creative initiative and professionalism. Senior Project is required of BFA art majors. Prerequisites: ART 40100. (S,Y)
4 Credits

ART 49000 Senior Project I (LA)

A directed project under the advisement of the faculty in the student's major area. The aim is to develop a body of work demonstrating creative initiative as part of the senior capstone experience. Senior Project is required of BFA art majors. Prerequisites: BFA Art majors; completion of twenty-four credits in art; senior standing; permission of instructor. (F,S,Y)
3 Credits

ART 49100 Senior Project II (LA)

Continuation of a directed project under the advisement of the faculty in the student's major area. The aim is to develop a body of work demonstrating creative initiative as part of the senior capstone experience. Senior Project is required of BFA art majors. Prerequisites: BFA Art majors; ART 49000. (F,S,Y)
Attributes: UND
3 Credits

ART 49200 Studio Art Projects (LA)

Directed study in the creation of an independent body of work. Includes research, group critique and artist statements. Prerequisites: Any 300-level ART course. (U,Y)
4 Credits

ART 49500 Art Internship (NLA)

An opportunity for students to gain practical experience in a variety of art-related activities that are directly involved in the creation of visual art. A faculty member from the art department as well as a mentor from the sponsoring agency supervises the internship. Internships are arranged on an individual basis and must be approved by the chair of the art department. Prerequisites: Permission of instructor/mentor; three art courses; junior or senior standing. (IRR)
1-4 Credits

ART 49900-49901 Independent Study: Art (LA)

Advanced projects for seniors under specifically directed tutelage. Projects to be arranged between instructor and student. Offered on demand only. May be repeated two times for a total of Prerequisites: Permission of instructor. (F,S,Y)
1-4 Credits

Art History (ARTH)

ARTH 11100 Episodes in Western Art (LA)

An introduction to art history through close examinations of selected works and themes from prehistory to the present. The chosen topics, primarily based on painting and sculpture from the Western tradition, will be discussed from a variety of perspectives, including style, artists' techniques and materials, potential meanings, and historical context. The course is designed to familiarize students with key terms and skills employed by art historians, as well as conventions and institutions associated with Western art. The course will cover a broad history of art while simultaneously raising questions about the sources and authority of that history. (Y)

Attributes: 3B, AN1, CA, CSA, G, H, HU, TIII, TWOS
4 Credits

ARTH 11300 Elements of Architecture (LA)

A primer on the topic of architectural design, history and practice. Acquaints students with the art of making buildings through a variety of topics, among them, space, form, structure, use, and meaning. Architectural theory from a variety of eras and cultures is introduced. Students learn to consider the activities surrounding the creation of architecture, including the interaction of architects, clients, builders, and the environmental forces that act upon buildings. Includes written and graphic assignments. (Y)

Attributes: ARCH, CA, TQSF
4 Credits

ARTH 11400 Architecture Across Cultures (LA)

An investigation of world architecture, examining spaces of dwelling, worship, and commerce comparatively across time and place to shed light on the ways in which values and identities are expressed in architectural form. Includes analysis of buildings in their historical relationship to the natural environment and its resources and attention to the contributions of makers who have been marginalized in standard histories. (Y)

Attributes: AN1, ARCH, CA, G, INBG, TMBS, TQSF
4 Credits

ARTH 12500-12504 Selected Topics in Art History (LA)

Introduction to the discipline of art history by a review of major categories of art (i.e., portraiture, landscape, genre, still-life, narrative painting, abstraction, representation, sculpture, architecture) within the context of a single theme or period. Not open to seniors. (IRR)

Attributes: 3B, FA, G, H, HU
3 Credits

ARTH 13500 Introduction to Visual Culture (LA)

An examination of the crucial roles that images and objects play in shaping societies. Covers the larger culture of visual images, including art, print, film, fashion, photography, and electronic media, and focuses on how images define, shape, and communicate beliefs and behaviors in a variety of contexts. Emphasizes developing a sense of "visual literacy" and becoming more self-consciously aware of the act and nature of looking, in a world in which ideas increasingly are communicated in visual, rather than linguistic, form. (Y)

Attributes: 3B, AN3, CA, G, H, HU, SCE, TIDE, TPJ
4 Credits

ARTH 16000 Art Across Cultures (LA)

A cross-cultural comparison of artistic and visual production and introduction to fundamental concepts, terms, and visual analysis skills used in art history. By juxtaposing a variety of artistic cultures across time and space, this course will address how and why various peoples create art and communicate visually. Organization by theme will highlight different visual conventions and approaches to a range of subjects as well as the cultural and historical reasons for those differences. (Y)

Attributes: AN1, CA, G, H, INBG, TPJ, TWOS
4 Credits

ARTH 20100 Practicing Art History (LA)

This course engages contemporary cultural debates at the center of Art History, Museum Studies, and Architecture by contextualizing them through the study of questions, theories, methods and ethical debates that have developed within the discipline. Students will develop skills in critical reading, evaluating sources, and identifying different approaches used to analyze images and spaces in order to build critical awareness for their future study. Involves critical reading, engaged discussion, presentations, writing workshops and field trips and/or guest visits. Prerequisites: One course in art history; WRTG 10600, ICSM 10800, ICSM 11800, or equivalent. (FY)

Attributes: HU, WI
4 Credits

ARTH 20500 Chemistry and Art (LA)

Investigates, through lecture and laboratory activities, the scientific basis of such topics as paints and pigments, metalworking and sculpture, dyes and fabrics, polymeric materials, and chemical hazards in art. Introduces students to basic chemical concepts and laboratory techniques, as well as modern analytical instruments. Lectures on the material history of art establish the context for the study of these chemical and analytical concepts. Students may enroll for ARTH 20500 or CHEM 20500, but not both. Prerequisites: Sophomore standing; permission of instructor. (S,O)

Attributes: 2A, 3B, CA, FA, HU, NS, SC, TIII
4 Credits

ARTH 20600 Small Builds: Architecture at a Smaller Scale (LA)

Examines the interactions between architecture, art, industrial design and fashion through the analysis and presentation of case studies and texts. Includes a studio component where students design and build hybrid-architectural objects such as functional jewelry, portable structures, and other small-scale architectural artifacts and models. (IRR)

Attributes: AN3, CA, TIII, TQSF
4 Credits

ARTH 20700 The Architecture of Patterns: The art and science of patterns (LA)

Examines the history of patterns from a multidisciplinary perspective, and speculates upon their present and future use across a variety of fields. Includes design workshops where students will study and make patterns, utilizing examples and discourse from architecture, art, biology, chemistry, fashion, mathematics, ornament and other sources. Prerequisites: Sophomore standing or above. (IRR)
Attributes: CA, FA, TIII, TWOS

3 Credits

ARTH 21600 Art in London (LA)

This course focuses on modern and contemporary art currently on view in London. In addition to providing an overview of the history of modern and contemporary art, it also introduces students to London's art world: from its public and private museums, galleries, and art spaces to contemporary debates on the arts. The course will largely be hands-on, with field trips to make use of London's distinctive setting and opportunities. Course topics change to include current exhibitions and events in London. Satisfies the "art, visual culture, or architecture after the year 1750" requirement in the major. Prerequisites: Sophomore standing. Offered only through the London Center. (Y)

Attributes: AN3, APOS, CA, CSA, HM, HU, INBG, TIDE, TIII
3 Credits

ARTH 21700 British Art and Architecture I: 1066-1660 (LA)

Studies of selected works of visual art from major periods in British history, to include British architecture, painting, costume, and design and their relationship to the societies that produced them. Includes survey of Roman, Saxon, and Celtic Britain. Visits to museums and field trips. Satisfies the "art, visual culture, or architecture from the years 1400 to 1750" requirement in the major. Offered only through the London Center. Prerequisites: Sophomore standing. (FY)

Attributes: AN1, APRE, ARCH, CA, CSA, G, HM, TIDE, TIII
3 Credits

ARTH 21800 British Art and Architecture II: 1660-1914 (LA)

A study of selected works of visual art from recent periods in Britain's history and their relationship to the societies that produced them. Analysis of various styles in painting, architecture, costume, and ornament. Visits to museums and field trips. Satisfies the "art, visual culture, or architecture after the year 1750" requirement in the major. Offered only through the London Center. Prerequisites: Sophomore standing. (S,Y)

Attributes: AN1, APOS, APRE, ARCH, CA, G, HM, TIDE, TIII
3 Credits

ARTH 22100 Introduction to the Medieval World (LA)

Explores different facets of medieval life as revealed through the visual and material culture of the western Middle Ages. Organized by theme rather than chronology. Topics include modern fascinations with the medieval, religious functions and contexts for images, medieval places and spaces, visual storytelling, images and objects of daily life, and medieval images of death. Investigates a variety of types of objects and images (including buildings, sculpture, manuscript illumination, metalwork, and mosaics), as well as archaeological remains of medieval life. Satisfies the "art, visual culture, or architecture before 1400" requirement in the major. (IRR)

Attributes: AN1, APRE, ARCH, CA, G, TIDE, TMBS, TPJ
4 Credits

ARTH 23200 Architecture from Renaissance to Revolution (LA)

An exploration of European architecture from the 15th to the 18th centuries, focusing on issues of form, space, structure, and meaning. The course begins and ends with "rebirths" of antiquity, considering in-between architectural ideas that stray far from the classical tradition. Concepts such as renaissance, baroque, rococo, and neoclassical are examined, as are relevant political and religious circumstances. Includes study of architectural interactions between western Europe and the Mediterranean and Atlantic worlds. (Y)

Attributes: AN1, APRE, ARCH, CA, CSA, G, TIDE, TPJ
4 Credits

ARTH 23300 Great Spaces: An Introduction to Urban Design (LA)

Introduction to the history of open space design, with an emphasis placed on the city. Examination of the principles that generate successful spaces at several scales, from pocket parks and public squares to ceremonial sites and ideal cities. Analysis of the cultural meanings embedded in urban space. Regions covered include Western Europe and Russia, the Americas, and Asia. Chronological scope ranges from ancient to contemporary. (IRR)

Attributes: ARCH, ESTS, G
3 Credits

ARTH 23500 Art in Europe, 1500-1800 (LA)

Explores the visual culture of early modern Europe from the Renaissance to the Revolutionary era. Students survey a variety of media, study patronage, and chart the development of art institutions including academies and exhibitions. Satisfies the "art, visual culture, or architecture from the years 1400 to 1750" requirement in the major. (IRR)

Attributes: 3B, AN1, APRE, CA, CSA, FA, G, GERM, H, HU, TWOS
3 Credits

ARTH 24000 Architecture Since 1800 (LA)

A historical survey of significant architects and their works, from the 19th century to the present. Includes a discussion of aspects of style, design theory, technological developments, and architectural vocabulary. Emphasizes the role of the architect in modern society. (IRR)

Attributes: AN1, APOS, ARCH, CA, TIDE
4 Credits

ARTH 24200 Placing Race and Gender (LA)

Explores ways in which social hierarchies are expressed in and shaped by the built environment, with a focus on race and gender. Examines architectural expressions of difference in historical and contemporary culture through siting, spatial layout, materials, ornamentation, and scale. Considers race- and gender-based barriers to participation in the architectural profession and expands the definition of architectural maker to include neglected contributions of builders, craftspersons, patrons and clients. (IRR)

Attributes: AN3, ARCH, CA, DV, TIDE, TPJ, WGS, WGSC
4 Credits

ARTH 24300 Gender and Visual Culture (LA)

Examines images of women and men in relation to concepts of gender, race, class, and sexuality, and investigates contemporary representations of gender from the perspective of the history of art and feminist theory. (IRR)

Attributes: AN1, AN3, CA, DV, G, MAP, SCE, TIDE, WGS, WGSC
3 Credits

ARTH 25100 Nineteenth-Century European Art (LA)

Major styles and theories of 19th-century painting and sculpture, especially in France but also in Spain, England, and Germany. Neoclassicism, Romanticism, Realism, Impressionism, and Postimpressionism are covered. The course also includes material on the roles of identity, technology, nationalism and social change in shaping the art of the era. (IRR)

Attributes: 3B, AN1, APOS, CA, G, GERM, H, HU, TIDE, TIII
4 Credits

ARTH 25200 Twentieth-Century European Art (LA)

Study of leading European painters and sculptors of the 20th century. Major movements from fauvism and expressionism through cubism, futurism, dadaism, and surrealism. Includes Rouault, Munch, Nolde, Kokoschka, Klee, Kandinsky, Matisse, Picasso, Boccioni, Mondrian, Tatlin, Duchamp, DeChirico, and Miró. (Y)

Attributes: AN1, APOS, CA, G, GERM, TIII, TPJ
4 Credits

ARTH 26000 Art and Architecture of the Americas before 1500 (LA)

Introduces art and architecture produced by the Indigenous cultures of the Americas prior to contact with European cultures. Organized chronologically within each major region, explores major cultures of these regions, including: Mississippian, Anasazi; Olmec, Teotihuacan, Maya, Aztec; and Chavin, Paracas, Nazca, Moche, Tiwanaku and Inca. Additionally, introduces a range of approaches used in studying art and architectural history. (IRR)

Attributes: AN1, APRE, ARCH, CA, G, LAEL, LXME, NASE, RPRE, TIII, TMBS, TPJ
4 Credits

ARTH 26500 Modern Latin American Art (LA)

Explores artistic production in Latin America from the independence period (19th century) through the 20th century, and identifies competing definitions of what it means to be "modern" and "Latin American." Major themes include artistic contributions to the creation of national identity, Latin American artists' negotiations of European, indigenous, and African traditions, the rise of internationalism and the art market, and the relationship between art, politics, social activism, and resistance. Addresses the following major artistic trends, among others: the academic tradition, modernismo, the Mexican mural movement, indigenismo, surrealism, constructive universalism, abstraction, conceptual art, and postmodernism. Satisfies the "art, visual culture, or architecture after the year 1750" requirement in the major. (F,S,Y)

Attributes: AN1, APOS, CA, DV, G, H, INBG, LSCI, LXME, RPRE, TIDE, TIII
3 Credits

ARTH 27000 Art and Architecture of Africa (LA)

Introduces the art and architecture of Africa through a series of case studies that place objects and monuments in their social context while relating them to broader art historical issues. Covers two thousand years of history, from the ancient kingdoms of Mali to present day artists working on the continent. Major themes include: authorship and performance, gender, the role of photography in the formation of colonial and post-colonial identities, the ever-changing inventions of masquerade, individual vs. communal patronage, and the role of "tradition" in the production and reception of contemporary artists. (IRR)

Attributes: ADSE, AN1, AN3, APRE, ARCH, CA, RPRE, TMBS, TPJ
4 Credits

ARTH 27503-27505 Selected Topics in Art History: Thematic Topic (LA)

This course may be repeated for credit for selected topics on different subjects. Prerequisites: Sophomore standing. (IRR)

Attributes: 3B, FA, G, H
3 Credits

ARTH 28000 Selected Topics in Art History (LA)

Intermediate course with a specialized focus on an art historical theme. May be repeated for credit when topics vary. (IRR)
3 Credits

ARTH 28010 Selected Topics in Architecture (LA)

Intermediate course with a specialized focus on an architectural theme. May be repeated for credit when topics vary. (IRR)
Attributes: ARCH
3 Credits

ARTH 28020 Selected Topics in Art History, Pre-1800 (LA)

Intermediate course with a specialized focus on an art historical theme, pre-1800. May be repeated for credit when topics vary. (IRR)
Attributes: APRE
3 Credits

ARTH 28030 Selected Topics in Architecture pre-1800 (LA)

Intermediate course with a specialized focus on an architectural theme, pre-1800. May be repeated for credit when topics vary. (IRR)
Attributes: APRE, ARCH
3 Credits

ARTH 28040 Selected Topics in Art History, post-1800 (LA)

Intermediate course with a specialized focus on an art historical theme, post-1800. May be repeated for credit when topics vary. (IRR)
Attributes: APOS
3 Credits

ARTH 28050 Selected Topics in Architecture post-1800 (LA)

Intermediate course with a specialized focus on an architectural theme, post-1800. May be repeated for credit when topics vary. (IRR)
Attributes: APOS, ARCH
3 Credits

ARTH 28300 American Visual Culture: 1690-1960 (LA)

Relates the images and objects made by and for Americans to the society that produced them. Organized in a thematic fashion around topics such as democracy, colonialism, progress, materialism, and pop culture. Traditional "art historical" media (painting, sculpture, architecture, and graphic arts) are joined by vernacular building, industrial design, costume, advertising, film, photography, and television to create a fuller picture of American life and culture over three centuries. Satisfies the "art, visual culture, or architecture after the year 1750" requirement in the major. (IRR)
Attributes: APOS, CA, MAP, TIDE
3 Credits

ARTH 28500 Art since 1960 (LA)

Surveys the development of contemporary visual art. Explores how various artists, art movements, art practices, and artworks since 1960 have challenged previous notions about art and addressed social, political, and cultural issues. Traces international connections between artists during the post-war period and the rise of the global artworld since 1990. (IRR)
Attributes: 3B, APOS, CA, G, HU, SCE, TIII
4 Credits

ARTH 28700 Latinx Art in the United States (LA)

The course focuses on Latinx Art in the United States during the 20th century, while periodically reaching back further in time to provide historical perspective. Special emphasis will be placed on the following artistic cultures: Chicano, Puerto Rican, Cuban-American, and New York City's art world. Topics to be considered include: the relative coherence of the category "Latinx Art;" the role of art in the construction of tradition and community; intersections of gender, race, sexuality and class in Latinx identity formation; the borderlands as place and concept; and the place of the arts in contemporary debates over immigration. (IRR)
 Attributes: AN3, APOS, CA, DV, LAEL, LAGC, LSCH, LXME, RPRE, SCE, TIDE, TPJ, WGS
 4 Credits

ARTH 29200 Introduction to Museum Studies (LA)

Introduces the history of museums and art galleries in an international context, investigates their cultural and societal roles, and addresses the contemporary issues and ethical dilemmas they face. Explores related aspects of the art world and art market. (Y)
 Attributes: AN1, AN3, FA
 4 Credits

ARTH 30100 Architectural Studio I: Fundamentals of Architectural Design and Drawing (LA)

An introduction to basic concepts of architectural design through a graduated series of exercises focused on the architectural conceptualization of space, form, function, and structure. Basic techniques of architectural communication, including drawing, model-making, and simple 3-D computer modeling are introduced in the context of controlled investigations of architecture's formal properties and functional demands. Prerequisites: One ARTH course at the 100-level with ARCH attribute and one ARTH course at the 200-level course with ARCH attribute and ART 11xxx or ART 12xxx or ART 15xxx. (S,Y)
 Attributes: ESTS
 4 Credits

ARTH 30200 Architectural Studio II: Environmental Design and Digital Representation (LA)

This course builds on skills introduced in ARTH 30100, moving from the scale of the individual architectural object to consideration of the building in its broader urban and natural environment. Basic techniques of drawing and 3-D modeling are further developed with exposure to more advanced representational challenges and digital tools. Course may be retaken once for credit. Students must have permission of instructor to repeat this course. Prerequisites: ARTH 30100. (F,Y)
 4 Credits

ARTH 31800 Memorable Cities (LA)

An investigation of the architecture and "urban imaginary" of world cities (e.g., New York, Paris, Moscow, Istanbul, Kyoto, Lagos, Los Angeles). Exploration of the components of successful city design through study of architectural ensembles and urban patterns in their political and cultural contexts and analysis of relationships between human experience and architectural form through the lens of literary representation. Prerequisites: One course in art history at 200-level or above. (O)
 Attributes: AN1, ARCH
 4 Credits

ARTH 33100-33110 Studies in Art from Ancient to Renaissance (LA)

Advanced studies of focused issues in the history of ancient, medieval, or Renaissance art. Specific course topic varies. May be repeated for credit for different topics. Prerequisites: One art history course at level 2 or above; junior standing. Further prerequisites may be added according to the topic. (IRR)
 Attributes: ARCH, CSA
 3 Credits

ARTH 35000-35010 Studies in Art from Baroque to Modern (LA)

Advanced studies of focused issues in art from the period between the 17th century and the present. Specific course topic varies. May be repeated for credit for different topics. Prerequisites: One art history course at level 2 or above; junior standing. Further prerequisites may be added according to topic. (IRR)
 Attributes: HU
 3 Credits

ARTH 35800 Form, Function, and Fantasy: Architecture since 1945 (LA)

The decades since World War II have been a time of extraordinary freedom and exploration in architecture and the most intense period of building in the history of the planet. In what direction is architecture headed? This course considers this question and related issues by examining recent and current architecture of Europe, the Western hemisphere, and the Far East. Prerequisites: One art history course at level 2 or above; junior standing. (IRR)
 Attributes: ARCH
 3 Credits

ARTH 36600 Art and Revolution in Latin America (LA)

Investigates painting, photography, graphic art, sculpture, and film aligned with the Mexican, Cuban, and Nicaraguan revolutions. This course will consider definitions of revolutionary art, relationships between government cultural policy and artistic creation, ways in which artists contribute to the construction of revolutionary society, and the viability of 20th-century Latin American revolutionary art. Prerequisites: One course in art history. (IRR)
 Attributes: AN1, INBG, LAEL, LSPL, LXME, SCE
 3 Credits

ARTH 37500 Selected Topics in Art History (LA)

Addresses an advanced topic in art history. May be repeated for credit for different selected topics. Prerequisites: One art history course at 200-level or above. (IRR)
 Attributes: WGS3
 4 Credits

ARTH 38000-38005 Studies in Architectural History and Theory (LA)

Advanced studies of focused issues in the history of architecture and architectural theory. Specific course topic varies. May be repeated for credit for different topics. Prerequisites: One art history course at 200-level or above. (IRR)
 Attributes: ARCH
 4 Credits

ARTH 39300 Exhibitions, Education, and Outreach (LA)

Experiential learning course explores the scholarship and the experience of the interface between museums and galleries, arts professionals, and the public. Subjects covered include formulating and producing public programs, such as educational tours and guest lectures; creating and implementing public relations campaigns; designing, installing, and striking an exhibition; and assessing exhibitions. Prerequisites: Three courses in art history; junior standing. (IRR)
 Attributes: HU
 3 Credits

ARTH 39500 Anti-Institutional Art and Art Institutions (LA)

Examines how contemporary art practices such as performance art, participatory art, and institutional critique resist established ways of exhibiting and collecting art in museums and galleries. Considers how art institutions have adapted in response. Prerequisites: One 200-level ARTH course. (IRR)

Attributes: HU, SCE

4 Credits

ARTH 39600 Exhibiting African Art (LA)

Examines how African art entered western collections from the earliest treasuries and cabinets of curiosities, to ethnography museums, private collections and finally art museums and galleries. Considers how museum installations respond to historical and political circumstances.

Focuses primarily on traditional African art, but also studies how the display of this art continues to have an impact on contemporary African art and the market. Prerequisites: One art history course at level 2 or above; junior standing. (IRR)

Attributes: AN1

3 Credits

ARTH 39700 Selected Topics in Museum Studies (LA)

Advanced topics in museum studies. Specific course topic varies. May be repeated for credit for different topics. Prerequisites: One ARTH course at level 2 or above; junior standing.

3 Credits

ARTH 48000 Senior Portfolio: Architectural Studies (LA)

A critical appraisal of architectural projects, writing and research, and other related visual and textual materials created as part of a student's major in architectural studies. Through an assessment of their undergraduate production, students will be expected to explain and expand on past projects; apply knowledge of history, structure, and design theory to these projects; and discover systems of presenting their work to a variety of audiences. Prerequisites: ARTH 30200. (Y)

Attributes: CP

1 Credit

ARTH 49000 Seminar: Art History (LA)

A central topic with class discussion, individual research, and presentation of papers as major parts of the course. This course may be repeated for credit for seminar topics on different subjects. Prerequisites: 3 courses in art history including one art history course at the 300-level or 3 courses in art history and senior standing. (Y)

Attributes: HU, WI

4 Credits

ARTH 49050 Seminar: Architecture (LA)

A central topic with class discussion, individual research, and presentation of papers as major parts of the course. This course may be repeated for credit for seminar topics on different subjects. Prerequisites: 3 courses in Art History including one Art History course at the 300-level or 3 courses in Art History. (IRR)

Attributes: HU, WI

4 Credits

ARTH 49300 Exhibition Seminar (LA)

Address the issues of exhibition-related curatorial work, and students will work together to curate an exhibition for the Handwerker Gallery and write the accompanying exhibition catalogue. Subjects covered include exhibition planning, organization, and installation; writing and producing catalogues and didactic materials; developing and implementing related programming; and the challenges in each phase of exhibition development from the original idea to its full realization. Prerequisites: Three courses in art history; WRTG 10600 or ICSM 10800-10899 or ICSM 11800-11899; senior standing. (IRR)

Attributes: HU, WI

3 Credits

ARTH 49400 Internship: Art History (NLA)

The internship provides an opportunity to gain practical experience working in a gallery, museum, or other art, architecture, or cultural organization under the joint supervision of a site supervisor and an Ithaca College faculty member. Internships are arranged individually at the student's request, subject to the availability of an appropriate slot at a cultural organization. Internships may be carried out locally, at a remote location, or through Ithaca College's New York (ICNYC) or selected study abroad programs. Prerequisites: Three art history courses; permission of department chair and instructor. (F,S,Y)

1-6 Credits

ARTH 49700 Independent Study: Art History (LA)

Program of special reading and research under the supervision of a specialist in art history. Offered only on demand and by special permission. (IRR)

Attributes: FA, HU

1-4 Credits

ARTH 49800 Internship: Architectural Studies (NLA)

An opportunity for students to gain practical experience in areas related to architectural studies, under the joint supervision of a site supervisor and an Ithaca College faculty member. Internships are arranged individually by the student and are subject to the availability of an appropriate internship position. Prerequisites: At least one 300-level ARTH architectural history course (ARCH attribute) or ARTH 30100. (F,S,Y)

1-6 Credits

ARTH 49900 Honors Independent Study (LA)

Student-designed program of individualized reading, discussion, and research, culminating in the preparation and presentation of an honors thesis. Developed under the supervision of art history faculty. Offered only by special permission: see "Requirements for Honors in Art History and Architectural Studies." Prerequisites: WRTG 10600 or ICSM 10800. (IRR)

Attributes: WI

3,4 Credits

Astronomy (ASTR)

ASTR 17400 Solar System Astronomy (LA)

Survey of the solar system from the earliest conceptions of motions in the sky to modern findings of space exploration in the solar system. Emphasis is placed on physical processes and dynamics of the moon, earth, planets, comets, meteoric matter, and asteroids. Astronomical instruments and measurements. Prerequisites: Math placement score 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 (with a C- or better). (Y)

Attributes: SC, TIII, TWOS

3 Credits

ASTR 17500 Stars, Galaxies and the Universe (LA)

Survey of the universe lying beyond the solar system; introduction to characteristics and motions of stars; stellar structure and evolution; interstellar matter; star clusters, the sun, galaxies; introduction to cosmology; the question of life in the universe; astronomical instruments and measurements. Prerequisites: Math placement score 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 (with a C- or better). (Y)

Attributes: SC, TIDE, TIII

3 Credits

ASTR 17800 Astronomy Laboratory (LA)

Activities include both outdoor observing sessions and indoor lab exercises. Outdoor sessions emphasize learning the night sky and hands-on use of telescopes. Indoor laboratories emphasize data analysis through the use of celestial globes, spectroscopes, computer simulation, and image processing. Prerequisites: ASTR 17400 or ASTR 17500 (either may be taken concurrently). (IRR)

1 Credit

ASTR 37200 Astrophysics (LA)

Calculus-based introduction to the thermal, electromagnetic, and quantum mechanical properties of celestial objects. Topics include celestial mechanics, interactions of radiation with matter, thermal radiation, formation of spectral lines, and structure, formation and evolution of stars and galaxies. Prerequisite: PHYS 21800. (S,O)

3 Credits

Biochemistry (BIOC)

BIOC 19100-19200 Research: Biochemistry (LA)

After consultation with a faculty member doing biochemical research, the student undertakes a research problem under the guidance of that faculty member. Prerequisites: Permission of the faculty member.

Attributes: NS

1-3 Credits

BIOC 24000 Experimental Biochemistry (LA)

Immersion in a project-based research environment, focusing on current methodologies in biochemistry, molecular biology, genomics, and bioinformatics. In a highly collaborative atmosphere, students will form an interactive research team that engages in rigorous scientific problem solving through the sharing of ideas and progress reports. Prerequisites: BIOL 12100 or BIOL 11900; CHEM 22100. (Y)

Attributes: ENRE, NS

2 Credits

BIOC 29100 Research: Biochemistry (LA)

After consultation with a faculty member doing biochemical research, the student undertakes a research problem under the guidance of that faculty member. Prerequisites: Permission of the faculty member.

Attributes: NS

1-3 Credits

BIOC 29200 Research: Biochemistry (LA)

After consultation with a faculty member doing biochemical research, the student undertakes a research problem under the guidance of that faculty member. Prerequisites: Permission of the faculty member.

Attributes: NS

1-3 Credits

BIOC 33300 Biochemistry and Molecular Biology (LA)

A one-semester survey course covering the main concepts of biochemistry and molecular biology. Covers protein structure, enzymology, core metabolism, nucleic acid structure, DNA replication, transcription and translation from a molecular perspective. Lecture/discussion: Three hours. Not open to students who have completed BIOC 35300 or BIOC 35400. Prerequisites: BIOL 11900 or BIOL 12100; CHEM 22200. (S,Y)

Attributes: BIEL

3 Credits

BIOC 35300 Biochemistry: Protein Structure & Function (LA)

Introduction to biochemistry, including consideration of protein, enzyme, carbohydrate, and lipid structure and function, and metabolism of sugars, fatty acids, and amino acids. Mechanisms of reactions and control of pathways are stressed. Three hours of lecture per week. Prerequisites: CHEM 22200 and 23200. (F,Y)

Attributes: BIEL, QL

3 Credits

BIOC 35400 Biochemistry: Molecular Biology of the Gene (LA)

The structure of nucleic acids and chromosomes, replication of DNA, mutation and repair, DNA recombination, transcription, RNA processing, translation, gene regulation in prokaryotes and eukaryotes, genes and development, and molecular medicine will be covered. Three hours of lecture and one hour of discussion per week. Prerequisites: CHEM 22200 and BIOL 22700. (S,Y)

Attributes: BIEL

4 Credits

BIOC 39000 Independent Research in Biochemistry (LA)

In consultation with a faculty member, student will plan and execute a research project in biochemistry or related area. The project will culminate in a research paper describing the findings as well as an oral presentation delivered to the department of the faculty advisor. Prerequisites: BIOL 22700; CHEM 23200; permission of instructor. (F-S, Y)

3 Credits

BIOC 39100-39200 Research: Biochemistry (LA)

After consultation with a faculty member doing biochemical research, the student undertakes a research problem under the guidance of that faculty member. Prerequisites: Permission of the faculty member.

Attributes: NS

1-3 Credits

BIOC 41000 Experimental Biochemistry (LA)

Immersion in a project-based research environment, focusing on current methodologies in biochemistry, molecular biology, genomics, and bioinformatics. In a highly collaborative atmosphere, students will form an interactive research team that engages in rigorous scientific problem solving through the sharing of ideas and progress reports. Prerequisites: BIOL 12100 or BIOL 11900; CHEM 22100. (Y)

Attributes: ENRE, NS

2 Credits

BIOC 48100 Current Topics in Biochemistry (LA)

Discussion of major research areas of current interest. Topics change from year to year, but may include genetic engineering and cloning techniques, mechanisms of carcinogenesis, toxicology, immunology, and gerontology. Prerequisites: WRTG 10600 or ICSM 10800-10899 or ICSM 11800-11899; BIOC 35300 and BIOC 35400. (S,Y)

Attributes: BIEL, CP, WI

3 Credits

BIOC 49100-49200 Research: Biochemistry (LA)

After consultation with a faculty member doing biochemical research, the student undertakes a research problem under the guidance of that faculty member. Prerequisites: Permission of the faculty member.

Attributes: NS

1-3 Credits

BIOC 49700-49800 Honors Research: Biochemistry (LA)

After consultation with a selected honors committee from biology and chemistry faculty, the student undertakes a research project under the guidance of a faculty member. An honors thesis and an oral defense of the thesis are required. Prerequisites: Admission to honors program; three credits of research at level 3 or above.

Attributes: NS

3-4 Credits

Biology (BIOL)

BIOL 10100 Plagues and Peoples (LA)

This course focuses on the significant socio-economic, cultural, and political impacts of plagues and epidemics from historical through modern times. We explore the vectors of disease such as viruses, parasites, and bacteria. Although modern medical advances have improved disease control, inequities in access to these treatments is at the root of modern power struggles. This is a general education course intended for non-science majors. (IRR)

Attributes: AN2, SC, TIDE, TPJ

3 Credits

BIOL 10210 Biology of Sex (LA)

An evolutionary analysis of reproductive behavior, taking a comparative approach among animals, including humans, to better understand our own sexuality and behavior in a biological context. Topics include asexual and sexual reproduction; sex determination; genetic and environmental determinants of sexual behavior; male and female tactics; mating systems (monogamy, polyandry, polygyny); conflict of interests between the sexes; courtship displays; mate choice; assuring paternity; and parental care. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (S,O)

Attributes: 2A, NS, SC, TIDE, TIII, WGS, WGS1

3 Credits

BIOL 10310 New and Emerging Diseases (LA)

Examines the phenomenon of new and emerging diseases and their effects on humans. Topics include the history of emerging or reemerging diseases, epidemics and pandemics, the role of ecological factors in disease emergence, types of infectious agents, their mechanisms of action, and how our immune system responds to infection by these agents. We examine factors – such as antibiotic resistance, population, environmental changes, global travel, and global warming – that contribute to diseases in the 21st century. We also discuss how political, economic, social, and cultural factors contribute to the emergence of diseases and the response to those diseases. This is a general education course intended for non-science majors. (S,Y)

Attributes: 2A, AN2, NS

3 Credits

BIOL 10400 Environmental Biology (LA)

Blends general ecological concepts with evaluations of several environmental problems. Topics include the growth and regulation of natural populations compared to human populations; our use and future supplies of energy, from food to nuclear power; and the preservation of wildlife. The pollution of our environment by human activities is emphasized. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (F,S,Y)

Attributes: 2A, NS, SC, TQSF

3 Credits

BIOL 10600 Plants, People, and Food Production (LA)

Major emphasis is placed on the structure and function of plants; the use of plants in food production; the structure of agricultural technology; the relationship between world food supply and the population problem; scientific, social, and economic aspects of food production. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (IRR)

Attributes: 2A, AN2, NS, SC, TQSF, TWOS

3 Credits

BIOL 10700 Human Genetics (LA)

Heredity in human families and populations; genetic basis of normal and abnormal traits; chromosome behavior and sex determination. Emphasis is placed on the social, ethical, and political issues in genetics. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (FE)

Attributes: 2A, AN2, NS, SC, TIDE, TIII

3 Credits

BIOL 10800 The Human Organism (LA)

Study of the structure and function of the human body. Primary emphasis is placed on normal body function, with a secondary emphasis placed on common diseases. For non-science majors; cannot be taken by students who have completed BIOL 11900 or BIOL 12100. Lecture/discussion: Three hours. (FY)

Attributes: 2A, NS, SC, TIDE, TWOS

3 Credits

BIOL 10900 Life in the Ocean (LA)

Study of the diversity of life found in the ocean with special attention to how ocean life impacts and is impacted by humans. Threats to ocean diversity will be looked at from the standpoint of their effects on both individual organisms and various ocean ecosystems. There will be one open lab during the semester. This is a general education course intended for non-science majors. Lecture: Three hours. (IRR)

Attributes: 2A, NS, SC, TIDE, TPJ

3 Credits

BIOL 11010 History of Life on Earth (LA)

This course will present what we know about the geologic past. Methodologies used to study the past history of our planet will be introduced. The course will also critically analyze topics that frequently appear in the popular media such as new paleontological discoveries, new views on dinosaur biology, mass extinctions, and processes of evolution. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (S,Y)

Attributes: 2A, NS, SC, TIII, TWOS

3 Credits

BIOL 11300 Insects and People (LA)

Why insects are the most successful animals on earth, and their negative and positive effects on people. Topics include insect structure, function, reproduction, development, and behavior; insects as pollinators and producers of useful products; insects as scavengers and applications in forensic science; insects as vectors of disease; agricultural, forestry, and household pests; chemical and biological control of insect pests. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (F,O)

Attributes: 2A, NS, SC, TIII, TQSF

3 Credits

BIOL 11400 Exploring the World Through Evolutionary Biology (LA)

Examination of the mechanisms that have resulted in the rich diversity of life on our planet. Emphasis on how evolutionary biology helps us to understand current issues in ecology, conservation biology, global climate change, agriculture, human health and medicine, and human behavior. Topics include: the fossil record, biodiversity, mass extinctions, human evolution, infectious diseases and antibiotic resistance. (IRR)

Attributes: 2A, AN2, NS, SC, TIII

3 Credits

BIOL 11500 Essentials of Biology (LA)

A one-semester general biology course for nonmajors covering basic physiology, genetics, and development. Evolutionary trends and ecological relationships are discussed. The influence of biology on the lives of humans is emphasized. This is a general education course intended for non-science majors. Lecture/discussion: Three hours. (IRR)

Attributes: 2A, NS

3 Credits

BIOL 11800 Island Biology (LA)

An introduction to the biology of islands and the impacts of human activity on island ecosystems. Focuses on flora and fauna of islands and considers evolution on islands, island endemics, adaptive radiation, as well as the impacts of human activities including climate change, introduced species and tourism. This course is intended for non-science majors; students who have already taken the ICSM Island Life or BIOL 22300 (Biology of Oceanic Islands) cannot take this course for credit. (IRR)

Attributes: SC, TQSF, TWOS

3 Credits

BIOL 11900 Fundamentals of Biology: Cells and Bodies (LA)

A survey of biology for physical and occupational therapy, exercise science, and other health-related majors. Covers cell structure, cellular respiration, mitosis and meiosis, genetics, DNA structure and function, and animal physiology. Lecture: Three hours. Laboratory: Three hours. (F,S)

Attributes: 2A, NS

4 Credits

BIOL 12000 Fundamentals of Biology: Ecology and Evolution (LA)

A survey of biology for physical and occupational therapy, exercise science, and other health-related majors. Meets the biology requirement for environmental studies majors. Covers microevolution, macroevolution (patterns of evolution of the kingdoms, of phyla of plants and animals, and of classes of vertebrates), and ecology (general and human) at the level of populations, communities, and ecosystems. Lecture: Three hours. Laboratory: Three hours. (S,Y)

Attributes: 2A, NS

4 Credits

BIOL 12100 Principles of Biology, Cell and Molecular (LA)

One of two core introductory lecture-laboratory courses for biology and other science majors that surveys the field of biology. Major emphasis is placed on biochemistry, cellular biology, and genetics, and their impact on organismal structure and function. Lecture/discussion: Three hours. Laboratory: Three hours. (F, Y)

Attributes: ENRE

4 Credits

BIOL 12200 Principles of Biology, Ecology and Evolution (LA)

One of two core introductory lecture-laboratory courses for biology and other science majors that surveys the field of biology. Concentrates on the origins and maintenance of biodiversity through evolutionary and ecological processes. Lecture/discussion: Three hours. Laboratory: Three hours. (S,Y)

Attributes: 2A, NS

4 Credits

BIOL 16000 Natural World by the Numbers (LA)

Practical application of precollege level mathematics to natural phenomena. Practice evaluating the interpretation and presentation of data. Cross-listed with CHEM 16000. Prerequisites: Passing score on math competency exam. (IRR)

Attributes: NS

3 Credits

BIOL 19702 The Biology of Cancer (LA)

Investigates how cancer cells function and how genetic and environmental factors lead to the transformation of cells. Examines the cellular systems, including the immune system, designed to protect normal cells from becoming cancerous, the growth and behavior of tumors, the phenomena of invasion and metastasis, and the treatment and statistics of cancers. (S,Y)

Attributes: 2A, NS, SC, TWOS

3 Credits

BIOL 20000 Independent Study: Biology (LA)

For students pursuing special laboratory projects or literature research and for teaching interns (working within the department). Discussion and/or laboratory to fit the student's needs. Course level determined by the intended degree of independence and originality of the student's work, and the extent of the student's background courses. Course may be repeated for different projects. Offered on demand only. Prerequisites: Permission of instructor.

Attributes: UND

1-3 Credits

BIOL 20100 Presenting Biology (LA)

Prepares students conducting research to create and deliver an oral presentation. To be taken concurrently with BIOL 30200. Prerequisites: BIOL 11900 or 12100; BIOL 12000 or 12200. (F,S,Y)

1 Credit

BIOL 20400 Selected Topics: Biology (LA)

Intermediate course with a specialized focus chosen by faculty members or resulting from student requests. May be repeated for credit when topics vary. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200. (IRR)

Attributes: BIEL

2-4 Credits

BIOL 20500 Biology of Aging (LA)

Study of theoretical and measured aspects of the aging phenomenon as it influences human biology. Topics range from the subcellular to whole populations. Course may not be used to fulfill requirements in the biology major or minor. Prerequisites: Sophomore standing. (S,Y)

Attributes: 2A, NS, SC, TMBS

3 Credits

BIOL 20600 Primary Human Anatomy (LA)

A one-semester introduction to human anatomy designed for physical and occupational therapy majors in preparation for cadaver dissection.

Lecture topics include anatomical terminology; tissues types; skeletal, muscular, and nervous systems; and regional anatomy. Emphasis in laboratory is placed on bones, muscle attachments, actions and innervations, and dissection skills. Prerequisites: BIOL 11900 or BIOL 12100 and sophomore standing. (S,Y)

Attributes: BIEL, ENRE

3 Credits

BIOL 20700 Communicating Biology (LA)

Develop best practices for presenting biological research findings orally and in writing. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200; WRTG 10600 or equivalent. Enrollment limited to Biology majors. (F-S,Y)

Attributes: BIEL, WI

3 Credits

BIOL 20900 Experiences in Biology (NLA)

Supervised, hands-on, group experience in the biological sciences that is connected to a course that provides the background and preparation for the experience. Experiences often involve travel that is typically scheduled during winter, May, or summer terms. Experiences may encompass a range of activities, but emphasize immersion in a particular topic or activity in a non-traditional setting. This course may be repeated. Prerequisites: permission of instructor. (IRR)

0-1 Credits

BIOL 21000 Research in Biology (LA)

For students who desire research work but have not yet completed BIOL 30200. Prerequisites: One introductory biology course; permission of instructor. May be repeated once for credit. (F-S,Y)

Attributes: UND

1-3 Credits

BIOL 21200 Conservation Biology (LA)

Introduction to principles of conservation biology issues used to understand and reverse the current worldwide species loss. Examination of case studies of local and global conservation efforts to combat this species loss. Lab exercises include field trips. Lecture: Three hours. Laboratory: Three hours. This course is cross-listed with ENVS 21200; students cannot receive credit for this course and ENVS 21200.

Prerequisites: Any 10000-level ENVS or BIOL course. (IRR)

Attributes: BIEL, ENRE

4 Credits

BIOL 21400 Animal Physiology (LA)

The study of physiological mechanisms, from the molecular and cellular to the organismic level, with an emphasis placed on unique adaptations to environmental stresses. Specific topics include the mechanisms underlying nerve function, movement, circulation, respiration, and endocrine regulation. Lecture: Three hours. Laboratory: Three hours.

Prerequisites: BIOL 11900 or BIOL 12100. (F,Y)

Attributes: BIEL, ENRE

4 Credits

BIOL 22300 Biology of Oceanic Islands (LA)

The mechanisms of evolution and the factors that drive speciation on island systems are covered in detail. Topics include: island biogeography, global and island climate, ecological niches, natural selection, adaptive radiation, invasive species, conservation biology, and the impacts of anthropogenic activities on island habitats. Prerequisites: BIOL 12000 or BIOL 12200. (IRR)

Attributes: BIEL

3 Credits

BIOL 22500 The Power of Plants: Plants in Medicine and Agriculture (LA)

Explores the important roles of plants in modern society and indigenous cultures, with specific focus on plants as sources of medicines and food. Other topics include plant classification; the mechanisms of bioactive plant compounds in humans; the evolution, domestication, and genetic modification of crop plants; plant conservation; and ownership of nature. Lectures include discussions based on readings as well as lectures.

Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200. (F,O)

Attributes: BIEL

4 Credits

BIOL 22700 Genetics (LA)

Principles of heredity; survey of classical genetics, human genetics, modern molecular and microbiological genetics; studies of confidence of analysis of genetic data; and interrelating transcription and translation at the cellular and organismal level. Lecture: Three hours. Laboratory: Three hours. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200. (F,S,Y)

Attributes: BIEL, ENRE

4 Credits

BIOL 22800 Evolution (LA)

An overview of the field of evolutionary biology that includes the study of both microevolutionary and macroevolutionary change and the mechanisms of change. Specific topics of focus include natural selection, genetic drift, population genetics, quantitative genetics, adaptation, speciation, phylogenetic analysis, and sexual selection. Lecture: Three hours. Discussion: One hour. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200. (F,S,Y)

Attributes: BIEL

4 Credits

BIOL 27100 Ecology (LA)

Presents the basic concepts of ecology with balanced treatment of plant and animal examples. Topics include the interactions among individuals of a population, interactions in their abiotic environment, and interactions with other species. Also discussed are growth, regulation, diversity, and stability of populations, and the interactions among populations at the community and ecosystems levels. Laboratories include field and laboratory work and statistical analyses of data. Lecture: Three hours. Laboratory: Three hours. Prerequisites: BIOL 12000 or BIOL 12200. (F,Y)

Attributes: BIEL, ENRE

4 Credits

BIOL 27500 Field Biology (LA)

Survey of the ecosystems of central New York. Areas of emphasis are direct experience of the diversity of ecosystems and their structure and function; adaptations of organisms to specific ecosystems; recognition of dominant and indicator species; human impact on ecosystem function and species diversity; and the methods used to measure these parameters. Lectures emphasize the unique attributes of different ecosystems and the techniques of data gathering and analysis. Analyses of societal impact and management of ecosystems are included. Lecture: Two hours. Laboratory: Six hours. Prerequisites: Two of the following: BIOL 12100, BIOL 12200, BIOL 12000, ENVS 12100. (F,O)
Attributes: BIEL, ENRE, ESTS
4 Credits

BIOL 28400 Field Ornithology (LA)

Relation between climate, habitat, and regional bird species. Lecture and laboratory in bird anatomy, territoriality, migration, and song. Fieldwork: Saturday morning trips and bird banding. Lecture: Three hours. Laboratory: Three hours. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200. (F,E)
Attributes: BIEL, ENRE, ESTS
4 Credits

BIOL 29000 Research in Biology (LA)

For students to conduct research with a faculty member, either before or after completing the required BIOL 30200 research course. Course is repeatable up to in total. Permission of instructor required. Prerequisites: BIOL 11900, 12000, 12100, or 12200. (F,S)
1-3 Credits

BIOL 30000 Independent Study: Biology (LA)

For teaching interns (working within the department) and for students pursuing special laboratory projects or literature research. Discussion and/or laboratory to fit the student's needs. Course level determined by the intended degree of independence and originality of the student's work and the extent of the student's background courses. Course may be repeated. Offered on demand only. Prerequisites: Permission of instructor.
Attributes: UND
1-3 Credits

BIOL 30200 Research in Biology (LA)

Research for biology majors. It is recommended that projects be performed during the junior year. Research areas must be selected by midterm of the semester prior to enrollment. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200; BIOL 20700 (may be taken concurrently); permission of instructor. (F,S,Y)
Attributes: NS
3 Credits

BIOL 30400 Selected Topics: Biology (LA)

Advanced course with a specialized focus chosen by faculty members or resulting from student requests. May be repeated for credit when topics vary. Prerequisites: One 200-level BIOL course; Permission of instructor. (IRR)
Attributes: BIEL
2-4 Credits

BIOL 30500 Invasive Species (LA)

Examines the ecology and evolution of invasive species through discussion of current literature and field cases. Considers community vulnerability to invasion, characteristics of invaders, and the process, impact, and potential management responses for biological invasion. Prerequisites: BIOL 27100. (IRR)
Attributes: BIEL
4 Credits

BIOL 30800 Animal Behavior (LA)

Explores the proximate causes and ultimate evolutionary explanations for the behavior of animals. Introduces the study of behavioral ecology by examining basic ecological problems and evaluating the behavioral solutions animals use to solve them. Lecture topics include the development of behavior, control of behavior, communication, adaptive response to predators, adaptive feeding behavior, male and female reproductive tactics, the evolution of mating systems, adaptive tactics of parents, and social behavior. Emphasis in the laboratory is placed on observation and an experimental approach to animal behavior. Lecture: Three hours. Laboratory: Three hours. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200; one other course in biology at 200-level or above (excluding BIOL 20500). (F,E)
Attributes: BIEL, ENRE
4 Credits

BIOL 31500 Neurobiology (LA)

Study of the biology of the nervous system with an emphasis placed on the molecular and cellular mechanisms underlying nerve function. Also considers the function of the nervous system on an organismic level and the underlying causes of nervous system disease. Topics include ion channel function; neurotransmitters in the nervous system; sensory systems; motor systems and response to injury; and learning and memory. Lecture and discussion, with an emphasis placed on reading and analyzing the scientific literature. Prerequisites: BIOL 11900 or BIOL 12100; PSYC 31100 or one additional biology course at 200-level or above (excluding BIOL 20500). (S,Y)
Attributes: BIEL
4 Credits

BIOL 33000 Genomics, Bioinformatics, and Computational Biology (LA)

This course focuses on the genome, how it is used to build functional organisms, and how it can be compared within and between species to gain insight on biological processes and patterns of evolution. Emphasis will be on computational tools required by biologists for extracting and interpreting the vast amounts of data generated by emerging technologies. Prerequisites: BIOL 22700. (F,IRR)
Attributes: BIEL
4 Credits

BIOL 34500 Developmental Biology (LA)

Biology of embryonic development. The course covers the major unifying features of vertebrate and invertebrate development and focuses on the molecules that control these processes. Topics include regulation of gene expression, cell fate determination, fertilization, embryonic pattern formation, cell signaling, stem cells, and the relationships between development and disease. Lecture/lab: Four hours. Prerequisites: BIOL 22700. (F,O)
Attributes: BIEL, ENRE
4 Credits

BIOL 35200 Microbiology (LA)

Examines the structure, physiology, and genetics of microorganisms. Emphasis placed on understanding microbial growth, ecology, use of microorganisms in research and commerce, how microorganisms impact food and water quality, and the immune response to pathogens. Lecture: Three hours. Laboratory: Three hours. Prerequisites: BIOL 22700. (S,E)
Attributes: BIEL, ENRE
4 Credits

BIOL 35400 Cell Biology (LA)

Study of the relationship and unity of structure and function in living cells and cell populations. Emphasis is placed on cell organelles, cell membrane systems, and the functions of cells in cell recognition, cell signaling, regeneration, and malignancy. Prerequisites: BIOL 22700. (F,Y)
Attributes: BIEL, ENRE
4 Credits

BIOL 37300 Plant Physiology (LA)

Intensive study of the basic physiological and biochemical processes of plants. Emphasis is placed in interaction between cellular structure and function, as well as coordination of the various physiological processes throughout the organism. Lecture: Three hours. Laboratory: Three hours. Prerequisites: BIOL 11900 or BIOL 12100; BIOL 12000 or BIOL 12200; One 200-level BIOL course. (IRR)
Attributes: BIEL, ENRE
4 Credits

BIOL 37900 Aquatic Ecology (LA)

Explores the biological, chemical, and physical features of lakes and other inland aquatic habitats. Focuses on interactions among organisms, interactions between organisms and their environment, and on the physiological adaptations of species to the aquatic environment. Lecture/discussion: Three hours. Laboratory: Three hours. Prerequisites: BIOL 12200; CHEM 12100 or CHEM 12300; junior standing. (IRR)
Attributes: BIEL, ENRE
4 Credits

BIOL 40000 Research in Biology (LA)

For students desiring further research work beyond level 3. This course may be taken twice for credit. Prerequisites: Permission of instructor. (F-S,Y)
Attributes: UND
1-3 Credits

BIOL 40100 Biology Honors Program (LA)

Research and thesis for biology majors pursuing the honors program. It is recommended that the research program begin before the start of the fall of the senior year and continue to the end of the senior year. Prerequisites: Acceptance into the honors program. (F-S,Y)
Attributes: NS
2-3 Credits

BIOL 40200 Biology: Honors Program (LA)

Research and thesis for biology majors pursuing the honors program. It is recommended that the research program begin before the start of the fall of the senior year and continue to the end of the senior year. Prerequisites: Acceptance into the honors program. (F-S,Y)
Attributes: NS
2-3 Credits

BIOL 40400 Selected Topics: Biology (LA)

Advanced research methods course with a specialized focus chosen by faculty members or resulting from student requests. May be repeated for credit when topics vary. Prerequisites: BIOL 30200 or BIOC 39000 or BIOC 41000; Permission of instructor. (IRR)
Attributes: BIEL
2-4 Credits

BIOL 41100 Biology Seminar (LA)

Seminars, discussion, and readings in the biological sciences. Required of all biology majors. Prerequisites: BIOL 20700 (may be taken concurrently) and junior standing. Pass/fail only. (F-S, Y)
0.5 Credit

BIOL 41200 Biology: Seminar (LA)

Seminars, discussion, and readings in the biological sciences. Required of all biology majors. Prerequisites: BIOL 41100 and junior standing. Pass/fail only. (F-S,Y)
0.5 Credit

BIOL 41400 Capstone in Biology (NLA)

Students will explore connections between the integrative core curriculum, their biology major, other learning experiences while at Ithaca College or abroad, and future goals. Students will create a written reflection that integrates their various learning experiences and how their experience at Ithaca College has prepared them to achieve their future goals. Students will also prepare a cover letter, curriculum vitae, and personal statement; identify career opportunities, and develop a showcase electronic portfolio. (F,Y)
Attributes: CP
1 Credit

BIOL 44000 Inquiry and the Nature of Science for the Science Teacher (LA)

Considers issues pertaining to the nature and practice of science, especially as they relate to science education. Explores aspects that distinguish scientific inquiry from other forms of inquiry. Examines safety issues of teaching science in a classroom, and teaching science in the context of the community. Cross-listed with CHEM 44000 and PHYS 44000. Students can receive credit for only one of: BIOL 44000, PHYS 44000, CHEM 44000. Prerequisites: EDUC 34000 and junior standing. (IRR)
Attributes: NS
3 Credits

BIOL 46100 Ecophysiology (LA)

Examines the function and performance of animals and plants in their environment. This course integrates information from molecular biology through organismal physiology to understand the mechanisms that allow organisms to survive in their physical, chemical, and biological environments. This information is analyzed to understand how these small-scale processes affect higher levels of organization, from biotic communities up to global-level issues. Topics include adaptations to extremes in temperature, energy availability, moisture, and nutrients. Examples will be taken from organisms living in a wide variety of environments, including deserts, the Arctic, temperate forests, marine environments, and rain forests. Lecture and discussion, with an emphasis on reading and analyzing the scientific literature. Prerequisites: BIOL 27100; BIOL 21400 or BIOL 37300. (S,E)
Attributes: BIEL
4 Credits

BIOL 47600 Endocrinology (LA)

Introduces the mechanisms by which hormones control their targets and provides background on the major vertebrate hormones. The course then covers current research in endocrinology, analyzing topics such as weight control, growth, gender differentiation, reproduction, the stress response, and environmental endocrine disrupters. Lecture and discussion, with an emphasis placed on reading and analyzing the scientific literature.

Prerequisites: BIOL 21400; BIOC 35300 or BIOL 20700, (may be taken concurrently). (S,O)

Attributes: BIEL

4 Credits

Business-Interdisc Studies (BINT)

BINT 10000 First-Year Seminar in Business (NLA)

Links the challenges faced by first-year college students with similar demands in business settings. Students learn that many of the issues they face individually in transition from high school to college have parallels to those faced in business organizations. Topics covered include time management, goal setting, learning styles, communication skills, and resource utilization, among others. Open to first-year business students only. (FY)

1 Credit

BINT 10100 World of Business (NLA)

Surveys the functional areas of business, namely management, finance, accounting, operations, marketing, entrepreneurship, and sustainability. Links the challenges faced by first-year college students with similar demands on management in business settings. (FY)

4 Credits

BINT 10400 Informational Interview (NLA)

This program allows students to explore a career path of interest by conducting an interview with a professional. The student is expected to contact an individual within their selected profession and conduct an interview based on questions provided by the Business-Link Professions Program. Upon completion of the interview, students will write up a reflection and submit it to the Business-Link Professions Program office for review and grading. Open to first and second year business students only. This course is offered in block I and II. Prerequisites: Business-Link Professions Workshop 1, completion of School of Business Informational Interview application and Permission of Instructor. Pass/fail only. (F,S, SUM, W)

0 Credit

BINT 19800 Internship for Credit (NLA)

Off-campus experience involving varied, non-routine work designed to allow students to learn about realworld operations of an organization. Pass/fail only. (F, S, SUM, W)

1-6 Credits

BINT 19900 Washington, D.C. Practicum (NLA)

Off-campus experience in Washington, D.C., involving varied nonroutine work projects that allow students to synthesize classroom learning with on-the-job learning acquired by working in an organization. The program puts primary responsibility on the student to carry out program requirements in conjunction with a faculty sponsor. Prerequisites:

BINT 10100; sophomore standing; minimum of 2.50 cumulative grade point average at Ithaca College. Credits may only be used as open elective credits and may not be used as business elective credit or to replace other business coursework. Pass/fail only. (F-S,Y)

3-6 Credits

BINT 20400 Career Exploration (NLA)

This off-campus experience gives students more insight into their desired profession through a 30 hour job shadowing experience by providing them an opportunity to observe daily functions of the organization and to interview staff in order to learn various aspects of the organization. Upon conclusion, a reflection must be submitted to the Business-Link Professions Program Office for review and grading. Open to first and second year business students only. This course is offered in block I and II. Prerequisites: Business-Link Professions Workshop 2; BINT 10400; completion of School of Business Career Exploration application and permission of instructor. Pass/fail only. (F,S,U,W)

0 Credit

BINT 21000 Boom, Bust and the American Economic Cycle (LA)

This introductory survey course will look at the historical developments in the U.S. economy with special focus on the role of capital markets and financial services industry, from the 1930s to the present. We will critically examine such crucial events as stock markets collapses, major legislations governing the operations of financial markets & institutions, and milestones like the Great Recession and the Subprime Lending Crisis. The common thread throughout the course is to identify and analyze the interrelationship of myriad political, regulatory, economic, technological, global, and socio-psychological forces that have shaped the boom and bust cycles in the US economy. Various viewpoints focusing on the practical aspects of enforcement, social welfare through consumer protection, political roadblocks, and campaign finance reform will be evaluated. Prerequisite: Sophomore Standing. (FS)

Attributes: SO, TWOS

3 Credits

BINT 39800 Internship for Credit (NLA)

Off-campus experience involving varied, non-routine work designed to allow students to learn about realworld operations of an organization. Prerequisites: Junior Standing; good academic standing; completion of Business-Link Professions Workshops 1,2,3; School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

BINT 40400 Business Link Professions Program (NLA)

The Business-Link Professions Program integrates the professional development activities required of Accounting and Business Administration majors. The program enables business students to develop professional skills that are needed for successful careers. Throughout their time as majors, students complete a series of four theme-based workshops conducted by business school staff, faculty, alumni and/or employers, and one leadership certificate program, either leading-others or leadership-in-a-diverse-world. Successful completion of this course indicates the BLPP graduation requirement has been met. Pre-requisite: Senior standing. Accounting and Business Administration majors only. (P/F only). (F, S, SU)

0 Credit

Chemistry (CHEM)

CHEM 10100 Chemistry and Your Body (LA)

A course designed for students who have chosen to major in areas other than science. An introduction to the basic ideas of chemistry, the nature and structure of chemical compounds, and the meaning of chemical symbols. An application of these ideas and understandings to the chemistry of the body, with specific discussion of food, drugs, cosmetics, and other health-related topics. Three hours of lecture and/or discussion per week. Not open to students who have taken CHEM 12100 or CHEM 12300. (S,Y)

Attributes: 2A, NS, SC, TMBS, TWOS

3 Credits

CHEM 10200 Contemporary Chemical Issues (LA)

A description and discussion of new compounds and materials made by the chemical industry during the past 100 years that have properties superior to those of naturally occurring products. Many of these advances have significantly improved modern living; however, byproducts of some of these advances have also decreased the overall quality of life. After an introduction to the language and symbols of chemistry, topics related to contemporary problems and examples follow some compounds from research curiosities to industrial products. Three hours of lecture and/or discussion per week. Not open to students who have taken CHEM 12100 or CHEM 12300. (IRR)

Attributes: 2A, NS

3 Credits

CHEM 10500 Energy and the Environment (LA)

Description and discussion of types and sources of natural resources with a special emphasis placed on energy resources. Background is presented in terms of simple chemical principles understandable to students with majors other than the sciences. Topics of societal concern include air pollution, acid rain, global warming, ozone depletion, and upcoming energy shortages. Viable solutions to these problems are discussed. Primarily for students majoring in areas other than science or physical therapy. Three hours of class meeting per week, including discussion, lecture, and quizzes. Not open to students who have taken CHEM 12100 or CHEM 12300. (F,Y)

Attributes: ABSS, SC, TQSF

3 Credits

CHEM 10600 Preparation for Principles of Chemistry (LA)

Reviews fundamental mathematical skills and provides strategies for general chemistry problem solving, supporting students to develop scientific and proportional reasoning skills, as well as critical thinking and analytic problem-solving skills within a chemistry context in order to prepare them for success in CHEM 12100 Principles of Chemistry. Emphasis is placed on student participation and the application of chemistry concepts to solving real-world problems. Three hours of lecture/discussion per week. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or C- or better in MATH 10000. (F,Y)

Attributes: NS

2 Credits

CHEM 10800 Introduction to Technology (LA)

A course for non-science students, with an emphasis on the applications rather than the theories of science. This course examines those technologies, primarily nuclear technology (civilian and military) and biotechnology, that will significantly affect our lives in the years to come. Three hours of lecture and/or discussion per week. (IRR)

Attributes: 2A, NS

3 Credits

CHEM 11000 General Chemistry (LA)

General chemistry for occupational therapy majors. Topics from inorganic, organic, and biological chemistry, including the electronic structure of atoms, stoichiometry, equilibria, acids and bases, thermodynamics, kinetics, nomenclature, structure, and reactions of organic compounds and biochemicals. Required for occupational therapy majors. Prerequisites: High school chemistry. (S,Y)

Attributes: 2A, NS

3 Credits

CHEM 11200 Organic Chemistry and Biochemistry (LA)

Introduction to general theories and principles of organic chemistry and biochemistry. The naming and structure of organic compounds, reactivities of the various functional groups in both aliphatic and aromatic compounds, and an introduction to the organic chemistry of biologically important systems. Three hours of lecture per week, with a fourth hour scheduled for review session and exams. Prerequisites: CHEM 12100 and CHEM 12200. (S,Y)

Attributes: 2A, NS

3 Credits

CHEM 11400 Chemistry Laboratory (LA)

Designed to complement the CHEM 12100-11200 sequence. Deals with organic reactions. One laboratory per week. Prerequisites: CHEM 12100 and CHEM 12200 or CHEM 12300; CHEM 11200 prior or concurrent. (S, Y)

Attributes: 2A, NS

1 Credit

CHEM 11700 Environmental Chemistry (LA)

General principles of chemistry needed for the study of environmental science. Topics include mathematical methods, electronic structure of atoms, stoichiometry, equilibria, acids and bases, thermodynamics, kinetics, and nuclear chemistry. Not open to students who have taken CHEM 12100 or CHEM 12300. (F,Y)

Attributes: 2A, NS

3 Credits

CHEM 11900 Environmental Chemistry Laboratory (LA)

Hands-on experience with modern analytical instruments that are frequently encountered in environmental assessments. The course prepares students to be technologically knowledgeable and authoritative in their future careers. Prerequisite: CHEM 11700 (may be taken concurrently) Laboratory: Four hours. (F,Y)

Attributes: NS

1 Credit

CHEM 12000 Topics in Chemistry and Biochemistry (LA)

Introduction to research projects and selected topics in chemistry and biochemistry. Natural science faculty in Biology, Chemistry, and Physics will present topics of interest on a rotating basis. Primarily intended for biochemistry and chemistry majors. One meeting per week. Pass/Fail only. (F,Y)

Attributes: NS

1 Credit

CHEM 12100 Principles of Chemistry (LA)

Introduction to general theories and principles of chemistry stressing underlying correlations. Systematic study of the periodic table, with an emphasis on bonding and the quantitative relationships among the elements. Three hours of lecture per week. Intended for students who have completed high school chemistry with minimum grade of C. Students cannot receive credit for both CHEM 12100 and CHEM 12300. Co-requisite: CHEM 12200. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or higher. (F,S,Y)
Attributes: 2A, NS
3 Credits

CHEM 12200 Principles of Chemistry Laboratory (LA)

Introduction to basic chemistry laboratory practice and techniques. The experiments reinforce the concepts covered in CHEM 12100. Prerequisites: Math placement in Group 3 or higher, math placement assessment score of 46 or higher. Co-requisite: CHEM 12100. (F,S,Y)
1 Credit

CHEM 12300 Principles of Chemistry - Enriched Section (LA)

Introduction to general theories and principles of chemistry, stressing underlying correlations. Systematic study of the periodic table with an emphasis on bonding and the quantitative relationships among the elements. The course covers additional topics and examples of scientific interest not included in CHEM 12100. Three hours of lecture per week and one laboratory per week. Intended for students with a strong background in chemistry with a score of 4 or 5 on AP Chemistry, or minimum score of 50 on General Chemistry CLEP, or 4-7 on IB Chemistry. Students cannot receive credit for both CHEM 12100 and CHEM 12300. Prerequisites: Math placement in group 1, math placement assessment score of 76-87 and permission of instructor. (F,Y)
Attributes: 2A, NS
4 Credits

CHEM 12400 Experimental Chemistry I (LA)

Emphasis is placed on quantitative analysis, organic synthesis, and modern instrumental techniques, such as ultraviolet, visible, and infrared spectrophotometry. One lecture and one laboratory per week. Prerequisites: CHEM 12100 and CHEM 12200, or CHEM 12300; and CHEM 22100 (may be taken concurrently). (S,Y)
Attributes: 2A, NS
2 Credits

CHEM 16000 Natural World by the Numbers (LA)

Practical application of precollege level mathematics to natural phenomena. Practice evaluating the interpretation and presentation of data. Cross-listed with BIOL 16000. Prerequisites: Passing score on math competency exam. (IRR)
Attributes: NS
3 Credits

CHEM 17100-17200 Undergraduate Instruction in Chemistry (NLA)

Qualified undergraduates are given opportunities to participate in the department's instructional program, serving as laboratory assistants and/or tutors. Prerequisites: Permission of department. Pass/fail only.
1 Credit

CHEM 18100-18200 Selected Topics: Chemistry (LA)

Course content depends on interests of the registrants and may include informed discussions, outside reading, and either library or laboratory projects. This course may be repeated for credit for selected topics on different subjects. Prerequisites: Permission of instructor. (IRR)
Attributes: NS
1-3 Credits

CHEM 19100-19200 Research in Chemistry (LA)

After consultation with the faculty of the Department of Chemistry, the student undertakes a research problem under the guidance of one or more faculty members. Prerequisites: Permission of department.
Attributes: NS
1-3 Credits

CHEM 20500 Chemistry and Art (LA)

Investigates, through lecture and laboratory activities, the scientific basis of such topics as paints and pigments, metalworking and sculpture, dyes and fabrics, polymeric materials, and chemical hazards in art. Introduces students to basic chemical concepts and laboratory techniques, as well as modern analytical instruments. Lectures on the material history of art establish the context for the study of these chemical and analytical concepts. Students may enroll for ARTH 20500 or CHEM 20500, but not both. Prerequisites: Sophomore standing; permission of instructor. (S,O)
Attributes: 2A, 3B, CA, FA, HU, NS, SC, TIII
4 Credits

CHEM 22100 Organic Chemistry I (LA)

Introduction to the structure and reactivity of carbon compounds. Topics include bonding, isomerism, stereochemistry and the reactions of alkenes, alkynes, and alkyl halides with emphasis on reaction mechanisms. Analytical methods to study organic molecules; particularly infrared spectroscopy and nuclear magnetic resonance spectroscopy are also covered. The use of scientific and logical thought patterns is stressed in problem solving. Three hours of lecture per week. Co-requisite: CHEM 22300. Prerequisites: CHEM 12100 and CHEM 12200. (F,S,Y)
Attributes: NS
3 Credits

CHEM 22200 Organic Chemistry II (LA)

Continuation of CHEM 22100. Course covers the chemistry and reactivity of carbonyl functional groups, including aldehydes, ketones, esters, and amides. Aromaticity and select topics in biological chemistry are also covered. The use of scientific and logical thought patterns is stressed in problem solving. Three hours of lecture per week. Co-Requisite: CHEM 22400. Prerequisites: CHEM 22100 and CHEM 22300 (with a grade of C- or better). (F,S,Y)
Attributes: NS
3 Credits

CHEM 22300 Organic Chemistry I Laboratory (LA)

Emphasizes basic techniques of experimental organic chemistry, including reactions, purification of mixtures, and determination of structure. Experiments reinforce concepts covered in CHEM 22100. Co-requisite: CHEM 22100. Prerequisites: CHEM 12100 and CHEM 12200. (F,S)
1 Credit

CHEM 22400 Organic Chemistry II Laboratory (LA)

Emphasizes more advanced techniques of experimental organic chemistry, including reactions, purification of mixtures, and determination of structure. Experiments reinforce concepts covered in CHEM 22200. Co-Requisite: CHEM 22200. Prerequisites: CHEM 22100 and CHEM 22300. (F,S)
1 Credit

CHEM 22500 Experimental Chemistry II (LA)

Emphasis is placed on synthesis and qualitative analysis, using infrared and nuclear magnetic resonance spectroscopy and various chromatographic techniques. One lecture and one laboratory per week. Prerequisites: CHEM 12400 (with a grade of C- or better); CHEM 22200 (may be taken concurrently). (F,Y)

Attributes: ENRE, NS

2 Credits

CHEM 23200 Quantitative Chemistry (LA)

Foundations for advanced work in chemistry, biochemistry, biology, and related subjects. Quantitative approach to chemical equilibrium, chemical kinetics, chemical thermodynamics, and electrochemistry.

Prerequisites: CHEM 12100 and CHEM 12200; Math Placement in Group 2 or higher, math placement assessment score of 54 or greater. Co-requisite: CHEM 23300. (S,Y)

Attributes: ENRE, NS

3 Credits

CHEM 23300 Quantitative Chemistry Laboratory (LA)

Continued study of general and inorganic chemistry laboratory practices and techniques. The experiments reinforce the concepts covered in CHEM 23200. Co-requisite: CHEM 23200. Prerequisites: CHEM 12100 and CHEM 12200; Math placement in Group 2 or higher, math placement assessment score of 54 or greater. (S,Y)

Attributes: ENRE

1 Credit

CHEM 27100-27200 Undergraduate Instruction in Chemistry (NLA)

Qualified undergraduates are given opportunities to participate in the department's instructional program, serving as laboratory assistants and/or tutors. Prerequisites: Permission of department. Pass/fail only.

1 Credit

CHEM 28100-28200 Selected Topics: Chemistry (LA)

Course content depends on interests of the registrants and may include informed discussions, outside reading, and either library or laboratory projects. This course may be repeated for credit for selected topics on different subjects. Prerequisites: Permission of instructor. (IRR)

Attributes: NS

1-3 Credits

CHEM 29100-29200 Research in Chemistry (LA)

After consultation with the faculty of the Department of Chemistry, the student undertakes a research problem under the guidance of one or more faculty members. Prerequisites: Permission of department.

Attributes: NS

1-3 Credits

CHEM 32400 Experimental Chemistry III (LA)

Part three of the unified sequence. Project-oriented experiments to deal with concepts normally found in instrumental analysis laboratory courses. Emphasis is placed on using synthetic techniques, modern analysis by instrumentation, and studies of the physical properties of chemical systems. Two lectures and one laboratory per week. Prerequisites: CHEM 22500 (with a grade of C- or better); CHEM 23200 prior or concurrent. (S,Y)

Attributes: ENRE, NS

3 Credits

CHEM 32500 Experimental Chemistry IV (LA)

Part four of the unified sequence. Project-oriented experiments to deal with concepts normally found in instrumental analysis, physical, organic, and inorganic laboratory courses. Emphasis is placed on using synthetic techniques, modern analysis by instrumentation, and studies of the physical properties of chemical systems. One lecture and two laboratories per week. Prerequisites: CHEM 32400 (with a grade of C- or better); CHEM 34200 (may be taken concurrently). (S,Y)

Attributes: ENRE, NS, WI

4 Credits

CHEM 33100 Physical Chemistry: Thermodynamics and Kinetics (LA)

A theoretical interpretation of nature from the macroscopic viewpoint. Includes an introduction to thermodynamics, electrochemistry, and chemical kinetics. Prerequisites: CHEM 23200; MATH 10800 or MATH 11200; PHYS 10200 or PHYS 11800. (F,Y)

Attributes: NS

3 Credits

CHEM 33200 Physical Chemistry: Quantum Chemistry and Spectroscopy (LA)

A theoretical interpretation of nature from the microscopic viewpoint. Includes an introduction to the kinetic molecular theory of gases, quantum chemistry, and spectroscopy. Prerequisites: CHEM 23200 (may be taken concurrently); MATH 10800 or MATH 11200; PHYS 10200 or PHYS 11800. (S,Y)

Attributes: NS

3 Credits

CHEM 34200 Inorganic Chemistry (LA)

This course provides chemistry, biochemistry and other interested science majors with an understanding of the field of inorganic chemistry and as a foundation for advanced work in inorganic chemistry, materials science, biochemistry, and related subjects. The major topics are atomic structure, simple bonding theory, symmetry and group theory, acid-base chemistry, the crystalline solid state, coordination chemistry and organometallic chemistry. Three hours of lecture per week. Prerequisites: CHEM 23200 and CHEM 23300; Math placement in group 2 or higher, math placement assessment score of 54 or greater. (F,Y)

Attributes: NS

3 Credits

CHEM 34300 Inorganic Chemistry Laboratory (LA)

Emphasizes basic techniques of experimental inorganic and organometallic chemistry, including synthetic methods, reaction progress monitoring and product characterization by spectroscopic methods. Experiments reinforce and expand concepts covered in CHEM 34200. Prerequisites: CHEM 23200 and CHEM 23300; Math Placement Group of 2 or higher, math placement assessment score of 54 or greater. (F,Y)

1 Credit

CHEM 35300 Modern Instrumental Methods (LA)

This course introduces modern analytical methods used in the fields of chemistry, biology, environmental science, geology, materials science, and physics. Explores an 'analytical toolbox' of instrumentation and techniques, including chromatography, spectroscopy, and mass spectrometry. Emphasis is placed both on fundamental principles (i.e. the workings and mechanics of each technique), which is critical for validating data and troubleshooting, and hands-on experience of each method. Prerequisites: CHEM 23200 and CHEM 23300. (S,Y)

3 Credits

CHEM 35400 Polymer Chemistry (LA)

Study of the synthesis, structure, and properties of polymers, with a special emphasis on practical applications in the chemical industry. Topics include sources of chemical raw materials, plastics, fibers, drugs, surface coatings, food chemicals, dyes, and pigments. Specific examples illustrate the scientific basis for the performance of familiar, everyday materials. Prerequisites: CHEM 22200. (IRR, B)

Attributes: NS
1.5 Credits

CHEM 35600 Nuclear Magnetic Resonance (LA)

Study of nuclear magnetic resonance and its application in organic and inorganic chemistry. Topics include, instrumentation, chemical shift, spin-spin coupling, C-13 spectra, and modern pulse FT techniques. Emphasis on spectral interpretations and practical applications. Includes experiments using multi-pulse techniques. Prerequisites: CHEM 22200. (IRR, B)

Attributes: NS
1.5 Credits

CHEM 37100-37200 Undergraduate Instruction in Chemistry (NLA)

Qualified undergraduates are given opportunities to participate in the department's instructional program, serving as laboratory assistants and/or tutors. Prerequisites: Permission of department. Pass/fail only.
1 Credit

CHEM 38100-38116 Selected Topics in Chemistry (LA)

Course content depends on interests of the registrants and may include informed discussions, outside reading, and either library or laboratory projects. This course may be repeated for credit for selected topics on different subjects. Prerequisites: Permission of instructor. (IRR)

Attributes: ENRE, NS
1-3 Credits

CHEM 39100-39200 Research in Chemistry (LA)

After consultation with the faculty of the Department of Chemistry, the student undertakes a research problem under the guidance of one or more faculty members. May be repeated up to a total of nine credits. Permission of department required. (F,S,Y)

Attributes: NS
1-3 Credits

CHEM 42100 Advanced Organic Chemistry (LA)

Detailed discussion of reaction mechanisms, isotope effects, linear free energy relationships, bonding theories, and advanced synthetic methods. Prerequisites: CHEM 22200 and CHEM 33200. (IRR)

Attributes: NS
3 Credits

CHEM 42200 Advanced Inorganic Chemistry (LA)

Chemistry of coordination compounds in light of modern theory. The electronic, magnetic, and spectral properties of transition metal complexes are considered, with the application of group theoretical techniques. Other topics include formation and stability of complex ions, mechanism of reactions of these ions, and complexes of transition metal ions of biological interest. Three hours of lecture per week. Prerequisites: CHEM 34200. (IRR)

Attributes: NS
3 Credits

CHEM 43200 Bio-Organic Chemistry (LA)

Covers the modern interface of chemistry and biology, as well as an examination of current developments in biotechnology. Topics include combinatorial chemistry and modern synthetic methods, protein engineering, innovative approaches to drug design, enzyme mimics, and in vitro evolution of functional biopolymers. Prerequisites: CHEM 32400. (IRR)

Attributes: NS
3 Credits

CHEM 44000 Inquiry and the Nature of Science for the Science Teacher (LA)

Considers issues pertaining to the nature and practice of science, especially as they relate to science education. Explores aspects that distinguish scientific inquiry from other forms of inquiry. Examines safety issues of teaching science in a classroom, and teaching science in the context of the community. Cross-listed with CHEM 44000 and PHYS 44000. Students can receive credit for only one of: BIOL 44000, PHYS 44000, CHEM 44000. Prerequisites: EDUC 34000 and junior standing. (IRR)

Attributes: NS
3 Credits

CHEM 44200 Computational Chemistry (LA)

A solid understanding of the theoretical aspects of computational modeling and its utility and limitations in predicting electronic structures, molecular geometries, chemical dynamics, and chemical reactivity. In addition, the student will gain a hands-on, working knowledge of modern computational methods. Prerequisites: CHEM 32400; CHEM 33200. (IRR)

Attributes: NS
3 Credits

CHEM 44400 Chemical Applications of Group Theory (LA)

The chemical applications of symmetry and group theory, with a special emphasis placed on chemical bonding and spectroscopy. The necessary mathematical underpinnings for this course, including vectors, matrix algebra, and group theory, are presented largely in terms of symmetry operations and related properties of molecules. Prerequisites: CHEM 34200 and CHEM 33100. (IRR)

Attributes: NS
3 Credits

CHEM 45200 Instrumental Analysis (LA)

Familiarizes students with the principles and applications of modern analytical instrumentation for chemical analysis through hands-on experience with a wide variety of instrumental techniques. Prerequisites: CHEM 32400; PHYS 10200 or PHYS 11800. (IRR).

Attributes: NS
3 Credits

CHEM 47100-47200 Undergraduate Instruction in Chemistry (NLA)

Qualified undergraduates are given opportunities to participate in the department's instructional program, serving as laboratory assistants and/or tutors. Prerequisites: Permission of department. Pass/fail only.
1 Credit

CHEM 48100-48110 Selected Topics in Chemistry (LA)

Course content depends on interests of the registrants and may include informed discussions, outside reading, and either library or laboratory projects. Prerequisites: Permission of instructor. (IRR)

Attributes: ENRE, NS
1-3 Credits

CHEM 48600 Chemistry Capstone: Senior Research Experience (LA)

After consultation with the faculty of the Department of Chemistry, the student undertakes a research problem under the guidance of one or more faculty members. Permission of Instructor is required. (F,Y)

Attributes: NS

3 Credits

CHEM 48700 Chemistry Seminar (LA)

Series of lectures dealing with current research topics in chemistry and biochemistry presented by the faculty, visitors, and students. One meeting per week. Pass/Fail only. Permission of department required.

Attributes: NS

1 Credit

CHEM 48800 Chemistry Capstone: Senior Thesis (LA)

Students prepare a written thesis and an oral presentation describing their senior chemistry research experience (CHEM 48600) or literature search under the guidance of their research advisor. Ethics in science is addressed. Seminars will also be given by guest speakers. Explores the relationships between the various components of the integrative core curriculum (ICC), the chemistry major, other learning experiences at the College, and future goals. Reflection on the role of a liberal arts education. Prerequisites: Senior standing and major in Chemistry. (S,Y)

Attributes: CP, NS, WI

3 Credits

Chinese (CHIN)

CHIN 10100 Elementary Chinese I (LA)

Introductory course designed to develop spoken and written skills in Mandarin Chinese. Students will be introduced to pinyin (sounds tones), vocabulary, characters (simplified version), and grammatical constructions. Participation, self-expression, and cultural awareness will be emphasized. Open to students with no previous Chinese, or by placement examination. (F,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

CHIN 10200 Elementary Chinese II (LA)

Continuation of CHIN 10100. Limited to students who have successfully completed CHIN 10100 with a grade of C- or better, or by permission of instructor. Prerequisite: CHIN 10100, or equivalent, with a grade of C- or better. (S,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

CHIN 20100 Intermediate Chinese I (LA)

This course will further develop speaking, listening, reading and writing proficiency. Special emphasis will be given to conversational and writing skills. Chinese culture, history and society will be discussed through selected readings. Prerequisite: CHIN 10200, or equivalent, with a grade of C- or better, or with instructor permission. (F,Y)

Attributes: HU

3 Credits

CHIN 20200 Intermediate Chinese II (LA)

Continuation of CHIN 20100. Emphasis will be given to oral and written proficiency. Prerequisite: CHIN 20100 with a grade of C- or better, or with instructor permission. (S,Y)

Attributes: HU

3 Credits

Cinema and Photography (CNPH)

CNPH 10100 Introduction to Film Aesthetics and Analysis (LA)

An analysis of the cinematic techniques utilized throughout film history to create meaning, suggest mood, develop psychology of characters, and communicate ideas. Emphasis is placed on classic American and foreign films, from the silent period to the present day. (F)

Attributes: CA, DV, HM, HU

3 Credits

CNPH 11100 Cinema Production 1 (NLA)

In this intensive production experience, students learn the rudiments of creating a motion picture. Aspects of preproduction (idea conception, budgeting), production (camerawork, directing), and postproduction (sound and picture editing) are introduced as students create multiple works of cinema art. (F,S)

Attributes: CCCS

4 Credits

CNPH 14100 Introduction to Photography (LA)

Introduction to photographic processes and historical, conceptual, and aesthetic concerns. Fundamentals of the art, including camera handling, exposure, digital image control and correction, lighting, composition, and printing. (F,S)

Attributes: 3B, CA, CCCS, ESTS, MC

4 Credits

CNPH 20310 The Photograph in Exhibition (LA)

Addresses the issue of photographic exhibition – touching on considerations of context, scale, and installation – as it affects the experience and meaning of images. Students will attend a series of photographic exhibitions and will critically evaluate the content of each through written papers and oral presentations. Prerequisites: Open only to B.S. cinema and photography students in the still photography concentration. Corequisites: CNPH 24000. (S)

1 Credit

CNPH 20500 Photographic Currents (LA)

Introduces key concepts, historical frameworks and current debates in the study of contemporary photography. Readings, lectures and visits to exhibitions focus on particular genres, ideas and international practices within the contemporary media arts, specifically photography. Topics vary on faculty expertise and research interest. Only offered at the Ithaca College London, New York and Los Angeles centers. Sophomore standing. (IRR)

Attributes: SCE

3 Credits

CNPH 20700 European Cinema (LA)

Concentrates on post-Second World War European cinema up to the present day. Study of the themes and styles of the European art film, authorship, and the relation of audience to film criticism. This course is offered only through the Ithaca College London Center. Prerequisites: Acceptance into the Ithaca College London program. (IRR)

Attributes: SCE

3 Credits

CNPH 21002-21012 Special Topics in Cinema Production (NLA)

Study of the cinema production process using significant works representative of important historic and contemporary ideas and movements. Screenings and readings guide discussions and analysis geared toward providing familiarity with a broad range of production models and connecting them to larger questions of culture production and artistic expression. Students in the B.S. cinema production concentration and B.F.A. degree in film, photography and visual arts may repeat the course once. Corequisite: CNPH 20300 Cinema in Exhibition for students in B.S. Cinema & Photography - Cinema Production concentrations only. Prerequisite: One course in the humanities or fine arts. (F-S)

4 Credits

CNPH 21400 Hollywood and American Film (LA)

The focus is on the historical, economic, and social formations in the evolution of a wide range of American cinemas, including Hollywood, independent work, documentary, experimental, and hybrid forms. A survey and analysis of films of representative American directors, styles, and genres will be conducted. (S)

Attributes: CA, HM, HU, TIDE, TWOS

4 Credits

CNPH 22000 Cinematic Currents (NLA)

Study of the cinema production process using significant works representative of important historic and contemporary ideas and movements. Screenings and readings guide discussions and analysis geared toward providing familiarity with a broad range of production models and connecting them to larger questions of culture production and artistic expression. Students in the B.S. cinema production concentration and B.F.A. degree in film, photography and visual arts may repeat the course once. Prerequisites: Sophomore standing or above. (F,S)

4 Credits

CNPH 22400 Cinema Production 2 (NLA)

In this intermediate-level motion picture production course, students complete several works of cinema, continuing where Cinema Production I left off in both technical and artistic sophistication. Students will make significant progress in the areas of sound design, cinematography, directing, and editing. Prerequisites: CNPH 11100. (F-S)

Attributes: CCCS

4 Credits

CNPH 24000 History of Photography (LA)

Study of photography from its beginning to its emergence as an important means of communication and expression. Critical examination of the growth and relationship of the contribution of photography to the visual arts. The development of the medium is seen through the eyes of past and present masters who struggled to understand and perfect it. Prerequisites: Nonmajors must have at least sophomore standing. (S)

Attributes: HU, MAP

3 Credits

CNPH 24200 Intermediate Photography (NLA)

Rigorous immersion in color processes and aesthetic concerns. Further technical mastery of image making, including large-format film, digital acquisition, high-resolution scanning, color control, and digital color output. Coursework introduces different modes of working and genres in the medium of photography. Students are asked to employ the various techniques to solve a variety of conceptual and aesthetic problems in the medium. Prerequisites: CNPH 14100. (F-S)

Attributes: CCCS

4 Credits

CNPH 29200-29244 Minicourses in Cinema, Photography, and Media Arts (NLA)

A series of short courses in specialized areas of cinema, photography, and media arts that do not meet the College guidelines for liberal arts designation. Department faculty participate in their areas of expertise. Cannot repeat specific topics. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester; sophomore standing. Pass/fail. (IRR)

1 Credit

CNPH 30000 Fiction Film Theory (LA)

Close visual analysis of film, focusing on cinematographic and directorial aspects of film style. Detailed examination of specific films and various theories. Prerequisites: CNPH 10100; at least two level-2 liberal arts courses, and WRTG 10600 or equivalent. (F)

Attributes: SCE, WI

3 Credits

CNPH 30100 History and Theory of Documentary (LA)

Investigation of the social, historical, cultural, and aesthetic implications of nonfiction film through historical overview of various films. This course uses social theory, economic theory, ethnography, historiography, and documentary theory to explore the intersection of historical contexts and film movements. Prerequisites: CNPH 10100 or TVR 12200; at least two level-2 liberal arts courses, and WRTG 10600 or equivalent. (S)

Attributes: HU, SCE, WI

3 Credits

CNPH 30200-30205 Selected Topics in Cinema and Photography (LA)

Intensive exploration and analysis of a specific area of film study, allowing students to concentrate their study in an upper-level course. Depending on faculty research interests and student demand, this course may cover genres, periods, directors, and other cinematic conceptual frameworks. Prerequisites: CNPH 21400 or level-2 course with an HU designation; permission of instructor. (IRR)

Attributes: SCE

3 Credits

CNPH 30400-30417 Selected Topics in Photography (NLA)

Exploration and analysis of a specific area of photography. Topics vary based on student demand and on faculty expertise and research interest. Prerequisites: CNPH 14100, CNPH 24200, or may vary depending on topic – refer to Undergraduate Course Offerings each semester. (F-S)

4 Credits

CNPH 30418 ST: Photography (NLA)

Exploration and analysis of a specific area of photography. Topics vary based on student demand and on faculty expertise and research interest. Prerequisites: CNPH 14100, CNPH 24200, or may vary depending on topic – refer to Undergraduate Course Offerings each semester. (F-S)

4 Credits

CNPH 30500 Contemporary Film Criticism (LA)

Analysis and evaluation of contemporary films and criticism. Students trace current feature films to their artistic and cinematic roots and assess the value of the new offerings. At the same time, they evaluate national criticism (not reviews) of the new offerings. (IRR)

Attributes: SCE

3 Credits

CNPH 31000 British Comedy: Film, Television, and Radio (LA)

Exploration of the development of the cultural characteristics of British Comedy programming for cinema, television, and radio. This class traces the evolution of comedic forms, and surveys contemporary genres—sketch, broken, sitcom, satire, stand-up, improv, the impressionists, and "sit-trag." Only offered in London. Prerequisites: three courses in humanities (HU) and/or social sciences (SS), junior standing and acceptance into the Ithaca College London Program. (Y)

Attributes: SCE

3 Credits

CNPH 32100 Advanced Cinema Production: Fiction (NLA)

This intensive, advanced-level course examines cinema as a form of storytelling. Students produce their own cinema projects and critical papers to familiarize themselves with techniques of aesthetics specific to narrative cinemas. A final project of the student's design and participation in a culminating public exhibition of work from the class are required. Prerequisites: CNPH 22400. (F-S)

4 Credits

CNPH 32200 Advanced Cinema Production: Nonfiction (NLA)

This intensive, advanced-level course examines the relationship between the theory and practice of cinematic documentary. Students produce short cinema projects and critical papers to familiarize themselves with techniques and aesthetics specific to documentary modes of cinema. A final project of the student's design and participation in a culminating public exhibition of work from the class are required. Prerequisites: CNPH 22400 or TVR 29900; open only to students in the B.S. cinema and photography, B.F.A film, photography, and visual arts, or B.A. documentary studies and production programs. (S)

4 Credits

CNPH 32300 Advanced Cinema Production: Experimental (NLA)

This intensive, advanced-level course examines cinema as a visual art form akin to painting, photography, and sculpture. Readings, lectures, and screenings are used to develop a basic context for relevant critical, historical, and theoretical issues, with emphasis placed on the various formal, conceptual, structural, and post-structural ideas that characterize 20th-century modern and contemporary art. Students produce their own cinema projects and critical papers to familiarize themselves with these ideas and practices. A final project and participation in a culminating public exhibition of work from the class are required. Prerequisites: CNPH 22400. (F)

4 Credits

CNPH 32400 Advanced Cinema Production: Animation (NLA)

Builds on animation fundamentals while giving students an opportunity to develop and create more ambitious animated projects. In the context of these projects, we will continue to discuss industry production methods, watch contemporary animators' work and examine the role changing technology plays in production. Prerequisite: MASS 20100. (Y)

4 Credits

CNPH 33001 Special Topics in Advanced Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y)

4 Credits

CNPH 33002 ST: Adv. Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y)

CNPH 33003-33009 Special Topics in Advanced Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y)

4 Credits

CNPH 33010 ST: Adv. Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y)

4 Credits

CNPH 33011 Special Topics in Advanced Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y)

4 Credits

CNPH 34200 Contemporary Photographic Genres (LA)

Through lectures, discussions, and production of photographic works, the student explores a range of key genres current in the field. Class locates contemporary photographic practices within a lineage of art historical, philosophical, and creative conversations from modernism, through postmodernism, to the current cultural moment. Photographic theories, criticism, classification, and aesthetics are explored and brought to bear on the student's photographic work. Prerequisites: Junior standing, CNPH 24000 and CNPH 24200. (F)

4 Credits

CNPH 42000 Thesis Cinema Production (NLA)

Individual experience preparatory to graduate study and careers in cinema production. This course is designed to bring together ideas, processes, practices, and theories in the service of the production of a substantial work of cinema. Students will pursue an entire project from conception to completion, combining intensive preproduction, production, and post-production with in-depth instruction on lab work, distribution, and exhibition. Throughout the course, emphasis is placed on instructor, peer, and self-critique. In addition to completion of the final production, students are expected to generate an essay that situates their work within the history of the medium and contextualizes its relationship to current intellectual and creative debates. Prerequisites: MASS 13400 or JOUR 11100 and CNPH 32100 or CNPH 32200, CNPH 32300, CNPH 32400, CNPH 32500, or CNPH 33001-33099. (F,S)

4 Credits

CNPH 44300 Photo Workshop (NLA)

Individual experience preparatory to graduate study and to careers in photography. Designed to fit the individual student's background and interests. May include research projects or advanced photography. Course participants are expected to complete an artist's essay that situates their work within the history of the medium and contextualizes its relationship to current intellectual and creative debates. Students may take a second semester of this course with permission of instructor. Prerequisites: CNPH 14100; CNPH 24200; 1 course from CNPH 30400-30499; senior standing. (F-S)

Attributes: UND

4 Credits

CNPH 45000 Cinema Production Practicum (NLA)

Capstone-level motion picture production course in which students undertake the primary creative and professional roles in a significant project under the direct supervision of a faculty specialist. The nature of the project will vary with each offering. Prerequisites: CNPH 11100; CNPH 22400; CNPH 32100, CNPH 32200, CNPH 32300, or CNPH 32400; senior standing; faculty permission. (IRR)

4 Credits

CNPH 49000 Internship: Cinema and Photography (NLA)

Jointly supervised work experience with a cooperating institution in the field of cinema or photography, intended to motivate the intern toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Prerequisites: Junior cinema and photography or film, photography, and visual arts major or minor; completion of the Park School internship procedures. Total may not exceed including London and Los Angeles internships. (F,S,U,W)

1-8 Credits

CNPH 49800 London Communications Internship (NLA)

A limited number of internships with cooperating institutions or organizations are available to communications majors. The jointly supervised work experience offers the opportunity to learn through observation and participation in a professional setting. Prerequisites: Junior or senior standing; completion of Park School internship procedures; approval of the dean in the semester preceding the London registration. Pass/fail only. (F-S) See "London Center."

3-6 Credits

CNPH 49900 Independent Study: Cinema and Photography (LA)

Intensive study of one of the following problems under the supervision of a faculty adviser: program evaluation, scriptwriting, production, programming, film and cinema studies, contemporary issues in communications. Comprehensive research paper and/or project is required. Prerequisites: Junior cinema and photography or film, photography, and visual arts major. (F-S)

1-4 Credits

Communication Studies (CMST)

CMST 11000 Public Communication (LA)

Exposure to a variety of speaking situations as a means to more comfortable, effective communication. Brief unit on language followed by exercises in various kinds of influential speaking. Emphasis is placed on the ethical responsibilities of the speaker and on the need for a critical posture by both speaker and listener. (F,S,Y)

Attributes: 3A, CCCS, ESTS, HU

3 Credits

CMST 11500 Business and Professional Communication (LA)

Study of public communication skills used in business and professional settings; emphasis is placed on presentational speaking and motive analysis; opportunity for individualized skill development provided. (F,S,Y)

Attributes: CCCS, ESTS, HU

3 Credits

CMST 12000 Communication, Culture, and Rhetoric (LA)

Introduction to fundamentals of rhetorical theory and rhetorical approaches to the study of communication. Emphasis is placed on the discovery and critical analysis of the rhetorical impulse in a variety of forms of persuasion. Includes a basic survey of rhetorical forms such as speeches, essays, advertising, films, and television. (F,Y)

Attributes: HM, HU, LMSP, LSCO, TIDE

3 Credits

CMST 12400 Courtrooms and Communication (LA)

An investigation of trials and legal advocacy as communication phenomena. The course includes observations of live criminal trials and participation in mock trials. (F,Y)

Attributes: 1, HU

3 Credits

CMST 14000 Small Group Communication (LA)

Examination of the dynamics of small group communication with a focus on problem-solving groups. Topics include leadership, cohesiveness, norms, roles, conflict, problem-solving techniques, conformity and deviance, networks, and listening skills. (F,S,Y)

Attributes: 1, SO, SS, TIDE, TWOS

3 Credits

CMST 14900 Fundamentals of Interpersonal Communication (LA)

Introduction to basic principles of interpersonal communication. Presents a theoretical perspective integrated with activities in and out of the classroom. Topics include interpersonal perception, language, nonverbal communication, self-concept, social roles, conflict management, and dynamics of intimacy. (F,S,Y)

Attributes: 1, SO, SS, TMBS

3 Credits

CMST 21500 Argumentation and Debate (LA)

Study of the philosophy of argument and logic in persuasion, debate forms, construction of the debate case, and responsibility for reasoned discourse in a society. Prerequisites: Sophomore standing. (F,Y)
Attributes: CCCS, HU, LMEL, LSCO
3 Credits

CMST 21900 Communication Studies Practicum (NLA)

Practical experience in speech on campus, at the intercollegiate level, and in the community at large; debate and legislative assemblies; discussion, oratory, impromptu, and extemporaneous speaking; oral interpretation and readers' theater. The instructor will designate the minimum activities required to receive credit. May be repeated for a total of Pass/fail only. Permission of instructor. (F,S,Y)

Attributes: UND
1 Credit

CMST 22600 Health Communication (LA)

Introduction to the field of health communication, including origins and development. Presents theories of health behavior and communication and how they relate to one another in practice. Examines communication between health professionals and clients, and the roles media play in the health care industry and the delivery of health services. Cross-listed with HLTH 22600. Students may not receive credit for both HLTH 22600 and CMST 22600. Prerequisites: Sophomore standing or above. (F,Y)

Attributes: SS
3 Credits

CMST 39500 Internship: Communication Studies

1-12 Credits

CMST 39700 Directed Readings (LA)

Study of an extensive selection of literature, compiled by an instructor, on a topic of special interest. This literature should further student development within a relevant topic area that is not otherwise covered in an available course. Offered on demand only. Prerequisites: in communication studies; junior standing; approval of the communication studies faculty.

Attributes: HU, SS
1-4 Credits

CMST 42902-42910 Seminar in Public Communication (LA)

In-depth study of a specific topic in public communication, such as the speaking of a particular person (Nixon) or type of person (president), communication strategies of a movement (women's) or kind of rhetoric (famous pleas). Prerequisites: Senior standing or equivalent in communication studies. (IRR)

Attributes: HU
3 Credits

CMST 49500 Internship: Communication Studies (NLA)

Work-study project designed by the student in consultation with a sponsoring faculty member and a cooperating practicing professional. The proposal must define the work to be done, the theories to be explored, and the student's plan for submitting a written report based on his or her experience. Offered on demand only. No more than may be used toward the major. Prerequisites: Communication studies major, with a cumulative GPA of 2.30 and 3.00 in the major; permission of communication studies faculty. Variable credit, up to .

Attributes: UND
1-12 Credits

CMST 49800 Directed Research (LA)

Research project arranged at student request with an individual instructor in communication studies. Offered on demand only. No more than may be used toward the major. Prerequisites: Communication studies major or minor, with a cumulative GPA of 2.30 and 3.00 in the major; junior standing; permission of communication studies faculty.

Attributes: UND
1-4 Credits

CMST 49900 Independent Study: Communication Studies (LA)

Special reading and research under the supervision of the department. Must not duplicate standard coursework. Application must be made to the communication studies faculty before preregistration for the semester in which the study is to be undertaken. Offered on demand only. May be repeated for a total of Prerequisites: Cumulative GPA of 2.30 and 3.00 in major; junior or senior standing; permission of communication studies faculty.

Attributes: UND
1-4 Credits

Computer Science (COMP)

COMP 10500 Introduction to Website Development (LA)

Introduction to the design and construction of responsive interactive websites using current technologies and tools. The course covers principles of effective website design, the design process, and implementation techniques. A term project building a large interactive, mobile-ready website is required. Students who have completed or are taking COMP 20500 may not receive credit for this course. (F,S,Y)

Attributes: CA, CCCS, ESTS, MC, NS, TWOS
3 Credits

COMP 10600 Multimedia Programming (LA)

Fundamental concepts and skills in media programming are covered through design and development of interactive, multimedia websites and applications. Assignments include hands-on projects built using text, images, video, audio, animation, and interactivity. (F,S,Y)

Attributes: CA, CCCS, ESTS, NS, TIII
3 Credits

COMP 10700 Introduction to 2D Game Development (LA)

An introduction to the design, development, and implementation of two-dimensional (2-D) games. Topics to be covered will include principles of designing games and the computational methods and tools used to create game content. Some programming will be introduced, but no prior computing experience is needed. Students will also learn the basic principles of project management and teamwork. Concepts will be put into practice as teams design and develop their own 2-D game. The course will be a combination of lectures and hands-on exercises. (F,Y)

Attributes: 2B, CA, MC, NS, TIII
4 Credits

COMP 11000 Computers and Information Technologies (LA)

Develops student expertise in the use of a computer and the major software tools used for personal and professional productivity, with an emphasis placed on spreadsheets and database management systems. Includes an introduction to the components of a computer system and to social and ethical issues surrounding the use of a computer. Students may receive credit for only one of the following courses: COMP 11000, HLTH 13901, EXSS 13900. Students who have already taken COMP 20100 cannot receive credit for this course. (F,S,Y)

Attributes: 2B, NS, QL
3 Credits

COMP 11500 Discrete Structures for Computer Science (LA)

An introduction to discrete structures for computer science. The major topics of study include sets, proof techniques, logic, predicate logic, relations and functions, counting and probability, matrices, and induction. Prerequisites: COMP 17100. (S,Y)
Attributes: 2B, NS
4 Credits

COMP 12200 Introduction to Robotics Using Legos (LA)

This course introduces students to robotics and programming using Legos. Students will build various type of robotic objects incorporating output devices such as motors and lights as well as sensor input devices such as touch sensors, light sensors, sonar sensors, and rotation sensors. The emphasis is on hands-on labs. Programs to control and robots will be developed using an object-oriented language such as Java or C++ and cover the basic object-oriented concepts. Engineering concepts involving the use of gears will be briefly explored. The emphasis is hands-on labs along with presentations and demonstrations. This course is designed for students who have little or no previous programming experience. The course may not be taken for credit after COMP 22000 or COMP 22500. (IRR)
Attributes: 2B, NS
3 Credits

COMP 12400 Geographical Information Systems (LA)

Exploration of analytical and computational concepts and skills necessary to create, manipulate, analyze, visualize, and manage spatial databases. Skill-development in using a geographic information system (GIS) in a computer laboratory. Prerequisite: WRTG 10600, ICSM 108xx or ICSM 118xx. (F,Y)
Attributes: CCCS, ESTS, NS, WI
3 Credits

COMP 17000-17001 Introductory Computer Project (NLA)

Student undertakes a project to design and implement a computer application under the guidance of one or more faculty members. May be repeated for a total of Prerequisites: Permission of the computer science faculty. (F,S,Y)
1-3 Credits

COMP 17100 Principles of Computing Science I (LA)

A disciplined introduction to problem-solving methods and program development. Topics include standard control structures, basic data structures, algorithms and abstraction mechanisms, testing, and an introduction to algorithm analysis. (F-S,Y)
Attributes: 2B, NS
4 Credits

COMP 17200 Principles of Computer Science II (LA)

This course reinforces and strengthens the foundational concepts learned in Computer Science I and provides additional experience with problem solving and algorithmic thinking independent of the programming language used. It provides the requisite skills needed by majors and minors to successfully progress in Computer Science. The course is a combination of lectures, in-class exercises, and labs, with a strong hands-on approach. Prerequisite: COMP 17100 with a grade of C or better. (F,S,Y)
Attributes: NS
4 Credits

COMP 17900 Topics: Computer Languages (LA)

The syntax, data structures, and distinctive features of a specific programming language chosen from those not given detailed coverage in any regularly offered computer science course. Programming assignments develop students' skills in the language and illustrate typical applications. Possible languages include C++, LISP, and PROLOG. Restricted to students who have not already taken a course treating in detail the language offered by this course. May be repeated for credit with different languages. Prerequisite: COMP 17100 with a grade of C or better. (IRR)
Attributes: UND
1 Credit

COMP 19000 Selected Topics in Computer Science (LA)

Topics to be determined by the instructor and the Department of Computer Science. May be repeated for credit for selected topics on different subjects. (IRR)
Attributes: NS
1-4 Credits

COMP 19200 Independent Study in Computer Science (LA)

Enrichment and extension of the regular curriculum to areas not covered in existing courses. Arranged individually between student and faculty sponsor according to guidelines available from the department. (IRR)
Attributes: UND
1-4 Credits

COMP 20200 Computational Foundation of Emerging Media (LA)

Introduction to the concepts, tools, and computational methods underlying the most popular forms of emerging media. Topics include existing software tools for design, development, and analysis of emerging media and the computational methods and concepts underpinning both the tools and the media itself. Hands-on exercises in programming, scripting, and using a variety of software packages. Prerequisites: COMP 17100. (S, Y)
Attributes: NS
4 Credits

COMP 20500 Advanced Web Programming (LA)

Introduction to the creation of interactive and dynamic web pages. Students study the technologies and concepts necessary to add interactive scripts to web pages (client-side programming), receive and supply information to web pages (server-side programming using scripting), and store information (database creation). Prerequisites: COMP 17200 with a grade of C or better. (F,Y)
Attributes: CCCS, NS
4 Credits

COMP 20700 Game Development and Technologies (LA)

Covers the methods and technologies used to implement and test video games, with an emphasis on the software design and development, prototyping, and testing phases. Additionally, students are introduced to the various technologies (graphics, artificial intelligence, game physics, audio, and networking) and software tools used by game developers. This course may not be counted toward a computer science major. Prerequisites: COMP 10700 or COMP 17100 with a grade of C or better. (S,Y)
Attributes: NS
4 Credits

COMP 21000 Introduction to Computer Organization and Systems (LA)

Computer structure and organization. Investigation of operating systems, including processes, memory management, and file systems.

Prerequisites: COMP 22000 with a grade of C or better. (S,Y)

Attributes: NS

4 Credits

COMP 22000 Introduction to Data Structures (LA)

This course covers basic data structures, including stacks, queues, trees, and graphs. Fundamental algorithmic techniques, such as sorting and searching, are also covered. Prerequisites: COMP 17200 with a grade of C or better; COMP 11500 (with a grade of C or better) or MATH 11100 (may be taken concurrently). (F,Y)

Attributes: NS

4 Credits

COMP 27000-27001 Intermediate Computer Project (NLA)

Students undertake a project to design and implement a substantial computer application under the guidance of one or more faculty members. Permission of the computer science faculty required. May be repeated for a total of six credits. (F,S,Y)

1-3 Credits

COMP 29000 Selected Topics in Computer Science (LA)

Topics to be determined by the instructor and the Department of Computer Science. May be repeated for credit for selected topics on different subjects. (IRR)

Attributes: NS

1-4 Credits

COMP 29200 Independent Study in Computer Science (LA)

Enrichment and extension of the regular curriculum to areas not covered in existing courses. Arranged individually between student and faculty sponsor according to guidelines available from the department. (IRR)

Attributes: UND

1-4 Credits

COMP 30600 Mobile Development (LA)

Study of the basic concepts involved in developing applications for mobile devices including phones and tablets. Topics include Model-View-Controller architectures, user-interface design, multi-view applications, animation, threads, touch gestures, accessing sensors, and databases.

The course includes practical experience through a semester-long team project to design and implement a mobile app. Prerequisites: COMP 22000 with a grade of C or better. (F,E)

Prerequisites: COMP 22000 with a grade of C or better. (F,E)

4 Credits

COMP 31000 Implementation of Computer Operating Systems (LA)

In-depth investigation of the major concepts, algorithms, and implementation principles of computer operating systems. Both theoretical and practical aspects of operating systems are considered; students undertake substantial programming projects to illustrate concepts. Topics include scheduling; resource and storage allocation; problems of resolving deadlock, exclusion, and synchronization; memory allocation; secondary storage implementation; and distributed system structures. Prerequisites: COMP 21000 with a grade of C or better. (IRR)

Attributes: NS

4 Credits

COMP 31100 Algorithms and Data Structures (LA)

Analysis of major algorithms and data structures for primary memory. Data structures include graphs, dynamic hash tables, and balanced tree structures. Other major topics are algorithm design techniques (greedy method, divide/decrease and conquer, recursion and dynamic programming, branch and bound, and approximation algorithms).

Prerequisites: COMP 22000 and COMP 11500 with a grade of C or better. (S,Y)

Attributes: NS

4 Credits

COMP 32100 Programming Languages (LA)

An intermediate-level course in programming language constructs, including design issues, paradigms and corresponding machine models, language constructs, syntax, and semantics. Includes a survey of actual programming languages representative of common paradigms, critically comparing the design choices and features unique to each. Algorithmic, functional, and logical languages are considered. Prerequisites: COMP 21000 and COMP 22000 with a grade of C or better. (F,Y)

Prerequisites: COMP 21000 and COMP 22000 with a grade of C or better. (F,Y)

Attributes: NS

4 Credits

COMP 32500 HCI: User Interface Design and Development (LA)

This course presents the fundamental concepts of design, prototyping, evaluation, and implementation of user interfaces (UIs), which are part of the field of HCI (human-computer interaction). Topics of study include user-centered design, task analysis, prototyping, interface design principles, user testing, interface metaphors, windows and event-driven programming, and heuristic evaluation. Principles of human perception and cognition are applied to user interface design. Web interface designs and three-dimensional user interfaces are also studied.

Prerequisites: COMP 17200 with a grade of C or better and COMP 20500 or COMP 20700 or COMP 22000 with a grade of C or better. (S,Y)

Attributes: NS

4 Credits

COMP 33000 Introduction to Virtual Reality (LA)

This course introduces the fundamental concepts of virtual reality (VR), with an emphasis on the interdisciplinary nature of VR system development and applications. Topics include survey and analysis of VR hardware, software, and methodologies; advanced topics in computer graphics; interaction and navigation within VR; simulation and behaviors in virtual worlds; human perception; and applications of VR. The course includes hands-on experience with VR hardware and software. Prerequisites: COMP 20700 or COMP 22000 with a grade of C or better. (F,E)

Attributes: NS

4 Credits

COMP 34500 Introduction to Software Engineering (LA)

An introduction to the software development process, focusing on analysis, design, programming, and testing of a medium-scale team project. Object-oriented software engineering practices are discussed, with an emphasis on the unified process, use case-based design, and the unified modeling language (UML). Testing, risk analysis, and design patterns are also addressed. Prerequisites: COMP 22000 with a grade of C or better. (S,Y)

Attributes: NS

4 Credits

COMP 35400 Intelligent Systems (LA)

Explores key concepts of intelligent systems, including knowledge-based search techniques; automatic deduction, knowledge representation using predicate logic, and machine learning. Selected applications of artificial intelligence, such as problem solving, data mining, game playing, expert systems, planning, natural language understanding, and computer vision. Requires implementation of a significant intelligent software system.

Prerequisites: COMP 22000 with a grade of C or better. (S,E)

Attributes: NS

4 Credits

COMP 36500 Computer Networks (LA)

Basic concepts of computer networks and data communications.

The major topics include transmission media, error detection, routing, client-server models, remote execution, and encryption. Includes a discussion of characteristics of local and wide area networks, heterogeneous networks, and case studies of current networks. This course contains a laboratory component that includes topics such as network configuration, topologies and protocols, and installation of networks. Prerequisites: COMP 11500 and COMP 21000 with a grade of C or better. (F,O)

Attributes: NS

4 Credits

COMP 37000-37001 Intermediate II Computer Project (NLA)

After consultation with the computer science faculty, the student undertakes a project to design and implement a substantial computer application under the guidance of one or more faculty members.

Permission of the computer science faculty required. May be repeated for a total of six credits. (F,S,Y)

1-3 Credits

COMP 37500 Database Systems (LA)

Study of the basic concepts involved in database systems, including database architecture, data models, database design, and query techniques. The course includes practical experience through a semester-long team project to design and implement a database and related applications using SQL. Prerequisites: COMP 17100; COMP 20500 or COMP 22000 or COMP 22500 all with a grade of C or better. (F,E)

Attributes: NS

4 Credits

COMP 38500 Emerging Media Project (NLA)

Hands-on introduction to project design, development, implementation, and testing, with emphasis on the knowledge and skills required to successfully complete the production cycle, including team dynamics, market analysis, project management, documentation, and testing.

Students work in teams on projects assigned by the instructor.

Cross-listed with TVR 38500; students cannot receive credit for both COMP 38500 and TVR 38500. Open only to emerging media majors.

Prerequisites: COMP 20200; junior standing. (F-S, Y)

4 Credits

COMP 39000 Selected Topics in Computer Science (LA)

Topics to be determined by the instructor and the Department of Computer Science. May be repeated for credit for selected topics on different subjects. (IRR)

Attributes: NS

1-4 Credits

COMP 39200 Independent Study in Computer Science (LA)

Enrichment and extension of the regular curriculum to areas not covered in existing courses. Arranged individually between student and faculty sponsor according to guidelines available from the department. (IRR)

Attributes: UND

1-4 Credits

COMP 41000 Algorithms + Organization = Systems (LA)

In-depth investigation of the major concepts and implementation principles of computer systems (operating systems, networks, databases, etc.) through the exploration of seminal algorithms used in systems. Students read research papers and conduct experiments on algorithms in a systems environment. Topics may include scheduling, resource and storage allocation, problems of resolving deadlock, exclusion, and synchronization, memory allocation, secondary storage implementation, distributed system structures, switching, and IP addressing. Prerequisites: COMP 21000 and COMP 31100 both with a grade of C or better. (F,O)

4 Credits

COMP 41500 Computer Graphics (LA)

An introduction to the fundamentals of computer graphics, including the mathematical foundations of graphics techniques; 2D and 3D algorithms for geometry, transformations, viewing, and lighting; stereo viewing, ray tracing, and radiosity. At least two different graphics APIs will be introduced and will be used to implement graphics programs and provide hands-on experience in the topics covered. Prerequisite: COMP 31100 or COMP 33000 with a grade of C or better. (IRR)

Attributes: NS

4 Credits

COMP 45500 Search Engines and Recommender Systems (LA)

Explores how information retrieval and recommendation systems such as Netflix, Facebook, and Pandora, are designed and implemented. Combines development of information retrieval skills such as web-crawling, text & multimedia processing, boolean & vector-space modeling, classification, clustering, and similarity analysis. Will involve hands-on implementation of computer software systems. Prerequisites: COMP 22000 and one 300-level COMP or MATH course all with a grade of C or better. (S,O)

4 Credits

COMP 45600 Machine Learning (LA)

Explores supervised learning (including linear/logistic regression, decision trees, and neural networks) and unsupervised learning (including clustering, anomaly detection). Covers both theoretical concepts and practical applications of machine learning, and provides opportunities to implement and experiment with these algorithms on real-world data sets.

Prerequisites: COMP 22000 with a grade of C or better and one 300-level COMP or MATH with a grade of C or better. (IRR)

4 Credits

COMP 46500 Topics in Networks (LA)

This course investigates contemporary advanced algorithmic and networking concepts. Topics change depending on the semester but include the structure and function of networks, security in networks, and network simulations. The course exposes students to computing research and requires at least one significant programming project.

Prerequisites: COMP 31100 and COMP 36500 both with a grade of C or better. (IRR)

Attributes: NS

4 Credits

COMP 47000-47001 Advanced Computer Project (NLA)

Students undertake a project to design and implement a substantial computer application under the guidance of one or more faculty members. May be repeated for a total of Prerequisites: Junior standing and permission of the computer science faculty. (F-S,Y)
1-3 Credits

COMP 47500 Senior Project (LA)

Offers students the opportunity to consolidate theory and apply concepts to a computer-based problem, thus enhancing their understanding of various facets of the computing discipline. Students are responsible for the analysis, design, development, documentation, implementation, and testing of the computer system. The project may be carried out singly or in small groups of up to four people. Prerequisites: Senior standing; permission of instructor. (F-S,Y)

Attributes: NS

3 Credits

COMP 48500 Emerging Media Capstone (NLA)

Working as part of a team, the student designs, develops, and documents a significant emerging digital media project under the guidance of one or more faculty members. Cross-listed with TVR 48500; students cannot receive credit for both COMP 48500 and TVR 48500. Prerequisites: COMP 38500 or TVR 38500 with a minimum grade of C-. (F-S, Y)

4 Credits

COMP 49000 Selected Topics in Computer Science (LA)

Topics to be determined by the instructor and the Department of Computer Science. May be repeated for credit for selected topics on different subjects. (IRR)

Attributes: NS

1-4 Credits

COMP 49200 Independent Study in Computer Science (LA)

Enrichment and extension of the regular curriculum to areas not covered in existing courses. Arranged individually between student and faculty sponsor according to guidelines available from the department. (IRR)

Attributes: UND

1-4 Credits

COMP 49500 Computer Science Capstone (LA)

Students explore connections between the integrative core curriculum, their computer science major, other learning experiences while at Ithaca College or abroad, and future goals. Students create a written reflection that integrates their various learning experiences and how their experience at Ithaca College has prepared them to achieve their future goals. Students also prepare a cover letter, curriculum vitae, and personal statement and identify career opportunities; and develop a showcase electronic portfolio. Prerequisites: Senior Standing; Computer Science and Emerging Media Computation majors only. (F,Y)

Attributes: CP

1 Credit

COMP 49800 Computer Science Internship for Majors and Minors (NLA)

A computer science project (carried out within an organization outside the department) that is not routine, entails significant work experience, and has substantial academic content. The student is responsible for developing a project proposal and completing it in conjunction with a faculty sponsor from the department and a supervisor from the outside organization. At the end of the project, the student shall present a report based on the experience. With departmental approval, up to may be counted as upper-level elective credit toward a major in computer science or mathematics computer science or a minor in the Computer Science Department. Students should have completed three-fourths of the major or minor to be eligible for this opportunity. Prerequisites: Permission of a faculty sponsor. 1-(IRR)

1-12 Credits

Culture and Communication (CLTC)

CLTC 10000 Introduction to Culture and Communication (LA)

Introduction to the interdependent relationship between symbols, rituals, artifacts, and patterns of thought of cultural groups and the communication practices of those groups. Core concepts are demonstrated through an illustrative case focused on a social issue, problem, or other phenomenon. Students are also introduced to resources and basic skills that enhance study in the liberal arts. Not open to seniors except by permission of instructor. (F,S)

Attributes: DV, LMSP, LSCO

3 Credits

CLTC 23001 Special Topics in Media Literacy (LA)

Using the principles and practice of media literacy, this course will examine how media messages are constructed and how they affect our individual and collective understanding of specific topics. Students will develop critical decoding skills through analysis of current and historical media documents. A wide range of media forms will be explored, including digital, audio, audiovisual, and print-based media. Each year the seminar will focus on a different topic reflecting current issues and media literacy curricula developed at the College (e.g., environmental issues, social justice, peace and war). In presidential election years, the topic will be media construction of presidential campaigns. Prerequisites: Sophomore standing. Can be repeated for up to six credits when topics vary. (F, Y)

Attributes: HU

3 Credits

CLTC 48000 Senior Seminar in Culture and Communication (LA)

In this capstone course each student will undertake a major scholarly research project involving a topic related to her or his designated area of inquiry. Drawing on the skills and knowledge developed through previous coursework, and with the mentoring of the seminar instructor, each student will execute a suitable research design and present the results both in writing and orally in a public forum. Prerequisites: Senior standing in culture and communication major; TVR 26200, CNPH 30000 or CNPH 30100. (S)

Attributes: CP

3 Credits

CLTC 49000 Internship: Culture and Communication (NLA)

The internship provides a structured intensive learning experience in an organization dedicated to research, planning, policymaking, or service provision in an area related to culture and communication. Supervision is provided by an on-site professional preceptor. Students are required to submit periodic written field reports, as well as a final internship experience report. Prerequisites: Junior standing or above and permission of instructor. 1 to (F-S, Y)

1-6 Credits

CLTC 49900 Independent Study: Culture and Communication (LA)

Intensive study of the theoretical and empirical relationships between culture and communication. These projects will be conducted under the supervision of a faculty adviser and will require a comprehensive research paper and/or project. A proposal for the topic and specific plans must be approved by the dean's office of the Division of Interdisciplinary and International Studies. Prerequisites: Junior standing or above and permission of instructor. 1 to (F-S,Y)

1-4 Credits

Culture, Race and Ethnicity (CSCR)

CSCR 10600 Introduction to African Diaspora Studies (LA)

Introductory survey of the major topics and methodologies involved in studying the roots and routes of the African diaspora. Investigation of the physical and cultural movements between Africa and the Americas. Topics include the prominence of Africa in global history; the movement of African people (both voluntary and forced migrations); the enslavement of African peoples in the Americas; cultural aesthetics and identities; colonialism; and resistance. Employs an interdisciplinary approach drawing from disciplines in history, politics, cultural studies, social policy, and sociology. (F,S,Y)

Attributes: AN3, CNSL, DV

4 Credits

CSCR 10700 Introduction to Latino/a/x Studies (LA)

This interdisciplinary course explores the varied experiences of Latino/a/x people in the United States, past and present. Drawing from the disciplines of history, anthropology, literature, women's studies, and ethnic studies, it examines the historical roots of Latino/a/x, Chicano/a, Puerto Rican, Cuban-American, Central, and South American peoples. In particular, it will focus on notions of family, gender, class, race, political economy, language, and sexual identity in relation to public policy and Latino/as' struggles for place and power. Its approach is historical and comparative and it emphasizes the multiplicity of Latino/a/x experiences as well as the strategic deployment of the term Latino/a/x. (F,S,Y)

Attributes: AN3, CNSL, DV, LAEL, LAGC

4 Credits

CSCR 10900 Introduction to Native American and Indigenous Studies (LA)

Offers an interdisciplinary survey and introduction to the field of Native American Indigenous Studies. Focuses on how past and present Native American experiences both in the United States and with its colonial precursors have shaped this pan-ethnic group's identity, cultures, political power, and ways of life. Examines approaches to Native American Indigenous Studies and the way Native Americans have navigated their relationship to others historically and today. (F,S,Y)

Attributes: AN3, CNSL, DV, SO, TIDE, TPJ

4 Credits

CSCR 11000 Introduction to Asian American Studies (LA)

Offers a critical introduction to Asian American Studies. Focuses on Asian migrations to the U.S., especially in response to labor demands in the 18th -21st centuries. Examines the ways these migrations and subsequent generations of Asian Americans have shaped the economy, racial hierarchies/power, notions of citizenship and cultural belonging, and movements for freedom and autonomy. Discusses the structure and systems of race in the United States as they apply to Asians within a broader context. (F,S,Y)

Attributes: AASE, AN3, CNSL, DV, HM, RPRE, SO, TIDE, TPJ

4 Credits

CSCR 12000 U.S. Civil Rights Seminar (LA)

The primary goal of the course is to introduce students to the history, philosophies, and practices of the civil rights movement in the United States, with a particular focus on the work and writings of Martin Luther King Jr. By utilizing readings, class discussions, and a visit to significant historical landmarks of the movement, students will develop an understanding of the differing approaches to social change and their strategic use within different parts of the modern day civil rights era. In addition, students will build an academic foundation for the required civil rights tour to be held during fall break. The seminar is open to Martin Luther King Jr. Scholar Program participants only. For more information scholars should review the program requirements. Prerequisites: None. 1

Credit. (F, Y)

Attributes: SS

1 Credit

CSCR 12300 Introduction to Culture, Race & Ethnicity Concepts (LA)

Introduces students to key concepts in culture, race, and ethnicity studies. Drawing from cultural studies, comparative ethnic studies, and gender and sexuality studies, it investigates how racial and ethnic identity politics shape institutional and social policies, cultural expressions and aesthetics, and resistance movements. Particular attention will be paid to the ways communities of color have negotiated oppression, generated knowledge, and secured dignity and self-determination. (F,S,Y)

Attributes: AN3, CNSL, DV, LMSF, LSCO, RPRE, SO, TIDE, TPJ

4 Credits

CSCR 14500 Politics of Identity: Race, Ethnicity, Culture (LA)

Explores the impact of race on both individual identities and on the life opportunities afforded to different racial groups in the United States.

Focuses on understanding how identity and race are socially and politically constructed in order to devise an anti-racist politics that cuts across racial and cultural differences. Cross-listed with POLT 14500.

Counts as a political theory course for politics majors. (F,Y)

Attributes: HM, SO, SS, TIDE, TPJ

3 Credits

CSCR 20700 Hip Hop Feminism: That's a Bad B@tch (LA)

Explores the development and growing perspective of Hip Hop Feminism. Examines the historical, political, racial, economic, and social importance of hip hop as a cultural movement. Particular attention is given to hip hop's main tenets; the political economy of racialized representations; and the legacy and agency of cultural expressions. Uses an intersectional consciousness to explore patriarchy, sexism, and racism through works by early womanist, hip hop feminists and contemporary scholars, artists, performers, and writers. (IRR)

Attributes: AACH, AASE, ADCH, ADSE, LSCH, LXME, NACH, NASE, WGS, WGS1

4 Credits

CSCR 21100 American Gangster: Social Portrayals of Gangs (LA)

Analyzes the social portrayals of American gangsters in films, with an emphasis on deconstructing portrayals of race, class, ethnicity, gender, and sexuality. Examines the social, political, and economic factors involved in the emergence of criminal organizations (mafias, prison gangs, street gangs, and violent motorcycle clubs) in the United States. Investigates an array of multi-ethnic and multi-racial gangsters, with a significant focus on Latinos in the U.S. (Y)

Attributes: ADCH, ADSE, LMEL, LSCH, LSCO, LXME, MAP, RPRE, SCE
4 Credits

CSCR 21500 Asian Americans Speak Out: Resisting Mainstream History (LA)

Introduces students to oral history methodologies and theories within the trajectory of Asian American studies. Critically interrogates what constitutes history and the knowledge that is produced through it. Examines how and why this stake in oral history methodology emerges as a strategy for survival, the incorporation of once neglected accounts into academic narratives, and the challenge posed by this institutionalization to contemporary scholars in Asian American studies. (Y)

Attributes: AAPP, AASE, AN3, DV, RPRE, SO, TIDE, TPJ
4 Credits

CSCR 22000 Case Studies in Global Justice (LA)

This seminar will introduce students in the Martin Luther King Jr. Scholar Program to the study of social justice in an international and comparative context. In general the seminar is designed to engage scholars in analysis, discussion, writing, and action that will contribute to the development of global citizens who have the skills, perspectives, and motivation to work effectively for social justice. Each seminar will examine a particular case study while utilizing the work of Martin Luther King Jr. The seminar also provides the academic framework that explores the nexus between race, migration, and social justice. Through both individual and group work students will work to draw conclusions and life lessons from their international research and experiences. This seminar may be taken for 0 or and is open to Martin Luther King Jr. Scholar Program participants only. For more information scholars should review the program requirements. Prerequisites: CSCR 12000 or CSCR 12100. (F, Y)

Attributes: SS
0-1 Credits

CSCR 22200 Japanese Americans and Mass Incarceration (LA)

This course offers students an in-depth study of Japanese American World War II incarceration. We will explore Japanese American incarceration comparatively with other forms of containment (settler colonialism, prisons, immigrant detention centers, etc.) to understand how the U.S. functions as a carceral state. (O)

Attributes: AACI, AASE, ADCI, ADSE, DV, NACI, NASE, SO, TIDE, TPJ
4 Credits

CSCR 22400 Race, Place, and Power (LA)

Explores how relationships to place and environment shape and are shaped by race, power, and resistance with a focus on sites of U.S. occupation in the Pacific, such as Hawai'i, Guam, Okinawa, and the Philippines. Investigates the relationship between tourism, militarization, and colonization, with a special focus on ways that contemporary scholars, artists, and writers seek to decolonize the Pacific Islands and assert Indigenous sovereignty over the Pacific's lands, cultures, and futures. (F,IRR)

Attributes: AAPP, AASE, LXME, NAPP, NASE, RPRE
4 Credits

CSCR 22600 Introduction to Black Church Studies (LA)

Introduces the historical development of the Black Church in America, African American religious thought, and its contribution to the religious progress of Black Americans. Takes a multidisciplinary and interdisciplinary approach to understand how Black Christians wrestle with what it means to be Black and Christian in America. Uses historical, theological, ethical, rhetorical, and sociological foundations of that experience from an academic perspective. (F,IRR)

Attributes: RPRE, RSEA
4 Credits

CSCR 23400 Black Cinema: Exploring the Black Image in Film (LA)

Explores the image of Black people in film in a social and historical context. Examines the role of the Black director and Black cinema conventions. Introduces students to visual and textual reading methods used in Black studies and ethnic studies. Topics include, but are not limited to, spectatorship, music videos, Caribbean and Black British cinema, afrofuturism, the Black romantic narrative, racial conflict, and blaxploitation. (Y)

Attributes: ADCI, ADSE, RPRE, WGS, WGSJ
4 Credits

CSCR 23700 Policing the Borderlands: Power, Policy, and Justice (LA)

Examines the history of the US-Mexico Borderlands, with a special focus on power, policy, and justice. Investigates how state policy from the colonial period to the present has shaped people's sense of community and national identification, and how peoples of multiple cultures and shifting national affiliations have historically negotiated power, policy, and justice in this region. Considers how power and justice are manifested in state policy and contested through acts of resistance and violence. Topics explored include policies associated to citizenship, statehood, immigration, sovereignty, education, crime, and enforcement. (Y)

Attributes: DV, LAEL, LAGC, LMEL, LSCO, LSPP, LXME, NAPP, NASE, RPRE
4 Credits

CSCR 24200 Miscegenation and Racial Binaries (LA)

Introduction to the history, policies, laws, language, and cultural mores around interracial marriage and biracialness beyond racial binaries. Prerequisites: Sophomore standing. (IRR)

Attributes: ADPP, ADSE, NAPP, NASE, SS
3 Credits

CSCR 25000 Hip-Hop Cultures (LA)

Examines the historical, political, racial, economic, and social importance of hip-hop as a cultural movement. Particular attention is given to hip-hop's main tenets (writ'ing, b-boy'ing, dj'ing, and mc'ing); the political economy of racialized representations; and the legacy and agency of cultural expressions. (Y)

Attributes: 1, AACH, AASE, ADCH, ADSE, DV, H, LSCH, LXME, NACH, NASE, SCE, SS, WGS
3 Credits

CSCR 25600 The Politics of Whiteness (LA)

Examines the emergence of whiteness as a category that determines the distribution of rights and privileges including voting rights, property rights, and the right to own one's own body. Explores the politics of whiteness in relation to culture, ideology, sexuality, social movements, and cross-racial alliances. Prerequisites: Sophomore standing. (F,Y)

Attributes: AAPL, AASE, ADCH, ADPL, ADSE, AN3, DV, LSPL, LXME, NAPL, NASE, SO, TIDE, TPJ
3 Credits

CSCR 26100 Watching Race in American Media (LA)

Explores how representations of racial and ethnic identities in U.S. film, television, and music influence the construction of political, racial, and gender identities nationally. Investigates how cultural representations of race, ethnicity, and gender are central to the development of U.S. mass culture and consumerism, nationalism, citizenship, and social movements. Particular attention is given to the role of black and Latino/a culture and music in developing strategies of resistance to oppression. (Y)

Attributes: AACH, AASE, ADCH, ADSE, DV, HM, LSCH, LXME, MAP, NACH, NASE, SCE, TIDE, TPJ

3 Credits

CSCR 30500 Practicum in Social Change: Urban Mentorship Initiative (NLA)

An academic mentorship program that offers students the opportunity to participate in interdisciplinary coursework and field-based service-learning aimed at supporting underserved youth in their pursuit of higher education. Course includes required participation in a two-day trip (Friday to Saturday) to a partner school. This is a cross-listed course; students cannot receive credit for both SOCI 30500 and CSCR 30500. (F,Y)

Attributes: AAPP, AASE, ADPP, ADSE, LSPP, LXME, NAPP, NASE

3 Credits

CSCR 30700 Race and Colonialism (LA)

This course engages colonialism as a set of racial and material practices that shaped the identities of the colonizers and the colonized as much as it did the global political economy. Three themes in particular will guide our engagement: the racial overtones and undertones of the colonial encounter, especially as embodied in the ideas of discovery, barbarism, and progress; the psychological dynamics of the relationship between the colonizers and the colonized; and the politics of oppression and liberation. Cross-listed with POLT 32300. Prerequisites: Junior standing. (Y)

Attributes: AACI, AASE, ADCI, ADSE, LSCI, LXME, NACI, NASE, SS

3 Credits

CSCR 32400 Critical Race Theories (LA)

Explores the realities and consequences of using race as a category of analysis and identity in the United States and/or in the diasporas of Black, Latino/a/x, Asian and indigenous peoples. Includes the study of settler colonialism, systemic racism, intersectionality, history of racial formations, racial/ethnic identities and hierarchies, and whiteness. Examines the foundations and assumptions of various critical race theories significant to the fields of indigenous studies and/or race and ethnicity studies. Prerequisites: One CSCR course. (Y)

Attributes: AAPP, AASE, ADPP, ADSE, LSPP, LXME, NAPP, NASE, RPPE

4 Credits

4 Credits

CSCR 35000-35012 Selected Topics in Culture, Race and Ethnicity (LA)

Selected topics in culture, race, and ethnicity will be considered with a narrow focus and considerable depth. This course may be repeated for credit for different selected topics. Prerequisites: Junior standing. (IRR).

Attributes: SS

3 Credits

CSCR 35100 Race and Sexual Politics (LA)

Explores how dominant representations of racialized sexuality, femininity, and masculinity in U.S. culture and politics influence systems of inequality. Particular attention is paid to the relationship between constructions of race and sexual politics, social policy shifts in welfare reform, the prison industrial complex, and intimate justice. Focus on antiracist feminist resistance and reproductive justice. Prerequisites: Junior standing. (Y)

Attributes: AAPL, AASE, ADPL, ADSE, DV, LSPL, LXME, NAPL, NASE, SS, WGS, WGS3

3 Credits

CSCR 35200 Punishment, Prisons, and Democracy (LA)

This course explores dominant definitions of crime, punishment, and democratic justice in the United States and their relationship to imprisonment. The course begins by examining the historical and ideological roots of the U.S. prison system from slavery to the convict lease system. Focusing on the post-civil rights era, we consider how deindustrialization, the war on drugs, and shifts in policing, welfare policy, sentencing laws, and global militarism have redefined notions of U.S. justice and democracy. The course is attentive to the ways the prison industrial complex disproportionately affects people of color. Prerequisites: Junior standing. (Y)

Attributes: AAPP, AASE, ADPP, ADSE, DV, LSPP, LXME, NAPP, NASE, SS, WGS, WGS3

3 Credits

CSCR 37400 Latino/a/x Resistance Movements (LA)

Focuses on the historical relationships between Latino/a/x people and other racial/ethnic groups in the US and Latin America with special emphasis on social movements and grassroots efforts for social justice from post-WWII to the present. Central theoretical questions revolve around why resistance movements rise and fall, and how the politics of Latino/a/x resistance within the United States have historically evolved. Examines collective Latino/a/x agency and community attempts to shape their own political and social destiny by teaching students archival research methods. Students review archival materials from Latino/a/x organizations to ask what constitutes history-making. Interrogates how grassroots movements use alternative historical archives and cultural objects to create counter-narratives of resistance. Prerequisites: One CSCR course or one course designated for the Latin American Studies minor (LAEL attribute). (S,Y)

Attributes: LAEL, LSPL, LXME, NAPL, RPPE

4 Credits

CSCR 38000 Research in Culture, Race, and Ethnicity Studies (LA)

Engages students in research on a selected topic, theme, or community-engaged project related to issues of indigeneity, race, and/or ethnicity. Project is determined by the instructor or co-created by student participants. Students consider the ethical dimensions of research, learn methodological approaches and practice applying research methods that are commonly used in indigenous studies and/or ethnic studies. Potential research methods may include, but are not limited to, community-driven research methods; social science qualitative methods like interviewing & coding; ethnographic methods; oral history; textual analysis methods; and/or archival research methods. Prerequisites: At least one CSCR course. (IRR)

Attributes: AAPP, AASE, ADPP, ADSE, LSPP, LXME, NAPP, NASE, RPPE

4 Credits

CSCR 43300 Education, Oppression, and Liberation (LA)

Interrogates the educational experiences of oppressed people in the African Diaspora. A historical overview of the schools, pedagogies, and curriculums developed for Black/Brown students including the political, social, economic, and cultural manifestations of "Black education." Additionally, the course examines how educational institutions have been, and can be, used for individual, group, and global liberation. Prerequisites: Three courses in the liberal arts. (IRR)
Attributes: ADPL, ADSE, RPRE
4 Credits

CSCR 43400 Capstone Seminar in Race, Power, and Resistance (LA)

Capstone seminar serving as the culminating experience for Race, Power, and Resistance majors. Draws on the skills and concepts developed through previous coursework in the major and the ICC curriculum to synthesize various theories, knowledges, and methods in indigenous, race and ethnic studies. Students integrate studies in the major and their ICC coursework through a research presentation focused on the relational dimensions of racial/ethnic oppression and resistance and how accumulated knowledge will be applied in their chosen occupations. Prerequisites: CSCR 32400; CSCR 21500, CSCR 23400, CSCR 37400, or CSCR 38000. (IRR)
Attributes: AACI, AASE, ADCI, ADSE, LSCI, LXME, NACI, NASE, RPRE
1 Credit

CSCR 43500 Black Radical Traditions (LA)

Examines Black radical philosophies ranging from slavery to the present. Traces shifts and continuities in how Black philosophers have contended with barriers to freedom and emancipation, with a focus on political figures like Harriet Jacobs, Ida B. Wells, W.E.B. DuBois, C.L.R. James, Martin Luther King Jr., Malcolm X, Frantz Fanon, James Baldwin, Angela Y. Davis and Audre Lorde. Explores these writers' engagement with abolition, existentialism, desegregation, decolonization, and the intersectionalities of race, gender and sexuality, while situating the Black radical tradition within the broader history of U.S. thought, culture and politics. (S,IRR)
Attributes: ADCI, ADSE, DV, HU, WGS, WGS3, WGS1
3 Credits

CSCR 45000 Selected Topics in Culture, Race and Ethnicity (LA)

Selected topics in culture, race, and ethnicity will be considered with a narrow focus, in-depth analysis, and advanced research and writing. This course may be repeated for credit for different selected topics. Prerequisites: CSCR 12300, one 200-level CSCR course, and one 300-level CSCR course. (IRR).
Attributes: SS
3 Credits

CSCR 47800 Las Americas: Globalizing Latino/a Studies (LA)

Historicizes economic, political, and cultural processes in the Americas during the 20th century by focusing on U.S. Latinos/as in relation to globalization. Emphasis on transnational social movements, migration and borders; state formation and international organizations; human rights; labor organizing; counterinsurgency; and regional, non-U.S. centered, inter-American relationships. This is a capstone course designed as a discussion/reading/research-intensive seminar. Prerequisites: One course in CSCR at 300 level or higher. (S,Y)
Attributes: HU, LSCI, LXME
3 Credits

CSCR 49800 Internship: Culture, Race, and Ethnicity (NLA)

The internship provides a structured intensive learning experience in an organization dedicated to research, planning, policymaking, or service provision in an area related to culture, race, and ethnicity. Supervision is provided by an on-site professional preceptor. Students are required to submit periodic written field reports, as well as a final internship experience report. Prerequisites: Junior standing or above and permission of instructor. 1 to (F-S, Y)\.
1-6 Credits

CSCR 49900 Independent Study: Culture, Race, and Ethnicity (LA)

Intensive study of the theoretical and empirical relationships between culture, race, and ethnicity. These projects will be conducted under the supervision of a faculty advisor, and will require a comprehensive research paper and/or project. A proposal for the topic and specific plans must be approved by the dean's office of the Division of Interdisciplinary and International Studies. Prerequisites: Junior standing or above, and permission of instructor. (F-S,Y)
1-4 Credits

Dance (DNCE)

DNCE 10000 Introduction to Dance (LA)

Survey of the varied forms and styles of social, spiritual, and theatrical dance. Lecture, discussion, and film viewing provide a fundamental understanding of the development of dance forms and a foundation for evaluation and criticism of dance performance in society. (IRR)
Attributes: CA, TIDE
3 Credits

DNCE 10300 Functional Awareness for Dance (LA)

Functional Awareness for Dance is an introduction to human anatomy with an emphasis on the musculoskeletal system and principles of movement. It is designed to provide basic knowledge of the function of the human body as a means to facilitate the art of dancing. (F)
3 Credits

DNCE 11100 Ballet I (NLA)

Introductory analysis and practice of ballet technique. Students develop an understanding of fundamental ballet technique and terminology, body awareness, elasticity and rhythmic sense. May be repeated four times. (F,Y)
1 Credit

DNCE 11200 Ballet II (NLA)

Continuation of DNCE 11100. Further analysis and practice of ballet technique. Students develop a deeper concentration in and understanding of fundamental ballet technique and terminology. Building of strength through flexibility and coordination. May be repeated four times. Prerequisites: DNCE 11100 or permission of instructor. (S,Y)
1 Credit

DNCE 12100 Modern Dance I (NLA)

Introductory analysis and practice of modern dance technique. Students develop an understanding of body awareness and fundamentals of improvisation. Emphasis is placed on expressive body movement, warm-up exercises, and basic principles of form and improvisation. May be repeated four times. (F,Y)
1 Credit

DNCE 12200 Modern Dance II (NLA)

Continuation of DNCE 12100. Further analysis and practice of modern dance technique. Students develop a deeper concentration in and understanding of body awareness and fundamentals of improvisation. May be repeated four times. Prerequisites: DNCE 12100 or permission of instructor. (S,Y)

1 Credit

DNCE 13100 Jazz Dance I (NLA)

Introductory analysis and practice of jazz dance technique for theatre performance. Students develop an understanding of fundamental movement principles, technique, and terminology. May be repeated four times. (F,Y)

1 Credit

DNCE 13200 Jazz Dance II (NLA)

Continuation of DNCE 13100. Further analysis and practice of jazz dance technique for theatre performance. Students develop a deeper concentration in and understanding of fundamental jazz movement principles. May be repeated four times. Prerequisites: DNCE 13100 or permission of instructor. (S,Y)

1 Credit

DNCE 13900 Rehearsal and Performance for Dance (NLA)

Laboratory participation in rehearsal and performance of a dance production. Students receive credit for assignments in dance performance. The student is evaluated by the faculty member in charge of the designated dance work. Evaluation is based on degree of professional attitude during the rehearsal process and quality of performance. (IRR)

0-2 Credits

DNCE 14100 Tap Dance I (NLA)

Introductory analysis and practice in tap dance technique. Students develop an understanding of tap dance styles, history of tap dance in stage and film, and terminology. May be repeated four times. (F,Y)

1 Credit

DNCE 14200 Tap Dance II (NLA)

Continuation of DNCE 14100. Further analysis and practice of tap dance technique. Students develop a deeper concentration in and understanding of fundamental principles, technique, and terminology. May be repeated four times. Prerequisites: DNCE 14100 or permission of instructor. (S,Y)

1 Credit

DNCE 21100 Ballet III (NLA)

Continuation of DNCE 11200. Intermediate analysis and practice of ballet technique. Further development in building strength through flexibility and coordination. May be repeated four times. Prerequisites: DNCE 11200 or permission of instructor. (F,S,Y)

1 Credit

DNCE 22100 Modern Dance III (NLA)

Continuation of DNCE 12200. Intermediate analysis and practice of modern dance technique. Further development of skills in selected styles and techniques in the modern idiom. May be repeated four times. Prerequisites: DNCE 12200 or permission of instructor. (S,Y)

1 Credit

DNCE 23100 Jazz Dance III (NLA)

Continuation of DNCE 13200. Intermediate work in analysis and practice of jazz dance technique in theatre performance, building on skills developed in beginning jazz and ballet classes. May be repeated four times. Prerequisites: DNCE 13200 and DNCE 21100 (may be taken concurrently), or permission of instructor. (F,Y)

1 Credit

DNCE 24100 Tap Dance III (NLA)

Intermediate course in tap technique designed to broaden awareness and skill in tap dance for stage and film. May be repeated four times. Prerequisites: DNCE 14200. (F,Y)

1 Credit

DNCE 30100 Survey of Dance History (LA)

Examines origins and development of ballet and modern dance in Western societies, considering the artistic, political, philosophical, religious and social forces that influenced the art form. Prerequisites: junior standing. (S,O)

Attributes: 3B, G, H, HU

3 Credits

DNCE 30200 Dance Composition (LA)

Introduction to dance composition theory through original movements studies composed by students. Explore concepts of movement designed in time and space, as well as dynamics, rhythm and motivation.

Prerequisites: two courses of 200-level dance technique selected from DNCE 21100, DNCE 22100, DNCE 23100, or DNCE 24100. (S,E)

Attributes: CCCS, FA

3 Credits

DNCE 30300 Dance for the Camera (LA)

The course is designed to introduce digital video technology in dance through the acquisition of technical and creative skills required to choreograph, compose, edit, and disseminate Dance for Camera works. Permission by instructor is required. (F)

1.5 Credits

DNCE 31100 Ballet IV (NLA)

Advanced technique course focusing on complex movements that strengthen the body and mind connection and increase personal expressiveness and artistry as a ballet dancer. May be repeated four times. Prerequisites: DNCE 21100 or permission of instructor. (F,S,Y)

1 Credit

DNCE 31200 Ballet IV with Pointe (NLA)

Advanced technique course, including pointe work, with emphasis on barre and center work. Focus on development of leg strength and learning variations from full length ballets. Prerequisites: DNCE 21100; permission of instructor. (F,S,Y)

1.5 Credits

DNCE 32100 Modern Dance IV (NLA)

Advanced technique course focusing on modern dance skills designed to broaden the student's awareness of selected styles and technique in the modern idiom. May be repeated four times. Prerequisites: DNCE 22100 or permission of instructor. (S,Y)

1 Credit

DNCE 33100 Jazz Dance IV (NLA)

Advanced course in analysis and practice of jazz dance for theatre performance. May be repeated four times. Prerequisites: DNCE 23100 or permission of instructor. (S,Y)

1 Credit

DNCE 34100 Tap Dance IV (NLA)

Advanced course in tap technique designed to broaden awareness and skill in tap dance for stage and film. May be repeated four times. Prerequisites: DNCE 24100 or permission of instructor. (S,Y)
1 Credit

DNCE 35100 Advanced Dance Technique (NLA)

Ongoing dance and movement practice for the advanced level pre-professional dancer. Focus is on integration of dance and movement skills with special attention on deepening the understanding and application of core strength with a wide range of movement and choreographic possibilities. Students are accepted into the course by audition. The course is repeatable up to four times. Prerequisites: Permission of instructor. (F,S,Y)
1 Credit

DNCE 36100 Dance for the Musical Stage I (LA)

Advanced course in the techniques, forms, and styles of dance in musical theatre. Movement studies are performed to familiarize students with a variety of musical theatre dance styles focusing on mid 19th through early 20th century dance forms. Survey of the early history of dance in the American musical theatre through readings, lectures, class discussions, student research, and films. Prerequisites: two courses of 200-level dance technique selected from DNCE 21100, DNCE 22100, DNCE 23100, or DNCE 24100, or permission of instructor. (F,Y)
Attributes: FA
2 Credits

DNCE 36200 Dance for the Musical Stage II (LA)

Advanced course in the techniques, forms, and styles of dance in musical theatre. Movement studies are performed to familiarize students with a variety of musical theatre dance styles focusing on 20th century dance forms. Survey of the development of dance in the American musical theatre through the present day, through readings, lectures, class discussions, student research and films. Prerequisites: two courses of 200-level dance technique selected from DNCE 21100, DNCE 22100, or DNCE 23100 (may be taken concurrently), or permission of instructor. (S,Y)
Attributes: FA
2 Credits

DNCE 40100 Partnering in Dance (NLA)

This course is an advanced dance technique class that works to develop proficiency in partnering through the study of partnering fundamentals. Students will learn and perform choreographies working collaboratively with partners integrating these techniques. Prerequisites: One 300-level DNCE. (F)
1.5 Credits

Documentary Studies (DOCU)

DOCU 10100 Documentary Immersion (LA)

An introduction to the vast field of documentary with regular guest presentations about the various aspects of the theory and practice of the field drawn from across the Park School faculty. Attendance is required at a number of documentary-oriented special events both in the Park School and in other schools on campus, including screenings, guest lectures, workshops, master classes, concerts, trainings, and symposia. (F)
1 Credit

DOCU 40100 Documentary Industries (LA)

An overview of the political economies, infrastructures, and operations of documentary practices across platforms such as print, analog, digital media, and hybrid forms within both national and international contexts. It discusses budgeting, project development, technologies, research, production and team management, fundraising, co-productions, granting agencies, legal and ethical issues, marketing design, public relations, press kits, festivals, broadcast, streaming, roll-out strategies, website development, engagement campaigns, audience development for festivals and screenings, distribution, four walling, roadshowing, self-distribution, institutional and home-use sales, community-based screenings, and eventizing. (S)
Attributes: CCCS
1 Credit

DOCU 49900 Documentary Practicum (NLA)

Produce a substantive nonfiction media project with the guidance of a faculty member. Projects that partner with nonprofit, activist or educational groups outside of the Park School of Communications are encouraged. Works for hire are not eligible. Access is restricted to proposals that are approved by the Documentary Studies and Production Steering Committee before the registration period in the prior fall or spring semester. The outcome should be a completed work suitable for inclusion in a professional portfolio and that has value as a form of community engagement on substantial issues. By permission of instructor. Prerequisites: TVR 29900 or JOUR 21100. (IRR)
1-4 Credits

Economics (ECON)

ECON 11500 Current Economic Debates (LA)

The study of economic issues tied to selected topics such as labor relations, unemployment, health care, poverty, discrimination and inequality, globalization and climate change. These will be analyzed from a lens of equity, inclusion, and economic justice. (F,S,Y)
Attributes: 1, SS
4 Credits

ECON 12000 Principles of Economics (LA)

Introduction to the foundational theories and applications in macroeconomics and microeconomics. Macroeconomic topics include economic indicators, business cycles, national income accounting, the determinants of national income, employment and inflation, the monetary system, central banks, and fiscal policy. Microeconomic topics include supply and demand, comparative advantage, consumer choice, the theory of the firm under competition and monopolies, economic inequality, and market failure. (F,S,Y)
Attributes: QL, SS
4 Credits

ECON 20100 Micro Analysis (LA)

Intermediate microeconomics course on consumer and producer behavior, supply and demand, market analysis, and conditions under which such behavior is socially desirable for the community as a whole. Prerequisites: ECON 12000. (F,Y)
Attributes: SS
4 Credits

ECON 20200 Macro Analysis (LA)

Intermediate macroeconomics course on theory, policy, and data related to unemployment, inflation, exchange rates, global trade balances and inclusive economic growth; will cover country and regional cases from many regional areas in the global economy. Prerequisites: ECON 12000. (S,Y)

Attributes: SS
4 Credits

ECON 20400 Economics of Health Care (LA)

Introduces students to the health care delivery and financing system in the United States. Uses economic analysis to study current health policy debates including insurance, health care reform in the United States, Medicare, Medicaid, physician payment arrangements and resulting incentives, global comparative health systems, and quality of care. Students cannot receive credit for both ECON 20400 and HLTH 20400.

Prerequisites: ECON 12000. (IRR)
Attributes: LMEL, LSCO
4 Credits

ECON 22100 Money and Banking (LA)

Investigates banking and finance through a macroeconomics lens. Covers: history of money, comparative histories of debt and usury, commercial bank systems, management and regulation; shadow banking; central bank policies; connections between financialization and wealth distribution; banking discrimination; and financial crisis. Prerequisites: ECON 12000. (IRR)

Attributes: SS
4 Credits

ECON 24000 Inequality (LA)

Introduction to the issue of inequality from an economic perspective. Topics include inequality measurement, the causes and consequences of high inequality, the socioeconomic dimensions of inequality, and potential policy solutions. Includes case studies from the U.S. and other high income countries, as well as developing countries. Prerequisites: ECON 12000. (IRR)

4 Credits

ECON 25000 Race and Economic Power (LA)

This course explores historical patterns and current trends of race and ethnicity based wealth gaps in the United States. Topics include slavery, immigration, residential segregation, discrimination in lending and employment, and the role of the government in perpetuating or challenging various dimensions of racial wealth inequality. Prerequisites: Any 100-level ECON course. (IRR)

Attributes: DV
4 Credits

ECON 26000 Capitalism: Recessions and Revivals (LA)

Explores the nature and causes of recessions and revivals in the U.S. economy. Focuses on capitalism as an engine or impediment to economic progress. The theory and history of business cycles are reviewed before students explore the nature and causes of specific episodes of recession and revival in the U.S. Prerequisites: ECON 12000. (IRR)

4 Credits

ECON 27000 Women and Economics (LA)

Introduction to economic issues related to women's roles in household, domestic, and global economies through both a microeconomic and macroeconomic lens. Topics include education, labor force participation, sex segregation in the labor market, wage differentials, discrimination, family formation and household production. Prerequisites: ECON 12000. (IRR)

Attributes: AN3, LMEL, LSCO, SS, WGS
4 Credits

ECON 28100 Environmental Economics (LA)

Introduction to the study of environmental problems with the perspective, analytical ideas, and methodology of economics. Emphasis is placed on the economic analysis of climate change. Topics include the relationship between economic activity and climate change, economic analysis of climate change mitigation and adaptation strategies, and economic analysis of environmental policy in both the United States and the international community. Cross-listed as ENVS 28100. Prerequisites: ECON 12000. (IRR)

Attributes: AN3, LMEL, LSCO, SS
4 Credits

ECON 28800-28807 Selected Topics: Economics (LA)

Matters of special contemporary interest to students and faculty may be developed under this course heading. This arrangement permits departmental offerings to be responsive to evolving faculty and student interests. May be repeated for credit when topics change. Prerequisites: ECON 12000. (IRR)

Attributes: SS
1-4 Credits

ECON 29000 Microeconomic Market Simulations (LA)

Application of microeconomic theory of firm behavior using computerized simulations. Case studies of different industries vary by semester. May be repeated for up to three credits. Prerequisites: ECON 12200. (F-S,Y)

1 Credit

ECON 30100 Labor Economics (LA)

Provides an overview of topics related to labor economics through both a microeconomic and macroeconomic lens. Topics include the supply of and demand for labor, the structure of wages, employment determination, elasticity, human capital, unions and collective bargaining, inequality, discrimination and government programs. Prerequisites: ECON 20100. (IRR)

Attributes: SS
4 Credits

ECON 31200 Economic Development (LA)

Examination of economic changes in developing countries from both a macroeconomic and microeconomic perspective. This includes evaluating the goals of development, applying various theoretical models of development, and exploring empirical data testing such models. In the process several policy options and specific country contexts will be highlighted. Prerequisites: Any 200-level ECON course. (IRR)

Attributes: ENSS, ENVE, ESSS, INBG, SS
4 Credits

ECON 32500 Public Finance (LA)

This course centers around the role of government in the economy. In particular, we will study how government taxation and expenditure policies affect the economy and the welfare of its citizens. Topics include resource allocation, budgeting, income distribution, social safety nets, and other current policy debates. Prerequisites: ECON 20100. (IRR)

Attributes: SS
4 Credits

ECON 33300 Econometrics (LA)

Statistical methods, simple and multiple regression analysis. Detection and remedy of multicollinearity, heteroskedasticity, and autocorrelation. Alternate functional forms and dichotomous variables. Exposure to econometric software. Prerequisites: ECON 12000 and MATH 14400 or MATH 14500, MATH 21600, MATH 31600. (F,Y)

Attributes: SS

4 Credits

ECON 33400 Advanced Econometrics (LA)

Advanced topics in econometrics include tests of linear restrictions, dummy variables, distributed lags, time-series techniques, panel data techniques, simultaneous-equation models, and non-linear models. Derivation of formulas and proofs of statistical concepts. Develop advanced proficiency with econometric software. Prerequisites:

ECON 33300. (IRR)

Attributes: SS

4 Credits

ECON 36500 Sport Economics (LA)

Application of economic theory to the markets of professional and amateur sports. This course applies economic principles to analyze a wide range of issues within the realm of professional sports and intercollegiate athletics. Included are the analysis of labor markets and labor relations, public finance of sports facilities, and the organization of sports institutions. Students cannot also receive credit for SPMM 36500. Prerequisites: SMGT 11000; ECON 12100; and ECON 12200. (F,Y)

Attributes: SS

3 Credits

ECON 36800 Globalization and Human Development (LA)

This course provides a working knowledge of contemporary issues related to globalization. The emphasis is on analysis of arguments concerning the linkages between trade and financial liberalization, economic growth, poverty alleviation, and well-being. Prerequisites: Any 200-level ECON course. (F,Y)

Attributes: AN3, DV, INBG, LAEL, LAGC

4 Credits

ECON 37200 Big Business, Profit, and Community Well-Being (LA)

Extends and refines the economic theory of the firm with a focus on oligopolies and monopolies. Drawing on empirical evidence, it examines theories concerning the motives of very large firms, barriers to entry, interdependence among firms, product differentiation, advertising, and profit. Examines the distribution of business activity benefits in the community among consumers, labor, management, and stockholders.

Prerequisites: ECON 20100. (IRR)

Attributes: QL

4 Credits

ECON 38500 International Economics (LA)

Study of international trade patterns, gains and losses from trade, and international investment, both private and government. Issues discussed include pros and cons of free trade, tariffs, bi-lateral, regional, and multi-lateral trade agreements, the World Trade Organization, and the role of trade in tackling global inequality and climate change. Prerequisites:

ECON 20200. (IRR)

Attributes: GERM, LAEL, LAGC

4 Credits

ECON 39200 Senior Economics Thesis Prep (NLA)

Prepares Economics majors for the required Senior Thesis course, ECON 49200. Building on experiences in previous courses the class will introduce students to research methods to assist in the writing of their capstone projects. Covers topic selection, scholarly databases, literature reviews, data collection, and citation style. (S,Y)

1 Credit

ECON 49000 Internship: Economics (NLA)

Designed to offer applications of economic concepts. Business, banking, law, government, and not-for-profit agencies provide the settings. The student is expected to prepare a log of activities, an interim report, and a final report consisting of an economic analysis of the internship experience. All guidelines of the School of Humanities and Sciences must be followed. Prerequisites: Permission of instructor. (F-S,Y)

1-12 Credits

ECON 49200 Senior Thesis in Economics (LA)

Guided research, study, and writing on subjects selected by faculty-student consultation. Students will also reflect on the experience of a liberal arts education through exploration of the students' courses in and outside of the major, including ICC courses; includes discussion of professional opportunities for Economics majors. Prerequisites: ECON 20100, ECON 20200, ECON 33300, and ECON 39200. (F,Y)

4 Credits

ECON 49900 Independent Study: Economics (LA)

Program of special reading and research under supervision of the department. Offered on demand only. Prerequisites: ECON 12100-12200; senior standing; or by special permission of the department.

Attributes: UND

1-4 Credits

Education (EDUC)

EDUC 10000 Education and Society (LA)

Introduction to educational issues and the interaction between schools and society in the United States. Explores the history and philosophy of U.S. education as well as research and opinion concerning contemporary educational policy and practice. Students use course materials as a lens for reflecting on their own school experience and developing informed policy suggestions regarding education in the United States.

(F,S)

4 Credits

EDUC 10200 Inquiry's Role in Language and Literacy Development (LA)

Explores the role of learners' inquiry as foundational to language and literacy development, early childhood through adolescence, from an equity-oriented, strengths-based perspective. Includes attention to learners' inquiry as a stance and as a culturally situated practice, to language and literacy within families, schools, and communities, and to the roles of inquiry in writing and in responses to children's and adolescent literature. (IRR)

Attributes: ESE

4 Credits

EDUC 10300 Introduction to Inquiry in Education (LA)

Introduces students to education research, examining how and why research is conducted, types of questions posed, and varied methodological approaches to research. Importantly, students learn how to critically analyze and evaluate educational research, as well as how such research can be used to further educational policies and practices.

(IRR)

4 Credits

EDUC 19210 Child Abuse Identification and Prevention (NLA)

A two-hour workshop on child abuse identification and prevention. Offered at least once each semester. Pass-Fail only. (F-S)
0 Credit

EDUC 19220 Drug and Alcohol Abuse: Identification and Prevention (NLA)

A two-hour workshop on the identification and prevention of drug and alcohol abuse. Offered at least once each semester. Pass-Fail only. (F-S)
0 Credit

EDUC 19230 School Violence Prevention (NLA)

A two-hour workshop on school violence prevention. Offered at least once a semester. Pass-fail only. Zero credits. (F-S, Y)
0 Credit

EDUC 19240 Harassment, Bullying, and Discrimination in Schools: Prevention and Intervention (NLA)

A six-hour workshop on harassment, bullying, cyberbullying, and discrimination prevention and intervention. Offered at least once per semester. Pass-Fail only. (F-S)
0 Credit

EDUC 20100 Technology for the Middle/Secondary School Teacher (NLA)

Introduction to the concepts and skills necessary for applying/using information technology in educational settings. Topics include basic computer/technology operations and concepts, terminology, modes of access, manipulation of data, installation and use of software, basic troubleshooting, use of a variety of peripheral devices, social and ethical issues, and the pedagogical use of various technologies. Projects require integrating and applying concepts and skills developed in the course to students' fields in the teaching profession. Prerequisites: Sophomore standing and open only to students in teacher education programs and speech-language pathology. (F,Y)
2 Credits

EDUC 20200 Literacy Across the Disciplines for Middle and Secondary Education (NLA)

Offers prospective middle- and secondary- level teachers with understandings and analysis of teaching methods used to facilitate content-specific literacy. Helps students recognize and identify the nuances of a discipline by using literacy strategies that make thinking visible. Topics include how to foster disciplinary literacy, Common Core State Standards for literacy in the subject areas, media literacy, sociocultural literacy, and recognizing and planning for culturally and linguistically diverse classrooms. Required 15 hour field experience. Prerequisites: EDUC 10200. (F,S,Y)
2 Credits

EDUC 21010 Educational Psychology (LA)

Study of human development from infancy through adolescence, including cognitive and behavioral approaches to learning in the context of school and other instructional situations. Attention given to the empirical (scientific) attitude in relating theory and practice in various educational settings. Prerequisites: Sophomore standing. (F-S,Y)
Attributes: 1, SS, TE
3 Credits

EDUC 21800 Introduction to Pedagogy and Practice (NLA)

Theory and practice in teaching across the disciplines in secondary schools. Emphasis on instructional planning, models and processes of teaching, classroom management, and the assessment of student learning. Introduction to structured observation and reflective practice. Prerequisite: Sophomore standing and enrollment in an H&S teaching option major or the Education Studies Minor. (F,Y)
3 Credits

EDUC 21910 Early Field Experience: Theory and Practice (LA)

Introduces students to public and/or private education system in an extended field experience; each student completes 50 hours of fieldwork in an educational setting. This is a coordinated offering of Ithaca College and the area schools. Prerequisites: EDUC 19210 or EDUC 21010. (F,S,Y)
4 Credits

EDUC 22000 Issues in Elementary Education (LA)

Investigates contemporary issues in elementary education, including historical development of elementary classroom practice (emphasis on reading instruction); philosophical and psychological theories of learning; women's role in elementary school teaching; children's literature and storytelling in child development; impact of societal problems on children and families; media literacy initiatives in elementary schools; assessment practices; conflict resolution; family involvement in children's schooling; multicultural understandings; calls for, and examples of, school reform. Prerequisites: Sophomore standing or above. (F-S,Y)
Attributes: SS
3 Credits

EDUC 22500 Cultural & Linguistic Diversity in K-12 Schools (LA)

This course guides students in developing a knowledge base about culturally and linguistically diverse students in K-12 schools in the United States. Examines major theories related to educating immigrant students as well as a culturally and linguistically diverse student population and engages students in critical analysis of education policy and practice at the institutional level. Prerequisites: Sophomore standing. (Y)
Attributes: AN3, DV, HM, SO, TIDE, TPJ
3 Credits

EDUC 22900 Second Language Acquisition: Its Nature and Meaning for Educators (LA)

A comparison of first- and subsequent-language learning as it affects the school-age population. The sociocultural nature of language and language acquisition is addressed, as well as specific needs in the multicultural classroom. The multifaceted fundamentals surrounding the nonnative speaker and second-language learning are provided to prepare the student to understand the paradigm shifts that have resulted from demographic changes in this country. This course requires 16-20 hours of field experience and/or observation. Prerequisites: Sophomore standing. (S,Y)
Attributes: SS, TE
2 Credits

EDUC 23000 Literacy as a Community Movement (LA)

Introduction to the topic of literacy in education and a critical examination of common conceptualizations of how children learn how to read. Examines ongoing discrepancies in reading outcomes for children from different demographic groups, especially children of color. Provides opportunities to engage with the idea of community movement as a vehicle for educational change. Prerequisites: At least one EDUC course. (IRR)
4 Credits

EDUC 23900 Foundations of Special Education and Inclusivity (LA)

Introduces future educators to populations of children encountered in diverse classrooms and examines topics related to inclusion. Considers the access and functional needs of various populations, including students with diagnosed disabilities. Reviews federal mandates, legal issues, ethical and equity issues, family issues, school personnel collaboration, and education methodologies. This course requires 15 hours of fieldwork. Intended for education students in the School of Humanities and Sciences and the School of Music. (F,S,Y)
Attributes: TE, UND
3 Credits

EDUC 29000-29001 Selected Topics in Education (LA)

Investigation of selected topics in the field of education as determined by specialized faculty research, teaching interests, and trends. (IRR)

Attributes: UND

1-4 Credits

EDUC 29900 Research Project in Education (LA)

Individual or research team study, under the supervision of a faculty member, to explore issues in education. Written proposal to the Chair of the Education Department and the faculty supervisor, describing the terms of the research project, is required. This course may be repeated for a total of Prerequisites: Sophomore standing and permission of instructor. (F-S)

1-3 Credits

EDUC 34000 Social and Cultural Foundations of Education (LA)

Required for all students in teacher certification programs, but open to other students as well. Combines historical, philosophical, sociological, and anthropological perspectives to investigate contemporary social and cultural issues in education and teaching. Provides preparation for critically reflective decision making and for working effectively with diverse students and communities. Topics include equal educational opportunity; the financing of U.S. schools; tracking/ability grouping; the sociocultural dynamics of teaching and learning; multicultural education; social class issues; gender bias and equity; the experiences of African American, Latino, Asian American, and linguistic minority students in U.S. schools; educating students with disabilities; the role of religion in U.S. schools; issues of sexuality; working with families and communities; developing schools as caring learning communities; effective uses of technology; and recent proposals for school reform. Prerequisites: Sophomore standing. (F,S)

Attributes: 1, AN3, CNSL, DV, H, LAEL, SS, TE

3 Credits

EDUC 34100 Science, Technology, and Society (LA)

Examines the relationship between scientific knowledge, technological innovations and systems, and society by examining the history of technology and science, the social contexts in which science and technology occur, the organizations of people and things that make up science and technology systems, and the social and cultural consequences of scientific and technological change. Intended for teacher education students in the School of Humanities and Sciences. Prerequisites: Junior standing. (IRR)

Attributes: NS

1 Credit

EDUC 34900 Comparative and International Education (LA)

Explores educational goals, policies, and practices around the world through a comparative and international education lens, allowing students to situate the U.S. educational system within a global context. Focuses on topics such as variations and patterns among school systems, policies, reforms, assessment initiatives, and issues related to equity. Prerequisites: EDUC 10000. (IRR)

4 Credits

EDUC 35000 Black Feminist Alchemy: Theory into Practice (LA)

Explores the experiences of Black girls in U.S. schools as they are affected by social constructions and positionalities related to the intersection of race and gender. Through this particular lens, the course explores broader institutional and individual patterns of gendered racism in schools. Prerequisites: EDUC 10000. (IRR)

4 Credits

EDUC 36000 Education for Social Change (LA)

Examination of schools and teaching as forces for constructive social change, investigating how educators can create learning experiences in schools, classrooms, youth programs, and communities that will contribute to the school success of all youth and the development of a more equitable and just society. Particular attention paid to democratic approaches to teaching and learning; multicultural education; critical reflection; experiential learning; youth activism; community-based education; and innovative uses of technology. Class discussion and weekly volunteer projects. Prerequisites: Sophomore standing or above; EDUC 21010, EDUC 34000. (IRR)

3 Credits

EDUC 37000 Culture and Community in Education and Teaching (LA)

A sociocultural analysis of schools, teaching, and learning for the purpose of creating more effective educational experiences for culturally diverse learners. Students learn to incorporate knowledge about race, ethnicity, social class, gender, and other important aspects of culture into the design of schools and educational programs and lessons. Particular attention is given to cultural information about African American, Latino, and Asian American youth and families. All students in the course work a minimum of three hours a week with youth in a community program or school and develop projects specific to their interests and community placements. Prerequisites: EDUC 10000. (IRR)

Attributes: 1, AN3, CNSL, SS, WGS, WGS3

3 Credits

EDUC 40510 Pedagogy and Practice for the Mathematics Teacher

Examination of current research and practice in the effective teaching of mathematics at the middle and high school levels. Focus on national and state standards in mathematics, instructional planning and differentiation, appropriate uses of technology, approaches to assessment, and the integration of literacy into the mathematics curriculum. Introduction to professional organizations, journals, and research. Twenty-hour field experience required. Prerequisites: Senior standing; open only to math with teaching option majors. (F,Y)

Attributes: TE

3 Credits

EDUC 40800 Professional Development Seminar (NLA)

Seminar in the development of a personal philosophy of education and the preparation of a professional portfolio. Analysis of fall semester field-based experiences and professional program advising. Prerequisite: Senior standing. Pass-Fail only. (F, Y)

0 Credit

EDUC 40910 Pedagogy and Practice in the Teaching of Social Studies (NLA)

Examination of current research and practice in the effective teaching of social studies at the middle and high school levels. Focus on national and state standards in social studies, mastery of theoretical concepts and their application in the classroom, instructional planning and differentiation, appropriate uses of technology, approaches to assessment, and the integration of literacy in the social studies curriculum. Introduction to professional organizations, journals, and resources. Twenty-hour field experience required. Prerequisites: Senior standing; open only to social studies with teaching option majors. (F,Y)

Attributes: TE, UND

3 Credits

EDUC 41010 Pedagogy and Practice for the Science Teacher (NLA)

Examination of current research and practice in the effective teaching of science at the middle and high school levels. Focus on national and state standards in science, instructional planning and differentiation, appropriate uses of technology, approaches to assessment, laboratory organization and safety, and the integration of literacy in the science curriculum. Twenty-hour field experience required. Prerequisites: Senior standing; open only to biology with teaching option, chemistry with teaching option, or physics with teaching option majors. (F,Y)

Attributes: TE, UND
3 Credits

EDUC 41110 Pedagogy and Practice for the English Teacher (NLA)

Examination of current research and practice in the effective teaching of English at the middle and high school levels. Focus on national and state standards in English language arts, instructional planning and differentiation, appropriate use of technology, approaches to assessment, and support for students' literacy development. Introduction to professional organizations, journals and resources. Twenty-hour field experience required. Prerequisites: Senior standing; open only to English with teaching option majors. (F,Y)

Attributes: TE, UND
3 Credits

EDUC 41210 Seminar in Reflective Practice (LA)

Taken concurrently with EDUC 49810. Serves as the reflective component of student teaching, where students will analyze their teaching and identify how to use community-based assets to enhance their students' learning. Students develop culminating projects that require reflection and that demonstrate professional knowledge, skills, and dispositions required by the program and state. Prepares student teachers for the professional job search and offers preparation for future professional growth. Corequisites: EDUC 49810. (S,Y)

Attributes: TE
3 Credits

EDUC 41300 Selected Topics in the Foundations of Modern Education (LA)

Seminar course. Specialized inquiries in sociology of education, philosophy of education, or history of education. (IRR)

Attributes: HU, SS
3 Credits

EDUC 41310 Pedagogy and Practice of Teaching Languages Other Than English (NLA)

Examination of current research and practice in the effective teaching of languages other than English at the middle and high school levels. Focuses on national and state standards in the teaching of modern languages, instructional planning and differentiation, appropriate uses of technology, approaches to assessment, and issues related to second language development and literacy development. Introduction to professional organizations, journals and resources. Twenty-hour field experience required. Prerequisites: Senior standing; open only to German with teaching option, French with teaching option, and Spanish with teaching option majors. (F,Y)

Attributes: TE, UND
3 Credits

EDUC 41410 Pedagogy and Practice for the Art Teacher (NLA)

Examines the teaching of visual art to students at the elementary, middle, and secondary levels. This course will provide grounding in the history of art education in the United States, current theory and practice teaching art, and artistic development in children and adolescents. Emphasis is placed on the New York State standards in the visual arts for development of art lessons that contain relevant objectives, motivation, methodology, and evaluation techniques. Various art materials, techniques, and processes suitable for k-12 levels will be examined. Additional topics are incorporating art history, aesthetics, and art criticism in the curriculum; health and safety issues of art materials; art room organization; selecting and ordering supplies; and fostering professionalism. This course also provides practice in developing teaching skills through presentation of lesson plans in various media at the elementary, middle, and secondary levels. Twenty hours of observation and fieldwork in local public schools are required. Prerequisites: Senior standing; open only to art education majors (F,Y)

4 Credits

EDUC 43000 Capstone Seminar in Education Studies (LA)

Serves as the culminating experience for Education Studies majors; draws on the skills and concepts built through previous coursework in the major and ICC curriculum to synthesize various theories, knowledges, practices, and methods in education studies. (S,Y)

Attributes: CP
4 Credits

EDUC 49600 Senior Seminar in Education Studies (LA)

Synthesizes key understandings from across the Education Studies Curriculum by engaging students in reflection on their program. Students complete a culminating project that represents their development across the minor, the themes across their coursework, and key understandings related to sociocultural issues in education, engagement with communities, and education in the service of social justice. (Y)

1 Credit

EDUC 49700 Fieldwork in Education (NLA)

Directed fieldwork under a teacher education program faculty member's supervision, culminating in a major paper or comparable product. Written proposal to the teacher education program, describing the terms of the particular project, is required. Open only to juniors and seniors who have completed one or more courses at level 3 or 4 in education. Prerequisites: Permission of instructor. Variable credit. (F-S)

1-9 Credits

EDUC 49810 Professional Semester in Education (NLA)

Taken concurrently with EDUC 41210. A full semester of observation and supervised teaching at both the middle and high school levels. Additional coursework requires permission of department chair and coordinator of teacher education. Corequisites: EDUC 41210. (F-S,Y)

Attributes: TE, UND
12 Credits

EDUC 49900 Independent Study in Education (LA)

Study with a faculty member of specific problems in education. Written proposal to the coordinator of the teacher education program, describing the terms of the particular project, is required. May be repeated up to six credits. Prerequisites: Permission of instructor. (IRR)

0.5-4 Credits

Emerging Media (EMED)

EMED 12000 Introduction to Emerging Media (LA)

Introduction to emerging media and related issues, both social and technical. Focus on the history and current state of emerging media using relevant theories, areas of practice, applications, and media literacy. Discussion, research, writing, and group collaborative work focused on challenges and opportunities in the field of emerging media. (F,Y)

Attributes: SCE

4 Credits

EMED 21400 Design of New Media: Theory, Function and Analysis (LA)

Fundamental principles of design, function, and usability of new media technology, including games, mobile applications, web-based media, and other digital media platforms. Assessment of examples of new media designs for strengths, limitations, and usability; exploration of rules, techniques, and problem-solving strategies that go into the creation of new media applications and platforms. Open to majors in emerging media. Prerequisites: EMED 12000 or TVR 12400. (Y)

4 Credits

EMED 31300 Topics in Media Law and Policy (LA)

Overview of First Amendment theory, legal precedent, copyright, libel, and privacy as applied to existing and emerging digital media, followed by an in-depth investigation of specific new media law and policy issues determined by faculty expertise and student interest. Prerequisites: EMED 12000, TVR 12100, or TVR 12400; Emerging Media majors; junior standing. (IRR)

4 Credits

EMED 31400 Emerging Media Research Methods and Critical Inquiry (LA)

This course covers both quantitative and qualitative research methods in fields related to communication and information technologies, including sampling, survey, experiment, systematic content analysis, in-depth interviews, focus groups, and qualitative content analysis. Review of literature, identification of basic concepts, problems, responsibilities, and research ethics; procedures and basic techniques of open source computational data analysis; hypothesis testing and statistical interpretation and analysis; and critical inquiry. A research project is required. Prerequisites: EMED 12000 or TVR 12400. (Y)

Attributes: QL

4 Credits

EMED 32000 Utopias and Dystopias of Emerging Media (LA)

Analysis of theoretical, social, economic, political, technological, and cultural perspectives that impact and are impacted by new and emerging media technologies. Theoretical framework or technological focus defined by contemporary issues and student interest. Prerequisites: WRTG 10600 or ICSM 108xx or ICSM 118xx; EMED 12000 or TVR 12400. (Y)

Attributes: DV, SCE, WI

4 Credits

EMED 38500 Emerging Media Junior Project (NLA)

Hands-on introduction to project design, development, implementation, and testing, with emphasis on the knowledge and skills required to successfully complete the production cycle, including team dynamics, market analysis, project management, documentation, and testing. Students work in teams on projects assigned by the instructor. (S)

4 Credits

EMED 48500 Emerging Media Capstone (NLA)

Working as part of a team, the students design, develop, and document a significant emerging digital media project. Prerequisites: EMED 38500; Emerging Media Majors. (S)

4 Credits

English (ENGL)

ENGL 10500 Introduction to American Literature (LA)

Study of literary modes, such as fiction, poetry, essays, and drama, in which American writers have expressed ideals of individual conduct and social relationships or have appraised and challenged the practices of society. Emphasis is placed on class participation. (F-S,Y)

Attributes: 3A, HU

3 Credits

ENGL 10700 Introduction to Literature (LA)

Works of English, American, or European literature from early or recent times are considered in relation to one or more recurrent themes.

Emphasis is placed on class participation. (F,S,Y)

Attributes: 3A, HM, HU, TIDE, TIII

3 Credits

ENGL 10900 Introduction to Drama (LA)

Critical discussion of drama, covering a broad range of forms and techniques, with an emphasis placed on class participation.

Recommended for beginning English majors. Also offered through the London Center. (F,S,Y)

Attributes: 3A, CA, DLIT, HM, HU, TIDE, TMBS

3 Credits

ENGL 11000 Introduction to Fiction (LA)

Critical discussion of fiction, covering a broad range of forms and techniques. Emphasis is placed on class participation. Recommended for beginning English majors. Also offered through the London Center. (F-S,Y)

Attributes: 3A, HM, HU, TIDE

3 Credits

ENGL 11200 Introduction to the Short Story (LA)

Critical discussion of short stories, covering a broad range of forms and techniques, with an emphasis placed on class participation and development of skills in literary analysis and writing. (F,S,Y)

Attributes: CA, HM, TIDE, TIII

4 Credits

ENGL 11300 Introduction to Poetry (LA)

Critical discussion of poetry, covering a broad range of forms and techniques, with an emphasis placed on class participation and development of skills in literary analysis and writing. Recommended for beginning English majors. (F,S,Y)

Attributes: CA, HM, TIDE, TIII

4 Credits

ENGL 18100 Novel Identities, Fictional Selves (LA)

Introductory study of the novel and the ways in which it both traces and shapes the development of modern and post-modern selfhood. Authors to be studied include Hemingway, Woolf, Morrison, Smith, and others. (Y)

Attributes: HM, TIDE

3 Credits

ENGL 18200 The Power of Injustice and the Injustice of Power (LA)

Introductory study of representations of injustice in 19th, 20th, and 21st century poetry, drama, and fiction. Emphasis placed on class participation and development of skills in literary analysis and writing. (Y)

Attributes: DV, ESE, HM, TIDE, TPJ, WGS, WGSC
4 Credits

ENGL 18300 Engendering Modernity (LA)

Introductory study of representations of gender and gendered identity in modern and contemporary novels and poetry, with an emphasis placed on class participation and development of skills in literary analysis and writing. (Y)

Attributes: DV, HM, TIDE, WGS
4 Credits

ENGL 18400 Faking It: Reality Hunger in the Age of Fake News and Artificial Intelligence (LA)

Introductory study of "truth" and "falsehood" in fiction and poetry of the 20th and 21st centuries, and of the challenges associated with articulating an "authentic" identity in the era of the deep fake. Attention devoted specifically to the ways in which forgery illustrates aspects of the relationship between aesthetics and ethics. Emphasis on class participation and development of skills in literary analysis and writing. (Y)

Attributes: HM, TWOS
4 Credits

ENGL 18500 Earth Works: Literature and the Environment (LA)

Study of essays, stories, novels, and poems from the last 100 years engaging with the representations of nature and the environment. Course focuses on the cultural, historical, and political constructions of nature, and how these impact environmental thinking and behavior. Emphasis placed on class participation and development of skills in literary analysis and writing. (IRR)

Attributes: HM, TMBS, TQSF
4 Credits

ENGL 18600 Fantasy and Fairy Tales (LA)

Introductory study of the development of the literature of fantasy in the 20th century, with special attention paid to the fairy tale as a contributing or originary form. Additional emphasis on the development of skills in literary analysis and analytical writing. (Y)

Attributes: HM, TIDE, TMBS, WGS, WGSC
4 Credits

ENGL 19409 Mysterious Muddles and Commonplace Crime: Gothic Novels and Detective Fiction (LA)

Focuses on the parallel between reading fiction and detecting the "truth" by seeing how Gothic and detective novels gradually reveal plot and character through clues, hints, and symbols. Exploration of how the interpretation of those clues can be affected by the reader's own perspective, emotions, and biases. Emphasis placed on class participation and development of skills in literary analysis and writing. (IRR)

Attributes: HM, TIII
4 Credits

ENGL 19412 Banned Books and Censorship Trials: Obscenity in the 20th Century (LA)

Study of twentieth-century understandings of the role literature plays in perceptions of obscenity and the ways in which literary culture shaped and was shaped by popular, philosophical, and legal notions of "the obscene." Readings include Wilde's *The Picture of Dorian Gray*, Nabokov's *Lolita*, and Lawrence's *Lady Chatterly's Lover*. (IRR)

Attributes: HM, TIDE, TIII
4 Credits

ENGL 19413 Vampire Literature (LA)

Introductory survey of the cultural figure of the vampire in novels, short stories, and visual media. Examines material that dates from the middle ages to the present day in order to investigate the cultural persistence of vampires and their role as catalysts for developments in thinking about religion, sexuality, and individual identity. Emphasis placed on class participation and development of skills in literary analysis and writing. (IRR)

Attributes: HM, TIDE, TMBS, WGS, WGSC
4 Credits

ENGL 19414 Introduction to Asian American Literature (LA)

Introductory survey of Asian American literature. Examines a broad range of Asian American literary works with particular attention to issues of immigration, generational conflict, and identity formation. Includes works by such authors as Victoria Chang, Celeste Ng, and Nina Revoyr. Additional emphasis on the development of skills in literary analysis and analytical writing. (IRR)

Attributes: AASE, DV, HM, RPRE, TIDE
4 Credits

ENGL 19418 What is the Contemporary? A Study of Genre (LA)

Introductory study of global literary genres from 1970 to the present. Additional emphasis on the development of skills in literary analysis and analytical writing. (F,S,Y)

Attributes: HM, TIDE, TIII
4 Credits

ENGL 20007 Honors Intermediate Seminar (LA)

Attributes: 3A, 3B, H, HN, HU
3 Credits

ENGL 20100 Approaches to Literary Study (LA)

An examination of the discipline of literary studies. Explores issues that concern literary critics as they read and write about works of literature, including the historical development of literary studies, canonicity, the conventions of literary-critical discourse, and the assumptions and interpretive consequences of different theoretical and critical approaches to literature. Designed to develop skills for reading both primary and secondary texts. Intended for English majors; open to non-majors on a space-available basis. Prerequisites: One course in English and WRTG 10600, ICSM 10800, or ICSM 11800. (S,Y)

Attributes: W1
4 Credits

ENGL 21000 The Literature of Horror (LA)

Survey of horror literature and related media from the genre's 17th-century origins through to the present day. Prerequisites: One LA course. (F,O,S)

4 Credits

ENGL 21100 Jewish-American Writers (LA)

Study of dramas, short stories, and novels of Jewish-American writers who have gained prominence since the 1950s, such as Miller, Malamud, Mailer, Singer, Roth, and Bellow. Prerequisites: One course in the humanities or social sciences, or sophomore standing. (F,S,Y)
Attributes: 3A, DV, HU
3 Credits

ENGL 21400 Survey of Science Fiction (LA)

Survey of fantasy and science fiction from Beowulf to cyberpunk. Prerequisites: One course in the humanities or social sciences, or sophomore standing. (IRR)
Attributes: 3A, E20A, HU
3 Credits

ENGL 21500 Contemporary Topics in Science Fiction (LA)

Courses offered under this number will focus on varying topics within the genre of science fiction. Prerequisite: one course in the humanities or social sciences, or sophomore standing. (IRR)
Attributes: 3A, HM, HU, TIDE, TPJ
3 Credits

ENGL 21600 Contemporary British Fiction (LA)

Deals with works of British fiction since World War II for their literary value and for their portrayal of British society during the last five decades. Prerequisites: One course in the humanities or social sciences, or sophomore standing. (F,S,Y)
Attributes: 3A, E20A, H, HM, HU, TIDE, TIII
3 Credits

ENGL 21800 Modern and Contemporary American Drama (LA)

Study of the leading American dramatists of the 20th and 21st centuries, such as O'Neill, Behrman, Odets, Sherwood Anderson, Wilder, Hellman, Miller, Williams, Inge, Albee, and Eliot. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (F,S,Y)
Attributes: 3A, DLIT, E20A, HU, WI
3 Credits

ENGL 21900 Shakespeare (LA)

Study of a variety of Shakespeare's plays as examples both of the way dramatic literature works and of the achievement of the greatest of English writers. Since plays vary each semester, course may be repeated once for credit. Also offered through the London Center. Prerequisites: One LA course. (F,S,Y)
Attributes: CSA, DLIT, EP19, HM, TIDE, TIII
4 Credits

ENGL 22000 Black Women Writers (LA)

Survey of the works of black women writers from the eighteenth century to the present. Prerequisites: One LA course. (F,S,Y)
Attributes: ADCH, ADSE, DV, E20A, ERGC, ESE, RPRE, WGSJ
4 Credits

ENGL 22100 Survey of African American Literature (LA)

A study of African American literature from 1700 to the present. Prerequisites: One LA course. (F,S,Y)
Attributes: ADCH, ADSE, DV, E20A, ERGC, ESE, RPRE, WGS, WGSJ
4 Credits

ENGL 23100 Ancient Literature (LA)

Works that have dominated the Western imagination and set standards for art and life for nearly 3,000 years: the epics of Homer and Virgil, the plays of Aeschylus, Sophocles, Euripides, and Aristophanes, and selections from the Bible. Prerequisites: One course in the humanities or social sciences, or sophomore standing. (F or S,Y)
Attributes: CSA, EP19, HU
3 Credits

ENGL 23200 Medieval Literature (LA)

Survey of literature written between c. 800 and c. 1500 CE, primarily in the British Isles. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (F,S,Y)
Attributes: CSA, EP19, WI
4 Credits

ENGL 25000 Translation: The Art of Disguise (LA)

Examines the role of translation within the broader context of comparative literature. Drawing from representative texts spanning across centuries, students will discuss concepts of interpretation, faithfulness, loss and gain, negotiation, colonization, cannibalization and ethics. Explores the figure of the translator, both in theoretical and literary works, and approaches the field of translation from the perspective of practicing translators and translated authors. Basic reading proficiency in a language other than English is necessary. Cross-listed with LNGS 25000. Prerequisites: WRTG 10600 or ICSM 108xx or ICSM 118xx and Sophomore standing. (IRR)
Attributes: 1, 3A, G, HM, HU, TIII, TWOS, WI
4 Credits

ENGL 26100 Holocaust Literature and Film: From Auschwitz to the Americas (LA)

Taught in English, this course examines holocaust representation in literature and film, and the Jewish diaspora in Latin America. Class preparation and discussion will explore the power of narration to express the human capacity for resistance and resilience. This course does not satisfy language proficiency requirements in majors. Prerequisites: One course in the Liberal Arts. (IRR)
Attributes: CTE, HM, JWST, LAEL, TIDE, WGS
4 Credits

ENGL 26601 Spanish/Latin American Literature in Translation (LA)

A study of one or more principal works of major Spanish and/or Latin American writers. Taught in English. This course does not count towards language proficiency requirements in majors. (IRR)
Attributes: CTE
4 Credits

ENGL 27100 Renaissance Literature (LA)

Major trends in English literature from the early 16th century through Milton and their continental backgrounds in Renaissance Italy, France, and Spain. Emphasis on Elizabethan and Jacobean drama. Prerequisites: WRTG 106000 or ICSM 10800. (F,S,Y)
Attributes: CSA, EP19, WI
4 Credits

ENGL 27200 The Enlightenment (1660-1770) (LA)

A survey of primarily British and Anglophone literary works from the late seventeenth to the early nineteenth century. Prerequisites: One LA course. (F,S,Y)
Attributes: EP19
4 Credits

ENGL 27800 Jane Austen and Her Contemporaries (LA)

Study of Austen's novels, letters, and other writings, alongside those of other contemporary poets and novelists. Particular focus on literary representations of women's lives, and women's attitudes toward the transatlantic slave trade. Prerequisites: One LA course. (Y)
Attributes: ERGC, WGS, WGSC
4 Credits

ENGL 27900 Introduction to Latino/a/x Literature (LA)

Examines canonical literary texts produced by and about Latino groups in the United States. Class discussion and preparation will explore the historically changing ways in which, from the 19th century onward, various Latino communities have imagined their identities both within and across the national borders of the United States and Latin America. Taught in English. This course does not count towards language proficiency requirements in majors. Prerequisites: One course in the liberal arts. (IRR)
Attributes: LAEL, LXME
4 Credits

ENGL 28100 Romantic-Victorian Literature (LA)

British writing from the late eighteenth to the early twentieth century, chiefly Romantic poetry and the Victorian novel. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (F,S,Y)
Attributes: EP19, GERM, WI
4 Credits

ENGL 28500 Queer Literature (LA)

Survey of key works of lesbian, gay, bisexual, transgender, and queer literature, as well as of key debates in queer literary studies. Prerequisites: One three to four credit Liberal Arts course. (S)
Attributes: DV, E20A, ERGC, ESE, WGS, WGSJ
4 Credits

ENGL 29900 Independent Study: English (LA)

Reading and writing focused on an individual project arranged by a student with a particular faculty member. Offered on demand only. A maximum of three credits may be counted toward requirements for the English major or minor. Prerequisites: One literature course and sophomore standing. (IRR)
Attributes: HU
1-3 Credits

ENGL 31100 Dramatic Literature I (LA)

Studies in dramatic literature prior to 1900. Prerequisites: Three LA courses in ENGL or THEA; WRTG 10600 or ICSM 10800 or ICSM 11800. (F,Y)
Attributes: CSA, DLIT, EP19, WI
4 Credits

ENGL 31200 Dramatic Literature II (LA)

Studies in modern drama. Prerequisites: Three LA courses in ENGL or THEA; WRTG 10600 or ICSM 10800 or ICSM 11800. (S,Y)
Attributes: DLIT, E20A, WGS, WGSJ, WI
4 Credits

ENGL 31800 Short Story (LA)

Survey of 19th- and 20th-century short stories, British and American, by Poe, Hawthorne, Crane, Joyce, Hemingway, Lawrence, Bowen, Nabokov, Updike, Malamud, and others. History and development of the short story. Prerequisites: nine credits of English. (IRR)
Attributes: HU
3 Credits

ENGL 31900 Great American Writers before 1890 (LA)

Major works of American literature from the 18th and 19th centuries. Prerequisites: 3 courses in ENGL; WRTG 10600, ICSM 10800, or ICSM 11800. (F or S,Y)
Attributes: EP19, WI
4 Credits

ENGL 32000 Great American Writers after 1890 (LA)

Stephen Crane, Dreiser, and the naturalist movement. Later writers such as Sherwood Anderson, Fitzgerald, Hemingway, Faulkner, and Ellison. Poets such as Robinson, Frost, Eliot, and Stevens. Prerequisites: nine credits of English. (F or S,Y)
Attributes: HU
3 Credits

ENGL 32300 Biblical Interpretation in Judaism and Christianity (LA)

Examines the theological and literary dimensions of reading the Bible in the Jewish and Christian traditions. Focuses on the comparative study of Jewish and Christian methodologies for interpreting the Bible. Prerequisites: Three courses in the humanities, at least one of which is in English, Jewish studies, or religious studies.
Attributes: HU
3 Credits

ENGL 32400 Literature of the Bible (LA)

A study of major narratives and poetry from the Bible, together with their influence on subsequent literature. Emphasis is placed on literary strategies and historical knowledge that enable critical understanding. Prerequisites: Three courses in the humanities. (S,E)
Attributes: HU, WI
3 Credits

ENGL 32500 Studies in Medieval English Literature (LA)

Topics vary. Prerequisites: nine credits of English. This course may be repeated once for credit when topics vary for a total of six credits. (F or S,Y)
Attributes: EP19, GERM, HU
3 Credits

ENGL 33100 Studies in the English Renaissance (LA)

Topics vary. Prerequisites: nine credits of English. This course may be repeated once for credit when topics vary for a total of six credits. (F or S,Y)
Attributes: EP19, HU
3 Credits

ENGL 34100 Studies in the Enlightenment (1660-1770) (LA)

Topics vary. Prerequisites: nine credits of English. This course may be repeated once for credit when topics vary for a total of six credits. (F or S,Y)
Attributes: EP19, HU
3 Credits

ENGL 35000 Imagining Herself: Women's Autobiography (LA)

Examination of the way women have employed autobiography as a form of self-expression and gender definition. Consideration of the way autobiographies differ from other forms of personal expression and how they can be analyzed as literary texts. Authors may include Beryl Markham, Zora Neale Hurston, Audre Lorde, Annie Dillard, Dorothy Allison, Maxine Hong Kingston, Nancy Mairs, May Sarton, and Temple Grandin. Prerequisites: Three courses in the humanities, one of which is an English course; sophomore standing. (F,S,Y)
Attributes: DV, HU
3 Credits

ENGL 35100 Studies in Young Adult and Children's Literature (LA)

Courses offered under this number will focus on varying topics within the genre of young adult and/or children's literature. These courses may cohere around a particular theme; they may bring together literature from different genres and various periods; and they may be interdisciplinary in nature. This course may be repeated once for credit when topics vary for a total of Prerequisites: Three three-credit Liberal Arts courses. (Y)
 Attributes: ESE, HU, WGS, WGS3, WGSC
 3 Credits

ENGL 35200 Studies in 19th-Century English Literature (LA)

Topics vary. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: nine credits of English. (F or S,Y)
 Attributes: EP19, HU
 3 Credits

ENGL 35600 Religion and Literature (LA)

This course explores the ways in which religious ideas and practices appear in contemporary novels associated with various cultures and religious traditions. We consider how authors utilize religious themes to negotiate challenges and questions posed by modernity, as well as how they engage questions of religious identity through the medium of modern literary forms. We read these works against the background of contemporary changes in the relationship between the religious and the secular. Cross-listed with RLST 35600; students may not receive credit for both. Prerequisites: One course in RLST or ENGL; WRTG 10600, ICSM 10800, ICSM 11800, or equivalent. (IRR)
 Attributes: WI
 3 Credits

ENGL 36300 Irish Literature (LA)

A study of the sudden flowering of Irish literature between 1885 and 1939 and its influence on the political and social history of the time. Readings from Yeats, Joyce, Synge, and O'Casey, as well as lesser-known figures of the period. Prerequisites: nine credits of English. Also offered through the London Center. (IRR)
 Attributes: HU
 3 Credits

ENGL 36500 Studies in the Novel (LA)

Studies in the novel, with topics varying from semester to semester. Concentration may be on a theme, a period, a type, etc. This course may be repeated once for credit when topics vary for a total of eight credits. Prerequisites: Three English courses. (F,S,Y)
 Attributes: RPRE
 4 Credits

ENGL 36600 Studies in Poetry (LA)

Studies in lyric, narrative, and/or epic poetry, with topics varying from semester to semester. Concentration may be on a theme, a period, a type, etc. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: nine credits of English. (F-S,Y)
 Attributes: HU
 3 Credits

ENGL 36700 Studies in Drama (LA)

Studies in textual and performance aspects of drama, with topics varying from semester to semester. Concentration may be on a theme, a period, a type, etc. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: nine credits of English. (F-S,Y)
 Attributes: HU, WGS, WGS3
 3 Credits

ENGL 36800 Dangerous Women in Dramatic Literature (LA)

Advanced study of women characters in dramatic texts who challenge or threaten dominant cultural assumptions about the nature of femininity, from ancient Greece to the present day. May include studies of such authors as Aeschylus, Shakespeare, Ford, Behn, Ibsen, Williams, Churchill, Smith. Prerequisites: WRTG 10600 or ICSM 10800 or ICSM 11800; one additional course in ENGL or WRTG. (IRR)
 Attributes: DLIT, ERGC, WGS, WGS3, WGSC, WI
 3 Credits

ENGL 36900 Studies in Multicultural American Literature (LA)

Studies in diverse voices in American literature, including African American, Jewish American, Native American, Hispanic American, and Asian-American writers. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: Nine credits of English. (F,S)
 Attributes: AASE, ADSE, DV, ERGC, HU, LXME, NASE, RPRE, WGS, WGS3, WGS4
 3 Credits

ENGL 37000 American Poetry (LA)

A survey of the main currents of American poetry from the middle of the 19th century to the present. Beginning with the poetry of Walt Whitman and Emily Dickinson, the course establishes the dialectic poles of attraction for American writing, concentrating on such major 20th-century poets as Robert Frost, Wallace Stevens, T. S. Eliot, William Carlos Williams, Theodore Roethke, Robert Lowell, and James Wright. Prerequisites: Nine credits of English. It is recommended that students take either ENGL 11300 Introduction to Poetry or ENGL 10500 Introduction to American Literature prior to this course. (IRR)
 Attributes: HU
 3 Credits

ENGL 37100-37103 Studies in African American Literature (LA)

Studies in selected topics involving African American literature, literary movements, and traditions. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: Nine credits in English. (F,S,Y)
 Attributes: ADCH, ADSE, ERGC, HU, RPRE
 3 Credits

ENGL 37200 Studies in American Literature (LA)

Studies in different selected figures in American literature each semester. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: Nine credits of English. Since content varies each semester, course may be repeated once for credit. Also offered through the London Center. (F-S)
 Attributes: HU
 3 Credits

ENGL 37300 Renaissance Drama (LA)

Study of English drama after Shakespeare and the London background of the Jacobean and early Caroline periods. Readings from Carey, Fletcher, Ford, Jonson, Marlowe, Middleton, and Webster. Also offered through the London Center. Prerequisites: ENGL 21900 or ENGL 27100. (F,O,S)
 Attributes: CSA, DLIT
 4 Credits

ENGL 37700 Nineteenth-Century British Novel (LA)

The writings of Jane Austen, Charles Dickens, George Eliot, Henry James, and Thomas Hardy in their historical and cultural context. Critical approaches to the study of the novel. Prerequisites: Nine credits of English. Also offered through the London Center. (F or S,Y)
 Attributes: HU
 3 Credits

ENGL 37800 Twentieth-Century British Novel (LA)

Offers an introduction to the twentieth-century British novel. Charts the massive social and intellectual dislocations of the twentieth century and examines the ways in which the social, political, and cultural events of British history have shaped the production and reception of modern and contemporary British novels. Prerequisites:

Three ENGL courses. (F,S,Y)

Attributes: E20A

4 Credits

ENGL 38000-38003 Studies in World Literature (LA)

Studies in world literature, with a focus on cultures outside of the Anglo-American traditions. This course may be repeated once for credit when topics vary for a total of eight credits. Prerequisites: Three ENGL courses.

(F,S,Y)

Attributes: ERGC

4 Credits

ENGL 38200-38203 Studies in Modern Literature (LA)

Studies in 20th-century Anglophone and related literatures. Concentration may be on a theme, a genre, a particular author or group of authors, etc.

Prerequisites: Three ENGL courses. (IRR)

Attributes: E20A

4 Credits

ENGL 38400 Modern British Women Writers (LA)

This course will explore a wide range of fiction, drama, and poetry written by 20th-century women, with close attention not only to the historical conditions out of which these texts arose and how female writers speak to (and about) one another, but also to how style, form, and genre bear on the representation of marriage, sexuality, religion, parenthood, authority, and the expression of identity. Authors vary, but may include Mansfield, Woolf, Spark, Sayers, Churchill, Stevie Smith, Eavan Boland. Prerequisites: Nine credits of English. (Y)

Attributes: HU

3 Credits

ENGL 38600-38603 Studies in Indian Literature (LA)

Studies in Indian literature, with topics varying from semester to semester. Concentration may be on a particular author, a group of authors, a theme, a style, etc. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites: Nine credits of English. (Y)

Attributes: HU

3 Credits

ENGL 38700 Teaching Literature in Middle School and High School (LA)

Designed for potential middle school and high school teachers of English. Study of various works of literature frequently taught in middle school and high school, with an emphasis on presentation to younger students.

Prerequisites: Nine credits of English. (IRR)

Attributes: ESE, HU

3 Credits

ENGL 38800 Feminist Fiction and Poetry (LA)

Novels, short stories, and poems associated with second-wave feminist thinking. Prerequisites: 3 ENGL courses. (S)

Attributes: WGS1

4 Credits

ENGL 39000 Selected Topics in Literature (LA)

Courses offered under this number will focus on varying topics within the discipline of literary studies. These courses may cohere around a particular theme; they may bring together literature from various periods; and they may be interdisciplinary in nature. This course may be repeated once for credit when topics vary for a total of six credits. Prerequisites:

Nine credits in English. (IRR)

Attributes: HU

3 Credits

ENGL 39200 Latino/a/x Literatures: Narratives of Displacement and Belonging (LA)

This course delves deeply into questions of travel, migration, exile, displacement and belonging in Latino/a/x literature and features expressions of the intersectionalities of Latino/a/x identities in the United States. The texts chosen for this class will grapple with these overarching themes, while traversing the interstices of Latino/a/x identities that confront such issues as racism, colorism, sexuality, and gender. Taught in English. This course does not count towards language proficiency requirements in majors. Prerequisites: Three courses in the liberal arts.

(IRR)

Attributes: CTE, DV, LAEL, LSCH, LXME, RPRE, WGS3, WGS1

4 Credits

ENGL 39400 Sport in Film and Literature (LA)

Investigation of the sociocultural and mythic dimensions of contemporary sport as represented in selected films and fiction.

Prerequisites: SPME 29700. (S,Y)

Attributes: MAP

3 Credits

ENGL 40000 Capstone in English (LA)

Reflection on the experience of a liberal arts education; exploration of the relationship between the ICC and the English major; discussion of professional opportunities for English majors. (F,S,Y)

Attributes: CP

1 Credit

ENGL 41000 Seminar in Medieval English Literature (LA)

Seminar examining advanced topics in literatures written between 500 and 1500 CE, chiefly in Britain. Open to upper-level English majors and to other upper-level students with permission of instructor. Prerequisites: 4 courses in ENGL. (F,S,Y)

Attributes: EP19

4 Credits

ENGL 42000 Seminar in Shakespeare (LA)

Open to upper-class English majors and to other upper-class students with permission of instructor. Prerequisites: ENGL 21900; permission of instructor. (F or S,Y)

Attributes: DLIT, EP19, HU

3 Credits

ENGL 42500 History and Structure of the English Language (LA)

Investigation of historical, theoretical, and structural elements of the English language necessary for understanding and communicating in written and spoken English, focusing on grammar, syntax, morphology, etymology, and the history of the English language. Study of issues in composition as they relate to the teaching of writing. Required of English with Teaching Option majors. Prerequisites: four English courses, one of which must be at level 3. (F,Y)

Attributes: HU

3 Credits

ENGL 43000 Seminar in the English Renaissance (LA)

Open to upper-class English majors and to other upper-class students with permission of instructor. Prerequisites: ENGL 27100; permission of instructor. (F or S,Y)
Attributes: EP19, HU
3 Credits

ENGL 44000 Seminar in the English Enlightenment (1660-1770) (LA)

Open to upper-class English majors and to other upper-class students with permission of instructor. Prerequisites: ENGL 27200; permission of instructor. (F or S,Y)
Attributes: HU
3 Credits

ENGL 45000 Seminar in 19th-Century Literature (LA)

Open to upper-class English majors and to other upper-class students with permission of instructor. Prerequisites: ENGL 38100; permission of instructor. (F or S,Y)
Attributes: HU
3 Credits

ENGL 46000 Seminar in 20th-Century English Literature (LA)

Open to upper-class English majors and to other upper-class students with permission of instructor. Prerequisites: Four English courses, at least two of which are at 200-level or above. (F,S,Y)
Attributes: E20A
4 Credits

ENGL 46500 Seminar in Drama (LA)

Selected topics in classic or contemporary drama. Prerequisites: Twelve credits in English or Theatre; permission of instructor; WRTG 10600, ICSM 10800, ICSM 11800, or equivalent. (F,S,Y)
Attributes: E20A, HU, WI
3 Credits

ENGL 47000 Seminar in American Literature before 1890 (LA)

Topics may include puritan literature, 18th- and 19th-century women writers, transcendentalism, Dickinson, Whitman, Twain, among others. Prerequisites: ENGL 31900. (IRR)
Attributes: HU
3 Credits

ENGL 47100 Seminar in American Literature after 1890 (LA)

Topics may include American modernism, the Harlem Renaissance, the postmodern memoir, James, Bishop, DeLillo, among others. Prerequisites: ENGL 32000. (IRR)
Attributes: HU
3 Credits

ENGL 48000 Seminar in Literary Criticism (LA)

Selected topics in the history and theory of literary criticism. Prerequisites: Four English courses; permission of instructor. (IRR)
Attributes: E20A, HU
3 Credits

ENGL 48200 Twentieth Century Irish Poetry: Yeats and Heaney (LA)

This seminar will be devoted to the poetic works of the two Irish poets who received the Nobel Prize in the 20th century. William Butler Yeats (1865-1939) will forever be associated with the violent birth of the modern Irish nation, especially as it is recounted in "Easter 1916," the poem commemorating the ill-fated rebellion that initiated Irish independence. Yeats, who sought in his poems "benefitting emblems of adversity," addressed the political cataclysms of Irish rebellion and subsequent civil war. Likewise, Seamus Heaney (b. 1939), whose career has paralleled the modern "troubles" of Northern Ireland, has said that he seeks "symbols adequate to our predicament," and his poetry has embodied the deep tensions of his divided society and a humane and complex response to those division. While there will be some time spent clarifying the political, historical, and religious context in which each of the poets wrote, the main focus of the seminar will be an intensive study of the poems themselves, with special attention paid to the ways in which Heaney has embraced and transformed Yeats's earlier poetic version.
Attributes: HU
3 Credits

ENGL 48300 Seminar in Feminist Science Fiction (LA)

Seminar examining a wide variety of science fiction texts—including novels, films, television programs, comics, and graphic novels—through the lens of feminist theory. Prerequisites: ENGL 21400 or ENGL 21500. (IRR)
Attributes: E20A, ERGC, WGS, WGS3, WGSC, WGSJ
4 Credits

ENGL 48500 Seminar in World Literature (LA)

Selected topics in literatures originating outside the Anglo-American literary tradition. Prerequisites: 3 three-four credit ENGL courses. (U,IRR)
4 Credits

ENGL 49500 Internship: English (NLA)

Allows students to combine literary study with on-site work experience under the guidance of a faculty supervisor. Internships require the approval of both the sponsoring agency and the faculty supervisor. Also available through the London Center. A maximum of three credits may be used to fulfill requirements for the English major or minor. Prerequisites: Four English courses; junior standing or above; permission of instructor. Variable credit. (IRR)
1-12 Credits

ENGL 49801 Honors Project I (LA)

First course in a two-semester sequence of independent work on an individual project arranged by a student with a particular faculty member. Research, writing, and discussion culminating in a 1-2-page abstract for an honors thesis, an extensive annotated bibliography, and a draft of an analytical chapter, all defended before a department honors committee. Permission of instructor is required. (FY)
4 Credits

ENGL 49802 Honors Project II (LA)

Second course in a two-semester sequence of independent work on an individual project arranged by a student with a particular faculty member. Research, writing, and discussion culminating in an honors thesis of approximately 50-80 pages, defended before a department honors committee. May not be used as elective credit in the English major. Prerequisite: ENGL 49801. (S,Y)
4 Credits

ENGL 49900 Advanced Independent Study (LA)

Special research on an individual project arranged by a student with a particular faculty member. Final paper will be based on research in both electronic and print sources. Offered on demand only. A maximum of four credits may be used to fulfill requirements for the English major or minor. Prerequisites: Four ENGL courses. (IRR)
4 Credits

Environmental Studies (ENVS)

ENVS 10400 Intro Gardening & Permaculture (NLA)

Hands-on course examining the intersection of gardening with social, economic, and biological systems. Readings combined with experiential projects including field trips, with a focus on building foundational skills through work in the IC student garden. (F, IRR)
Attributes: ESTS
1 Credit

ENVS 11000 The Environmental Crisis: Causes and Solutions (LA)

Course provides basic literacy to understand the current environmental crisis, covering such topics as energy, population growth, climate change, biodiversity loss, resource exploitation, food production, and toxics. Course also investigates potential solutions to minimize impact on the personal, regional, national, and international scales. (S,Y)
Attributes: ABSS, LMEL, LMSP, LSCO, SC, SO, TPJ, TQSF, TWOS
3 Credits

ENVS 11200 Sustainability Principles and Practice (LA)

This course is designed to introduce students to the history and principles of sustainability as a new approach to addressing complex societal and environmental issues. The class will use a broad definition of sustainability, considering ecological, social, economic, political issues, and community and individual health. These components will be examined using a systems perspective that stresses their interrelatedness. (F,S,Y)
Attributes: ABSS, AN3, LMEL, LMSP, LSCO, SC, SO, TPJ, TQSF
3 Credits

ENVS 11900 Introduction to Environmental Humanities (LA)

Introduction to the ways that humanistic disciplines (literature, religion, philosophy, history, art history) contribute to an understanding of human-environment relationships. Explores how human values toward the natural world are developed and expressed; the importance of language and storytelling in guiding human attitudes and behavior toward the environment; and the ways that the humanities can inform the theory and practice of the sciences and social sciences. (F,S)
Attributes: ABSS, AN2, AN3, HM, TQSF
4 Credits

ENVS 12000 Environmental Sentinels (LA)

Field-based course that focuses on natural history, biodiversity, and development of the ability to perceive subtle changes in the environment. Primitive technology skills (friction fires, natural rope, medicinal plants, tracking, etc.) and field identification will be emphasized. Blending these skills and the approaches of deep wilderness awareness, students develop an ability to read land-use history and an appreciation for modern ecological science and natural resource management. Intended for environmental science and studies majors. (F,Y)
Attributes: ABSS
4 Credits

ENVS 12100 Introduction to Environmental Science and Technology (LA)

This course will focus on the scientific principles and technological advanced fundamental to understanding human impact on the environment. We will investigate how technology contributes to as well as reduces our impact on the environment. Topics include global climate change, water quality and availability, air quality, sustainable food production, biodiversity loss, and chemical and biological waste remediation. We will tie together the political, social, and economic aspects of environmental studies using a global perspective. (S,Y)
Attributes: ABSS
4 Credits

ENVS 14200 Wildlife Tracking and Nature Observation (LA)

This field-based course focuses on development of skills of nature observation and animal tracking in the context of modern ecology. Hands-on experience provides students the opportunity to practice tracking skills and become familiar with the details of the lives of local wildlife including coyote, deer, foxes, raccoons, opossums, weasels, mice, and bobcats. Topics and skills covered include local natural history, wildlife habitat assessment, clear print track identification, wildlife conservation, and the role of humans in today's ecosystems. (Y,U)
Attributes: ESTS, SC, TIII, TMBS
3 Credits

ENVS 17500 Introductory Environmental Seminar (LA)

Seminar course exposes students in the environmental studies or science program to environmentally relevant research, examples of careers in the environmental field, and opportunities to meet local and regional professionals. Pass/fail only. (F,Y)
Attributes: NS
1 Credit

ENVS 20100 Environmental Research: Introductory (LA)

An introductory course for students who desire hands-on research in environmental studies projects but who have limited experience with research. Research will typically involve participation in continuing projects, though new, student-proposed projects may be possible if the instructor approves. Students will work closely with a faculty member to guide their study. May be repeated twice for a maximum of Prerequisites: Sophomore standing and permission of instructor. (F-S)
Attributes: ENRE, UND
1-3 Credits

ENVS 20200 Topics in Sustainability (LA)

An umbrella course with a different focus each semester. The course is integrative and allows students to experience sustainability firsthand through field experiences and service projects at Ecovillage and the local community, linked to the study of core principles and strategies in different areas of community sustainability. The courses taught within this umbrella include sustainable land use, teaching sustainability, fostering sustainable communities, sustainable energy systems, urban sustainability, and the sustainability movement. May be repeated for a maximum of twelve credits. Prerequisites: Sophomore standing. (F-S)
Attributes: LMSP, NS, SS
3-4 Credits

ENVS 20400 Rainforests, Reefs, and Ruins: Belize Case Study (LA)

Focus on the environment and culture in Belize as a case study to explore topics including: structure and function of tropical ecosystems and Mayan civilization, factors leading to high biodiversity in the tropics, importance of biodiversity to human civilization, and threats to these ecosystems. Intended to prepare students for ENVS 20500. Prerequisites: Sophomore standing and permission of instructor. (F,Y)
Attributes: ENIN, ENSS, ENVE, ESSS, LAEL, NS, SC, SO, SS, TIDE, TQSF
3 Credits

ENVS 20500 Belize Immersion (LA)

Two-week cultural immersion course in Belize. Activities include deep jungle overnight trips, home stays with Belizean families, and service learning. Students are responsible for additional course fees for study abroad component. Course may be used to fulfill ENVS cultural immersion requirement. Prerequisites: ENVS 20400; sophomore standing; permission of instructor. (Y)

Attributes: ENIN, LAEL, LMSP

1 Credit

ENVS 21200 Conservation Biology (LA)

Introduction to principles of conservation biology issues used to understand and reverse the current worldwide species loss. Examination of case studies of local and global conservation efforts to combat this species loss. Lab exercises include field trips. Lecture: Three hours. Laboratory: Three hours. This course is cross-listed with BIOL 21200; students cannot receive credit for this course and BIOL 21200.

Prerequisites: Any 10000-level ENVS or BIOL course. (IRR)

Attributes: AN2, BIEL, ENIN, ENRE, ENVE

4 Credits

ENVS 22000 Human-Environment Geography (LA)

This course addresses complex interactions between nature and society from a geographic perspective. The course focuses on theories and methods central to human-environment geography and applies them to the world's most important environmental issues, such as climate change, deforestation, sustainable agriculture, cities, land and water conservation, and globalization. Coursework includes literature review, project design, concept diagramming, cartography (mapping), and quantitative data analysis to address geographic questions of central relevance to sustainability. (S,Y)

Attributes: ABSS, AN1, AN3, ENVE

3 Credits

ENVS 23000 Earth System Science (LA)

Lab-based course that takes a whole-systems approach to understanding the physical, chemical, biological, and human interactions that determine the past, current, and future states of the earth. Students will describe key components, interactions, and concepts that characterize the earth system. The course emphasizes the generation and analysis of quantitative data. Prerequisite: ENVS 12100. (FY)

Attributes: ABSS, ENIN

4 Credits

ENVS 23500 The Nature of Nature (LA)

Investigates why different religious traditions view our planet so differently. To what extent do these traditions shape peoples' perceptions of and interactions with the natural environment? Also explores how religious communities around the globe are responding to deforestation, biodiversity loss, and climate change. Makes use of a wide range of materials, including religious texts, documentaries, ethnographic studies, and science fiction. Prerequisites: One three-credit course in the liberal arts. (E)

Attributes: ABSS, ENHU, ENVE, ESHU, HM, TMBS, TQSF

3 Credits

ENVS 24000 Environmental Archaeology: Human Impact in the Past and Present (LA)

This course examines the interrelationship between humans and their environments from a long-term archaeological perspective. This course emphasizes archaeological, geological, and botanical methods and analytical techniques used for long-term environmental reconstruction. Cross-listed as ANTH 24000. Students may not earn credit for ANTH 24000. Prerequisite: ANTH 10400 or ANTH 10700. This course satisfies the archaeology requirement. (S,Y)

Attributes: ABSS, AN1, ENIN, ENSS, ENVE, ESSS, SS

3 Credits

ENVS 24300 Sustainable Energy: Powering the World (LA)

Survey of energy. Topics include solar, wind, geothermal, electricity, fossil fuels, heat transfer, and the economic and environmental opportunities created by energy efficiency and sustainable energy systems. The course culminates with a final Energy Design Project. Cross-listed as PHYS 24300. Students may not earn credit for both PHYS 24300 and PHYS 24300. Prerequisite: Math placement score 2 or higher, math placement assessment score of 54 or greater, or completion of MATH 10400, MATH 10800, or MATH 11000 (with a C- or better). (S,Y)

Attributes: ABSS, QL, SC, TQSF

4 Credits

ENVS 25000 Principles of Geology (LA)

Investigation of the solid earth, plate tectonics, basic mineralogy and processes that shape the terrestrial surface. Includes laboratory and hands-on activities. Prerequisites: one ENVS, BIOL, PHYS, or CHEM course. (F,O)

Attributes: ENRE, ENVE

4 Credits

ENVS 25200 Environmental Ethics (LA)

A critical examination of various moral problems raised when considering environmental issues. Questions regarding the moral status of animals, and the environment as a whole are explored. Also taken up are ethical issues raised by global climate change, such as our obligations to future generations, and how to resolve tensions between economic growth and environmental protection. These issues and others generate challenging and fundamental questions of moral philosophy: What is the basis of obligation? Do animals have rights? What does it mean to say something is intrinsically valuable? ENVS 25200 and PHIL 25200 are cross-listed courses; students cannot receive credit for both. Prerequisites: One liberal arts course. (Y)

Attributes: ABSS, AN2, AN3, HM, LMEL, LSCO, TPJ, TQSF

4 Credits

ENVS 26200 The History of Commodities in the Americas (LA)

Examines the relationship of commodities to the larger fabric of Atlantic world history since the 15th century, exploring how the material world shapes social, political, and economic behaviors and attitudes. Considers how historians, scientists, economists, and other social scientists, have interpreted the social, political, environmental, and economic significance of particular commodities. Central to the course is a focus on how commodities have shaped the relationship between Latin America, the Caribbean, and the United States. This course addresses material goods (sugar, cod, fertilizer, etc.) as commodities, as well as the history of human trafficking, from the Trans-Atlantic Slave Trade to modern day slavery. Cross-listed with HIST 26200; students cannot take both ENVS 26200 and HIST 26200 for credit. Prerequisites: Sophomore standing or above. (Y)

Attributes: ABSS, ENHU, ENVE, ESHI, ESHU, HM, TQSF

3 Credits

ENVS 27000 History of American Environmental Thought (LA)

A pervasive theme in the occupancy of North America is the changing and often conflicting perception of the environment. This course focuses on the history of environmental ideas, values, behaviors, and attitudes. Topics include capitalist, Romantic, and ecological thinking; the goals of conservation and preservation; recent rethinking of primitive experience and the idea of wilderness; and today's dialogue between mainstream environmentalism and deep ecology, the latter including ecofeminism, sustainable development, and biodiversity. Students examine the profound impact each of the paradigms has had on human-environment relations in America. This course counts toward the U.S. history requirement for history department majors. Students cannot receive credit for both HIST 27000 and ENVS 27000. (Y)

Attributes: ABSS, ENHU, ENVE, ESHI, ESHU, HI2, HM, LMEL, LSCO, SL, TQSF

4 Credits

ENVS 27100 Global Environmental History (LA)

An introduction to the field of global environmental history that explores nature's role in world history and the ways human systems of energy, agriculture, resource extraction, trade, and transportation have affected the environment over time and vice versa. Primarily focuses on the historical impacts of environmental change around the world since the start of the industrial revolution (c. 1750). Students cannot take both HIST 27100 and ENVS 27100 for credit. (IRR)

Attributes: ABSS, ENHU, ENVE, ESHI, ESHU, HI3, LMEL, LSCO

4 Credits

ENVS 27500 Intermediate Environmental Seminar (NLA)

Designed to help students make conscious choices to direct their academic activities at Ithaca College and to begin to consider post-graduation goals. Prerequisites: ENVS 17500. (S,Y)

1 Credit

ENVS 28100 Environmental Economics (LA)

Introduction to the study of environmental problems with the perspective, analytical ideas, and methodology of economics. Emphasis is placed on the economic analysis of climate change. Topics include the relationship between economic activity and climate change, economic analysis of climate change mitigation and adaptation strategies, and economic analysis of environmental policy in both the United States and the international community. Cross-listed as ECON 28100. Prerequisites: ECON 12000. (IRR)

Attributes: ENSS, ENVE, ESSS, SS

4 Credits

ENVS 29200 Critical Skills in Environmental Research and Practice (LA)

Introduces critical thinking, quantitative analysis, and presentation skills necessary for effective environmental research and professional practice including problem framing, literature review, critical thinking, experimental design, and methods of scientific inquiry. Quantitative literacy concepts such as estimation, measurement, and probability are covered. How to manage large data sets, make graphs, and execute statistical tests are addressed. Focus is on data analysis leading to objective decision making and policy formulation. Issues such as resource use, environmental impact, demographics, disease, pollution, biodiversity, and climate change are examined. Highly recommended for students interested in scientific research. Prerequisites: ENVS 12100. (S,Y)

Attributes: ENRE, QL

4 Credits

ENVS 30100 Environmental Research: Intermediate (LA)

For intermediate students who desire hands-on research in issues relating to sustainability and the environment. Research can involve participation in continuing faculty research projects or in new, student-proposed projects. Students will work closely with a faculty member to guide their study. May be repeated for a total of (F,S,Y)

1-3 Credits

ENVS 33100 Topics in Geography and Planning (LA)

Intermediate course with a different focus each semester. Topics include demographics, city and regional planning, land use, and topography. May be repeated for maximum of eight credits. Lecture/discussion, may include a three-hour laboratory. Prerequisite: ENVS 22000. (IRR)

Attributes: ENIN, ENSS, ENVE, ESPE, SS

3-4 Credits

ENVS 33300 International Environmental Policy (LA)

This course examines an environmental issue in depth (climate change, air pollution, fisheries, endangered species, human population, water management) and the international policy negotiations around that issue. Students will attend international environmental negotiation sessions; additional course fees apply for travel. Prerequisites: Junior standing; permission of instructor. (IRR)

Attributes: GERM, UND

3 Credits

ENVS 34000 Topics in Pollution (LA)

Intermediate course with a different focus each semester. Topics may include environmental toxicology, environmental health and medicine, aquatic pollution, pollution remediation, hazardous waste, or pollution policy. May be repeated for maximum of six credits when topics vary. Prerequisites: ENVS 12100. (F,Y)

Attributes: ENIN, ENRE, ENVE, ESTS, NS, WI

3 Credits

ENVS 34100 Topics in Pollution: Laboratory (LA)

Designed to complement ENVS 34000. Focuses on field and lab methods used in toxicology. Repeatable two times for a total of when topics vary. (F,Y)

Attributes: ENIN, ENRE

1 Credit

ENVS 35000-35002 Topics in Natural Resources and Ecology (LA)

Intermediate course with a different focus each semester. Topics include ecological issues associated with practical conservation or management practices, such as ecosystem ecology, conservation biology, or biology of invasive species. This course may be repeated for credit when topics vary, for a maximum of eight credits. Prerequisites: Three courses in environmental studies or biology. Lecture/discussion, may include a three-hour laboratory. (IRR)

Attributes: ENIN, ENVE, ESTS, NS

3-4 Credits

ENVS 35100 Farming the Forest: Non-Timber Forest Products (LA)

Highly hands-on interdisciplinary course in which students use place-based learning to understand and experience the role of forests in providing a range of provisioning services (food, fiber, medicine, fuel, and other materials) in the global social-ecological system. Integrated treatment of forest ecology, non-timber forest products management, and human-dimensions ecology leads to sustainably producing a range of non-timber forest products for a small student-run business. Students are responsible for all aspects of the business: production, safety, product research and development, sales, public education and outreach. Products include honey and other hive products, maple syrup, mushrooms, hand-carved items, herbal salves and teas, bark baskets, etc. (S,Y)

Attributes: ENIN, ESTS

4 Credits

ENVS 36000 Topics in Environmental Humanities (LA)

Intermediate course with a different focus each semester. Topics include literature, philosophy, art, mythology, history, landscape design, and architecture from around the world. By exploring the myriad ways human beings have viewed nature, students will gain a better grasp of why human-environment interactions are in crisis and what it means to be human in such a world. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800; and one of the following: ENVS 11900, ENVS 26200, ENVS 27000, or ENVS 27100. (IRR)

Attributes: ENHU, ENIN, ENVE, ESHU, HU, WI

3 Credits

ENVS 36600 Environmental Politics (LA)

Examines environmental protection (and destruction) from numerous political perspectives and in relation to various political ideologies. Looks at policy-making aspects of environmental protection. Traces the development of national and international environmental movements. Considers environmental issues in terms of race, gender, and class politics. Cross-listed with POLT 36600; students cannot receive credit for POLT 36600. (Y)

Attributes: ABSS, ENSS, ENVE, ESPE, LMEL, LSCO

4 Credits

ENVS 38000-38002 Selected Topics in Field Studies (LA)

Field study courses provide a multiday field trip to an off-campus ecosystem. Each field study course emphasizes a unique regional topic, and students become familiar with the major geological and ecological events as well as the human impact on sustainability of the natural ecosystem(s). Students also learn to identify the predominant flora and fauna of the area. Student projects are expected to show considerable independent effort, background information, analyses, and original synthesis. May be repeated for credit for field studies in different regions for a maximum three times or twelve credits. Prerequisites: 3 courses in ENVS or BIOL. (IRR)

Attributes: ENIN, ENSS, ENVE, ESSS, NS

1-4 Credits

ENVS 40200-40201 Environmental Research: Advanced (LA)

For advanced students who desire hands-on research in issues relating to sustainability and the environment. Research can involve participation in continuing faculty research projects or in new, student-proposed projects. Students will work closely with a faculty member to guide their study. Prerequisites: ENVS 30100 and permission of instructor. May be repeated for a total of eight credits. (F,S,Y)

Attributes: ENRE

1-4 Credits

ENVS 47500 Advanced Environmental Seminar (NLA)

Discussion group for seniors in environmental studies and environmental science. Course focuses on networking, and summative reflection on educational and personal growth through the preparation of an integration project and an e-portfolio. Restricted to Environmental Science and Environmental Studies majors. Prerequisites: ENVS 27500; senior standing. (S,Y)

Attributes: CP

1 Credit

ENVS 49000 Independent Study: Environmental Studies (LA)

A reading program of materials of special interest to the student, undertaken under faculty direction. Prerequisites: Permission of instructor. (F-S,Y)

Attributes: UND

1-4 Credits

ENVS 49500 Internship: Environmental Studies (NLA)

Permits students to explore environmental studies through a variety of work experiences. Students are expected to submit, as part of their course obligations, a thorough written evaluative report based on their experiences. Internships may be taken at national, state, and local levels, and in London under the auspices of the Ithaca College London Center. Prerequisites: Permission of instructor; completion of three-quarters of an environmental studies major or minor. 1-(F-S,Y)

1-12 Credits

Exercise and Sport Sciences (EXSS)

EXSS 12000 Anatomy and Physiology I (LA)

Develops a comprehensive understanding of the close interrelationship between anatomy and physiology as seen in the human organism. Covers the cells and tissues: epithelial, connective, muscle, and nerve. (F,Y)

Attributes: NS

4 Credits

EXSS 12100 Anatomy and Physiology II (LA)

Continuation of EXSS 12000. Covers the circulatory, endocrine, ventilatory, renal, digestive, and reproductive systems. Also reviews the muscular system from both a functional and a structural perspective.

Prerequisites: EXSS 12000. (S,Y)

Attributes: NS

4 Credits

EXSS 12400 Emergency Care for the Health Professional (NLA)

This course is designed to certify students in CPR/AED for the Professional Rescuer. Emphasis will be placed upon technique and execution of required skills. Basics of emergency injury care/first aid will be covered. Time for practice of common techniques will be included so that the students may develop and apply practical skill competencies. (F-S,B,IRR)

1 Credit

EXSS 12500 Foundations of Human Performance and Wellness (NLA)

This course provides students with an introduction to areas of exercise science focused on enhancing human performance and wellness. Details of some applied fields within Exercise Science (e.g. clinical exercise physiology, health & wellness, strength & conditioning) and how they impact human performance are emphasized. The range of human performances, from sports to prevention of disease and rehabilitation are discussed. Students will gain insight into career opportunities within exercise science aimed at enhancing human performance & wellness. Lecture and practical learning experiences will introduce students to skills needed to be a competent exercise instructor and leader. (S,Y)

2 Credits

EXSS 12600 Origins and Literacy of Medical Science (NLA)

Understand how science, research, and healthcare are interrelated, and how humans incorporate a systematic process to explain and predict clinical phenomena. Explore how we have come to rely on science in clinical practice, identify common potential misconceptions, and deepen the understanding of the scientific words we use. (S)
2 Credits

EXSS 17300 Fieldwork in Exercise Science I (NLA)

Practical observational experience in private, university, professional, hospital, corporate, clinical, or a community setting where exercise is used as the primary modality to enhance physical performance. The objective is to observe closely the daily operations and special functions implemented in these settings and the practice of using exercise to improve physical capacity. Prerequisites: Application and permission of exercise science coordinator. (Sum,Y)
1 Credit

EXSS 20200 Sport and Exercise Psychology (LA)

Introduction to the psychological factors that influence individual and group sport and exercise participation. Psychological skills training (PST) techniques used to enhance sport and exercise performance are presented. Topics include exercise and rehabilitation adherence, management of eating disorders and substance abuse, burnout and overtraining, self-confidence, goal setting, anxiety and stress management, concentration and attention control, imagery and visualization, group cohesion, sport and exercise leadership, motivation, and communication. Prerequisites: Any 100-level course. (F,S,Y)
Attributes: 1, SS
3 Credits

EXSS 22000 Kinesiology (LA)

Examines the anatomical structures and mechanical aspects of human movement. Emphasis is placed on the functional anatomy of the musculoskeletal and articular systems. Pathologies of upper and lower extremities and trunk are examined for contributions to abnormal patterns of posture, movement, and locomotion. Basic neuromuscular and biomechanical principles are introduced. Laboratory exercises concentrate on the role of muscle and joint action during basic movements and the adaptations that can result from pathologic conditions. The focus is on individual joint function and the integrated function of several joints during complex activities such as normal human locomotion. (S,Y)
Attributes: NS
4 Credits

EXSS 24600 Prevention and Care of Athletic Injuries (NLA)

Introduction to basic concepts in athletic training, with emphasis on anatomical bases and mechanisms of common athletic injuries. Basics of injury prevention, recognition, and initial care are covered. Prerequisites: EXSS 12000. (S,Y)
3 Credits

EXSS 24800 Acute Care and Emergency Management in Athletic Training (NLA)

An introduction to acute care and emergency situations. Topics include emergency assessment, sudden cardiac death, concussion, cervical spine injury, heat illness, and other athletic related trauma and certification in CPR/AED for the Professional Rescuer. Emphasis will be placed upon technique and execution of required skills. Prerequisites: EXSS 24600. (F,Y).
3 Credits

EXSS 25000 Athletic Training Techniques I (NLA)

Lecture-laboratory course to develop and refine taping and wrapping skills along with basic emergency and therapy techniques. Prerequisites: EXSS 12000; Co-requisites: EXSS 24600; athletic training majors only. (S,Y)
1 Credit

EXSS 25100 Athletic Training Techniques II (NLA)

Lecture-laboratory course to develop and refine comprehensive orthopedic evaluation skills specific to the assessment and evaluation of athletic injuries of the lower extremity and lumbar spine. Prerequisites: EXSS 24600; EXSS 25000. Corequisites: EXSS 25600. (F,Y)
1 Credit

EXSS 25200 Athletic Training Techniques III (NLA)

Lecture-laboratory course to develop and refine comprehensive orthopedic evaluation skills specific to the assessment and evaluation of athletic injuries of the upper extremity and cervical spine. Prerequisites: EXSS 25100, EXSS 25600. Co-requisites: EXSS 25700. (S,Y)
1 Credit

EXSS 25500 Introduction to Evidence Based Medicine and Clinical Reasoning (NLA)

Introduction to the central tenets and practices of evidence based medicine and clinical reasoning. Emphasis on the effective search for, and use of research and evidence that represent best practices relating to the evaluation and treatment of injuries and conditions in active populations in order to promote favorable patient outcomes, and upon the understanding and development of sound clinical reasoning skills specific to diagnostic decision making and patient care. Prerequisites: EXSS 24600. Co-requisites: EXSS 25600. (F,Y)
1 Credit

EXSS 25600 Athletic Injury Assessment I (NLA)

In-depth analysis of complete assessment theories, procedures, principles and skills related to the evaluation of orthopedic injuries and conditions. Emphasis is placed on anatomical bases and mechanisms of athletic injuries to the lower extremities and the lumbar spine. Time for practice is included so that students may develop essential practical skills. Prerequisites: EXSS 24600; Co-Requisites: EXSS 25100. (F,Y)
3 Credits

EXSS 25700 Athletic Injury Assessment II (NLA)

In-depth analysis of complete assessment theories, procedures, principles and skills related to the evaluation of orthopedic injuries and conditions. Emphasis is placed on anatomical bases and mechanisms of athletic injuries to the upper extremities and cervical spine. Time for practice is included so that students may develop essential practical skills. Prerequisites: EXSS 25600; Co-Requisites: EXSS 25200. (S,Y)
3 Credits

EXSS 26200 Personal Training (NLA)

Develop rationale and theory for the development of health-related fitness programs for the adult fitness participant. Understand how to conduct preparticipation health screening through client consultation. Learn how to develop exercise programs from a client's needs analysis. Understand the necessary skills required of the personal trainer and how to develop good client rapport and effective exercise leadership. Develop an understanding of programming for unique populations (i.e. – older adult, obese, etc.). The class format includes lecture and discussion. Material is geared toward meeting learning objectives for personal training certification. Prerequisite: EXSS 12100. (F,Y)
3 Credits

EXSS 26400 Strength and Conditioning Foundations (NLA)

This course examines the building blocks necessary to design, implement, and test a sport specific training program. Assessment tools will be examined and how their results are used to develop training programs for the athlete will be discussed. Determination of training needs through individualized, sport specific needs analyses and performance goal setting is emphasized. Short and long term benefits of training programs and the application of training cycles are discussed. The course develops the theoretical framework for the practice-based application classes that follow. The course helps prepare the student for a national certification exam. Prerequisites: EXSS 12100, EXSS 12500. (F)

3 Credits

EXSS 26500 Practicum in Performance and Wellness I (NLA)

Develop skills in administering health screening, assessments for cardiovascular endurance, muscular fitness, flexibility, body composition, and functional fitness. Majority of learning is fostered through review of video lectures, supervised practice, and arranged experiences in a full-functioning Wellness Clinic. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 12100, EXSS 12500. (F,Y)

1 Credit

EXSS 27200 Practicum in Clinical Exercise and Wellness I (NLA)

A practice-based course emphasizing fitness assessment and prescription of exercise programming for healthy populations. Develop and lead clients through programs to enhance physical fitness. Emphasis on developing strength and flexibility. Learning occurs in full-functioning Wellness Clinic and laboratory settings. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200. Only open to students in Clinical Exercise & Wellness concentration. (F-S,Y)

1 Credit

EXSS 27300 Community Service in Exercise and Sport Sciences (NLA)

Volunteer work in the community. This experience emphasizes donating time to promote community well-being, using skills developed in exercise and sport sciences programs. Examples include working at health fairs, checking blood pressure, measuring body composition, and determining blood lipid profiles. Pass/fail only. Prerequisites: EXSS 26200; permission of the instructor. (F-S,Y)

1 Credit

EXSS 29400 Clinical Experience in Athletic Training I (NLA)

Supervised practical experience in an athletic training setting at Ithaca College. A minimum of 60 clock-hours is required; students apply basic clinical skills taught in previous coursework. Clinical proficiencies emphasized include basic emergency care, protective taping and wrapping, injury evaluation, and basic therapy techniques. Prerequisites: EXSS 24600, EXSS 25000. (F,Y)

0.5 Credit

EXSS 30000 Clinical Experience in Athletic Training II (NLA)

Supervised practical experience in an athletic training setting at Ithaca College. A minimum of 30 clock-hours is required; students apply basic clinical skills taught in previous coursework. Clinical proficiencies emphasized include acute and emergency care, and orthopedic assessment of the lower extremity and lumbar spine. Prerequisites: EXSS 24800, EXSS 25100, EXSS 25600. (S,Y)

0.5 Credit

EXSS 30100 Clinical Experience in Athletic Training III (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required. Clinical proficiencies emphasized include orthopedic assessment of the upper extremity and cervical spine. Prerequisites: EXSS 25700, EXSS 25200, EXSS 30000. (F,Y)

1 Credit

EXSS 30200 Psychology of Injury in Sport and Exercise (NLA)

Designed to provide an in-depth study of the psychological causes and consequences of sport and exercise related injuries. This course will examine issues associated with onset, treatment and rehabilitation of sport injury and the mental training strategies commonly used for injury rehabilitation. Topics include motivation, adherence, return to play, mental health concerns, interview, and assessment. Prerequisites: EXSS 20200. (S,Y)

3 Credits

EXSS 30500 Techniques & Treatment of the Spine in Athletic Training (NLA)

Explores evaluation and treatment techniques for spinal injuries sustained in athletics. Emphasis on understanding a treatment classification system for spinal injuries and application of appropriate treatment, advanced manual therapy techniques and rehabilitation concepts. Pass/Fail only. Prerequisites: EXSS 25700. (S,Y)

2 Credits

EXSS 30600 Biomechanical Principles of Human Movement (LA)

Biomechanics of human movement provides an in-depth exploration of the biomechanics of human motion. Concepts and skills used to perform and interpret biomechanical analyses of human movement including anthropometry, kinematic analysis, and joint kinetics are covered. Biomechanics of fundamental movement skills including running, jumping/landing and lifting are examined in lecture and during hands on laboratory experiences. Prerequisites: PHYS 10100 or PHYS 11700, and EXSS 22000. (F,S,Y)

Attributes: 1, NS

4 Credits

EXSS 31100 Biopsychosocial Foundations of Clinical Practice (LA)

Understanding of human health and illness from a personal context. Identify biological, psychological, and social factors and their complex interactions in order to better understand and formulate more effective approaches to health, illness, and health care delivery. Application of the biopsychosocial model to healthcare studies and clinical practice. Prerequisites: PSYC 10300; EXSS 24600. (F)

Attributes: DV

3 Credits

EXSS 31200 Pre Healthcare Clinical Practicum I (NLA)

Explore the athletic training profession, domains of practice, and interprofessional practice within supervised clinical observations. Examine the education, regulation and governance of athletic training. Gain an understanding of the clinical expectations, operations and responsibilities of athletic trainers. Examine the biopsychosocial model within the athletic training clinical setting. A minimum of 30 experiential hours required. Prerequisites: EXSS 24600. (F)

1 Credit

EXSS 32000 Neuromuscular Control (LA)

Study of sensorimotor and musculoskeletal systems involved in producing coordinated and purposeful movements. Injury, training, practice, learning, and other cognitive-emotional processes are examined as they affect the neuromuscular control of finely coordinated skills and vigorous physical performance. Emphasis is placed on understanding the relevant neurophysiological mechanisms of movement and how training and practice can be used to maximize performance, wellness, and rehabilitation ease. Exploration of theories of motor learning and control, from the general motor program to the dynamic system theory. Prerequisites: EXSS 22000 or PTBS 31300; junior standing. (S,Y) Attributes: NS
3 Credits

EXSS 32100 Exercise Physiology (LA)

Examines physiological changes during exercise, after exercise, and during a training period. Also considers efficiency, needs, and limitations of body systems, and their interrelationships. Lecture, demonstration, and laboratory. Prerequisites: EXSS 12100; junior standing. (F-S,Y)
4 Credits

EXSS 34000 Therapeutic Interventions in Athletic Training I (NLA)

Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications and contraindications, and clinical application. Prerequisites: EXSS 25700. Co-requisites: EXSS 35100. (F,Y)
3 Credits

EXSS 34200 Therapeutic Interventions in Athletic Training II (NLA)

Basic principles of therapeutic exercise to develop, maintain, and/or improve components of physical fitness. Emphasis is placed on these principles as well as on specific exercise programs for rehabilitation of major athletic injuries. Prerequisites: EXSS 34000. Co-requisites: EXSS 35100. (S,Y)
3 Credits

EXSS 34900 Fieldwork in Exercise and Sport Sciences (NLA)

Practical experience in corporate or clinical settings, amateur and professional sport agencies, and community organizations. Focus is on observation, guided learning, and supervised practical experiences. Prerequisites: Exercise and sport sciences major or minor; junior standing or above; permission of department chair. (F-S,Y)
1-6 Credits

EXSS 35100 Athletic Training Techniques IV (NLA)

Lecture-laboratory course to develop and refine essential skills related to various therapeutic interventions with emphasis on therapeutic modalities in athletic training. Prerequisites: EXSS 25700, EXSS 25200. Corequisites: EXSS 34000. (F,Y)
1 Credit

EXSS 35200 Athletic Training Techniques V (NLA)

Lecture-laboratory course to develop and refine essential skills related to therapeutic interventions with emphasis placed in rehabilitation and exercise in athletic training. Prerequisites: EXSS 34000, EXSS 35100. Corequisites: EXSS 34200. (S,Y)
1 Credit

EXSS 36000 Medical Science (NLA)

An in-depth study of the etiology, process, treatment, and pharmacology of diseases of the human body according to the body systems. Emphasis is placed on infectious, cardiovascular, pulmonary, gastrointestinal, endocrine, and urogenital disorders. Prerequisites: EXSS 12000, EXSS 12100, junior standing. (S,Y)
3 Credits

EXSS 36500 Junior Internship in Athletic Training (NLA)

Provides a supervised clinical experience opportunity for junior AT majors. Relevant clinical experiences must include exposure to upper extremity, lower extremity, and equipment intensive experiences of both genders. A minimum of 60 experiential hours per credit is required. Each student is required to take four credits of this course obtaining a minimum of 240 practical hours, and a minimum of 120 of these hours must be attained under the supervision of an approved clinical instructor. These clinical experiences must be approved by the athletic training clinical coordinator prior to registration. May be repeated up to four credits. Pass/fail only. Prerequisite: EXSS 30000, EXSS 25700; athletic training major, junior standing. (F,S,U,Y)
1-4 Credits

EXSS 37300 Fieldwork in Exercise Science II (NLA)

Practical observational experience in private, university, professional, hospital, corporate, clinical, or a community setting where exercise is used as the primary modality to enhance physical performance. The objective is to observe closely the daily operations and special functions implemented in these settings and the practice of using exercise to improve physical capacity. A clear focus for internship planning should be developed during this fieldwork. May be repeated for one credit. Prerequisites: EXSS 26200; application to and permission of exercise science coordinator. (Sum, Y)
1 Credit

EXSS 37500 Research Methods in Exercise and Sport Sciences (LA)

Examination of the investigative methods used in exercise and sport sciences research. Design of experiments and application of statistical techniques for several types of research are explored. Includes proposal preparation for an original research project. Prerequisites: MATH 14400, MATH 14500, MATH 15500, or PSYC 20700; WRTG 10600 or ICSM equivalent; junior standing. (F,S,Y) Attributes: 1, 2B, WI
3 Credits

EXSS 38200 Practicum in Clinical Exercise and Wellness II (NLA)

A practice-based course emphasizing fitness assessment and prescription of exercise programming for healthy and patient populations. Develop and lead clients through programs to enhance physical fitness. Emphasis on developing core function, balance, and cardiovascular endurance. Majority of learning occurs in full-functioning Wellness Clinic and laboratory settings. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200. Only open to students in Clinical Exercise & Wellness concentration. (F-S,Y)
1 Credit

EXSS 38400 Practicum in Performance and Wellness II (NLA)

Develop skills to conduct sports specific needs analyses. Students' abilities to implement testing protocols to evaluate athlete / client condition on health- and skill-related components of fitness is enhanced. Statistical analysis is used to identify strengths and weaknesses. Profiles are devised to identify objective program directions. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200 and EXSS 26400. (S,Y)
1 Credit

EXSS 38500 Practicum in Performance and Wellness III (NLA)

Explore and execute training modes to enhance strength and power in active populations. Emphasis is on technique and teaching for development of performance in a variety of active populations. Discussion and demonstration, personal skill development, and leading peers in skill development are the primary means of instruction. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200 and EXSS 26400. (F,Y)

1 Credit

EXSS 38600 Practicum in Performance and Wellness IV (NLA)

Develop skills in the proper execution of exercises to enhance health- and skill-related components of fitness (i.e. flexibility, speed, agility, power and aerobic / anaerobic endurance). Students' abilities to devise and implement field-based conditioning modes will be enhanced. Emphasis is on technique and teaching for development of athletic performance in a variety of athletic populations. Discussion, demonstration, personal skill development, and leading athletes / clients in skill development are the primary means of instruction. Material is geared toward meeting learning objectives for national certification. Prerequisite: EXSS 26200 and EXSS 26400. (S,Y)

1 Credit

EXSS 38700 Practicum in Performance and Wellness Testing (NLA)

Emphasizes skill development in graded exercise testing through practice-based instruction. Assessing the health status of an individual, protocol selection, and utilizing results to guide exercise programming will be discussed. Understanding electrocardiography and safety and emergency procedures will be highlighted. Majority of learning is fostered through arranged experiences in a full-functioning Wellness Clinic and Exercise Physiology Laboratory. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200; EXSS 26400; EXSS 32100. (S,Y)

1 Credit

EXSS 39000 Advanced Strength and Conditioning (NLA)

This enhances students understanding of strength and conditioning service provision through examination of more advanced concepts of performance testing, program design and program implementation. Technological advancements and recent developments in the areas of performance testing and athlete monitoring will be examined. Objective determination of athletes' needs will be emphasized further. Student understanding of program design will be enhanced through discussion and application of advanced periodization models. The course helps prepare the student for the national certification exam. Prerequisites: EXSS 26400. (S,Y)

3 Credits

EXSS 39900-39901 Selected Topics in Exercise and Sport Sciences (LA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

Attributes: NLA

1-3 Credits

EXSS 40000 Clinical Experience in Athletic Training IV (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required. Clinical proficiencies emphasized include basic therapeutic exercise techniques and advanced modality use. Students must be athletic training majors. Prerequisites: EXSS 30100, EXSS 34000, EXSS 35100. (S,Y)

1 Credit

EXSS 40100 Clinical Experience in Athletic Training V (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required. Clinical skills emphasized include advanced therapeutic exercise techniques, therapeutic exercise protocols for major joints, and pre-event management. Prerequisites: EXSS 34200, EXSS 35200, EXSS 40000; athletic training majors only. (F,Y)

1 Credit

EXSS 40400 Leadership and Team Building in Exercise and Sport (LA)

Designed to provide an in-depth study of the principles and applied strategies that influence effective leadership and the building of productive teams. Emphasis is placed on developing high-performing teams through the effective use of individual, team, and corporate sport leadership. Topics include the assessment, training, and implementation of leadership qualities, skills, and "laws" that promote the proper development of leaders and teams. Theoretical foundations will be discussed for situational, transformational, charismatic, and servant leadership as each relates to the building of championship teams. Information is provided via small groups, lectures, role-playings, and student-taught workshop (cooperative learning) formats. Prerequisites: EXSS 30200. (S,Y)

Attributes: NS

3 Credits

EXSS 40500 Applied Techniques in Sport Psychology (NLA)

An in-depth examination of sport psychology techniques and their application to sport performance. Particular attention will be given to the synthesis and application of various mental training techniques to youth and team sport settings. Techniques include motivation, teamwork, communication, goal setting, anxiety/arousal control, imagery, positive self-talk, leadership, and mental toughness. Topics include gaining entry, confidentiality, and providing consultation in youth and team sport settings. Prerequisites: EXSS 30200. (S,Y)

3 Credits

EXSS 40600 Health and Wellness Coaching (NLA)

Presents relevant theory and allows for development of relational skills required for successful health and wellness coaching with the goal to sustainably affect healthy behavior change in patients/clients. Hybrid learning environment utilizes on-line, telephonic, and classroom experiences. Presents most course material via telephonic conferences. Details career options in health coaching and preparation for coaching certification. Prerequisites: Senior standing. Open to HSHP students only. (F,Y)

3 Credits

EXSS 40700 Clinical Pathoanatomy (NLA)

Advanced course that emphasizes musculoskeletal structure, function, and injury by extending and deepening prior knowledge through the use of human anatomic laboratory instruction. There will be in-depth examination of injuries that occur during sports participation. Students will apply knowledge of pathoanatomy, pathomechanics, and pathophysiology towards a deeper understanding of the most common sports-related injuries and their anatomical basis. Prerequisites: Grade of C or better in EXSS 34000; Grade of C or better in EXSS 34200; senior standing or permission of instructor. (F-Y)

3 Credits

EXSS 41100 Principles of Evidence Based Practice and Clinical Reasoning (NLA)

Introduce evidence-based practice and clinical reasoning with emphasis on effective search strategies for evidence of best practices relating to the recognition, rehabilitation, and prevention of injuries and conditions in active populations. Explore patient outcomes to develop sound clinical reasoning skills specific to diagnostic decision making and patient care. Prerequisites: EXSS 37500. (S)
2 Credits

EXSS 41200 Pre-Healthcare Clinical Practicum II (NLA)

Examine athletic training policies and procedures within supervised clinical observations. Recognize the social determinants of health, while interacting with various healthcare professions treating active populations. Identify the various interventions used to treat athletic injury and gain certification in CPR/AED use. A minimum of 30 experiential hours is required. Prerequisites: EXSS 31200. (S)
1 Credit

EXSS 42000 Advanced Biomechanics of Human Movement (LA)

An in-depth exploration of the biomechanics of human motion, focusing on the concepts and skills needed to perform and interpret biomechanical analyses of a variety of human movements. Topics will include anthropometry, kinematics, kinetics, and mechanical work, energy, and power. Select human movement skills from sport, clinical, and occupation settings will be examined in lecture and during hands-on laboratory experiences. Prerequisites: EXSS 22000; EXSS 22100, or PHYS 10100, or PHYS 11700 with C- or better; and EXSS 32100. (S,Y)
Attributes: 1, NS
4 Credits

EXSS 42100 Advanced Study in Exercise Physiology (LA)

An extension of EXSS 32100 Exercise Physiology that goes into greater depth on the physiological mechanisms that regulate the body's responses and adaptations to exercise. Special physiological considerations of gender, development and aging, obesity, pregnancy, and environmental stress (e.g., altitude, pollution, extreme temperature) are emphasized. Popular pharmaceutical and dietary manipulations used to enhance exercise performance are discussed. Experimental research in exercise physiology is introduced, and limited laboratory experiences are scheduled during class time. Prerequisites: EXSS 32100. (F-S,Y)
3 Credits

EXSS 42200 Exercise and Rehabilitation Psychology (LA)

Discussion of the psychological antecedents of exercise, including barriers and adherence to exercise or rehabilitation regimens. Particular attention will also be given to wellness, stress, the biobehavioral basis of coronary heart disease and other illnesses, and the psychodynamics of rehabilitative medicine. Prerequisites: EXSS 20200; EXSS 32100 or EXSS 34200 or EXSS 30200; Junior standing. (F, Y)
Attributes: 1, SS
3 Credits

EXSS 43000 Seminar in Athletic Training (NLA)

Seminar for senior students majoring in athletic training, intended to expand and reinforce learning that has taken place in previous core courses. Major topics include contemporary issues, athletic training administration, budget management, facility design, protective equipment, injury evaluation, modality operation, and treatment and rehabilitation programs. Prerequisites: EXSS 25600; senior standing in athletic training/exercise science. (F-S,Y)
3 Credits

EXSS 44700 Pathophysiology, Limited Capacity and Exercise (NLA)

Study of the pathophysiology of disease or disabling states, the assessment of exercise potential, and the special considerations for prescription of exercise in these cases. Special emphasis is placed on discussion of phase I and phase II cardiac rehabilitation, diabetic patients, pulmonary disease, and working with older adults with limited functional capacity. Additional special populations are discussed as time permits. Material is geared to the learning objectives of the American College of Sports Medicine's exercise specialist certification. Prerequisites: EXSS 24600; EXSS 26200; EXSS 32100. (S,Y)
3 Credits

EXSS 45000-45100 Independent Study in Exercise and Sport Sciences (LA)

Individual study program for the investigation of special issues or topics in the field of exercise or sport science that have such breadth of cultural or psychological material, such rigor and depth of theoretic structure, or such play of broad intellectual and aesthetic themes as to be classified as liberal arts. Arranged individually between student and faculty sponsor according to guidelines available from the department. Prerequisites: Major or minor in the Department of Exercise and Sport Sciences; permission of department chair. (F-S,Y)
0.5-3 Credits

EXSS 45500 Senior Internship in Athletic Training (NLA)

Provides a supervised clinical experience opportunity for senior AT majors. Relevant clinical experiences must include exposure to upper extremity, lower extremity, and equipment intensive, and general medical experiences of both genders. A minimum of 60 experiential hours per credit is required. Each student is required to take four credits of this course obtaining a minimum of 240 practical hours, and a minimum of 120 of these hours must be attained under the supervision of an approved clinical instructor. These clinical experiences must be approved by the athletic training clinical coordinator prior to registration. May be repeated up to four credits. Pass/fail only. Prerequisite: EXSS 36500, senior standing. (F-S, Su, Y)
1-4 Credits

EXSS 45600 Clinical Experience in Athletic Training VI (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required, and clinical proficiencies emphasized include administrative aspects of athletic training, presentation of season-ending injury reports as well as case histories. Clinical integration proficiencies (CIP) will be assessed. This course will include the ICC Capstone and will include athletic training major content with the integrative core curriculum and self-reflection of learning outcomes also explored. Students must be athletic training majors. Prerequisites: EXSS 40100, EXSS 43000. (S,Y)
Attributes: CP
1 Credit

EXSS 46000 Internship in Exercise and Sport Sciences (NLA)

Supervised work experience in corporate or clinical exercise settings, amateur and professional sport agencies, and community sport organizations. Student assumes a leadership role in various job-related activities and performs administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Prerequisites: EXSS 34900; permission of department chair. 6-(F-S,Y)
6-12 Credits

EXSS 46600 Administration, Mentoring, and Professional Preparation (NLA)

Provides opportunities to develop administrative and leadership skills. Emphasis is on appreciation for excellent leadership, staffing, equipping, and operations of a fully-functioning human performance facility. Majority of learning occurs by leading and working with apprentice students (i.e., underclass) in the program and through the completion of a project that allows the student to design their own facility. Preparation for external certification is emphasized. Prerequisites: EXSS 38200, EXSS 38400, EXSS 38500; and senior standing. (F-S,Y)
3 Credits

EXSS 46700 Practicum in Clinical Exercise and Wellness III (NLA)

A practice-based course emphasizing assessment of cardiovascular capacity and heart health through practical experiences in graded exercise testing. Highlights understanding electrocardiography, test protocol, utilizing results to guide exercise programming, and safety. Students initially collect data on classmates and ultimately work with Clinic clients. Majority of learning occurs in full-functioning Wellness Clinic and laboratory settings. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 46400; EXSS 27200 or EXSS 38200. Only open to students in Clinical Exercise & Wellness concentration. (F-S,Y)
1 Credit

EXSS 47000 Applied Practice in Strength and Conditioning and Wellness (NLA)

Enhance understanding of service provision in strength and conditioning for performance and wellness through applied practice. Students will assist strength and conditioning and health and wellness professionals in the delivery of support services to athletes / clients. Areas of support may include performance testing, program design, exercise leadership, reflective practice and athlete, client and coach education. The objective is to observe closely and have some supervised experiences in the daily operations and special functions of strength and conditioning / health and fitness facilities. A clear focus for internship planning will be developed during this experience. Prerequisites: EXSS 38600; EXSS 38700; EXSS 39000. (F,Y)
2 Credits

EXSS 47300 Internship: Strength and Conditioning (NLA)

A practical learning experience in a setting using exercise for athletic performance enhancement. Sites for internships include strength and conditioning programs in private, university and professional settings. Students are involved with the daily operations of the agency. Prerequisites: EXSS 46600; a minimum GPA of 2.50 in specific major requirements; permission of the exercise science coordinator. (F,S,Y)
Attributes: CP
6-12 Credits

EXSS 47400 Internship: Clinical Exercise and Wellness (NLA)

A practical learning experience in a setting using exercise for rehabilitation purposes, disease prevention, or wellness promotion. Sites such as hospitals, clinics, corporate fitness centers, wellness clinics, and community-based facilities are typical. Students are involved with the daily operations of the agency. Prerequisites: EXSS 46600; a minimum cumulative GPA of 2.75 with a minimum GPA of 3.00 in specific major requirements; permission of the exercise science coordinator. (F,S,Y)
Attributes: CP
6-12 Credits

EXSS 47500 Research Team I: Exercise and Sport Sciences (LA)

First semester of capstone research experience involving synthesis of a research question, development of appropriate experimental design, as well as data collection, analyses, interpretation, and result dissemination by teams of students under the direction of one or more faculty members. Prerequisites: EXSS 37500. (F,Y)
Attributes: UND
3 Credits

EXSS 47600 ICC Capstone in EXSS (NLA)

This course will provide exploration and self-reflection upon the relationship between the Ithaca College core curriculum courses and its application to the field of Exercise Science. Emphasis on the creation of a reflective artifact that demonstrates the changes that have occurred as a result of the ICC experience inside and outside the study of exercise science. Prerequisites: Senior standing, permission of instructor. (S,Y)
Attributes: CP
0 Credit

EXSS 47700 Research Team II (LA)

Second semester of capstone research experience involving data collection, analysis, interpretation, and result dissemination by teams of students under the direction of one or more faculty members. Prerequisite: EXSS 47500; (S,Y)
Attributes: CP
3 Credits

Finance (FINA)

FINA 10301 Fun with Investments (NLA)

Mini-course covering the fundamentals of investing, particularly in equities and fixed-income securities. Basic concepts and principles of investing, security pricing, and risk vs return. (B,F,S,Y)
1.5 Credits

FINA 10302 Minicourses in Finance (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

FINA 10400-10402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed FINA 32100. (Y)
1.5 Credits

FINA 12500 Introduction to Personal Finance (NLA)

A basic personal finance course, dealing with various aspects of individual financial decision making. Introduces financial investments, including stocks, bonds, and mutual funds and an overview of the individual income tax system. The fundamentals of personal financial statements, financing home and auto purchases, retirement planning, estate management, and insurance are also covered. Enrollment limited to non-business students. (Y)
3 Credits

FINA 20300 Financial Markets and Institutions (NLA)

A broad introduction to the structure and operation of the U.S. financial system through examination of the major financial institutions, markets, and instruments that compose it. Emphasis is on the functions and interrelationships of these elements and on identifying various government institutions and regulations overseeing the system.

Prerequisites: ECON 12100. (F,S,Y)

3 Credits

FINA 20400-20402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed FINA 32100. (IRR)

1.5 Credits

FINA 21000 Personal Financial Planning and Wealth Management (NLA)

The main goal of this course is to provide students with a foundation needed to make important decisions that affect their short- and long-term financial well-being as well as introduce students to concepts relevant to the Wealth Management profession. Students will learn the basic concepts and their applications through several delivery methods, which may include: self-analysis, case studies, and interactive web-based tools.

Prerequisites: BINT 10100. (F,S,Y)

3 Credits

FINA 30400-30401 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 30402 Mini-courses in Finance- Intro to Derivatives (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 31100 Business Finance (NLA)

An in-depth examination of the principle of time value of money with its applications in various areas of financial decision making in organizations to include stock and bond valuation, capital budgeting, and capital structure within the risk-return framework. Decisions about dividend policies, operating and financial leverage, and sources of short-term financing are also addressed. Prerequisites: ECON 12000 and ACCT 22500. (F,S,Y)

4 Credits

FINA 31500 Real Estate Finance (NLA)

Financing of residential properties (types of loans, underwriting, appraisal, and closing; analysis of income-producing properties), cash-flow identification, tax implications, leverage, and valuation, real estate investment performance, sources of real-estate funding, secondary mortgage markets, and the role of government policies. Prerequisites: FINA 31100; junior standing. (IRR)

3 Credits

FINA 31700 Insurance and Risk Management (NLA)

Study of risk and the risk management process with a major focus on insurance as a risk management tool. Legal principles, institutional aspects, and international issues. Business and personal risk management and government insurance. Corequisites: FINA 31100; junior standing. (IRR)

3 Credits

FINA 32100 Security Analysis and Portfolio Management (NLA)

In-depth study of the techniques used to analyze securities and portfolios. Risk and return trade-off; asset allocation; portfolio selection; diversification; capital asset pricing model; efficient market hypothesis; fixed income securities and equity valuation models; duration; derivative assets. Prerequisites: FINA 31100. (F,S,Y)

3 Credits

FINA 37000 International Finance (NLA)

Study of the conceptual and practical aspects of international finance through in-depth analysis of international financial markets, exchange rate determination, and exchange rate risk exposure and management. Concentration on working capital management and international capital budgeting strategy. Students develop an understanding of the dynamic relationship between exchange rates and fundamental economic variables. Prerequisites: FINA 31100; junior standing. (S,Y)

3 Credits

FINA 37500 Fixed Income Analysis and Portfolio Management (NLA)

The primary purpose of this course is to introduce the basic concepts of fixed income investing as well as various fixed income instruments. Topics covered include: Bond math, the yield curve, fixed income risk management, as well as the role of the economy and interest rates. Students will also work in teams and identify securities to invest in as part of the Fixed Income Portfolio. Prerequisites: FINA 31100. (S,Y)

3 Credits

FINA 38000 Equity Portfolio Management (NLA)

Equity Portfolio Management aims to provide students with the fundamental groundwork needed to manage equity investments in a portfolio setting. Students will learn the necessary skill set through a mixture of managing an actual equity portfolio combined with a focus on business cycles, sector analysis, estimating expected risk and return metrics, and finally equity evaluation. Prerequisites: FINA 32100. (F-S, Y)

3 Credits

FINA 39700 Selected Topics: Finance (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

FINA 40400-40402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 40500 Wealth Management (NLA)

The study of wealth management draws on course work from various disciplines. Topics may include fiduciary responsibility, investments, risk and insurance, taxation, and business and property law. Wealth management involves customized and sophisticated solutions dependent on the net-worth and financial objectives of the investor household. Students learn to formulate and implement appropriate plans for the accumulation, conservation and transfer of a client's personal wealth, dependent on specific client situations. Prerequisites: FINA 21000; FINA 32100. (F,Y)

3 Credits

FINA 41900 Speculative Markets (NLA)

In-depth analysis of options and option markets. Review of put and call options, option pricing formulas, and option strategies. Discussion of new developments such as interest rate options and options on future contracts. Second half focuses on the futures market, pricing the commodity futures and financial futures, and optimal hedging strategies based on futures. Prerequisites: FINA 31100; FINA 32100; junior standing. (IRR)
3 Credits

FINA 42000 Alternative Asset Management (NLA)

Teaches advanced finance students about the Alternative Investment Industry as well as the products and investments used in this area of investment. In depth analysis will be performed to fully evaluate such vehicles as hedge funds, private equity, commodities, and real estate. Prerequisites: FINA 32100. (F,Y)
3 Credits

FINA 47000 Financial Analysis and Forecasting (NLA)

An advanced finance elective that examines applied financial research and analysis in great depth. Topics covered include advanced financial analysis including ratio analysis, valuation methods, discount rates, as well as econometric techniques applied to financial research and forecasting. TSP, an econometric software, is used in some homeworks and project. Prerequisites: FINA 32100; senior standing. (IRR)
3 Credits

FINA 48000 Advanced Business Finance (NLA)

A capstone course in finance that combines theories of financial management with practical application through case analysis. Financial theories with respect to risks and returns, capital structure and cost of capital, optimal capital budget, short- and long-term financing decisions, and other topics concerning multinational financial management. Students may be required to write and present analyses of cases in the class. Prerequisites: FINA 32100. (F,Y)
3 Credits

FINA 49700-49702 Selected Topics in Finance (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
Attributes: UND
1-3 Credits

FINA 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)
1-6 Credits

FINA 49900 Independent Study: Finance (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,IRR,U,Y)
1-3 Credits

French (FREN)

FREN 10100 Elementary French I (LA)

Beginning course. Practice in understanding, speaking, reading, and writing simple idiomatic French in the context of French and francophone cultures. Emphasizes participation and self-expression. Open to students with no previous French, or by placement examination. (F,S,Y)
Attributes: 3A, G, HM, HU, TIDE
4 Credits

FREN 10200 Elementary French II (LA)

Continuation of FREN 10100. Limited to students who have successfully completed FREN 10100 with a grade of C- or better, or by placement examination. Prerequisites: FREN 10100, or equivalent. (F,S,Y)
Attributes: 3A, G, HM, HU, TIDE
4 Credits

FREN 20000 Intermediate French (LA)

Develops intermediate-level proficiency in French with a focus on culture. Includes grammar review and expansion, with practice in all skill areas and a particular emphasis on spoken communication. Prerequisites: FREN 10200 with a grade of C- or better, or by placement examination. (Y)
Attributes: HM, TIDE
4 Credits

Attributes: HM, TIDE

4 Credits

FREN 20300 French Intermediate Conversation (LA)

A conversation course for students at or above the intermediate level who want to maximize their conversational skills. May be repeated for a total of two credits. Prerequisites: FREN 10200. (IRR)
Attributes: HU
1 Credit

FREN 29900 Independent Study: French (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: Permission of instructor and chairperson. (IRR)
Attributes: UND
1-3 Credits

FREN 30100 Conversational French and Written Communication (LA)

Conversation-based course dedicated to developing spoken and written communication skills at the third-year level. Reading and discussion of contemporary material; regular practice of writing, including editing and correction of text. Prerequisites: FREN 20200 with a grade of C- or better, or language placement test. (IRR)
Attributes: 3A, CCCS, G, HU
3 Credits

FREN 31200 French Literature in Translation (LA)

Study of the principal works of major French writers. Readings and all class activities are in English. This course does not count towards language proficiency requirements in majors. (IRR)

Attributes: 3A, CTE, G, HU

4 Credits

FREN 31300 Introduction to French Literature (LA)

A study of representative texts in French literature in all genres.

Prerequisites: FREN 30100 (may be taken concurrently). (IRR)

Attributes: 3A, G, HU

3 Credits

FREN 32200 Advanced French Grammar Through Creative Writing (LA)

Advanced study of French grammar, with an emphasis placed on creative writing, including register, genres, and style. Prerequisites: FREN 20000 or above taught in French with a grade of C- or better, or by placement examination. (IRR)

Attributes: CCCS

4 Credits

FREN 32300 French Phonetics (LA)

Intensive practical phonetics for American speakers of French. Emphasis is placed on correct pronunciation, orthography, and understanding of contemporary dialects. Prerequisites: FREN 30100. (IRR)

Attributes: HU

3 Credits

FREN 34300 The Evolution of French Civilization (LA)

Study of how concrete elements of French civilization, key figures, government, society, ideas, literature, and the arts evolved from prehistoric times to the 20th century. Taught in French. Prerequisites: FREN 30100. (IRR)

Attributes: G, H, INBG

4 Credits

FREN 34400 Contemporary French Culture (LA)

Exploring modern France and francophone countries from a total culture point of view: geography, politics, and economy, as well as literature, sciences, music, cinema, gastronomy, and the arts. Taught in French.

Prerequisites: FREN 30100 (or equivalent with permission of instructor). (F,E)

Attributes: G, H

3 Credits

FREN 34800 French Radical Feminism (LA)

This course explores French feminism through history, from the French Revolution to the contemporary era. Through discussion of key French feminist texts, students address issues such as the relationship between gender, race and citizenship; the gender binary and its ties to heteronormative structures of power; and the influential role of French feminist theory on contemporary queer theory and transgender studies. Course taught in English. This course does not count towards language proficiency requirements in majors. Prerequisites: Two courses in the Liberal Arts. (IRR)

Attributes: CTE, WGS, WGS3, WGS1

4 Credits

FREN 35500 French Translation in Practice (LA)

Practical introduction to the world of translation and its relationship to culture and ethics through the analysis and translation of literary and non-literary texts (articles, brochures, documents) from French into English. Prerequisite: FREN 20000 or above taught in French with a grade of C- or better, or by placement examination. (IRR)

4 Credits

FREN 36700 French for Professional Communication (LA)

In this course students gain familiarity with spoken and written expression necessary to conduct business in France. Topics covered include the French and Francophone economy, French and Francophone business practices, human resources, marketing, professional translation, and intercultural communication. Prerequisites: FREN 20200. (IRR)

3 Credits

FREN 37700 Selected Topics in French Literature and Culture (LA)

Study of a genre, time period, group of authors, or single major writer. May be repeated up to nine credits when topics vary. Taught in French.

Prerequisites: FREN 30100 or by placement exam. (IRR)

3 Credits

FREN 39900 Independent Study: French (LA)

Individual research, study, and/or writing on particular topics supervised by a member of the department. Offered on demand only. Prerequisites: FREN 30100; permission of instructor and chairperson. (IRR)

Attributes: UND

1-3 Credits

General Business (GBUS)

GBUS 20300 Business Law I (NLA)

Introduction to contracts law under both the common law and the Uniform Commercial Code. Topics include contract formation (offers, counteroffers, consideration, and acceptance), enforcement, breach, and damages. Emphasis is placed on the application of legal concepts to solve problems. (Y)

2 Credits

GBUS 20400 Legal Environment of Business II (NLA)

Continuation of GBUS 20300 Legal Environment of Business. This course focuses on business organizations and the regulation of business.

Topics covered include agency and issues in employment law, forms of business organizations, partnerships, corporations, securities regulation, environmental law, antitrust law, corporate social responsibility, the Uniform Commercial Code, debtor-creditor relations, and selected current topics in law. Emphasis is on case analysis, including the social, ethical, political, and economic considerations of the impact of law on business and society. Emphasis is also placed on the application of legal concepts to solve problems. Prerequisites: GBUS 20300; sophomore standing. A student cannot receive credit for both GBUS 20400 and GBUS 30700. (S,Y)

3 Credits

GBUS 30700 Commercial Law (NLA)

In-depth analysis of the commercial law. Topics include Uniform Commercial Code (UCC) Article 2: sales contracts and risk of loss issues; Article 3: negotiable instruments and the holder-in-due-course doctrine; Article 6: bulk transfers; Article 9: secured transactions; bankruptcy; creditor and debtor rules; mortgages; liens; principals and agents; antitrust legislation; special corporation topics, such as LBOs and insider trading; liability of corporate officers and directors; and ethical considerations. Prerequisites: GBUS 20300; junior standing. Previously titled Business Law II (Accounting). A student may not receive credit for both GBUS 30700 and GBUS 20400. (S,Y)

3 Credits

GBUS 31000 International Business Law (NLA)

An analysis of commercial law in an international context. Topics covered include major national and international trade regulations; international sales, credits, and commercial transactions; resolution processes for international disputes; U.S. trade law; import and export laws; GATT; and the regulation of the international marketplace. Emphasis is on the application of legal concepts to solve problems. Prerequisites: GBUS 20300; junior standing. (S,Y)
Attributes: LMAL
3 Credits

General Communications (GCOM)

GCOM 10001-10010 Park Scholar Program Special Topics (LA)

Exploring various topics of interest to the field of media studies, this seminar develops the Park Scholar Program's first-year class into a learning community fluent in debates surrounding contemporary issues in communications studies. Open only to Park Scholars. Prerequisites: Permission of instructor. (F)
1 Credit

GCOM 10107 FLEFF: Mapping our Worlds (LA)

Maps can both reveal new territories and hide old secrets, show us multiple views of the world and also chronicle the havoc we wreak. In conjunction with the Finger Lakes Environmental Film Festival and using the "Atlas" works of Rebecca Solnit as our guide, this course will focus on the layered geographies and mappings of the Finger Lakes. Students will be encouraged to blend genres and media to complicate what we think we see and know about this region. As the semester ends, students will "map" a terrain of their choosing as they examine their relationship to a particular place.
1 Credit

GCOM 12500 Safety Training for Film and Video Production (NLA)

Covers film and television industry standards for safety including studio, location, electrical, weapon, lighting, tool, grip, rigging, pyrotechnics, special effects, and environmental safety, as well as other areas as practices and technology evolve. Includes safe practices for working around roadways and traveling to and from location shoots. Online only. Pass/fail. (F-S)
0-1 Credits

GCOM 13000 Spark: Igniting your Future in Communications (NLA)

An exploration of the important themes, radical creative/economic transformations, and disruptive technologies that impact the study and practice of communications. Using a problem-based learning approach, students are exposed to realworld challenges that influence all of the communications disciplines and professions, such as global and virtual enterprises, intellectual property, control and manipulation of information, imagery, and media channels, social and usergenerated media, and emerging economic models. Through discussions and case studies with guest speakers, students will gain an expanded understanding of current realities, interdisciplinary intersections, and future opportunities so that they can better plan their academic experience. Open only to freshmen majors in the Roy H. Park School of Communications and all freshmen in the B.S. in Emerging Media. (F)
1 Credit

GCOM 20100 Water Planet: Perspectives on Water Sustainability (LA)

Understand perspectives on water sustainability issues through an interdisciplinary approach with guest experts in the arts, sciences and humanities. Explore water sustainability topics from the personal to the global through readings, activities, discussion and media analysis. Prerequisites: Sophomore standing. (IRR)
Attributes: 1, G, HM, HU, SS, TPJ, TQSF
3 Credits

GCOM 23928-29327 Minicourses in Communications (LA)

A series of short courses in specialized areas of communications that meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR)
1-2 Credits

GCOM 32600 Media Industries (NLA)

Introductory overview of media and media-related industries (film, television, radio, corporate communications, sound recording, journalism, advertising, and public relations), with an emphasis on the interrelationship between the corporate and economic structures of the Hollywood system and media production. The course combines lectures, classroom exercises, and panel discussions with creative and corporate professionals currently working in the industry. Prerequisites: Junior standing. (Offered in Los Angeles F-S)
1 Credit

GCOM 41200-41210 Selected Topics (LA)

Exploration and analysis of a specific area of communication. Topics vary based on student demand and on faculty expertise and research interest. Course content and pedagogical methods meet College guidelines for liberal arts designation. May be repeated once. Not a production course. Total number of credits in any combination of TVR 41200, TVR 41210, GCOM 41200, GCOM 41210, STCM 39000, and STCM 39010 may not exceed 6. Prerequisites: Junior standing; others vary depending on the topic. Refer to Undergraduate Course Offerings each semester. (IRR)
3 Credits

GCOM 43000 Connecting the Dots: General Education Integration (NLA)

Explores the connections between the components of the general education core and students' major requirements. Students critically analyze their academic experience and other cocurricular and professional activities through online discussion of their overall college experience and how it connects to their majors and career aspirations. In addition, students will produce an extended reflective essay, or other appropriate artifact, that will be included as the framing element of their e-portfolio. This course is only open to majors in the Park School of Communications. Prerequisites: senior standing. (F,S)
Attributes: CP
1 Credit

German (GERM)

GERM 10100 Elementary German I (LA)

Beginning course. Practice in understanding, speaking, reading, and writing simple idiomatic German with special attention to German culture. Emphasizes participation and self-expression. Open to students with no previous German, or by placement examination. (FY)
Attributes: 3A, G, HM, HU, TIDE
4 Credits

GERM 10200 Elementary German II (LA)

Continuation of GERM 10100. Limited to students who have successfully completed GERM 10100 with a grade of C- or better, or by placement examination. Prerequisites: GERM 10100, or equivalent. (S,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

GERM 20000 Intermediate German (LA)

Develops intermediate-level proficiency in German with a focus on culture. Includes grammar review and expansion, with practice in all skill areas and a particular emphasis on spoken communication.

Prerequisites: GERM 10200 with a grade of C- or better, or by placement examination. (Y)

Attributes: HM, TIDE

4 Credits

GERM 20101 Intermediate German Conversation (LA)

Intensive conversational practice for students at the intermediate level. Includes pertinent grammar review and assigned readings as the basis for discussion in class, and periodic student presentations. May be used in place of GERM 20100 Intermediate German I for language proficiency requirements in majors. Prerequisites: GERM 10200 with a grade of C- or higher or by placement examination. (IRR)

Attributes: GERM

4 Credits

GERM 25000 History of German Film (LA)

A study of the principal films of major German directors. This class will cover the complete history of German film, from early silent cinema to contemporary films. Emphasis is given to the historical and cultural context of each film, as well as the film's relationship to questions of German identity. Readings include historical as well as theoretical texts. Conducted in English. This course does not count towards language proficiency requirements in majors. (IRR)

Attributes: 3B, CA, CTE, G, HM, HU, SCE, TIDE

4 Credits

GERM 25200 German Literature in Translation (LA)

Study of principal works of major writers and representative works of various periods. This course does not count towards language proficiency requirements in majors. (IRR)

Attributes: CTE, HU

4 Credits

GERM 29900 Independent Study: German (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: Permission of instructor and chairperson. (IRR)

Attributes: UND

1-3 Credits

GERM 30100 Spoken and Written Communication in German I (LA)

Developing spoken and written communication skills at the third-year level. Reading and discussion of contemporary material. Writing practice. Laboratory exercises. Prerequisites: GERM 20200 with a grade of C- or better, or equivalent. (F,Y)

Attributes: 3A, CCCS, G, HU

3 Credits

GERM 30900 Introduction to German Literature (LA)

A study of representative texts in German literature from the Enlightenment to the present. Students will learn how to read, interpret, and write about various literary genres and aesthetic movements.

Prerequisite: GERM 20000 or above taught in German with a grade of C- or better, or by placement examination. (IRR)

4 Credits

GERM 31200 Advanced German Grammar and Composition (LA)

Advanced study of German grammar, with an emphasis placed on composition. Prerequisites: GERM 20000 or above taught in German with a grade of C- or better, or by placement examination. (IRR)

Attributes: HU

4 Credits

GERM 32300 Advanced German Conversation (LA)

Extensive oral practice using selected topics as a basis for conversation, discussion, and presentations or short talks. Prerequisites: GERM 20000 or above taught in German with a grade of C- or better, or by placement examination. (IRR)

Attributes: 3A, G, HU

4 Credits

GERM 34100 German Cultural History (LA)

Study of the civilization and culture of Germany and other German-speaking countries. Usually taught in English. Prerequisites: Sophomore standing; permission of instructor. (S,E)

Attributes: G, HU, INBG

3 Credits

GERM 35000 History of German Film (LA)

A study of the principal films of major German directors. This class will cover the complete history of German film, from early silent cinema to contemporary films. Emphasis is given to the historical and cultural context of each film, as well as the film's relationship to questions of German identity. Readings include historical as well as theoretical texts. Taught in English, but with extensive practice in speaking, reading, comprehension, and writing in German. Prerequisites: GERM 20000 or above taught in German with a grade of C- or better, or by placement examination. (IRR)

Attributes: GERM, SCE

4 Credits

GERM 35500 German Translation in Practice (LA)

Practical introduction to the world of translation and its relationship to culture and ethics through the analysis and translation of literary and non-literary texts (articles, brochures, documents) from German into English. Prerequisite: GERM 20000 or above taught in German with a grade of C- or better, or by placement examination. (IRR)

4 Credits

GERM 36500 Masterworks in German (LA)

Study of selected literary works of significant writers of the 18th, 19th, and 20th centuries. Taught in German. Prerequisites: One level-3 German course taught in German, or equivalent. (F,O)

Attributes: 3A, G, HU

3 Credits

GERM 39300 Selected Topics in German Literature (LA)

Study of a genre, time period, group of authors, or single major writer. Taught in German. May be repeated two times each, for a total of twelve credits, when topics vary. Prerequisites: Two German courses at level 3. (S,E)

Attributes: 3A, G, HU

3 Credits

GERM 39900 Independent Study: German (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: Junior standing; permission of instructor and chairperson.

Attributes: HU

1-3 Credits

Gerontology (GERO)

GERO 10100 Introduction to Aging Studies (LA)

Introduction to the broad spectrum of issues involved in the study of aging. Biological, psychological, and sociological concerns, in addition to services for the elderly, are presented in survey fashion. Field trips, lectures, discussions, and demonstrations comprise the instructional methods. (F,S,Y)

Attributes: 1, SS
3 Credits

GERO 12000 Aging by the Numbers (LA)

Using quantitative data, explores aging-related topics such as cultural stereotypes, the demography of aging, and the financing of retirement. Focuses on developing understanding of different research methods and awareness of the promise and limits of quantitative data for understanding people's lives. (Y)

Attributes: QL
3 Credits

GERO 13000 The Journey of Aging (LA)

Explores the impact of aging on mind, body, and spirit, as well as contemporary responses to the possibilities and challenges of aging, with a focus on aging as a universal journey that affects all areas of life. Includes service learning with elders in the community. (Y)

Attributes: SO, TMBS
3 Credits

GERO 19501 Age Matters: Discovering the Possibilities beyond Midlife (LA)

Explores the intersections of age and identity in a variety of contexts, including the treatment of elders in modern culture. Examines the demographic and cultural forces shaping the period between retirement and disability. We examine our own beliefs and values as they relate to age and engage in service learning with elders in the community. (Y)

Attributes: 1, SL, SO, SS, TIDE
3 Credits

GERO 21000 Health and Aging (LA)

Examines the health status of older adults in the U.S. and the impact it has on longevity and quality of life in the later years. Includes factors that affect the health and longevity of older Americans, health challenges in later life, prevention and health promotion, the need for culturally competent health care for older adults, and end of life choices and issues. Explores how U.S. health policy and the health care system affect the lives of older adults. Prerequisites: One 10000-level GERO course or HLTH 11300. (S,O)

Attributes: SS
3 Credits

GERO 22000 Sociology of Aging (LA)

This course presents the prominent sociological theories and research about aging and the ways in which the experience of aging is socially constructed. Cross-listed with SOCI 22000. Students may not receive credit for both SOCI 22000 and GERO 22000. Prerequisites: One liberal arts course in any of the following departments: ANTH, CMST, CSCR, ECON, EDUC, GERO, HIST, PHIL, POLT, PSYC, SOCI, WGST. (F,Y)

Attributes: DV, SS
3 Credits

GERO 23000 Memory Loss and Aging: Myths and Realities (LA)

Memory loss has become one of the most feared stereotypes of aging. This course contrasts normal age-related changes in the brain with the effects of diseases that cause cognitive impairment. Prevalence, incidence, symptoms, causes, treatment, and caregiving issues are discussed, with emphasis on the history and personal, social, cultural, political, and economic impacts of Alzheimer's disease, which affects millions of older adults in the United States. Prerequisites: One 10000-level GERO course. (S,E)

3 Credits

GERO 25000 Lifespan Creativity (LA)

Examines the meanings and uses of creativity across the lifespan utilizing a variety of perspectives. Combines reading and discussion of academic literatures on creativity with experiential learning in the community. Prerequisites: Sophomore standing. (F,E)

Attributes: SO, SS, TIII
3 Credits

GERO 29010 Fieldwork in Gerontology (NLA)

Fieldwork gives students firsthand experience working and socializing with the elderly. Under the supervision of a trained professional within an organization in the Ithaca area, students engage in work activities, including direct service to the aged, as well as service to the host agency. An integrated series of seminars provides students with the context to better understand the needs of the community-based elderly, as well as the local, state, and national resources available and not available to meet those needs. Prerequisites: One 100-level GERO course. (F,S,Y)

1-3 Credits

GERO 29100 Field Placement in Gerontology (NLA)

Provides students the opportunity to interact with elders under the supervision of the sponsoring agency, and a gerontology faculty member. Placements are arranged individually. Students must complete the H&S internship application process. This course may be repeated for a total of three credits. Prerequisites: Sophomore standing, permission of instructor. (IRR)

1-3 Credits

GERO 31900 Aging and Social Policy (LA)

Examination of contemporary public health and social policies and programs that affect the well-being of older adults. The scope of these programs and policies, their historical development, and likely changes are explored. Prerequisites: One 20000-level GERO course. (S,Y)

Attributes: CNSL, DV
3 Credits

GERO 32500 The Long-Term Care System (LA)

Exploration of the continuum of long-term care services available in the United States. Examination of issues of access and financing; the combination of housing and services for disabled older adults; and challenges to the provision of a range of quality long-term care options. Prerequisites: One 20000-level GERO course. (F,O)

Attributes: CNSL, SS
3 Credits

GERO 37000 Counseling the Older Adult (LA)

Combines theory about and practice of basic counseling skills with information about issues faced by older adults and their families. Analyzes the lives of today's older adults within the frameworks of social institutions and race, class, and gender. Prerequisites: One 10000-level sociology course or one 10000-level GERO course; at least one of the following: GERO 22000, SOCI 30800, SOCI 30900, PSYC 36600, ANTH 34000, RLS 23800, HLTH 24000. (S,E)
Attributes: CNSL, SS
3 Credits

GERO 38000 End-of-Life Issues (LA)

Broad overview of basic concepts and psychosocial issues related to the meaning of loss and death, the process of death, and the experience of grieving. Consideration of health care practices along with community resources. Real-world topics and controversial issues explored through combination of lectures, hands-on activities, and field trips. Prerequisites: One 10000-level GERO course; junior standing. (S,E)
Attributes: CNSL, SS
3 Credits

GERO 40100 Gerontology Internship (NLA)

Provides a structured, intensive learning experience in an organization dedicated to research, planning, policymaking, or service provision for older adults. Supervision is provided by an on-site professional preceptor. Students are required to submit periodic written field reports, as well as a final internship experience report. Course may be repeated for a total of four credits. Prerequisites: GERO 29010; GERO 31900; Aging Studies major; permission of instructor. Pass/fail only. (Y)
0-4 Credits

GERO 48000 Gerontology Senior Seminar (LA)

This capstone experience provides a structured opportunity for gerontology majors to integrate knowledge and experience from coursework and internships as they explore a variety of theoretical and professional issues in gerontology. Prerequisites: GERO 31900; GERO 40100; senior standing; WRTG10600 or ICSM108XX or ICSM118XX. (S,Y)
Attributes: CP, SS, WI
3 Credits

GERO 49900 Independent Study (LA)

Individual research and writing on a particular area in gerontology, supervised by a faculty member in the gerontology program. Prerequisites: Permission of instructor. (F,S,Y)
1-4 Credits

Health (HLTH)

HLTH 10100 Introduction to Healthy Aging (LA)

Introduces students to the examination of the multifaceted and dynamic process of aging from the perspectives of a variety of health disciplines. Will explore the factors that influence our health over time, strategies for promoting health as we age, and the network of health care and long-term services and supports for the aging population. Emphases on interactions with older adults and intergenerational community engagement. (F,Y)
3 Credits

HLTH 10200 Medical Terminology (NLA)

The language of medicine is explored through study of the structure, use, and pronunciation of medical terms used to describe human anatomy, disease conditions, diagnostic tests, and treatment methods. (F-S,Y)
Attributes: HE1
3 Credits

HLTH 11000 War, Hunger, and Genocide: An International Health Perspective (LA)

An investigation of the cost – human and economic – of organized violence, including genocide, and the efforts being made to ameliorate or eliminate the devastation. Particular emphasis is placed on the role that can be played by health care professionals who believe that war may be a preventable phenomenon that can be eradicated by traditional public health methods that have triumphed over other major health problems in the past. (F,Y)
Attributes: AN2, AN3, DV, HE1, HM, LSCO, SO, TPJ, TQSF
3 Credits

HLTH 11300 Personal Health (LA)

Designed to provide expert knowledge about health and health care that is available to the individual. Emphasizes wellness and health promotion in areas that concern students such as exercise, stress, nutrition, weight management, contraception, intimate relationships, HIV infection, drugs, and alcohol. Prerequisites: Freshman or sophomore standing. (F-S,Y)
Attributes: 1, HE1, NS, SC, SO, TE, TIDE, TMBS
3 Credits

HLTH 11700 Foundations of Public Health (LA)

Introductory course that explores the evolution of public health; core and essential functions of public health; current public health policy issues; typical public health careers and responsibilities; and the role of public trust and ethics in public health. (F,S,Y)
Attributes: SO, TWOS
3 Credits

HLTH 12200 Emergency Health Care (NLA)

Provides emergency health care instruction in cardiopulmonary resuscitation and first aid. This course is strongly recommended for anyone interested in coaching, teaching, or camping. Successful completion of this course can result in American Red Cross certification in cardiopulmonary resuscitation and basic life support and standard first aid. (F-S,Y)
1 Credit

HLTH 13000 Healthy Viewings: Media, Medicine, and Health (LA)

Representations of medicine and health in popular culture. The meanings of these representations are studied in relationship to the building of stereotypes, development of policies, and framing of arguments in public discourse. Course includes extensive screening of examples from the media. (IRR)
3 Credits

HLTH 13901 Technology for the Professional Edge (LA)

Integration of instructional, communication, assessment, and computer concepts and skills necessary for the use of information technology in diverse physical activity and health settings. Includes introduction to the social and ethical issues inherent in the use of computers in health and school settings. A student may receive credit for only one of the following courses: COMP 11000, EXSS 13900, HLTH 13901. (F-S,Y)
Attributes: HE1, TE
3 Credits

HLTH 14000 Cyborgs, Clones, and Policy: New Technologies in Health and Medicine (LA)

Investigation and analysis of new medical and health technologies in the changing environment of health and medicine and how they affect policies for healing and prevention of illness and disease. Emphasis is given to the discourse of the body as a machine, its impact on health policies, and the effect of new technologies on relationships among health care providers, patients, and their families. Subjects include biotechnology, cloning, the Internet, digital medicine, and eugenics. (S,Y)

Attributes: HE1, LSCO

3 Credits

HLTH 15200 Introduction to Health and Physical Education (NLA)

Introduces students to the related disciplines of health education and physical education in U.S.K-12 public schools and society from historical and contemporary perspectives. Rationales for goals, standards, and national initiatives in each field will be stressed, as well as their relationship to the coordinated school health model. Students will explore the various duties of professionals in these fields as well as the variety of available career options. (F,Y)

Attributes: TE

3 Credits

HLTH 20100 Food and Society (LA)

Explores the significance of food in human life across time and across cultures. Examines the relationship of food to sociocultural, psychobiological, and ecological aspects of human life. Determinants of food choices, food systems, and socioeconomic and ecological implications are explored. Students emerge with insight and appreciation for the role of food as a means of self-expression and social exchange.

Prerequisite: Sophomore standing. (F,Y)

Attributes: AN2, AN3, HE1, SO, TIDE, TWOS

3 Credits

HLTH 20200 Human Nutrition (LA)

An introduction to the field of human nutrition. Includes the study of human nutritional needs and the attainment of health through an adequate diet. Topics such as obesity, sport nutrition, eating disorders, and the use of nutritional supplements are critically reviewed. Issues relating to diet, ethnicity and health, world hunger, nutrition, and disease prevention are explored. The use of a computerized diet analysis database enables students to assess the adequacy of their own diets.

Prerequisites: EXSS 12000, BIOL 11500, BIOL 11900, BIOL 12100, CHEM 11100, or CHEM 12100; sophomore standing. (F,S,Y)

Attributes: 1, AN2, ESTS, HE1, NS

3 Credits

HLTH 20300 Consumer Health (LA)

This course prepares students to understand health care from the consumer's perspective, including understanding the role of consumer theories, health behavior models, and the attitudes and activities of consumers in the health care industry. The philosophy and language of consumerism and the social, political, and ethical implications of consumerism in health are explored. The implications for policy and practice of the use of the consumerism model in health care are examined. Attention is given to existing research and theoretical models of insurance concepts, the individual purchase of health care, and newer consumer trends such as self-diagnosing, purchasing health products via the Internet, and the whole-scale industry movement toward consumer-directed health care. (F,Y)

Attributes: SO, TWOS

3 Credits

HLTH 20400 Economics of Health Care (LA)

Introduces students to the health care delivery and financing system in the United States. Uses economic analysis to study current health policy debates including insurance, health care reform in the United States, Medicare, Medicaid, physician payment arrangements and resulting incentives, global comparative health systems, and quality of care.

Students cannot receive credit for both ECON 20400 and HLTH 20400.

Prerequisites: ECON 12000. (IRR)

Attributes: LMEL, LSCO

4 Credits

HLTH 20500 Critical Health Issues (LA)

Examination of the health workforce, medical education, medical specialization, the rising cost of care, voluntary and governmental health insurance, health care delivery systems, and health care for the poor. (F,S,Y)

Attributes: CNSL, DV, LAEL, LMEL, LMSP, LSCO, SO, SS, TE, TWOS

3 Credits

HLTH 20800 Viral Diseases of the World (LA)

This course will describe the structure, transmission, replication, prevention and treatment, and associated pathology of viruses. Specific focus on the historical, cultural and economic impact of clinically significant DNA and RNA viruses such as HIV, influenza, HPV, hepatitis, Ebola and norovirus. Prerequisites: Sophomore standing. (S)

Attributes: HE1

3 Credits

HLTH 21300 Wellness: Multicultural Perspectives on Health and Healing (LA)

An overview of the dynamic nature of the wellness movement. Its historical, social, political, cultural, and economic variables are critically examined. A wide range of wellness modalities, including those that fall under manual, mind-body, herbal, movement, and bioelectrical fields of practice, are included. Cross-cultural paradigms of health and healing are examined and compared. Prevention of chronic disease and health promotion are integrated into the concept of wellness, and disease etiologies and treatments are presented from multiple perspectives. The implications of and opportunities for prevention specialists in schools and communities are emphasized. Prerequisites: Sophomore standing. (F,S,Y)

Attributes: AASE, ADPL, ADSE, AN2, HE1, LXME, NASE, RPRE, TE

3 Credits

HLTH 21400 Sustainable Living: A Holistic Approach to Health (LA)

Focuses on holistic health using environmental sustainability approaches with multi-disciplinary perspectives on environmental issues and its relation to public health. Personal, social, economic, political, and environmental aspects of making sustainable choices in everyday life will be explored based on the database inquiry. The principles and practices of behavior change and pedagogies ingrained in theory and principles of environmental sustainability will be explored. The methods used to assess and evaluate the consequences of consumption (included but not limited to food) and lifestyle decisions will be discussed. Students will work individually and in groups by using experiential learning approaches to examine how to make sustainable choices, exercise personal accountability, and promote health. Prerequisites: Sophomore standing. (F,S,Y)

Attributes: HE1, SC, SO, TPJ, TQSF

3 Credits

HLTH 21700 Epidemiological Approaches to Disease Prevention and Control (LA)

Examines the history, principles, and practices in the cause, prevention, and control of diseases. Epidemiologic terminologies and measures such as morbidity, mortality, fertility, descriptive and analytic epidemiology, screening, infectious disease, and occupational epidemiology in public health practice will be covered. Prerequisites: MATH 15500 or MATH 14400 or MATH 14500 or MATH 21600. (F-S,Y)

3 Credits

HLTH 22400 Emergency Health Care Instructor (NLA)

Training for entry-level instructors of American Red Cross cardiopulmonary resuscitation (CPR) for the professional rescuer, of community CPR, and of community first aid and safety. During the semester, students are required to complete the instructor candidate training segment that is offered at a time designated by the instructor. Includes teaching methods, materials, and practice. Prerequisites: Current American Red Cross CPR for the professional rescuer, community CPR, and community first aid and safety certificates. (F-S,Y)

2 Credits

HLTH 22600 Health Communication (LA)

Introduction to the study of health communication, including its origins, development, and status. Introduction to theories of health behavior and communication and to how they relate to one another in practice. Examination of communication between health professionals and clients and of the role media play in the health care industry and the delivery of health services. Prerequisites: Sophomore standing or above. (F,Y)

Attributes: HE1, LSCO, SS

3 Credits

HLTH 22700 Stress: Its Nature and Management (LA)

Overview of the nature and physiology of stress and techniques used to manage stress. Topics include stress physiology, social engineering, cognitive restructuring, conflict resolution, time management, self-help techniques, nutrition, exercise, and relaxation techniques such as meditation, progressive relaxation, and autogenic training. Prerequisites: Sophomore standing. (F,S,Y)

Attributes: HE1, SC, SO, TIDE, TMBS

3 Credits

HLTH 22800 Human Sexuality (LA)

Promotes a critical perspective of contemporary issues associated with human sexuality. The importance of healthy behavioral practices and responsible decision making concerning sexuality is emphasized. Content areas include contraception and birth control, pregnancy and childbirth, sexually transmitted infections, gender and gender roles, ethnicity and sexuality, sexual anatomy and physiology, sexual response, sexual expression, sexual orientation, relationships, and sexuality over the life span. (F,S,Y)

Attributes: 1, AN2, HE1, SO, SS, TIDE, TMBS, WGS, WGS1

3 Credits

HLTH 22900 Human Disease (LA)

Focus is on the leading causes of morbidity and mortality in the world, with an emphasis on the United States. Emphasis is on health promotion through awareness of risk factors associated with diseases. Topics reviewed include etiology, pathology, symptoms, morbidity and mortality rates, prevention, and commonly used methods of diagnosis and treatment. Opportunities for hands-on learning and skill development in best practice screening techniques that are used in primary care settings. (S,Y)

Attributes: 1, HE1

3 Credits

HLTH 23400 Fitness Applications for Health Promotion (NLA)

Incorporates basic kinesiological, biomechanical, and physiological principles and concepts with practical applications for physical activity, health-related fitness, and health promotion. Clinical procedures include body composition measurement, submaximal oxygen uptake testing, assessing blood pressure, calculating body mass indexes, and cholesterol screening. A major emphasis is the assessment of health-related fitness and the prescription of various types of physical activities for children, adolescents, and adults. Prerequisites: EXSS 12000; EXSS 12100. Students can receive credit for HLTH 23400 or PHED 23400, not both. (S,Y)

4 Credits

HLTH 24000 Health Promotion and the Older Adult (LA)

Health promotion and prevention strategies that allow people to extend and improve the quality of their lives. Through an interdisciplinary approach, health-related factors that affect older persons as they age are studied. Prerequisites: HLTH 11300 or GERO 10100. (IRR)

Attributes: 1

3 Credits

HLTH 25000 Global Health (LA)

Study of public health and health care issues across national borders and how they affect the entire globe, including the future health of the planet. Public health and health care delivery in certain nations are also studied. Prerequisites: One social science course. (S,Y)

Attributes: AN2, AN3, DV, LMEL, LMSP, LSCO

3 Credits

HLTH 30000 China: Culture, Health, Healing and Sport (LA)

Introduction to the philosophy and practice in health, prevention and rehabilitation, sport and physical education in China from a historical and cultural perspective. Prepares students for a short-term study abroad opportunity in China (optional). Prerequisites: Junior standing or sophomore who has taken a HLTH course at the 20000-level. (S,IRR)

Attributes: AN2, AN3

1 Credit

HLTH 30100 Lifecycle Nutrition (LA)

Explores an ecological perspective on nutrition. Examines the unique needs and concerns of each stage of the human lifespan, including prenatal, infant, child, adolescent, adult, older adult, pregnancy, and lactation. Students examine nutritional issues that are relevant to healthy growth and development, disease prevention, and optimal well-being at all ages. Prerequisites: HLTH 20200. (F,Y)

Attributes: HE1

3 Credits

HLTH 30500 Community Nutrition: Global Perspectives (NLA)

Explores function of community nutrition including monitoring, assessment, and the role of nutrition in health disparities. Students learn to plan interventions and evaluate programs. Prerequisites: HLTH 20200 and HLTH 30100. (S,Y)

Attributes: SL

3 Credits

HLTH 30600 Counseling for the Health Professions (NLA)

Theory and application of health counseling with focus on health behavior change, disease and wellness. Explores factors associated with the direction of advice and decision making in the development and maintenance of individual health and wellness. Provides means for incorporating positive health practices, courses of action, and guidance in health promotion programs, health care encounters, and health education. Course draws on base of health content and theory courses to develop a core set of career-specific useable skills. Prerequisites: HLTH 21300, HLTH 22900, and junior standing. (S, Y)

Attributes: HE1

3 Credits

HLTH 30900 Study Abroad in China: Culture, Health, Healing and Sport (LA)

This is a study abroad experiential learning course. Students will travel to China and explore and experience Chinese culture, rehabilitation and health promotion in a practical setting. Students will have hands-on learning opportunities under certified traditional Chinese medicine professionals such as acupuncture, massage, cupping, Tai Chi, and calligraphy. Prerequisites: HLTH 30000. (Sum, IRR)

Attributes: AN2, AN3

2 Credits

HLTH 31000 Microbiology for the Health Sciences (LA)

Explore the world of human-microbe interactions. Study mechanisms of disease transmission and pathogenicity of infectious agents. Understand how antimicrobials work; understand antibiotic, detergent, disinfectant resistance and propose alternative mechanisms for managing microbial growth. Understand basic concepts of bacterial gene expression and its application in the field of biotechnology. Analyze how natural disasters facilitate outbreaks. Understand the mechanisms behind vaccination. Apply principles of metabolism and contamination to analyses of food safety. Prerequisites: BIOL 11900, BIOL 12100, or EXSS 12100; and any 200-level HLTH course. (F,Y)

Attributes: BIEL, HE1

3 Credits

HLTH 31100 Microbiology for Health Sciences Laboratory (LA)

Master basic microbiological laboratory technical skills including aseptic technique, inoculating microbial cultures, enumerating, isolating, and identifying microorganisms. Gain introductory skills in molecular biological techniques. Analyze cases, synthesize data, and select appropriate tools for microbial identification. Prerequisites: BIOL 11900, BIOL 12100, or EXSS 12100; and any 200-level HLTH course; and HLTH 20700 or HLTH 31000 (may be taken concurrently). (F,Y)

Attributes: BIEL, HE1

1 Credit

HLTH 31200 Inequalities in U.S. Health Care (LA)

Introduces the historical, political, economic, social and environmental factors that drive inequalities in the U.S. health care system. Highlights the role of race, ethnicity and culture; socioeconomic status; geography/residential segregation; gender, sexual preference and identity; immigration status; health literacy and other factors on health inequalities. Enables students to critically analyze the multiple pathways in which discrimination impacts health status, access to, and quality of care and identify conceptual models and frameworks for reducing and/or eliminating health care disparities. Prerequisites: Junior standing or sophomore who has taken a social science or HLTH course at the 200-level. (F,S,Y)

Attributes: ADSE, AN2, AN3, DV, LMEL, LSCO, LXME

3 Credits

HLTH 31500 Family Health Problems (LA)

Theory and research on family composition and its dynamic nature are critically examined with research and surveillance data on youth and families. Issues of identity, gender, race, class, sexual orientation, socioeconomic status, and community are related to family health. Preference is given to health education and physical education majors. Prerequisites: Major or minor; junior standing. (S,Y)

Attributes: HE1, SS, WGS, WGS3

3 Credits

HLTH 31600 Health Research and Analysis (LA)

Theoretical and philosophical bases for conducting research in health. Identifies and utilizes research methods in social and behavioral sciences, including quantitative, qualitative, and epidemiological methodologies. The objective is to assist students in the development of active skills, which include identifying key research issues in health, working through their analysis, and understanding the intellectual, practical, ethical, and political implications of different methods of research in health. Prerequisites: MATH 14400, MATH 14500, MATH 15500, or MATH 21600; HLTH 20500 or HLTH 21300; and junior standing. (F,S,Y)

Attributes: HE1, QL, SS, TE

3 Credits

HLTH 31700 Community Health (LA)

Provides an overview of community development strategies most frequently used in health promotion and health education programs. Emphasis is placed upon the processes of community organizing and developing critical awareness/consciousness as educational methods in public health. The course is designed to provide students with theoretical foundations, methods, and skills essential to professional community health education practice. Prerequisites: HLTH 21700 and junior standing. (F,Y)

Attributes: TE, WGS, WGS3

3 Credits

HLTH 32600 Health Planning and Administration (NLA)

Integrates general management principles with strategic planning in health care organizations. Data systems, forecasting, and problem identification and analysis are explored, along with the stages of strategic planning. Emphasis is placed on identifying strategic issues in complex environments and formulating realistic responses. Students prepare actual applications for new programs to regulatory agencies. Prerequisites: HLTH 20500 and one GBUS or MGMT course. (S,Y)

Attributes: HE1, TE

3 Credits

HLTH 33000 Health Promotion in the Workplace (NLA)

Development of a hierarchy of program needs and objectives for worksite health promotion. Students design needs-assessment instruments and develop work programs based on the needs identified by the population surveyed. The course also addresses issues surrounding program evaluation. Prerequisites: PSYC 33400, HLTH 11300, or MKTG 31200. (IRR)

Attributes: HE1

3 Credits

HLTH 33300 Development and Evaluation of Health Programs (NLA)

Prepares students with background information on how to design, implement, and evaluate health education and health promotion programs. "Quality of life" issues are evaluated to establish links between social problems and specific health problems. Several methods are employed to evaluate these programs. Prerequisites: Junior standing and HLTH 10600 or HLTH 15200; at least two HLTH 20000 level courses. (Y)

Attributes: TE

3 Credits

HLTH 33510 Legal and Ethical Issues in Health Policy (LA)

An examination of legal and ethical issues related to health care. Topics include the equitable distribution of scarce resources, the relationship between individual consumers and powerful (frequently for-profit) third party payers, and the government's role at all levels in regulating health care and protecting the public from potentially fraudulent or abusive providers. Prerequisites: PHIL 21200 or PHIL 23000; HLTH 20500; WRTG 10600 or ICSM 108XX, or ICSM 118XX. (F,S,Y)

Attributes: LMSP, TE, WI

3 Credits

HLTH 34900-34901 Fieldwork in Health (NLA)

Practical experiences in public, voluntary, or commercial health agencies. Provides the opportunity to become involved in various agency functions. Prerequisites: Junior standing; permission of department chair.

Repeatable for up to (F,S,Y)

Attributes: TE

0.5-6 Credits

HLTH 35000 Drug Use and Abuse (LA)

Promotes critical thinking about many implications of the use of mind-altering drugs within our society. An interdisciplinary approach is used to study aspects of social, cultural, mental, emotional, physical, and spiritual health related to drugs, society, and human behavior. Course content includes, and is not limited to, alcohol, tobacco, legal and illegal substances. Prerequisites: Junior standing. (F,S,Y)

Attributes: HE1, SS

3 Credits

HLTH 36000 Curriculum and Materials in Health Education (NLA)

Examination of the philosophical, theoretical, and practical aspects of curriculum development related to health program planning. Consideration is given to curricular scope and sequence. Students demonstrate their ability to develop unit plans, block calendars, and lesson plans. Existing prepackaged curriculum models are evaluated. Prerequisites: EDUC 21010; nine credits in HLTH xxxxx courses. (F,Y)

Attributes: TE

3 Credits

HLTH 39900-39906 Selected Topics in Health (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

1-3 Credits

HLTH 40300 Nutritional Care and Therapeutics (NLA)

Provides overview of role of nutrition professional as a member of the health care team. Students explore best practice techniques for nutrition assessment and health diagnoses; application of theoretical models of nutrition behavior and intervention to individual case studies; guidelines for client education, monitoring and documentation; and frameworks of nutrition practice within allopathic, complementary, and alternative health care models. Nutritional supplement use and diet planning are explored via case study. Students critically analyze the development, effect, method, application, and efficacy of current standards for nutrition intervention. Prerequisites: Senior standing; HLTH 22900, HLTH 30100, HLTH 30500, HLTH 30600. (F,Y)

3 Credits

HLTH 41700 Public Health Policy and Justice (LA)

History and theories of the public health perspective. Detailed analysis of major contemporary public health issues in the context of political, economic, and social factors. Theories and uses of epidemiology and ethics as a descriptive, analytical, and political tool of public health. Community, regional, national, and global public health policies are studied and evaluated. Attention is paid to current public health issues in the news. Prerequisites: HLTH 31700. (F,Y)

Attributes: WI

3 Credits

HLTH 42000 Teaching Strategies in Health Education (NLA)

Designed for prospective health educators as a comprehensive background for health instruction in elementary, secondary, and community settings. Students acquire the knowledge and skills necessary to plan, deliver, and assess learning experiences and activities incorporating strategies that target multiple intelligences, learner diversity, cooperative education, curriculum integration, and skill acquisition as they relate to health education. Prerequisites: HLTH 33300 or HLTH 36000. (S,Y)

Attributes: HE1, TE

3 Credits

HLTH 43900 Assessment in Health Education (NLA)

Prepares class members to assess student learning in K-12 health education settings. Through a combination of lecture, labs, discussion, and field-based activities, opportunities are provided to understand and apply current educational testing and evaluation procedures. Course content includes study of the criteria for selection of tests, application of statistical procedures, construction and analysis of assessment tools, procedures for classification and grading of students, and program assessment techniques. Credit will not be granted for both this course and PHED 43900. Prerequisites: PHED 33200, HLTH 33300, or HLTH 36000. (F,Y)

Attributes: TE

3 Credits

HLTH 44100 Student Teaching in Health Education (NLA)

Observation and supervised student teaching. Assignment to approved cooperating schools full-time for one semester in the senior year. Required of all students preparing to teach health education in elementary or secondary schools. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010; HLTH 42000; EDUC 34000. (F-S,Y)

10 Credits

HLTH 44400 Leadership and Health Promotion (LA)

Explores the interconnected nature of leadership operating within the synergy of perspectives involved in health promotion. Examination of collective and interdisciplinary theories and approaches to problem solving, relationship building and transformation in health promotion. Leadership is explored through directed inquiry of case studies. Challenges to promoting health in individuals, communities, and society are considered. Prerequisites: HLTH 31600. (S,Y)

Attributes: CP

2 Credits

HLTH 44500 Student Teaching in Health Education (dual major) (NLA)

Observation and supervised student teaching. Assignment to approved public schools full-time for a half semester in the senior year. Experience in structured observation, classroom assisting, and direct instruction; additional experience in planning, conferencing, and related school duties outside regular class periods. Individual conferences are held with Ithaca College supervisors of field experiences. Required of all dual health education and physical education majors. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010; HLTH 36000; HLTH 42000; EDUC 34000. (F,S,Y)

Attributes: TE

5 Credits

HLTH 44800 Seminar in Health Education (NLA)

An opportunity for student teachers or internship participants to analyze and discuss individual and general problems related to their experiences. Current trends and issues confronting the prospective health education professional, such as issues regarding changes in the profession, teaching credentials, and job opportunities, are also addressed. Corequisites: HLTH 44100 or HLTH 44900. (F,S,Y)

Attributes: CP, TE

2 Credits

HLTH 44900-44901 Internship in Health (NLA)

Supervised, full-time experience in a health agency during the summer or regular academic semester. Content of internship should reflect the student's concentration area (i.e., gerontology, substance abuse services, worksite health promotion, nutrition, or PIC). Prerequisites: Current American Red Cross CPR and first aid card; junior or senior standing; permission of department chair. 6-(F-S,Y)

6-12 Credits

HLTH 45200-45203 Independent Study in Health (LA)

An individual study program for the investigation of special problems in the field of health. A written report is required. Prerequisites: Senior standing; permission of instructor and department chair. (F-S,Y)

1-3 Credits

HLTH 45300 Supervised Research (NLA)

Empirical research on a health topic selected in consultation with instructor. A written report is required. Course may be repeated for up to Prerequisites: At least three courses in health; permission of instructor and department chair. (F-S,Y)

1-3 Credits

HLTH 48700 Multicultural Issues in Health (LA)

Addresses the issues of ethnicity, culture, and race as they relate to health. Examines a variety of intercultural issues, including power and oppression, and how they affect the lives of children, adults, and families living in the United States. Prerequisites: HLTH 31700, HLTH 33510. (S,Y)

Attributes: AN2, AN3, DV, HE1

3 Credits

Health Interdiscip Studies (HINT)

HINT 10000 Health Sciences: Foundations and Careers (NLA)

An overview of the foundation of health sciences and career opportunities in the various fields. The class format includes small-group discussion as well as guest lectures by health science educators. Selected issues related to the professions are also examined. (F,Y)

2 Credits

HINT 10010 Introduction to Health Professions Careers (NLA)

Overview of various health professions careers and connection with key campus resources. Career exploration including academic pathways, professional responsibilities, and discipline-specific and interprofessional expectations. Integration of best practices for Health Professions Advising. (F,Y)

1 Credit

HINT 23000 Introduction to Interdisciplinary Health Care Teams (NLA)

Introduction to the essential knowledge that facilitates interaction among health science professionals and enables them to become more effective members of interdisciplinary teams. Prerequisites: Sophomore standing. (F or S,Y)

1 Credit

HINT 31200 Health Care and Culture (LA)

An investigation of sociocultural context in the delivery and receipt of health care and rehabilitation services. Students examine, through readings, discussion, and interviews with people in the community, the role of ethnicity, race, religion, and socioeconomic status in shaping the health-related beliefs and behaviors of individuals. Prerequisites: Junior standing. (S,Y)

Attributes: 1, AN2, AN3, G

3 Credits

HINT 31300 Health Care and Culture: An International Field Experience (NLA)

An investigation of sociocultural factors in the delivery of health care and rehabilitation services in an international context. Students examine, through experiential learning, discussion, and lectures, the role of ethnicity, race, religion, and socioeconomic status in shaping the health-related beliefs and behaviors of individuals in a selected country. Prerequisites: HINT 31200 or permission of the instructor. (U,Y)

Attributes: 1, AN2, AN3, G

1 Credit

HINT 33000 Interdisciplinary Collaboration: Practical Applications for Health Care Teams (NLA)

Application of collaboration of interdisciplinary team-management principles and intervention planning strategies and techniques that include interdisciplinary treatment plan development, assessment, and the development of interdisciplinary intervention programs. Prerequisites: HINT 23000. (F or S,Y)

1 Credit

HINT 43000 Seminar: Capstone in Health Care Teams (NLA)

Students will observe and evaluate the collaboration of interdisciplinary team-management principles and intervention planning strategies and techniques. Includes travel to national and/or international sites (at the student's expense) where interdisciplinary collaboration in a multicultural setting is practiced. Prerequisites: HINT 33000. May be repeated up to (Y)

1 Credit

History (HIST)

HIST 10100 Before Europe: Cultures of the Premodern West (LA)

This course examines a selection of cultures from the beginnings of "Western" civilization in the ancient Mediterranean into the medieval and early modern eras as the idea of Europe gradually emerged. In addition to focusing on some particularly formative periods in the history of Western cultures, we will examine the idea of a continuous strand of Western civilization throughout this time period, looking also for instances of discontinuity and rupture in the past. Not open to seniors except by permission of instructor. Also offered through the London Center. (F,Y)

Attributes: CSA, HM, TIDE, TPJ

3 Credits

HIST 10200 Modern Western Civilization (LA)

Continuation of HIST 10100, extending from the early modern period to the present. Students may not receive credit for both HIST 10200 and HIST 18200. Not open to seniors except by permission of instructor. Also offered through the London Center. (S,Y)

Attributes: 1, G, H, HU

3 Credits

HIST 10600 History in the News: Global Identities and the Search for Justice (LA)

Introduces the field of contemporary history through an examination of current events and issues. Students follow international developments and offer historical contexts and evaluations within themes of global identities and the search for justice through the paradigm of globalization and human rights. (F,S,Y)

Attributes: DV, ESE, HM, TIDE, TPJ

4 Credits

HIST 11100 Founding a Nation: United States History to 1877 (LA)

A survey of United States history from the colonial period through Reconstruction. Included are the peopling of the nation from Europe, Africa, and the Americas, problems of colonial settlement, the achievement of political independence and stability, territorial expansion, industrialization, and the struggle over slavery. Not open to seniors except by permission of instructor. (IRR)

Attributes: HM, TPJ

4 Credits

HIST 11200 Building Modern America: United States History since 1877 (LA)

A survey of national development since Reconstruction with an emphasis on social and economic development, waves of immigration, overseas expansion, social and political reform movements, involvement in two world wars, and the Cold War. Not open to seniors except by permission of instructor. (Y)

Attributes: 1, DV, H, HU

3 Credits

HIST 12600 Women and the American Experience, 1607-1870 (LA)

Examines the diverse experiences and social roles of women from seventeenth century settlement to Reconstruction. Explores Native American women; regional variations in the formation of colonial society; the "proper place" of white women; women and politics, reform movements, religion, and sexuality; African-American women and slavery; women as pioneers; women and work. Emphasis on the diversity and changes among the various social classes and races that comprise women's history across time. (IRR)

Attributes: DV, HM, TPJ, WGS

3 Credits

HIST 12700 Women and the American Experience, 1870-2000 (LA)

Examines women's lives between Reconstruction and the Clinton era. A major focus will be to understand how class, ethnicity, and race influenced American women's work, family life, and organized activities across time. As we build our chronological framework, we will explore immigration, industrialization, female sexuality, women and the Depression, women and WWII, women and reform, the "feminine mystique," the Civil Rights Movement, the women's movement, and the American Indian Movement. The course will emphasize diversity and change among various social classes, races, and ethnic groups that comprised our history. (IRR)

Attributes: DV, HM, TPJ, WGS

3 Credits

HIST 14100 From the Margins: European Social History, 1450-2000 (LA)

Course about individuals who are traditionally left out of standard narratives of European history. Study of such historically marginalized individuals sheds light on the values, beliefs, and practices of previous generations. (Y)

Attributes: DV, HM, TIDE, TPJ, WGS, WGS1

4 Credits

HIST 15100 The Past Is Present: The Relevancies of History (LA)

People tend quite naturally to think in present terms and see the world as it is around them. The present, however, does not exist independently of the past. This course uses a series of videotapes, readings, and group discussions to link the past to the present in a variety of ways. (F,Y)

Attributes: 1, H, HU

3 Credits

HIST 16800 1968: A U.S. Revolution (LA)

Focuses on the most tumultuous year in modern American history, exploring a range of themes in the history of the wider era – Civil Rights, Cold War and Vietnam War, generational change/student movements, and a shift in politics to the right – in a way that brings the moment to life and frames it in human terms. Examines student life, popular culture, and personal stories from 1968 to illuminate how much the nation changed in this era. Not open to seniors. (IRR)

Attributes: HM, HU, TIDE, TPJ

3 Credits

HIST 17700 Voting: U.S. Elections in Historical Context (LA)

This course examines the history of voting and elections in the United States, with particular attention to how and why voting patterns have shifted over time. Offered every fall semester during national elections (even-numbered years), students will gain the context necessary to understand current events by learning the history of suffrage and the evolution of the American party system. (E,F)

Attributes: HI2

1 Credit

HIST 18100 Becoming Global: The World to 1500 (LA)

Traces the development of key social, cultural and political developments that emerge in ancient and premodern societies across the globe. The course is both chronological and thematic and explores how a broad range of early societies dealt with certain key questions in human history, including hierarchy and social structures, identity, authority, and cultural encounter. Students may not receive credit for both HIST 18100 and HIST 10100. Not open to seniors except by permission of instructor. (Y)

Attributes: HM, TIDE, TPJ

4 Credits

HIST 18200 How Did We Get Here? The Making of the Modern World (LA)

This course examines the history of the modern world, defined as the period after 1500, with an emphasis on the operation of imperial power, nationalist resistance, revolution, the emergence of nation-states, and the development of global inequality. Students may not receive credit for both HIST 18200 and HIST 10200. Not open to seniors except by permission of instructor. (Y)

Attributes: HM, TIDE, TPJ

4 Credits

HIST 18400 The Islands: Caribbean History 1492 to the present (LA)

Exploration of the history of the Caribbean as a transnational, multi-racial, multi-cultural, and globalized space. Focus on how the Caribbean embodies and challenges ideas about the relationship of the United States to the rest of the hemisphere. (IRR)

Attributes: ADSE, HM, LAEL, LSCH, LXME, NASE, RPRE, TIDE, TQSF

3 Credits

HIST 18500-18501 Selected Topics: Historical Studies (LA)

Occasional courses of an exploratory nature are offered under these numbers and title. These may be of lecture or seminar format, of great breadth or highly specialized. There is no prerequisite. This course may be repeated for credit for a total of three credits for selected topics on different subjects. (IRR)

Attributes: HU

1-3 Credits

HIST 20900 Ethnic United States since the Civil War (LA)

Explores the cultures and social structures that various immigrant groups brought to the United States, their interaction with the dominant Anglo-Saxon culture, and the kind of multiethnic society the United States has built (melting pot or tossed salad). This course counts toward the U.S. history requirement for history department majors. Prerequisites: Sophomore standing. (S,Y)

Attributes: DV, HI2, HM, LSCH, LXME, TPJ

3 Credits

HIST 21000 The United States Labor Movement (LA)

Explores labor history from 1840 to the 1970s. Based on two premises: first, that labor history is an essential ingredient to the understanding of American history; and second, that labor history must extend beyond traditional union history into the lives and aspirations of the workers themselves. Thus, the course looks beyond the union halls into the homes and hearts of the men and women who have built America. This course counts toward the U.S. history requirement for history department majors. Prerequisites: Sophomore standing. (IRR)

Attributes: 1, H, HI2, HU

3 Credits

HIST 21100 The United States and Vietnam 1945-1990 (LA)

Through readings, films, and student research, explores the history of the United States' involvement in Southeast Asia from World War II to 1990. It emphasizes the origins and reason for the Vietnam War, the impact of the war on all participants, and the aftermath of the defeat of the U.S. effort. This course counts toward the U.S. history requirement for history department majors. Prerequisites: Sophomore standing. (S,Y)

Attributes: HI2, HU

3 Credits

HIST 21200 The History of American Law (LA)

Explores the Constitution and the history of its interpretation (rights) and how our legal system, both criminal and in terms of those constitutional rights, has so often fallen short of our ideals (wrongs). Considering concrete examples drawn from the legal system, from the explosive growth of American prison populations, to shifting interpretations of constitutional protections related to privacy, the right to bear arms, and race and gender, students gain a deeper understanding of U.S. law as a human construct that is changeable, fallible, and correctable. (IRR)

Attributes: LMEL, LSCO

4 Credits

HIST 21500 The Heritage of China: Introduction to Chinese Culture (LA)

Introduces important aspects of China's cultural history and traditions. Exposes students to central ideas in Chinese philosophy and religion, to masterworks of Chinese art, drama, and literature, as well as to other important topics pertaining to language, family, and science. This course counts toward the global requirement for History department majors.

Prerequisite: Sophomore standing. (IRR)

Attributes: HI3, HM, HU, RPRE, TIDE

3 Credits

HIST 22100 Russian History (LA)

Russian history from antiquity to the 1917 revolution. Emphasis is placed on political, social, and intellectual developments. This course counts towards the European requirement for history department majors. Prerequisite: Sophomore standing. (F,Y)

Attributes: G, H, HI1, INBG

3 Credits

HIST 22200 The USSR: History and Legacies (LA)

An interdisciplinary study of Soviet history that applies varied historical interpretations and methodologies to provide an integrative analysis of the USSR and post-Soviet era. This course counts toward the European requirement for history department majors. (IRR)

Attributes: HI1, HM, INBG, TIDE, TWOS

4 Credits

HIST 22300 Rise and Fall of the British Empire (LA)

Explores the scope of the empire, ranging across North America, Australia, New Zealand, the Middle East, and India, and how populations in both Britain and the colonized regions responded to empire. Topics include the technologies of power that enabled Britain to administer such a large area, how imperial power was implicated in the construction of knowledge that introduced these regions to a European audience, the dissolution of the empire in the 20th century, and the postcolonial legacy that continues to shape these former imperial possessions and the modern British state. Counts toward the global history requirement for history department majors. (IRR)

Attributes: AACH, AASE, HI3

4 Credits

HIST 22400 Modern South Asia (LA)

Considers the history of modern South Asia from about 1500 to the present day. Begins with a background overview of early cultural and political history, then proceeds through the rise of the Mughal Empire and regional Indian powers, the coming of the British, the Sepoy mutiny/ rebellion, the rise of nationalism Hindu-Muslim communal tensions, partition and the formation of India and Pakistan, concluding with contemporary cultural and political issues, such as the rights of women, dalits and religious minorities, the middle class and globalization, Indo-Pak relations, and the development of nuclear powers in South Asia. Counts toward the global history requirement for history department majors. (IRR)

Attributes: AACI, AASE, HI3, INBG, RPRE, RSEA
4 Credits

HIST 22500 Women in Search of Utopia (LA)

Explores how women in both America and the greater British imperial domain have analyzed the social construction of gender, particularly as it related to family, politics, work roles, and war. Using both utopian fiction written by women and the utopian experiments in which they participated, it examines issues of race, class, and gender through this prism. By exploring how women envisioned better worlds for themselves, it emphasizes historical context as a critical part of analyzing these utopias and why women's utopian visions changed over time. For History Department majors, this course fulfills the U.S. History requirement. Prerequisites: Sophomore standing. (IRR)

Attributes: HI2, HM, TIDE, TPJ, WGS
3 Credits

HIST 22700 Islamic Civilizations: From the Time of Muhammad to the 19th Century (LA)

Explores the worldwide development of Islamic societies, beginning in the Arabian peninsula just before the time of Muhammad, charts the rise and consolidation of Islam in Arabia, and follows the global development of Islamic societies from the Middle East to Europe and Asia. Considers articulations of Islamic identity worldwide and Islamic adaptations to varying social and cultural locations. The course ends as the European colonial powers encounter the Middle Eastern and Asian Islamic worlds. Counts toward the global history requirement for history department majors. (IRR)

Attributes: AASE, ADSE, HI3, HIPM, RPRE, RSEA
4 Credits

HIST 22800 Islam in the Modern World (LA)

Examines the scope and transformations of Islamic societies since the 19th century, including the decline of the Ottoman empire, encounters with European colonialism, the rise of nationalism and nation-states in the Middle East and Islamic Asia, the Arab-Israeli conflict, the partition of India, the Islamic revolution in Iran, and the rise of Islam in Europe and the United States. Considers also the tension between militancy and quietism, women's economic empowerment, changing gender roles, and the worldwide Muslim response to extremist violence and ideologies. Counts toward the global history requirement for history department majors. (IRR)

Attributes: HI3, HM, INBG, RSEA, TIDE, TPJ, TWOS
4 Credits

HIST 22900 Medicine and Magic in the Middle Ages (LA)

Examines a variety of aspects of medical and magical theory and practice in the medieval Mediterranean world, ca. 750-1350. Looks at the transmission of practices and ideas throughout the Mediterranean, including texts originating in the most significant medical centers during this period – Baghdad, Alexandria, Constantinople, Toledo, Bologna, and Salerno – and written in Greek, Hebrew, Arabic, Latin, and more local languages. Among other topics, it considers medical theory, surgical practice, daily regimens, origins of hospitals, and responses to epidemic. Examines how magic and astrology are often inseparable from medicine in this period. This course counts toward the Premodern, Global, or European requirement for history department majors. (IRR)

Attributes: HI1, HI3, HIPM
4 Credits

HIST 23000 Science and Religion from the Ancient Near East to the Scientific Revolution (LA)

Examines interactions between science and religion from the ancient Near East through the scientific revolution in the seventeenth century, with focus on the transmission and development of scientific ideas from Mesopotamia to Greece, Egypt, Rome, the Muslim Empires, and early modern Europe, and on the interdependence of religious belief and scientific thought throughout this period. Counts toward the Premodern, European, or Global area requirement for the history major. (IRR)

Attributes: HI1, HI3, HIPM, HM, RSEA, TIII
4 Credits

HIST 23100 Body and Society in Ancient Greece and Rome (LA)

This class examines ancient Greek and Roman social history through the lens of the body. Topics include sexuality and marriage, mythical paradigms of gendered behavior, legal rights and restrictions, fertility and other religious cults, notions of freedom and slavery, theories about body and soul, treatment of the dead, and ancient medical practices. While appreciating these aspects of ancient societies, another goal of this course will be to examine how people in the modern world have chosen certain aspects of ancient Greek and Roman civilizations to help define their own values. This course counts toward the Premodern or European requirement for History Department Majors. (IRR)

Attributes: CSA, HI1, HIPM, WGS, WGSC
4 Credits

HIST 23200 Medieval Civilization (LA)

Focuses on the political, religious, and cultural developments in the medieval European and Mediterranean world, c. 300-1400. We will survey the events of this long span of time, and we will also focus in particular on the mentalities—the ways people understood themselves and the world—that characterize the Middle Ages. This course counts toward the Premodern or European requirement for history department majors. (IRR)

Attributes: HI1, HIPM
4 Credits

HIST 23300 Colonial Latin America (LA)

An examination of ancient American civilizations establishes the context for the Spanish and Portuguese conquests and the imposition of Iberian culture in the development of Spanish and Portuguese colonies. The course continues with the international setting of the colonies, the decline of the colonial order, and outbreak of wars of independence in the early 19th century. Counts toward the global history requirement for history department majors. (IRR)

Attributes: HI3, HIPM, HM, LAEL, LAGC, LXME, NASE, RPRE, TIDE, TPJ
4 Credits

HIST 23400 Modern Latin America (LA)

To promote an understanding of contemporary Latin America, the course examines the political, economic, social, and cultural transformations in the 19th and 20th centuries. Major topics include the relationship of Latin America to Europe and the United States and the relationship of notions of race, class and gender to politics and economics. Counts toward the global history requirement for history department majors. (F,S,Y)
Attributes: HI3, HM, INBG, LAEL, LXME, NASE, RPRE, TIDE, TPJ
4 Credits

HIST 23500 The Discovery of the World (LA)

A consideration of the prerequisites of transoceanic voyages and an investigation of why, among the societies that developed oceanic maritime capabilities, it was Europe that "discovered" the world. This course counts toward the global requirement for history department majors. Prerequisite: Sophomore standing. (IRR)
Attributes: 1, G, H, HI3, HU
3 Credits

HIST 24000 Reimagining America: Politics, Religion, and Reform in the Antebellum U.S., 1815-1860 (LA)

Examines the period of humanitarian reform in the United States between 1815 and the outbreak of civil war that saw Americans completely reimagine their politics, economy, and society. Topics include democracy and the second-party system; canals, steamships, and railroads; immigration and demographic change; reconsideration of gender roles; religious movements and utopias; and reform movements. Counts toward the U.S. history requirement for history department majors. (IRR)
Attributes: HI2, HM, LMEL, LSCO, RSEA, TMBS, TWOS, WGS, WGSC
4 Credits

HIST 24300 The City in United States History (LA)

The U.S. city: its development and impact on American society from the colonial period to the present. Changes in structure and function of the city in U.S. history and the effect of these changes on the lives of urban dwellers and American society in general. This course counts toward the U.S. history requirement for history department majors. Prerequisite: Sophomore standing. (O,E)
Attributes: ABSS, H, HI2
3 Credits

HIST 24500 The American Civil War and Reconstruction (LA)

This course investigates how the Civil War transformed the United States, with an emphasis on the war as a revolutionary experience rather than as a military struggle. Topics include the legality of secession; the creation and demise of the Confederacy; civil liberties in wartime; emancipation; presidential leadership; challenges of the home fronts; the concept of total war; the lost cause ideology; the imprint of war; the African-American family in freedom; Reconstruction; and the Rise of the New South. This course counts toward the U.S. history requirement for history department majors. (F,Y)
Attributes: DV, HI2, HM, LMEL, LSCO, TIDE, TPJ
4 Credits

HIST 24600 After the American Civil War: Race, Reconstruction, & Reconciliation (LA)

This course investigates the aftermath of the American Civil War with an emphasis on race, reconstruction, and reconciliation. Topics include emancipation; the 13th, 14th, and 15th amendments; the Freedman's Bureau; the rise of the Ku Klux Klan; the development of the lost cause ideology; voting laws and civil rights; the rise of Jim Crow laws; the epidemic of lynching; the contested election of 1876; and how the memory of the war shapes race relations. This course counts toward the U.S. history requirement for Department majors. (IRR)
Attributes: ADSE, DV, ESE, HI2, LMEL, LSCO, RPRE
4 Credits

HIST 25500 Native American History (LA)

Covers Native American issues since 1492. This historical approach will acquaint students with the major events and processes that transformed Native American communities across the North American continent. Students will review the political, social, economic, and religious changes that took place as a result of native interactions with Euro-Americans and various government agencies since colonial times. Students will also address how Native Americans were represented by non-native peoples and how these images (and misrepresentations) changed over time. This course counts toward the United States History requirement for history department majors. Prerequisite: Sophomore standing. (IRR)
Attributes: HI2, HU, NACH, NASE
3 Credits

HIST 26200 The History of Commodities in the Americas (LA)

Examines the relationship of commodities to the larger fabric of Atlantic world history since the 15th century, exploring how the material world shapes social, political, and economic behaviors and attitudes. Considers how historians, scientists, economists, and other social scientists, have interpreted the social, political, environmental, and economic significance of particular commodities. Central to the course is a focus on how commodities have shaped the relationship between Latin America, the Caribbean, and the United States. This course addresses material goods (sugar, cod, fertilizer, etc.) as commodities, as well as the history of human trafficking, from the Trans-Atlantic Slave Trade to modern day slavery. Cross-listed with ENV5 26200; students cannot take both HIST 26200 and ENV5 26200 for credit. This course counts toward the global history requirement for history department majors. Prerequisites: Sophomore standing or above. (Y)
Attributes: ABSS, ENHU, ESHI, ESHU, HI3, HM, LMEL, LSCO, TQSF
3 Credits

HIST 26300 Intimate Friendships and Illicit Loves: The History of American Sexuality (LA)

This course connects the history of sexuality to the broader context of American history, from the colonial settlement through the sexual revolutions of the 1960s and 1970s. It pays attention to how sexual norms and sexual deviance have been defined and experienced historically, and how the changing notions of norms and deviance have shaped what is permissible and acceptable throughout our history. Among the topics covered are birth control and abortion; interracial and interethnic sexual identities; sexually transmitted diseases; prostitution; sexual violence; and lesbian, gay, bisexual, and transgender identities and communities. This course counts toward the U.S. history requirement for history department majors. Prerequisites: Sophomore standing. (IRR)
Attributes: DV, HI2, HM, TIDE, WGS
3 Credits

HIST 26700 The Salem Witchcraft Crisis of 1692 (LA)

After exploring the history of witchcraft in Europe (especially England) and America, the class will focus exclusively on the 1692 crisis. It will examine why the outbreaks occurred when they did, who was accused of witchcraft and why, how the outbreaks reflected social and cultural values, and how the crises were resolved. Issues of religion, class, social structure, and especially gender will form the backdrop against which these broader questions will be examined. This course counts toward the U.S. history requirement for history department majors. Prerequisites: Sophomore standing and WRTG 10600, or ICSM 10800, or ICSM 11800. (IRR)

Attributes: HI2, HM, LMEL, LSCO, TPJ, WGS, WI

3 Credits

HIST 27000 History of American Environmental Thought (LA)

A pervasive theme in the occupancy of North America is the changing and often conflicting perception of the environment. This course focuses on the history of environmental ideas, values, behaviors, and attitudes. Topics include capitalist, Romantic, and ecological thinking; the goals of conservation and preservation; recent rethinking of primitive experience and the idea of wilderness; and today's dialogue between mainstream environmentalism and deep ecology, the latter including ecofeminism, sustainable development, and biodiversity. Students examine the profound impact each of the paradigms has had on human-environment relations in America. This course counts toward the U.S. history requirement for history department majors. Students cannot receive credit for both HIST 27000 and ENVS 27000. (Y)

Attributes: ABSS, ENHU, ENVE, ESHI, ESHU, HI2, HM, LMEL, LSCO, SL, TQSF

4 Credits

HIST 27100 Global Environmental History (LA)

An introduction to the field of global environmental history that explores nature's role in world history and the ways human systems of energy, agriculture, resource extraction, trade, and transportation have affected the environment over time and vice versa. Primarily focuses on the historical impacts of environmental change around the world since the start of the industrial revolution (c. 1750). Students cannot take both HIST 27100 and ENVS 27100 for credit. (IRR)

Attributes: ABSS, ENHU, ENVE, ESHI, ESHU, HI3, LMEL, LSCO

4 Credits

HIST 27200 History of the Future (LA)

An examination of historical perceptions and visions of the future. Utopian thought and societies, science and technology, war and peace, the environment, and gender relations are the historical themes assessed. This course counts toward either the European or the U.S. history requirement for history department majors. Prerequisite: Sophomore standing. (IRR)

Attributes: 1, ENHU, ENVE, ESHU, H, HI1, HI2, HM, HU, TIDE, TQSF

3 Credits

HIST 27300 Global Revolutions in the 20th and 21st Centuries (LA)

An exploration of ideas, concepts, and backgrounds of world revolutions in the 20th and 21st centuries. Applies various models of revolution in Europe, Asia, Africa, and the Americas. The course emphasizes culture as the leading influence in modern revolutions. This course counts toward the global requirement for history department majors. (IRR)

Attributes: AASE, ADSE, HI3, HM, INBG, LXME, NASE, TPJ, TWOS

4 Credits

HIST 27500 The History of United States Popular Culture (LA)

Explores the history of popular culture in the United States from the earliest mass media genres to the contemporary era, including minstrelsy, novels, photography, baseball, movies, radio, and television. Emphasis is placed upon a number of important themes in American social history and how they affected popular culture differently in different eras -- gender roles, race, and the role of changing technology. This course counts toward the U.S. history requirement for department majors. (IRR)

Attributes: HI2, HM, TIDE

4 Credits

HIST 27800 Japan under Samurai Rule (LA)

In the United States the word "samurai" often evokes the image of a sword-wielding Japanese male dedicated to martial arts and Zen, nobly pursuing a life of strict discipline and loyalty to his lord -- and ready to die at a moment's notice. This romanticized image was lived by few actual samurai over the 450 or so years during which they held sway. This course explores the changing and complex role of the samurai in Japan from 1200 to 1868 and considers what it was like to live under samurai rule for the other 90 percent or so of the population. This course counts toward the global requirement for history department majors.

Prerequisite: Sophomore standing or above. (IRR)

Attributes: HI3, HU

3 Credits

HIST 27900 Modern Japan, 1868 to the Present (LA)

In 1868 samurai executed a revolution that would soon dissolve the samurai as a class and begin transformations rapidly bringing Japan in the late 19th century's competitive maelstrom. Japan's new leaders pursued an imperialist path, gradually bringing the nation into conflict with much of Asia and then with the United States and Europe. After World War II, Japan peacefully developed a vibrant culture and dynamic economy. We will consider the forces of change and the processes Japan has experienced and pursued from mid-18th century to its competition with other Asian economies today. This course counts toward the global requirement for history department majors. Prerequisite: Sophomore standing. (IRR)

Attributes: HI3, INBG

3 Credits

HIST 28100 The Nation-State and its Others, 1789-1914 (LA)

Examines the rise of nationalism and the nation-state in the wake of the French Revolution. Topics discussed include the rise of national and independence movements in the early 19th century as well as national unifications in the late 19th century. Particular attention paid to European nations' shifting processes of inclusion and exclusion in the 19th century. This course counts towards the European History requirement for department majors. (IRR)

Attributes: HI1

4 Credits

HIST 28200 Dictatorships and Democracies in 20th Century Europe (LA)

An examination of economic, social, and political events in Europe in the 20th century. Focuses on why a few countries maintained viable democracies while most others succumbed to dictatorships. Special attention given to the treatment of minority populations in democracies and dictatorships. This course counts towards the European History requirement for department majors. (IRR)

Attributes: HI1, HM, TIDE, TPJ

4 Credits

HIST 28300 Society and Sovereignty in French History, 1550-1815 (LA)

Examines political, cultural, and social transformations in France. Focuses on the French Wars of Religion (1562-1598), absolutism, the Enlightenment, and the Revolutionary and Napoleonic eras. Special attention is given to changes in governance, social institutions, and human rights. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (IRR)

Attributes: HIPM, HM, LMEL, LSCO, TPJ, WI
4 Credits

HIST 28400 Microhistories: Gender, Religion, and Agency in Europe, 1350-1870 (LA)

Focuses on microhistories, a type of historical writing that examines an individual's life in connection with larger social, political, and cultural issues. Explores themes of religion, gender, and sexuality in early modern Europe. Readings cover individuals who would typically be left out of traditional historical narratives (e.g., women, LGBTQ+ individuals, and people of the lower and middling classes). This course counts towards the European History requirement for History Department majors.

Prerequisites: WRTG 10600, ICSM 10800, ICSM 11800. (IRR)
Attributes: HI1, RSEA, WGS, WGSC, WI
4 Credits

HIST 29000 The History of U.S. Foreign Relations (LA)

Survey of the prejudices, values, and ideologies that lie behind U.S. foreign policy. Course covers relations with major states and areas of the world from the origins of the nation until the post-Cold War era. Special attention is given to the relationship between social, economic, and political changes in the United States and their effect on foreign relations over time. This course counts toward the U.S. history requirement for history department majors. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (IRR)

Attributes: HI2, LMEL, LSCO, WI
4 Credits

HIST 29100-29105 Selected Topics: Studies in European History (LA)

Occasional courses of an experimental nature are offered under this number and title. These may be of lecture and/or discussion format, of great breadth, or highly specialized. Any prerequisites are announced when printed descriptions of the study topic are distributed. This course may be repeated for credit for selected topics on different subjects. This course counts toward the European requirement for history department majors. Prerequisite: Sophomore standing. (IRR)

Attributes: H, HI1, HU
3 Credits

HIST 29200-29204 Selected Topics: Studies in Global History (LA)

Occasional courses of an experimental nature are offered under this number and title. These may be of lecture and/or discussion format, of great breadth, or highly specialized. Any prerequisites are announced when printed descriptions of the study topic are distributed. This course may be repeated for credit for selected topics on different subjects. This course counts toward the global requirement for history department majors. Prerequisite: Sophomore standing. (IRR)

Attributes: 1, ENHU, ESHI, ESHU, G, H, HI3, HM, HU, TQSF, TWOS
3 Credits

HIST 29300-29304 Selected Topics: Studies in U.S. History (LA)

Occasional courses of an experimental nature are offered under this number and title. These may be of lecture and/or discussion format, of great breadth, or highly specialized. Any prerequisites are announced when printed descriptions of the study topic are distributed. This course may be repeated for credit for selected topics on different subjects. This course counts toward the U.S. requirement for history department majors.

Prerequisite: Sophomore standing. (IRR)
Attributes: HI2, HU
3 Credits

HIST 29900 Independent Study: History (LA)

Special research on an individual project arranged by a student with a particular faculty member. The project may include reading books and/or writing papers under the guidance of the faculty member, with a performance expectation of sophomore-level work. Offered on demand only. Prerequisite: Sophomore standing.

Attributes: UND
1-3 Credits

HIST 30100 Renaissance and Reformation Europe (LA)

Consideration of the major trends in European history between 1350 and 1660, including Renaissance culture and Humanism, the Protestant Reformation, Tudor/Stuart England, and the Wars of Religion. This course counts toward the European requirement for history department majors.

Prerequisites: One 200-level HIST course. (IRR)
Attributes: HI1, HIPM, RSEA
4 Credits

HIST 30200 The Old Regime and the French Revolution (LA)

Political, social, and intellectual upheaval in 17th- and 18th-century Europe. Rise and decline of absolutism and the age of revolution. Napoleon prior to 1814. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: HI1, HIPM
3 Credits

HIST 30300 The Colonial Period of American History: 1607-1763 (LA)

Intensive examination of the origins of American culture and society (family, community, social structure). This course counts toward the U.S. history requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (F,O)

Attributes: HI2, HIPM
3 Credits

HIST 30400 The Age of the American Revolution (LA)

This course will place the American Revolution within the context of colonial demographic, economic, social, political, and cultural development during the latter half of the 18th century. It will focus on the tangible events of colonial resistance, forming a confederation, drafting and ratifying the Constitution, and splitting into opposing political camps as well as the intangible impact of ideologies such as republicanism and nationalism. It will explore more specifically how women, Indians, blacks, the wealthy and the poor affected and were affected by the Revolution. This course counts toward the U.S. history requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (S,O)

Attributes: 1, HI2, HU
3 Credits

HIST 30500 Jeffersonian and Jacksonian America: Expansion and Reform (LA)

This course charts the transformation of society from the divisive election of Thomas Jefferson through Andrew Jackson's "age of the common man." Explores the legacy of the American Revolution, westward expansion, slavery, industrialization and the market economy, class, and reform movements such as temperance, moral reform, utopianism, and abolition. Counts toward the U.S. history requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: HI2, HU

3 Credits

HIST 30600 The House Divided: The United States in the Long 19th Century, 1800-1914 (LA)

This course traces the development of the United States over the "long 19th century," from 1800 to 1914. Particular attention will be paid to the "House Divided" and the division that led to civil war at mid-century and how reunification facilitated the country's emergence as a world power. This course meets the U. S. distribution requirement for department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI2

4 Credits

HIST 30700 The United States in the Age of Global Crisis, 1914-1945 (LA)

Intensive study of the elements that have made the United States a dominant nation in the 20th century. Probes the complex 1920s, the crisis and reform impulses of the Great Depression era, and the impact of both world wars on American society. This course counts toward the United States history requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI2

4 Credits

HIST 30800 The United States in the Age of Cold War (LA)

Emphasizes the interrelationships between foreign and domestic policy since World War II, with particular focus on 1945-1991. Special attention is paid to the Cold War, McCarthyism, the 1950s ethos, the social movements of the 1960s and 1970s, the Vietnam War, and the rise of the political right. This course counts toward the United States history distribution requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI2

4 Credits

HIST 31000 The American Frontier: 1840-1890 (LA)

A cross-disciplinary perspective on the process of settlement into the trans-Mississippi West, drawing from women's studies, social theory, anthropology, literature, and geography. This course counts toward the U.S. history requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: HI2, HU

3 Credits

HIST 31300 The Other Europe: Modern Eastern and Central Europe (LA)

Examines events and developments in Eastern and Central Europe from 1945 through the end of the Cold War. The course reviews the region's historical-cultural background, but concentrates on governance, ideology, politics, economics, society, and culture during the past 50 years. Special focus on the development of independent dissident activities, their challenge to dominant authoritarian models during the period, and the future of the region in a changing Europe. This course counts toward the European requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI1, INBG

4 Credits

HIST 32000 The United States and the Third World (LA)

An examination of the role of the United States in the modern history and cultural evolution of Africa, Asia, the Middle East, and Latin America. Course includes study of the attitudes, influences, and actions of the United States regarding the nations and peoples of these areas in the 19th and 20th centuries. A search for the forces that explain the understanding, or misunderstanding, of third-world cultures by people in the United States. This course counts toward the U.S. history requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (S,O)

Attributes: HI2, INBG

3 Credits

HIST 32500 United States Business History (LA)

U.S. business history from 1815 to 1960: a study of the development of the vertically integrated corporation and its social and political impact on American society. This course counts toward the U.S. history requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: HI2, HU

3 Credits

HIST 33800 Africa in World Politics (LA)

Examination of the international policy framework of diverse African countries and their participation in regional and global politics. Students explore Africa's changing position in the global economy and complex relationships with the African diaspora, Middle East, communist East, Western societies, and other African countries. Includes contemporary debates over policy responses to the war against terrorism, the global politics of international aid, Western gender diplomacy, AIDS discourse, environment politics, the diamond trails, and African passivity and isolation through a radical recentering of the continent in global politics and history. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: HI1, INBG

3 Credits

HIST 34300 China and the Opium Trade in International Context (LA)

By the early 1800s the British East India Company controlled poppy-growing lands between South and East Asia, expanded opium production and promoted opium addiction in China as a way to solve an unfavorable balance of trade. Using the effects of the opium trade on China, this course examines the connections between narcotics, imperialism in the 19th century, and the many military and political conflicts of the 20th century. This course counts toward the global requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing or above. (IRR)

Attributes: HI3, HU

3 Credits

HIST 34400 Japan's War in Asia and the Pacific, 1931-1945 (LA)

Long before Pearl Harbor, Japan had seized power in Manchuria (1931) and invaded China proper (1937). Therefore, in the Asian context the conflict is sometimes called the Fifteen-Year War. This course examines the background to Japan's military aggression in Asia, the war within the United States, why the war was conducted with exceptional brutality, and why its repercussions are still felt 60+ years after the war's end. We will investigate tensions among Japan, Asia, and the United States still generated by the residue of the war and seek both causes and possible solutions to those tensions. This course counts toward the global requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing or above. (IRR)
Attributes: HI3, HU
3 Credits

HIST 34700 Mughal India (LA)

Examines major aspects of the Mughal Empire as a diverse, multi-ethnic and multi-religious state. Topics include a history of the empire, Mughal relations with world powers, Mughal arts and literature, the role of women in the empire, and the nature of cultural mixture in the encounter between the Mughals and various groups on the subcontinent, both Indian and English. This course counts towards the Global History requirement for History majors. Prerequisites: One 200-level HIST course. (IRR)
Attributes: HI3
4 Credits

HIST 34800 The Ottoman World (LA)

Surveys major aspects of the Ottoman Empire, including the history of the empire, Ottoman political and commercial culture and relations with other world powers, religious culture, art, architecture, literature and music of the Ottoman period. The empire is treated as a case study of a diverse, multi-ethnic and multi-religious state composed of aspects of the earlier Byzantine Christian and Jewish cultures with Turkic and Islamic cultural elements. Addresses long-term issues of cultural interaction and diversity, and shapes a discussion on the ways that diverse cultures have negotiated their relationships over time. This course counts towards the Global History requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)
Attributes: HI3
4 Credits

HIST 35000 Conversion of Rome: Cultural Transformation in the Late Antique Mediterranean (LA)

Explores the fall of the Roman Empire and the rise of Christianity. Covers the historical context of the late empire and examines several aspects of culture individually, including attitudes towards political power, marriage and sexuality, military service, education, and care of the dead. Counts toward either the European or the Premodern requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)
Attributes: HI1, HIPM
4 Credits

HIST 35100 English History to 1714 (LA)

Study of English history, principally in the Tudor and Stuart periods: the early Tudors, the culture and institutions of Elizabethan England, the religious and political struggle of Stuart and Cromwellian England. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing or above. (IRR)
Attributes: HI1, HU
3 Credits

HIST 35200 Monks, Heretics, and Scholars: The Culture of the High Middle Ages (LA)

Focuses on the "High Middle Ages" (roughly 1100-1350) in Europe, especially France and Italy, through a close examination of the areas of greatest cultural and intellectual change. Examines increasing religious controversies, invention of new institutions of learning, and development of new habits of thinking about God and nature. Counts toward either the European or the Premodern requirement for history department majors. Prerequisites: one 200-level HIST course. (IRR)
Attributes: HI1, HI3, HIPM, RSEA
4 Credits

HIST 35300 Religion, Politics, and Culture in Ancient Greece, 550-350 BC (LA)

Focuses primarily on Athenian and Spartan culture in the period from the generation before the wars with Persia until the aftermath of the war between Athens and Sparta. Alongside the prolific political and cultural changes of this period, which are often seen through a modern, secular, perspective, we consider the enduring place of myth and religion in the lives of the Greeks. This course counts toward the Premodern or European requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)
Attributes: CSA, HI1, HIPM
4 Credits

HIST 35400 Imperial and Weimar Germany (LA)

One of the key questions of German history is whether the nation took a "special path" resulting inevitably in Nazism. This course is organized around this theme. It will examine Germany from the Wars of Unification through the end of the Weimar Republic, focusing particularly on social, political, and economic trends. Counts toward the European history requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)
Attributes: GERM, HI1
4 Credits

HIST 35500 Totalitarianism in Germany, 1933-1989 (LA)

In *The Origins of Totalitarianism* Hannah Arendt argued that Nazism and Communism were similar political systems. This idea will be the starting point for this class, which will examine two dictatorships, those of Nazi Germany and the German Democratic Republic (the communist system in East Germany). Counts toward the European requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)
Attributes: GERM, HI1
4 Credits

HIST 36200 Modern European Intellectual History (LA)

A survey of European thought in the modern era, exploring in depth contemporary scientific, religious, aesthetic, and existentialist ideas. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing or above. Also offered through the London Center (F-S,Y); (IRR).
Attributes: 1, G, H, HI1, HU
3 Credits

HIST 36500 Race, Politics, Ideology, and the Coming of the American Civil War, 1820-1861 (LA)

Why did the American Civil War break out in 1861? This course investigates the development of a North versus South mentality during the four decades preceding the American Civil War and why war came when it did. Topics include slavery and the rise of the Old South; the Missouri crisis; nullification and the concurrent majority; territorial expansion; divergent economic development; the Compromise of 1850; Bleeding Kansas; the rise of abolitionist political parties; and secession, among others. This course counts toward the U.S. history requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI2, WI
4 Credits

HIST 37000 Slavery and the Old South, 1607-1877 (LA)

This course on the Old South will examine the rise and fall of the cotton kingdom with a focus on how the planter elite used slavery to dominate and shape southern society. While the South's colonial antecedents will be considered, this course's focus will be on the development of the South as a conscious minority during the antebellum era; the lives of the enslaved; the death of the Old South as a result of war; the abolition of slavery; and Reconstruction and its end in 1877. This course counts toward the U.S. requirement for history department majors. Prerequisites: One 200-level HIST course. (S,IRR)

Attributes: ADCH, ADSE, HI2, RPPE
4 Credits

HIST 37500 America through Travelers' Eyes, 1800-1860 (LA)

This course interprets American history through the prism of travelers' reports. Many foreign visitors came to the United States in the early 19th century, drawn by its reputation as a beacon of liberty and innovation. In particular, foreigners sought to understand what democracy looked like in practice; assess how well Americans adhered to the principles articulated during the Revolutionary War; and investigate how a variety of reform movements were transforming society. For majors, this course meets the U.S. distribution requirement. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI2
4 Credits

HIST 38000 A Global History of Lies: Rumors, Conspiracy Theories, and Hoaxes (LA)

Considers how a confluence of technological, economic, political and social forces have reshaped the contours and possibilities of misinformation and disinformation and their role in the development of rumors, conspiracy theories, and hoaxes. Focusing on Europe, the United States, and Latin America, we will trace the arc of conspiratorial thinking and rumors from the European Wars of Religion to the era of Trump, Putin, Bolsonaro, Orban, and Erdogan. This course counts toward the global requirement for department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI3, LAEL
4 Credits

HIST 38300 Revolutionary China (LA)

Study of China and its passage from celestial empire to communist republic through two world wars and two revolutions. The assumptions and realities of China are considered, as well as the processes that led to them. This course counts toward the global requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing or above. (IRR)

Attributes: AAPL, AASE, HI3, HU, RPPE
3 Credits

HIST 38700 History of Disease and Health in Latin America (LA)

Examination of the history of disease and health in Latin America from the pre-Columbian period until the present day. The course considers the various ways that diseases, and ideas about disease, have been shaped by race, gender, class, nationalist ideologies, agricultural and trade practices, and politics. Counts toward either the European or the global requirement for history department majors. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI3, HU, LMEL, LSCO, LXME, RPPE, SS, WGS, WGS3, WGS1
3 Credits

HIST 38800 Revolution and Counterrevolution in the Americas (LA)

This course will follow two broad, and intertwining histories: revolution and counterrevolution within specific Latin American nations and US-Latin American foreign relations. Our main focus is on Central America, Argentina, Mexico, and Chile. In the course we consider how and why state violence occurs, how and why state actors (including the military, the police, and bureaucrats among others) use and rationalize violence, and the relationship between social movements and state repression. Finally, we will investigate how gendered questions of national, ethnic, and community identity, political allegiance, and family shaped political actors on both the left and the right. Prerequisites: One 200-level HIST course. (IRR)

Attributes: HI3, LAEL, LSCH, LXME, RPPE, WGS, WGSC
4 Credits

HIST 39100-39103 Selected Topics: Studies in European History (LA)

Occasional courses of an experimental nature are offered under this number and title. These may be of lecture and/or discussion format, of great breadth, or highly specialized. Any additional prerequisites are announced when printed descriptions of the study topic are distributed. This course may be repeated for credit for selected topics on different subjects. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing or above. (IRR)

Attributes: H, HI1, HU
3 Credits

HIST 39200-39205 Selected Topics: Studies in Global History (LA)

Occasional courses of an experimental nature are offered under this number and title. These may be of lecture and/or discussion format, of great breadth, or highly specialized. Any additional prerequisites are announced when printed descriptions of the study topic are distributed. This course may be repeated for credit for selected topics on different subjects. This course counts toward the global requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: HI3, LAEL, LAGC
3 Credits

HIST 39300-39303 Selected Topics: Studies in U.S. History (LA)

Occasional courses of an experimental nature are offered under this number and title. These may be of lecture and/or discussion format, of great breadth, or highly specialized. Any additional prerequisites are announced when printed descriptions of the study topic are distributed. This course may be repeated for credit for selected topics on different subjects. This course counts toward the United States requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. (IRR)

Attributes: H, HI2, HU
3 Credits

HIST 39500 British History: 1815-1914 (LA)

British history is discussed with major emphasis placed on England in 1815. The Great Reform Act, Robert Peel, Palmerston, Gladstone, trade unions, Ireland, imperialism, liberalism 1906-14, Parliament versus lords, and causes of World War I are discussed. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. Offered only through the London Center. (F,Y)

Attributes: HI1, HU

3 Credits

HIST 39600 Modern British History 1914 to Present (LA)

Great Britain's role in Europe and the East since World War I. Major emphasis is placed on British foreign policy and the figures of Lloyd George, Chamberlain, Churchill, MacMillan, and Wilson. This course counts toward the European requirement for history department majors. Prerequisites: One 20000-level HIST course; sophomore standing. Offered only through the London Center. (S,Y)

Attributes: H, HI1, INBG

3 Credits

HIST 39900 Independent Study: History (LA)

Special research on an individual project arranged by a student with a particular faculty member. The project may include reading books and/or writing papers under the guidance of the faculty member, with a performance expectation of junior-level work. Offered on demand only. Prerequisites: Junior standing, or equivalent.

Attributes: UND

1-3 Credits

HIST 45000 History Seminar and Capstone (LA)

Intensive reading, research, and writing seminar focused on a particular historical theme, culminating in a significant research paper. Also provides a capstone experience for History Majors. Students reflect upon their learning in the various components of the ICC and the way the ICC relates to the discipline of History, in addition to connecting their undergraduate work to the paths they will take after graduation. Themes and instructors vary each semester. Prerequisites: One 300-level History course. (F,S)

4 Credits

HIST 48100-48101 European Research Seminar (LA)

Intensive reading, research, and writing seminar in European history, culminating in a significant research paper. This course counts toward the European requirement for history department majors. Must be taken at home campus. This course may be repeated for credit for different selected topics. Prerequisites: Permission of instructor. (Y)

Attributes: HI1, HU, WI

3 Credits

HIST 48200-48201 Global Research Seminar (LA)

Intensive reading, research, and writing seminar in Global history, culminating in a significant research paper. This course counts toward the Global requirement for history department majors. Must be taken at home campus. This course may be repeated for credit for different selected topics. Prerequisites: WRTG10600 or ICSM10800-10899 or ICSM11800-11899; permission of instructor. (Y)

Attributes: AACI, AASE, HI3, LAEL, LAGC, WI

3 Credits

HIST 48300-48301 United States Research Seminar (LA)

Intensive reading, research, and writing seminar in United States history, culminating in a significant research paper. This course counts toward the United States requirement for history department majors. Must be taken at home campus. This course may be repeated for credit for different selected topics. Prerequisites: Permission of instructor. (Y)

Attributes: HI2, HU, WI

3 Credits

HIST 49100 European Research Tutorial (LA)

Intensive reading, research, and writing tutorial in European history, culminating in a significant research paper. Students share a common syllabus but meet individually with faculty. This course counts toward the European requirement for history department majors. Must be taken at home campus. This course may be repeated for credit for different selected topics. Prerequisites: Permission of instructor. (IRR)

Attributes: HI1, WI

3 Credits

HIST 49200 Global Research Tutorial (LA)

Intensive reading, research, and writing tutorial in Global history, culminating in a significant research paper. Students share a common syllabus but meet individually with faculty. This course counts toward the Global requirement for history department majors. Must be taken at home campus. This course may be repeated for credit for different selected topics. Prerequisites: Permission of instructor. (IRR)

Attributes: HI3, WI

3 Credits

HIST 49300 United States Research Tutorial (LA)

Intensive reading, research, and writing tutorial in United States history, culminating in a significant research paper. Students share a common syllabus but meet individually with faculty. This course counts toward the United States requirement for history department majors. Must be taken at home campus. This course may be repeated for credit for different selected topics. Prerequisites: Permission of instructor. (IRR)

Attributes: HI2, HU, WI

3 Credits

HIST 49400 History Capstone (LA)

Provides history and social studies majors with a capstone experience for both the Ithaca Core Curriculum and their work in their majors. Students reflect upon their learning in the various components of the ICC, the way the ICC relates to the discipline of History, in addition to connecting their undergraduate work to the paths they will take after graduation.

Restricted to history and social studies with teaching option majors only.

Prerequisite: Senior standing. Pass/Fail only. (F,S,Y)

Attributes: CP, HI2, HU

1 Credit

HIST 49500 History Internship (NLA)

An opportunity for practical experience in a variety of history-related activities in the United States, under the joint supervision of the sponsoring agency and a history department faculty member. Internships are arranged individually and must be approved by the chair of the history department. Prerequisites: Four history courses; junior standing or above; permission of instructor and chair. Available for variable credit; only may be counted toward the history major. (IRR)

Attributes: HI2, UND

1-6 Credits

HIST 49700 International History Internship (NLA)

An opportunity for practical experience in a variety of history-related activities under the joint supervision of the Office of International Programs (London Center) and a history department faculty member on the Ithaca College campus. Internships are arranged individually through the Office of International Programs, but must be approved by the chair of the history department. Prerequisites: Three history courses, two of which are at level 3 or above; permission of instructor and chairperson. (IRR)

Attributes: HI1
1-4 Credits

HIST 49900 Independent Study: History (LA)

Special research on an individual project arranged by a student with a particular faculty member. The project may include reading books and/or writing papers under the guidance of the faculty member, with a performance expectation of senior-level work. Offered on demand only. Prerequisites: Senior standing, or equivalent.

Attributes: UND
1-3 Credits

(IC)2 Integrated Curriculum (ICIC)

ICIC 10000 Integration: Connecting the Disciplines (LA)

How will we meet the complex challenges of the 21st century? We'll need to find ways to combine insights and ideas from many fields of study and use them creatively. Concepts and tools from systems science and design can help us do this. This minicourse introduces them through a series of engaging learning activities. Pass/Fail. (F,S)

Attributes: HM, SO, TIDE, TIII, TMBS, TPJ, TQSF, TWOS
1 Credit

ICIC 11000 IC ADVANTAGE: College: Learning to Learn (LA)

Interrogate your assumptions about education, conduct experiments on your own learning habits, and apply the science of success to your transformation from high school to college student. In this online summer course taken in the weeks prior to your arrival on campus, you will build the tools, mindset, and motivation to become a self-directed learner: to take control and shape the college experience you want for yourself; to take calculated academic risks; and to identify and build the habits and practices that will help you bring your personal best to your first year at Ithaca College. (U)

1 Credit

ICIC 11100 IC ADVANTAGE: Community: Exploring the People and Places of I.C. (LA)

Welcome to the vibrant learning community of Ithaca College and its host community, Ithaca, NY. In this online summer course taken in the weeks prior to your arrival on campus, you will meet new students from every corner of IC and work together to explore what it means to be a part of a community—on campus and beyond. A range of disciplinary perspectives and case studies (stories, poems, essays, photographs, music, movies, etc.) will help us connect the different worlds and identities of our lived experiences and the new communities we now enter, imagine, and seek to build at the outset of a shared Ithaca College experience. (U)

1 Credit

ICIC 11200-11219 Deep Dive: Intellectual Explorations (LA)

Delve into a crucial issue, idea, topic, or debate in a focused and intentional way. In this online summer course taken in the weeks prior to your arrival on campus, you will be introduced to the forms and challenges of college-level coursework and the transferable critical skills (reading, writing, oral presentation, etc.) for future academic success at Ithaca College. (U)

1 Credit

ICIC 12000 Insight: Combining Expertise (LA)

How can we combine insights from disciplinary experts to address complex issues? Guest experts from a variety of disciplines will discuss how researchers and practitioners in each of their disciplines would address a significant current issue, which varies by course section. Techniques are introduced to combine their insights and lead to deeper understanding and more powerful solutions. Pass/Fail. (F,S)

Attributes: HM, SO, TIDE, TIII, TMBS, TPJ, TQSF, TWOS
1 Credit

ICIC 13000 Creativity: Transforming Insights into Ideas (LA)

Where do great ideas come from? Can we become better at generating them? A series of significant challenges are posed, and a rich variety of creativity techniques and principles are introduced to meet them. Creativity skills that will apply in many contexts are developed. Pass/Fail. (F,S)

Attributes: HM, SO, TIDE, TIII, TMBS, TPJ, TQSF, TWOS
1 Credit

ICIC 14000 Character: Developing Habits for Good (LA)

How can we best serve society? By each and every day making choices that do good for others as well as ourselves. The content and development of character are explored through a series of challenging activities and assignments. Tools for examining and intentionally altering patterns of thought and action to better serve society are introduced. Pass/Fail. (F,S)

Attributes: HM, SO, TIDE, TIII, TMBS, TPJ, TQSF, TWOS
1 Credit

ICIC 15000 Contemplation: Understanding the Self as Learner (LA)

To be integrative, holistic learners, we must learn to listen to our inner voice, and appreciate our unique lived experience for the perspective it brings to bear on how and what we learn. Through the study and practice of different mindfulness exercises, we will build capacity for attention regulation, emotion regulation, cognitive regulation, and compassion. Through weekly journaling students will reflect on how these capacities shape their learning experience and how they know what they know. We end the course with student presentations of their learning and plans for continued use of these new skills for self-knowing and learning. (B,F,S)

Attributes: HM, SO, TIDE, TIII, TMBS, TPJ, TQSF, TWOS
1 Credit

Ithaca College Seminar (ICSM)

ICSM 10000 College: Learning to Learn (LA)

Interrogate your assumptions about education, conduct experiments on your own learning habits, and apply the science of success to your transformation from high school to college student. In this online summer course taken in the weeks prior to your arrival on campus, you will build the tools, mindset, and motivation to become a self-directed learner: to take control and shape the college experience you want for yourself; to take calculated academic risks; and to identify and build the habits and practices that will help you bring your personal best to your first year at Ithaca College. (U)

1 Credit

ICSM 10001 Community: The People and Places of IC (LA)

Welcome to the vibrant learning community of Ithaca College and its host community, Ithaca, NY. In this online summer course taken in the weeks prior to your arrival on campus, you will meet new students from every corner of IC and work together to explore what it means to be a part of a community—on campus and beyond. A range of disciplinary perspectives and case studies (stories, poems, essays, photographs, music, movies, etc.) will help us connect the different worlds and identities of our lived experiences and the new communities we now enter, imagine, and seek to build at the outset of a shared Ithaca College experience. (U)

1 Credit

ICSM 10020-10039 Deep Dive: Intellectual Explorations (LA)

Delve into a crucial issue, idea, topic, or debate in a focused and intentional way. In this online summer course taken in the weeks prior to your arrival on campus, you will be introduced to the forms and challenges of college-level coursework and the transferable critical skills (reading, writing, oral presentation, etc.) for future academic success at Ithaca College. (U)

1 Credit

ICSM 10500 Ithaca Seminar (LA)

An interdisciplinary liberal arts course that supports the academic and social transition to Ithaca College. The course will introduce the first year student to college level liberal arts inquiry and serve as an introduction to the Integrative Core Curriculum (ICC). This course is open only to first semester first-year students and students may not earn credit for more than one of ICSM 10500, ICSM 10800, ICSM 12000, ICSM 19000. (F,S)

4 Credits

ICSM 10800 Ithaca Seminar in Writing (LA)

An interdisciplinary academic writing and liberal arts course that supports the academic and social transition to Ithaca College. The course will introduce the first-year student to college-level liberal arts inquiry and serve as an introduction to the Integrative Core Curriculum (ICC). This course fulfills the Academic Writing competency requirement of the ICC. This course is open only to first-semester first-year students and students may not earn credit for more than one of ICSM 10500, ICSM 10800, ICSM 12000, ICSM 19000. (F)

4 Credits

ICSM 12000 Ithaca Seminar for Innovation Scholars (LA)

An interdisciplinary liberal arts course, offered as part of each of the Innovation Scholars programs, and which supports the academic and social transition to Ithaca College. The course will introduce the first-year student to college-level liberal arts inquiry and serve as an introduction to the Integrative Core Curriculum (ICC). This course is open only to first-semester first-year students accepted into one of the Innovation Scholars programs and students may not earn credit for more than one of ICSM 10500, ICSM 10800, ICSM 12000, ICSM 19000. (F)

4 Credits

ICSM 17000 Meeting the Challenges: Strategies for Success in College (LA)

An interdisciplinary liberal arts course that supports the continuing academic and social transition to Ithaca College. The course will examine topics to build academic success and relate academic success to wider considerations of student health and wellbeing in reflecting on the purpose and potential of a college experience. (F,S)

1 Credit

ICSM 19000 Ithaca Seminar for Transfer Students (LA)

An interdisciplinary liberal arts course that supports the academic and social transition to Ithaca College. The course will welcome transfer students to Ithaca College and its Integrative Core Curriculum (ICC) by discussing the role of the liberal arts in the 21st century, introducing students to reflective thinking, and developing awareness of on- and off-campus resources. (F,S)

1 Credit

ICSM 20000 Peer Leadership in the Ithaca Seminar (NLA)

This is an experiential learning course which assigns students to an Ithaca Seminar in the role of student Peer Leader (an ambassador or assistant who works with an instructor to engage Ithaca Seminar students in transition-to-college topics) and provides support, training, and reflection on this mentorship/leadership role. Students enrolled in this course will be assigned to an Ithaca Seminar course and collaborate with a corresponding instructor. In addition, students will attend sessions to identify and develop their own mentorship/leadership styles, discuss Ithaca Seminar classroom experiences, and begin to connect mentorship/leadership theory and practice. Prerequisites: Any ICSM 10500, ICSM 10800, ICSM 12000, or ICSM 19000 course, and instructor approval. (F)

0-1 Credits

Interdisciplinary Studies Prog (IISP)

IISP 10500 Exploring the Options: Finding Purpose and a Path in College (LA)

Provides Exploratory students with the opportunity to clarify their purpose in college. Readings and structured activities help students articulate educational goals and shape their program of study by learning to connect personal values with strategic planning and problem-solving skills. (B,F,S,Y)

Attributes: UND

1 Credit

IISP 49800 H&S Integrative Core Curriculum Capstone (LA)

Explores the relationships between the various components of the integrative core curriculum (ICC), the student's primary major, other learning experiences at the College, and future goals. Reflection on the role of a liberal arts education. Students enrolling in this course should have completed most of the requirements of the ICC. Pass/fail. Prerequisites: Senior standing and open only to students in the School of Humanities and Sciences. (F,S,Y)

Attributes: CP

1 Credit

International Business (INTB)

INTB 10300 Minicourses in Int'l Bus (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

INTB 10301-10303 Minicourses in International Business (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

INTB 10400-20402 Mini-courses in International Business (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed INTB 26500. (Y)
1.5 Credits

INTB 26500 International Business Operations (NLA)

A survey of the major functional areas of managing international business operations. Emphasis is on how decisions are influenced by cultural, economic, financial, marketing, administrative, and legal conditions. Prerequisites: ECON 12100; sophomore standing. (F,Y)
Attributes: 1, G, UND
3 Credits

INTB 29700 Business in China (NLA)

An overview of the key features of Chinese culture and their business implications, growing globalization of the Chinese socialist economy since late 1970s and consequences for China's economic development, companies and society at large. The course also examines some of the main challenges China has confronted such as environmental pollution, uneven regional development, and income inequality. Prerequisites: Sophomore standing. (Y)
3 Credits

INTB 30400-30402 Mini-courses in International Business (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics. (Y)
1.5 Credits

INTB 36000 International Management of Human Resources (NLA)

Discussion of structural, cultural, and legal implications of human resource management in multinational companies. Topics include different organizational structures for international operations and how firms from different nations manage their staffing, training and development, performance appraisal, compensation, and labor relations. Prerequisites: HRM 34000, junior standing. (IRR)
3 Credits

INTB 39700 Selected Topics: International Business (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
Attributes: GERM
1-3 Credits

INTB 40400-40402 Mini-courses in International Business (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics. (Y)
1.5 Credits

INTB 48000 Export-Import Operations (NLA)

Overview of the major considerations involved in the export-import process. Exploration of documentation, transportation, marketing, and finance of export and import operations. Discussion of legal aspects and legislative constraints confronting exporters and importers, along with governmental support programs, where available. Concentrates on the relevant issues in exporting from and importing into the United States; parallel examples from other countries are given where information is available. Prerequisites: INTB 26500 or INTB 38000; junior standing. (IRR)

3 Credits

INTB 49000 Seminar in International Business (NLA)

A capstone course in international business that analyzes a number of cases using knowledge and skills from previous courses in international business or those with global/comparative content. The main objective is to develop a clear understanding of problems and practices of decision making in international business operations. Prerequisites: INTB 26500 and any three-credit level-3 or higher INTB; FINA 37000, GBUS 31000, or MKTG 38000; senior standing. (S,Y)
3 Credits

INTB 49700 Selected Topics: International Business (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
Attributes: GERM, UND
1-3 Credits

INTB 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)
1-6 Credits

INTB 49900 Independent Study: International Business (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y)
1-3 Credits

Integrative Studies (INST)

INST 29900 Independent Study: Integrative Studies (LA)

Students may register for independent study in areas that have cross-disciplinary aspects or that are not available elsewhere in the College. Interested students should obtain the independent study application form and guidelines from the office of the dean and develop a project in consultation with a faculty sponsor. Offered on demand only. Prerequisites: Approval of adviser; permission of department chairs and dean.
1-4 Credits

INST 29910 Independent Study: Integrative Studies Non-LA (NLA)

Students may register for independent study in non-liberal arts areas that have cross-disciplinary aspects or that are not available elsewhere in the College. Interested students should obtain the independent study application form and guidelines from the office of the dean and develop a project in consultation with a faculty sponsor. Offered on demand only. Prerequisites: Approval of adviser; permission of department chairs and dean.

1-4 Credits

INST 30000 Seminar in Integrative Studies (LA)

An investigation into the nature of integrative and interdisciplinary studies. Students will formulate a proposal for the Integrative Studies senior project. Prerequisites: Junior standing and major in integrative studies. (Y)

1 Credit

INST 39700 Internship: Integrative Studies (NLA)

Together with a faculty sponsor, students develop an interdisciplinary work-study project that combines an academic core with responsibilities in a professional setting. A design statement must be developed and approved in advance. Application forms and guidelines are available in the office of the dean. A maximum of 12 internship credits may be counted toward a degree; advance approval by the provost is required for the 7th to 12th credits. Prerequisites: Completion of most of a major relevant to the work experience; permission of department chairs and dean. Variable credit.

1-6 Credits

INST 39900 Independent Study: Integrative Studies (LA)

Students may register for independent study in areas that have cross-disciplinary aspects or that are not available elsewhere in the College. Interested students should obtain the independent study application form and guidelines from the office of the dean and develop a project in consultation with a faculty sponsor. Offered on demand only. Prerequisites: Approval of adviser; permission of department chairs and dean.

1-4 Credits

INST 39910 Independent Study: Integrative Studies Non-LA (NLA)

Students may register for independent study in areas that have cross-disciplinary aspects or that are not available elsewhere in the College. Interested students should obtain the independent study application form and guidelines from the office of the dean and develop a project in consultation with a faculty sponsor. Offered on demand only. Prerequisites: Approval of adviser; permission of department chairs and dean.

1-4 Credits

INST 40000 Integrative Studies Capstone (LA)

Provides an integrative, synthetic summary of the student's interdisciplinary training. Culminates in the creation of a senior portfolio. Prerequisites: Senior standing and major in integrative studies. (Y)

Attributes: CP

1 Credit

INST 49000 Senior Project: Internship (NLA)

Combines academic studies with responsibilities and experiences in a professional setting. Supervision is provided by an on-site professional. Students are required to submit periodic written field reports, as well as a final internship experience report. Prerequisites: Senior standing; integrative studies major; permission of instructor. (Y)

3-6 Credits

INST 49100 Senior Project: Independent Study (LA)

Students register for independent, in-depth, integrative study in areas that have multi-disciplinary aspects. Forms and guidelines are available from the office of the dean. Students develop a project in consultation with a faculty sponsor. Prerequisites: Senior standing; integrative studies major; permission of instructor. (Y)

3-4 Credits

INST 49200 Senior Project: Applied Independent Study (NLA)

Students register for in-depth, hands-on integrative study in areas related to their integrative studies. Students develop an applied project in consultation with a faculty sponsor. Forms and guidelines are available from the office of the dean. Prerequisites: Senior standing; integrative studies major; permission of instructor. (Y)

3-4 Credits

Italian (ITAL)

ITAL 10100 Elementary Italian I (LA)

Beginning course. Practice in understanding, speaking, reading, and writing simple idiomatic Italian, with special attention to Italian culture. Emphasizes participation and self-expression. Open to students with no previous Italian, or by placement examination. (F,S,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

ITAL 10200 Elementary Italian II (LA)

Continuation of ITAL 10100. Limited to students who have successfully completed ITAL 10100 with a grade of C- or better, or by placement examination. Prerequisites: ITAL 10100 or equivalent. (F,S,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

ITAL 20000 Intermediate Italian (LA)

Develops intermediate-level proficiency in Italian with a focus on culture. Includes grammar review and expansion, with practice in all skill areas and a particular emphasis on spoken communication. Prerequisites: ITAL 10200 with a grade of C- or better, or by placement examination. (Y)

Attributes: HM, TIDE

4 Credits

ITAL 20500 Italy: Language and Culture (LA)

A three-week study abroad course that emphasizes learning Italian language skills, with an overview of the history and culture of Italy. The course will be based in Siena, Italy, with brief visits to other cities, including Florence, Venice, and Rome. The course includes a conversationally based Italian class and on-site sessions devoted to learning about the culture and civilization of Italy. Students will incur additional costs. Prerequisites: ITAL 10100 or the equivalent; application through the Office of International Programs. (Sum,IRR)

Attributes: G, HU, INBG

3 Credits

ITAL 21000 Experiencing Italy: Remarkable Cities (LA)

This course provides a "virtual tour" of Italy through the focused study of key metropolitan areas from a multidisciplinary perspective. Students explore the history of each city and the art, architecture, and literature that characterize it. The class examines the cultural differences of each area, including variations in traditions, language, cuisine, and music. Limited Italian pertaining to travel may be introduced, but no prior knowledge of Italian is required. Taught in English. This course does not count towards language proficiency requirements in majors.

Prerequisites: One 3 or liberal arts course. (IRR)

Attributes: CA, CTE, HM, TIDE

4 Credits

ITAL 23000 The Italian Americans (LA)

This course examines the experience and assimilation of Italian immigrants to the United States. Topics include the conditions in southern Italy that compelled Italians to emigrate, the challenges of immigration, the role of the family, Italian-American women, the effects of prejudice, the mafia stereotype, and portrayals of Italian Americans in popular culture. Taught in English. This course does not count towards language proficiency requirements in majors. (IRR)
4 Credits

ITAL 24500 Italian Culture: A Culinary Journey (LA)

This course introduces students to Italian culture through the lens of its rich culinary tradition. Students explore a wide range of culinary-related materials, such as films, recipes, restaurant reviews, cooking shows, websites, and songs, as well as literary texts. Cultural topics considered include territory, regional differences, influences of recent immigration patterns, etiquette, and changing lifestyles. Taught in English; no knowledge of Italian is required. This course cannot be used to satisfy language proficiency requirements in majors. (IRR)
Attributes: CTE, HM, TIDE, TPJ
4 Credits

ITAL 25000 The Love that Moves the Sun and Stars: Dante's Divine Comedy in Translation (LA)

Students read and discuss, in English translation, Dante Alighieri's masterwork *The Divine Comedy*, an encyclopedic poem composed of three parts: *Inferno*, *Purgatorio*, and *Paradiso*. The course considers the text on the literal and allegorical levels, as Dante intended, with a focus on love as the key concept that forms the core of the universe. It also explores the text's sources and influences, including works in the visual arts that *The Divine Comedy* has inspired over the centuries. The course is taught in English with bi-lingual texts available for students of Italian. This course does not count towards language proficiency requirements in majors. (IRR)
Attributes: CA, CTE, HM, TIDE
4 Credits

ITAL 26000 A Place To Call Home: Origins and Identity in Italian Literature, Film, Art and Music (LA)

This course examines a variety of Italian cultural artifacts, including poems, short stories, novels, films, visual art, and songs, that explore the concept of home and the theme of identity. Works will be drawn from throughout Italian history, and will consider the way in which the leitmotif of home is also inextricably connected with that of the journey towards and away from our origins. Course taught in English; no knowledge of Italian is required. Content in Italian will be available to interested students. This course does not count towards language proficiency requirements in majors. (IRR)
Attributes: CTE, HM, TIDE
4 Credits

ITAL 27000 Inferno to Infinity: Italian Literature in Translation (LA)

An overview of Italian literature from the Middle Ages through modernity, through a study of principal works of major authors and representative works of various periods. Readings and all class activities are in English. This course does not count towards language proficiency requirements in majors. (IRR)
Attributes: CTE, G, H, HM, HU, TIDE, TIII
4 Credits

ITAL 28000 Italian Culture through Cinema (LA)

This course is intended to introduce students to Italian cinema of the past four decades, and how these films depict the language, culture, history, and changing social issues of Italian society and culture. Special attention is paid to the integration of films with close reading, discussion, and analysis of literary and cinematic texts that address such issues as national identity, immigration and emigration, the rise and fall of Fascism, the new republic, the north/south question, and contemporary regional and cultural differences. Taught in English; no knowledge of Italian is required. This course cannot be used to satisfy language proficiency requirements in majors. (IRR)
Attributes: CTE
4 Credits

ITAL 29900 Independent Study: Italian (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: Permission of instructor and chairperson. (IRR)
Attributes: UND
1-3 Credits

ITAL 30000 Italian Conversation and Culture (LA)

Extensive oral practice with a focus on Italian culture using selected topics as a basis for grammar review and expansion, conversation, discussion, and presentation of short talks. Prerequisites: ITAL 20000 or above taught in Italian with a grade of C- or better, or by placement examination. (Y)
4 Credits

ITAL 31000 Experiencing Italy: Remarkable Cities (LA)

This course provides a "virtual tour" of Italy through the focused study of key metropolitan areas from a multidisciplinary perspective. Students explore the history of each city and the art, architecture, and literature that characterize it. The class examines the cultural differences of each area, including variations in traditions, language, cuisine, and music. Class taught in English, but with extensive Italian practice through readings, discussion, and assignments. Students with no or limited Italian should enroll in ITAL 21000 instead of this class. Prerequisites: ITAL 20000 or above, or by placement exam. (IRR)
4 Credits

ITAL 32300 Parliamo! Italian Conversation (LA)

Extensive oral practice using selected topics as a basis for conversation, discussion, and presentation of short talks. Prerequisites: ITAL 20200 with a grade of C- or better, or equivalent. (IRR)
Attributes: 3A, CCCS, G, HU
3 Credits

ITAL 32800 Practice in Reading and Writing in Italian (LA)

Develops spoken and written communication skills at the third-year level. Reading and discussion of contemporary material. Writing practice with an emphasis placed on developing grammar skills. Laboratory exercises. Prerequisites: ITAL 20200 with a grade of C- or better. (IRR)
Attributes: 3A, G, HU
3 Credits

ITAL 33000 The Italian Americans (LA)

This course examines the experience and assimilation of Italian immigrants to the United States. Topics include the conditions in southern Italy that compelled Italians to emigrate, the challenges of immigration, the role of the family, Italian-American women, the effects of prejudice, the mafia stereotype, and portrayals of Italian Americans in popular culture. Taught in English. This course does not count towards language proficiency requirements in majors. (IRR)

Attributes: CTE, DV, G, H, HU, SS

4 Credits

ITAL 34500 Italian Culture: A Culinary Journey (LA)

This course introduces students to Italian culture through the lens of its rich culinary tradition. Students explore a wide range of culinary-related materials, such as films, recipes, restaurant reviews, cooking shows, websites, and songs, as well as literary texts. Cultural topics considered include territory, regional differences, influences of recent immigration patterns, etiquette, and changing lifestyles. Taught in English, but with extensive practice in speaking, reading, comprehension, and writing in Italian. Prerequisites: ITAL 20000 or above taught in Italian with a grade of C- or better, or by placement examination. (IRR)

4 Credits

ITAL 35000 Italian Culture through Cinema (LA)

This course is intended to introduce students to the language, culture, history, and changing social issues depicted by Italian cinema of the past four decades. Special attention will be paid to the integration of films with close reading, discussion, and analysis of literary and cinematic texts that address such issues as national identity, immigration and emigration, the rise and fall of Fascism, the new republic, the north/south question, and contemporary regional cultural differences. Taught in English, but with extensive practice in speaking, reading, comprehension, and writing in Italian. Prerequisites: ITAL 20000 or above taught in Italian with a grade of C- or better, or by placement examination. (IRR)

Attributes: HU, INBG, SCE

4 Credits

ITAL 35500 Italian Translation in Practice (LA)

Practical introduction to the world of translation and its relationship to culture and ethics through the analysis and translation of literary and non-literary texts (articles, brochures, documents) from Italian to English. Prerequisites: ITAL 20000 or above taught in Italian with a grade of C- or better, or by placement examination. (IRR)

4 Credits

ITAL 36000 Everybody on Stage: The Magic of Italian Theater (LA)

Provides a hands-on introduction to the liveliest genre of Italian literature, improving oral and writing skills through a close reading and dramatic delivery of selected texts by masters such as Carlo Goldoni, Luigi Pirandello, and Dario Fo. Prerequisite: ITAL 20200 with a grade of C- or higher. (IRR)

Attributes: HU

3 Credits

ITAL 36500 Nineteenth- and Twentieth-Century Italian Literature (LA)

A study of selected literary works by key authors from the late 19th through the 20th centuries. Readings may include novels, plays, and short stories by writers such as Verga, Pirandello, and Calvino. Taught in Italian. Prerequisites: One level-3 Italian course taught in Italian, or equivalent. (IRR)

Attributes: 3A, G, HU

3 Credits

ITAL 37000 Love, Lust, and the Black Death: Boccaccio's Decameron (LA)

A study of Giovanni Boccaccio's masterpiece: a collection of short stories written at the dawn of the Renaissance and shadowed by the devastation of the plague. The tales encompass a wide range of themes from tragic to comic and heroic to vulgar, providing ample material for discussion of Italian culture and literature in both historical and contemporary contexts. Taught in Italian. Prerequisites: One level-3 Italian course except ITAL 33000. (IRR)

Attributes: HU

3 Credits

ITAL 37500 Images of Hell: Dante's Inferno (LA)

This course studies Dante Alighieri's *Divina Commedia: Inferno* in the original Italian. This text, written 700 years ago, played a critical role in shaping the language and literature of Italy. The course includes explorations of the profound and lasting influence of Dante's work on literature, art, and culture in Italy and beyond. Taught in Italian. Prerequisites: One level-3 Italian course except ITAL 33000. (IRR)

Attributes: HU

3 Credits

ITAL 38000 Selected Topics in Italian Literature and Culture (LA)

Study of a genre, time period, group of authors, or single major writer. Students may only take two selected topics courses, for a total of six credits. Taught in Italian. Prerequisites: Two Italian courses at level 3, or equivalent. (IRR)

Attributes: 3A, G, HU

3 Credits

ITAL 39900-49900 Independent Study: Italian (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: ITAL 32300, ITAL 32400, or equivalent; permission of instructor and chairperson. (IRR)

Attributes: UND

1-3 Credits

Jazz Studies (JAZZ)

JAZZ 16100 Survey of Jazz History (LA)

A one-semester course for non-music majors and music majors. The study of jazz history from 1890 to the present, with much required listening and reading outside class. Origins, blues, New Orleans Dixieland, Chicago Dixieland, ragtime, boogie woogie, swing, bebop, cool, funky, and eclectic era (i.e., free jazz, third stream, contemporary, big bands, jazz-rock fusion, advancements in improvisation, and electronics). This course is required for jazz studies majors and may be used as a music elective for other bachelor of music degrees. (F)

Attributes: 3B, ADCH, ADSE, FA, H

2 Credits

JAZZ 16500 Basic Music Calligraphy (NLA)

Use of the copying pen; laying out the work for easy page turns and readability; copying parts from both concert and transposed scores; writing piano parts; correcting arranger's or composer's mistakes; special problems with rhythm-section instruments; proper writing in all clefs; proper use of notation; lettering; titles; fixing mistakes; flags; rests; dots; note heads and stems; beams; ledger lines; time and key signatures; accidentals; dynamics, slurs, ties, and other articulations; shorthand and shortcuts; tremolos; instrument cues; multi-copying lyrics; many copying projects throughout the semester, including copying all the parts for a complete large jazz band orchestration. (F,IRR)

1 Credit

JAZZ 16600 Jazz Piano I (NLA)

Classroom instruction in functional jazz keyboard; open voicings of 7th, 9th, and 13th chords beginning with ii-V-I progressions in major and minor keys; rootless close voicings; basic comping techniques and patterns; melodic improvisation; interpreting a lead sheet; the blues; jazz styles; solo piano. The course focuses on interpretation and performance of standard pieces from the jazz repertoire through individual keyboard application in a class setting. Prerequisite: PFSM 17200 and MUTH 12200/12201. (F-S)

1 Credit

JAZZ 16700 Jazz Piano II (NLA)

A continuation of JAZZ 16600 to prepare the student for a variety of performance situations and voicings; comping styles; walking bass; technique for soloing and chord substitutions; solo piano styles; contemporary jazz styles. As in Jazz Piano I, the course focuses on interpretation and performance of standard jazz pieces through individual keyboard application in a class setting. Prerequisites: JAZZ 16600. (S)

1 Credit

JAZZ 17000 Jazz Private Study I, major instrument (NLA)

Private study in jazz for Jazz Studies majors only. Students take 2 semesters of JAZZ 17000 for each semester. Corequisite: JAZZ 19900. (F,S)

1-2 Credits

JAZZ 17001 Jazz Private Study I, minor instrument or concentration (NLA)

Private study in jazz. For Jazz Studies majors and concentrations only. Jazz Studies majors take 2 semesters of JAZZ 17001 for each semester. Jazz Studies concentrations may take JAZZ 17001 as an elective toward the jazz concentration requirements. (F-S)

1 Credit

JAZZ 19900 Jazz Repertoire and Pedagogy (NLA)

Students meet weekly as a group with their jazz study teacher(s) to perform repertoire and discuss performance technique and pedagogy. Pass/Fail only. (F,S)

0.5 Credit

JAZZ 20000 Jazz Theory and Aural Training I (LA)

Introduces and vigorously drills jazz chords and chord symbol notation, modes, scales, chord-scale relationships, and jazz forms. Activities will include transcribing and performing; students will be required to bring their instruments to each class. Prerequisites: MUTH 10100 or MUTH 10101. (F-S-B)

Attributes: FA

1 Credit

JAZZ 20100 Jazz Theory and Aural Training II (LA)

Introduces and vigorously drills advanced jazz chords and chord symbol notation, modes, scales, chord-scale relationships, and jazz forms. Activities will include transcribing and performing; students will be required to bring their instruments to each class. Prerequisites: JAZZ 20000. (F-S-B)

Attributes: FA

1 Credit

JAZZ 21000 Jazz Standards and Literature I (NLA)

Introduces the jazz standard repertoire critical to functioning as a musician in a jazz combo. Memorizing the melodies, chord progressions, lyrics (as appropriate) and improvising on the songs in all 12 keys will be the primary activities. There will also be a transcription assignment, where each student will be required to transcribe an improvised solo by a major jazz artist, and present that solo to the class, and play along with the recording. Prerequisites: JAZZ 20100. (2 cr.) (S)

2 Credits

JAZZ 23000 Jazz Tune Writing (NLA)

Legendary jazz trumpeter Clark Terry taught that learning jazz can be broken down into three essential steps: imitation, assimilation and innovation. This course will focus on the first two steps, imitation and assimilation. Basic techniques of tune writing are presented and explored in relation to the work of specific jazz composers whose works are rooted in the creative use of tonal harmonic relationships. Students listen to and analyze tunes by composers such as Bill Evans, Tadd Dameron, Thelonious Monk, Bob Brookmeyer, and Wayne Shorter, and compose original tunes using the musical vocabulary and techniques utilized by those composers. Prerequisites: JAZZ 20100. (S)

2 Credits

JAZZ 27000 Jazz Private Study II, major instrument (NLA)

Private study in jazz for Jazz Studies majors only. Students take 2 semesters of JAZZ 27000 for each semester. Corequisite: JAZZ 19900. Prerequisites: 2 semesters of JAZZ 17000. (F,S)

1-2 Credits

JAZZ 27001 Jazz Private Study II, minor instrument (NLA)

Private study in jazz for Jazz Studies majors. Jazz Studies majors take 2 semesters of JAZZ 27001 for each semester. Prerequisites: 2 semesters of JAZZ 17001. (F-S)

1 Credit

JAZZ 31000 Jazz Standards and Literature II (NLA)

Introduces more advanced standards and jazz repertoire critical to functioning as a musician in a modern jazz combo. Memorizing the melodies, chord progressions, lyrics (as appropriate) and improvising on the songs in all 12 keys will be the primary activities. Additionally, students will be required to analyze the composition and improvisation techniques of Charlie Parker and Thelonious Monk. Prerequisites: JAZZ 21000. (2 cr.) (F)

2 Credits

JAZZ 31100 Jazz Standards and Literature III (NLA)

Covers extremely advanced jazz standards and repertoire important to functioning as a musician in a modern jazz combo. Memorizing the melodies, chord progressions, and improvising on the songs will be the primary activities of the course. There will also be a transcription assignment, where each student will be required to transcribe and analyze an improvised solo by a major jazz artist on a complex, chromatic tune, present that solo to the class, and play along with the recording. Prerequisites: JAZZ 31000. (S, O)

2 Credits

JAZZ 32300 Jazz Arranging I (LA)

Jazz arranging for the big band. Chord progressions and harmonic motion; scales that go with chords; triadic and seventh chords; standard cadential formulas; progressions found in basic jazz tunes; transcription; transposition; proper rhythm notation; terminology; instrument ranges; principles of melodic analysis; approach note techniques; four-part close voicings; unisons; open voicings (i.e. "drop two" and "drop two and four"); pads; punch chords; additions to four-way close; five-part saxophone section writing; alternate voicings; rhythm section writing; background line writing; standard formal arrangements of jazz pieces; writing one full arrangement with parts copied for a large jazz ensemble (arrangements must be played to receive credit in the course); score analysis and listening; "shout" chorus; concerted writing; melodic and rhythmic modification. Prerequisite: JAZZ 20100. (F)

2 Credits

JAZZ 32500 Jazz Arranging II (LA)

Writing for small and medium-size jazz ensembles. Review of all major concepts from Jazz Arranging I; discussion of harmony, substitute chords, modulation, and reharmonization; two- and three-part jazz counterpoint; analysis of small-group scores; transcribing tunes from recordings; correction of published sheet music; melody writing and motive development; introductions and turnarounds; expanded use of the rhythm section; background writing; techniques used in developing a melody; formal considerations; assigned listening both in and out of class; one complete medium-size group arrangement. Arrangement must be played to receive credit in the course. Prerequisites: JAZZ 32300. (S)

2 Credits

JAZZ 32600 Jazz Arranging III (LA)

Jazz arranging for the "studio orchestra" (i.e., large jazz ensemble with strings, woodwinds, horns, tuba, and extra percussion). Review of all major concepts from Jazz Arranging I and II; woodwind writing (e.g., clarinet, flute, bass clarinet, bassoon, and oboe); string writing and combining strings with winds; expanded use of the rhythm section; writing for voices in combination with other instruments; the recording studio; percussion writing; writing for French horn and tuba; score analysis and listening; one "studio orchestra" arrangement (perhaps an original composition, with approval of professor). Arrangement must be played to receive credit in the course. Prerequisites: JAZZ 32500. (IRR)

2 Credits

JAZZ 36100 Jazz Improvisation I (LA)

Basic nomenclature; all four-note seventh chords; modes of the major scale as used in improvising; rhythmic motive development; "swing" feeling; even eighth-note feeling; introduction to ii-V and ii-V-I progressions in all major keys; modulating standard and jazz compositions; solo transcriptions; phrase construction; chordal style; linear style; cycles; ear development; basic form of a solo; inside playing in solo improvising; Dorian and Mixolydian mode application. (F)

2 Credits

JAZZ 36300 Jazz Improvisation II (LA)

More advanced harmonic concepts; b9 chords; 11th and 13th chords; review of ii-V-I progressions and resolutions; basic bitonality; formal structures of solos; use of altered scales; Phrygian, Lydian, Aeolian, and Locrian mode application to chord changes; whole tone and diminished scale usage; modes of the ascending melodic minor scale and their usage; bebop style compositions of the 1940s and 1950s; "rhythm changes" and substitute chord usage; bebop devices. Prerequisites: JAZZ 36100. (S,IRR)

2 Credits

JAZZ 36400 Jazz Improvisation III (LA)

Fast tempos; rock style improvisation; chord superimposition; advanced patterns; deceptive cadences; alternate blues changes; turnarounds; advanced bitonality; further application of modes of the ascending melodic minor; more advanced harmonies of songs from the 1960s through 1980s; the Lydian-augmented mode; the Mixolydian flat 13 mode. Prerequisites: JAZZ 36300. (S,IRR)

2 Credits

JAZZ 36600 Jazz Style Analysis (LA)

For music majors (open to selected non-music majors with permission of the instructor). Jazz history from 1945 to the present with required listening and reading outside class. Areas covered include stylistic analysis of contemporary jazz, major representative artists, and the influence of preceding styles on subsequent ones. Aural and theoretical analysis of transcribed solos is included. Course grades are based on quizzes and a final research or creative project. (S,IRR)

Attributes: 3B, H, HU

3 Credits

JAZZ 37000 Jazz Private Study III (NLA)

Private study in jazz for Jazz Studies majors only. Co-requisite: JAZZ 19900. Prerequisites: JAZZ 27000. (F,S)

1-2 Credits

JAZZ 37001 Jazz Private Study III, minor instrument (NLA)

Private study in jazz for Jazz Studies majors only. Jazz Studies majors may elect 2 semesters of JAZZ 37001 for each semester. Co-requisite: JAZZ 19900. Prerequisites: JAZZ 27000 or JAZZ 27001. (F,S)

1 Credit

JAZZ 47000 Jazz Private Study IV (NLA)

Private study in jazz for Jazz Studies majors only. Co-requisite: JAZZ 19900. Prerequisites: JAZZ 37000. (F,S)

2 Credits

Jewish Studies (JWST)

JWST 10300 Hebrew Scriptures (LA)

This course treats the books of the Bible critically as literature, as religious and moral texts, and as a source of sociological knowledge. It surveys the biblical literature, acquaints students with critical methods for the study of the Bible, situates the Bible within the literature and culture of the ancient Near East, and discusses the religion of ancient Israel. The course will deal with questions of history and archaeology and with questions of meaning: what the biblical text meant to its ancient readers and what meanings it has today. Cross-listed as RLST 10300. (F,Y)

Attributes: 3A, H, HM, HU, TIDE, TMBS

3 Credits

JWST 20100 Jews in the Ancient and Medieval Worlds (LA)

An introduction to Jewish history and the varieties of Jewish cultures and religious traditions in the ancient and medieval worlds, covering Jewish history from the period of the Second Temple (sixth century B.C.E.) to the expulsion from Spain in 1492. (F,O)

Attributes: 1, AN3, G, H, HM, HU, TIDE, TPJ

3 Credits

JWST 20200 Jews in the Modern World (LA)

A survey of world Jewish history from 1492 to the present, concentrating on the Middle East, Europe, North Africa, and the United States.

Discussion of the expulsion from Spain, growth of Jewish communities in the Ottoman Empire and Eastern Europe, enlightenment and emancipation, European colonialism, migration to the Americas, anti-Semitism and the Holocaust, the state of Israel, and modern religious movements. (F,E)

Attributes: 1, G, H, HM, HU, TIDE

3 Credits

JWST 20300 Living Judaism (LA)

Introduces Judaism as a lived tradition, with a focus on ethical, ritual, and cultural practices and beliefs from a wide variety of Jewish communities.

Readings include texts from the biblical, rabbinic, medieval, and modern periods. Theological and ethical issues addressed include God, good and evil, covenant, death and afterlife, justice, and social responsibility, as lived out through practices associated with birth and death; marriage and commitment; sexuality; and the life of study, prayer, and devotion. Course cross-listed with RLST 20300; students may not receive credit for both courses. Prerequisites: One three credit Liberal Arts course. (S,Y)

Attributes: 1, G, HM, HU, TIDE, TMBS

3 Credits

JWST 24000 Film and the Holocaust (LA)

Explores representations of the Holocaust in film, examining a broad range of documentary and fictional works from 1945 to the present, and focusing on several key themes, including the debate about the unrepresentability of the Holocaust, the ethical and political dimensions of Holocaust representation, and the evolution in the form and significance of Holocaust cinema. Prerequisites: One liberal arts course. (IRR)

Attributes: CA, DV, GERM, HM, JWST, SCE, TPJ

4 Credits

JWST 27500 Selected Topics in Jewish Studies (LA)

Topics of special interest to students and teachers may be developed under this course heading. Further prerequisites may be added according to topic. This course may be repeated for credit when topics change. (IRR)

Attributes: HM, HU, JWST, SS, TIDE, TPJ

1-3 Credits

JWST 29400 Contemporary Jewish Identities: Race, Gender, and Nation (LA)

Addresses the multiplicity of contemporary Jewish identities, focusing on Jews in the United States and Israel, the two largest contemporary Jewish communities. Examines the intersection of racial, gender, and national identities among contemporary Jews, including how Jews came to be defined in racial terms, feminist and queer identities, and the complexities of Jewish identity in a multi-ethnic Israel. (S,Y)

Attributes: DV, HM, HU, JWST, TIDE, TPJ, WGS, WGSJ

3 Credits

JWST 32300 Gender and Sexuality in Judaism (LA)

Exploration of what it means to be a Jewish man or woman. The course addresses how Jewish gender roles have changed throughout history, as well as how contemporary Jews deal with changes in women's roles and demands for gender equality. Topics covered include what is "gender" and how to study it; traditional roles of men and women in Judaism; the gendered Jewish body; family and sexuality; homosexuality; Jewish feminism; the gender of God; and changing women's religious roles.

Cross-listed with RLST 32300. (Y)

Attributes: 1, AN3, DV, HU, WGSJ

3 Credits

JWST 33300 Jewish Mysticism (LA)

This course traces the history of Jewish mysticism. After a brief overview of early Jewish mysticism from the biblical and rabbinic periods, students will concentrate on the medieval flowering of Kabbalah, and its further development in the 16th-century Kabbalah of Safed and Israel and 18th-century Eastern European Hasidism. The emphasis will be placed on understanding both the theoretical and experiential aspects of Jewish mysticism and on examining some of the key texts of Jewish mysticism. Cross-listed with RLST 33300. (Y)

Attributes: AN3, HU

3 Credits

JWST 34300 Biblical Interpretation in Judaism and Christianity (LA)

Examines the theological and literary dimensions of reading the Bible in the Jewish and Christian traditions. Focuses on the comparative study of Jewish and Christian methodologies for interpreting the Bible. Prerequisites: Two Liberal Arts Course. (Y)

Attributes: HU, RSEA

3 Credits

JWST 35300 Jewish Folk Religion: Magic and Ritual Power (LA)

Traces the history of the Jewish tradition of ritual power from biblical antiquity through the Middle Ages and through its transformation in the modern world. Introduces students to the historical and anthropological study of magic and ritual power, and the relationship between magic and religion. Topics covered include the use of amulets and incantations for healing, the relationship between magic and Jewish mysticism, possession, and exorcism in the early modern world, and the persistence of the Jewish magical tradition in the modern era. Prerequisites: Two Liberal Arts Courses. (IRR)

Attributes: AN3, AN4, HU, RSEA

3 Credits

JWST 37500-37501 Selected Topics in Jewish Studies (LA)

Topics of special interest to students and teachers may be developed under this course heading. Further prerequisites may be added according to topic. This course may be repeated for credit when topics change. (IRR)

Attributes: HU, SS

1-3 Credits

JWST 42000-42001 Internship: Jewish Studies (NLA)

On-site work experience, combined with academic study, in agencies or educational institutions with significant Jewish content, such as Jewish schools or community agencies or multicultural groups. Arranged individually at the student's request with the individual instructor, a sponsoring agency, and permission of the Jewish studies coordinator. Prerequisites: Permission of instructor. (IRR)

Attributes: JWST, UND

1-12 Credits

JWST 49100 Independent Study in Jewish Studies (LA)

Special research on an individual project arranged by a student with a particular faculty member. The project may include reading books and/or writing papers under the guidance of the faculty member, with a performance expectation of upper-level work. Offered on demand only. Prerequisites: Permission of instructor. (IRR)

Attributes: UND

1-4 Credits

Journalism (JOUR)

JOUR 11100 Introduction to Journalism (LA)

Introduces reporting, interviewing and writing on deadline using Associate Press style; introduces inverted-pyramid and broadcast writing; and introduces such issues as current events, objectivity, ethics, libel and investigative reporting. (F,S)

Attributes: CCCS

4 Credits

JOUR 11200 Investigative Journalism (LA)

This class provides students with both theoretical and practical skills to locate story ideas, identify reliable and diverse sources, conduct research online and through interviews, and analyze and visualize data. Students use investigative techniques to research, write, and produce stories in multiple beats, including but not limited to: government, education, sports, and social issues. Students work individually and in teams to produce multimedia content focused on a specific beat and/or issues of journalistic importance within the local and wider communities.

Prerequisites: JOUR 11100. (F,S)

4 Credits

JOUR 21100 Visual Journalism (LA)

Explores the fundamental visual techniques and concepts of multimedia journalism and how verbal and visual messages work together in news reporting. Students will learn how to research, shoot, write, edit and produce content for broadcast, web, and social media platforms.

Examples are critiqued to lead students toward an ethical and analytical approach to issues of journalistic visual rhetoric. Prerequisites:

JOUR 11200; WRTG 10600 or ICSM 10800 or ICSM 11800. (F,S)

Attributes: CCCS, WI

4 Credits

JOUR 21300 Journalism Ethics (LA)

An introduction to ethics in journalism, designed to develop responsible, professional attitudes and practices by applying a range of analyses to issues. Examines classic and contemporary journalism cases involving a variety of ethical questions. Prerequisites: Sophomore standing.

Restricted to journalism majors and minors, and documentary studies majors. (F-S)

3 Credits

JOUR 25000 Journalism History (LA)

Examines the development of the mass media in the United States, beginning with Western European antecedents and proceeding to the present era of complex new technologies. Focuses on the factors influencing the evolution of U.S. media history, emphasizing the development of the U.S. press philosophy, the interaction of industrialization and media, and the rise of mass culture. Prerequisites:

Sophomore standing. (F-S)

Attributes: 3B

3 Credits

JOUR 31300 Journalism Law (LA)

This course encompasses the study of the underlying theories and philosophical principles that are used to formulate laws and policies related to freedom of speech and press in the United States. An examination of the framework of the American legal and policy making systems will enable students to understand how laws, particularly the First Amendment, address a range of issues involving freedom of speech and press, including: defamation, libel, prior restraint, and copyright.

Prerequisites: Journalism majors; JOUR 21100; junior standing. (F,S)

3 Credits

JOUR 38400 Television News Producing and Editing (NLA)

This course builds on the television news skills developed in previous courses by focusing on the role of content managers in newsrooms, from writing to editing. Students will hold editorial board meetings to understand the concept of writing, editing, and crafting meaningful news segments. Students will script a newscast. Students will be tested on how to think independently in situations where important news stories are breaking. Under tight class time constraints, students will make decisions that will impact the newscast they are scripting. Students will learn one of the most important jobs of a successful news producer and editor: how to deal with people and ethical dilemmas as they happen in a newsroom setting. Prerequisites: JOUR 21100 (Y)

4 Credits

JOUR 39000-39030 Selected Topics in Journalism (LA)

The topics of this practicum will vary to allow students the opportunity to learn about a specialty area of journalism, such as sports journalism, international relations journalism, economics and business journalism, and medical journalism. Students will be required to read relevant specialty newspapers, magazines, and academic journals appropriate to the selected topic, report and write articles on the selected topic in online and print format, and write for broadcast. Prerequisites: JOUR 21100 or permission of instructor. (F-S)

3 Credits

JOUR 48000 Mobile and Social Media Journalism (NLA)

This course critically examines how journalists and news organizations are using emerging forms of social media and mobile platforms. Students gain hands-on experience by experimenting with social media and mobile devices for newsgathering, distribution, and audience engagement. Students produce a portfolio of multimedia stories and build their own professional journalistic brand. An emphasis is placed on critically assessing the credibility and authenticity of user-generated content.

Students will also learn how to use analytics tools to monitor and analyze the effectiveness of their mobile and social media activity. Prerequisites:

JOUR 21100; senior standing. (F,S)

4 Credits

JOUR 48200 Narrative Journalism Workshop (NLA)

Students demonstrate their ability in narrative journalism by researching and writing a major journalistic project. Projects will take the form of a long-form narrative feature report, with the goal of getting them published professionally. Critique and analysis of journalists' projects and reflections on their craft are emphasized. Prerequisites: JOUR 21100; junior standing. (F-S)

4 Credits

JOUR 48400 Mass Media Research (LA)

This course strengthens the student's skills in conducting journalism and mass communication research on real-world local, national, and international issues. Emphasis on the formulation of research topics and proposals; literature search and review; various methodologies that are applicable to the journalism profession; data collection, analysis, and interpretation; and research report writing. Prerequisite: JOUR 21100; junior standing. (IRR)

Attributes: CCRM, QL

3 Credits

JOUR 48600 Documentary Journalism Workshop (NLA)

Students produce an in-depth final project of journalistic significance in a multimedia platform appropriate to their subject matter. Students research, write, edit, and produce long-form news stories in a documentary format for multimedia. Participants also critique and analyze examples of professionally produced documentary and long-form television and web-based journalism. Prerequisites: JOUR 21100; junior standing. (F-S)

Attributes: SL

4 Credits

JOUR 48800 Issues and the News (LA)

A capstone course for seniors majoring or minoring in journalism, designed to give the students an opportunity for in-depth news examination and analysis from numerous sources. Ongoing critique of major news issues of the day. Students examine the variety of information sources available and incorporate various points of view from around the world. They present key summaries of issues they are monitoring, producing news stories and analytic pieces. Prerequisites: JOUR 21100; senior standing. (F-S)

Attributes: UND

3 Credits

JOUR 49000 Internship (NLA)

Jointly supervised work experience with a cooperating institution or corporation in the field of journalism or communications, intended to motivate the student toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skills and academic knowledge are put into practice. May be repeated. Prerequisites: Junior standing; journalism major or minor; completion of Park School internship procedures.

The total number of internship credits a journalism major or minor is permitted to earn may not exceed (including London and Los Angeles internships). For example, if a student takes an 8-credit internship, a second internship would count for up to only, for a total of Pass/fail only. (F-S)

1-8 Credits

JOUR 49900-49901 Independent Study in Journalism (LA)

Intensive research related to journalism under the supervision of a faculty adviser and with approval of the department chair. A major research paper is required. May be repeated; total credits earned may not exceed eight credits for the two independent study courses combined. Prerequisites: Journalism major or minor; senior standing; permission of department chair. (F-S)

1-4 Credits

Languages (LNGS)

LNGS 11100 Global Screen Cultures (LA)

Team-taught lecture course that examines cinematic representations of changing notions of cultural, national, and individual identity. Topics will include the impact of war and fascism on national identity; changing notions of the family structure and gender roles; generational conflict and cultural identity, class, race, and religion. Students will investigate these topics both within and across various national cultures. LNGS 11100 and SCRE 11100 are cross-listed; students may not take both courses for credit. (S,Y)

Attributes: CA, DV, HM, LXME, RPRE, SCE, TIDE

4 Credits

LNGS 11200 Intersections of Race, Language, Literature, and Power in World Cultures (LA)

An interdisciplinary introduction to literary and cultural analysis from a global/international perspective, focusing on texts originally written in languages other than English. Introduces students to theoretical concepts such as colonialism, imperialism, orientalism and neoliberalism and discusses topics such as class, race, gender, sexuality, migration, environment, and nationalism. Asks students to pay close attention to issues of language, literature, and translation while reflecting on their own experiences and positionality in relationship to the content. All texts are read in English translation. (Y)

Attributes: DV, HM, TIDE, TPJ

4 Credits

LNGS 12000 Introduction to the Art of Translation (LA)

Introduction to the world of translation and interpreting from a theoretical and practical perspective. Texts will include translators' prefaces, reviews, literary and non-literary translations, interviews focusing on issues of translatability, fidelity, purpose and ethics. This course is intended for students with basic reading and listening proficiency in a language other than English. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (IRR)

Attributes: HM, TIII, TWOS, WI

4 Credits

LNGS 15000 English for Speakers of Other Languages (LA)

Improvement of non-native speakers' comprehension and production of English. Emphasis on oral communication as well as reading comprehension and writing ability. Pass/Fail only. Prerequisites: Permission of instructor. (F-S, Y)

Attributes: HU

3 Credits

LNGS 23200 Introduction to Linguistics (LA)

An introduction to the fundamental areas and concepts of modern linguistics. Study of sounds and sound patterns, word and sentence structure, and language change. Other topics may include semantics, language acquisition, dialects, and pidgin and creole languages. Open to all students. Prerequisites: One course in the liberal arts. (F,S,Y)

Attributes: 3A, ESE, GERM, HM, SS, TIDE, TWOS

4 Credits

LNGS 24200 Language and the Mind (LA)

Building on introductory linguistic concepts, this course looks at how language works in the mind: sounds, words, sentences, meaning, and language acquisition. (F,Y)

Attributes: ESE, HM, TIII, TWOS

4 Credits

LNGS 24300 Language and the World (LA)

Building on introductory linguistic concepts, this course looks at how language works in the world: language variation, language change, computer-mediated communication, and systems of writing. (S,Y)

Attributes: HM, TIII, TWOS

4 Credits

LNGS 24500 Translation and Self-Discovery (LA)

Theory and practice of translation as a form of writing that leads to discovery and self-discovery. Students read texts related to the role of translation in disparate areas of knowledge and select and translate short texts into English and from English into a second language with the goal of experiencing the field of translation, deepening their relationship to their own language, and finding their voice (or a new voice) in another language. This course is intended for students with an intermediate-level reading and writing proficiency in a language other than English. Cross-listed with WRTG 24500; students may not receive credit for both courses. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (IRR) Attributes: HM, TIDE, TIII, WI
4 Credits

LNGS 25000 Translation: The Art of Disguise (LA)

Examines the role of translation within the broader context of comparative literature. Drawing from representative texts spanning across centuries, students will discuss concepts of interpretation, faithfulness, loss and gain, negotiation, colonization, cannibalization and ethics. Explores the figure of the translator, both in theoretical and literary works, and approaches the field of translation from the perspective of practicing translators and translated authors. Basic reading proficiency in a language other than English is necessary. Cross-listed with ENGL 25000. Prerequisites: WRTG 10600 or ICSM 108xx or ICSM 118xx and Sophomore standing. (IRR) Attributes: 1, 3A, G, GERM, HM, HU, TIII, TWOS, WI
4 Credits

LNGS 34000 Selected Topics in Linguistics (LA)

Investigation of selected topics in the field of linguistics. Prerequisite: LNGS 23200 with a grade of C- or better. (IRR)
4 Credits

LNGS 40000 Capstone in World Languages and Cultures (LA)

Culminating course in the World Languages and Cultures major. Students are invited to extend and synthesize conceptual strands encountered earlier in the program while exploring the transformation of the field in the 21st century. Particular attention is paid to career opportunities and preparation for post-graduate work. (F,S,Y)
1 Credit

LNGS 49800 Focused Translation Project (LA)

Individual research, analysis and translation of a literary or non-literary text (or selection of texts), supervised by a faculty mentor in the WLLC department. Culmination of the Translation Studies Minor, and restricted to Translation Studies minors. Course can be repeated once for up to two credits if completed in different languages. Prerequisites: FREN 35500, GERM 35500, ITAL 35500 or SPAN 35500. (IRR) Attributes: GERM
1 Credit

Legal Studies (LGST)

LGST 10100 Foundations in Law and Justice (LA)

Provides a critical, interdisciplinary, and comparative overview of the concepts of law and legality broadly defined. Illustrates how law and legal regimes are inextricably bound up with political, historical, economic, and sociocultural forces. By focusing on the dynamic relationship between law, justice, and power, the course looks at the ways that law can be used as a tool of social control, as well as ways that law can be employed as a site of resistance from which to produce social change. Law – and the links between law and justice – are examined in the national (American) and international or global contexts. The course is aimed at all students interested in questions of power, justice, governance, and society. LGST 10100 is required of all Legal Studies majors and minors. (F,Y) Attributes: AN3
4 Credits

LGST 27500 Selected Topics in Legal Studies (LA)

Explores contemporary topics, concepts, and controversies in the field of law and society at the intermediate level. May be repeated for credit for a total of nine credits when topics vary. Prerequisites: Sophomore standing. (IRR) Attributes: LSAP
1-3 Credits

LGST 30600 Criminal Law (NLA)

An introduction to topics in criminal law, criminal procedure, and criminal justice. Topics include the American court system; origins of law; elements of crimes; defenses to crimes; constitutional issues in criminal law; criminal procedure issues, including policy operations, arraignments, indictments, grand jury procedure, criminal trials, and appeals; and criminal justice issues, including "white- and blue-collar" crime, philosophies of crime and punishment, and crime in the workplace. An optional clinical component in the Tompkins County court system will be available. Prerequisites: LGST 10100 and one of CMST 12400, GBUS 20300, SOCI 20300, or TVR 12300. (F,S) Attributes: LMAL, LMEL
3 Credits

LGST 30700 Environmental Law and Policy (LA)

A survey of environmental law and the policies and goals of key federal environmental statutes. Students will examine the role of the Environmental Protection Agency in implementing and enforcing environmental standards, as well as significant case law developments. Prerequisites: LGST 10100 and one of CMST 12400, GBUS 20300, SOCI 20300, or TVR 12300. (Y) Attributes: ENSS, ENVE, ESPE, LMAL, LMEL
3 Credits

LGST 32000 Marketplace Regulation and Consumer Protection (NLA)

Discussion and in-depth study of the role of government in protecting the consumer and regulating marketplace practices. Seminar topics include the costs and effectiveness of the administrative law process, case studies of federal regulatory agencies, and recent developments in marketing and product liability law. Emphasis on research skills, and individual and group presentations. Prerequisites: LGST 10100 and one of CMST 12400, GBUS 20300, SOCI 20300, or TVR 12300. (Y) Attributes: ENSS, ENVE, ESPE, LMAL, LMEL
3 Credits

LGST 32300 Legal Research Seminar: Investigating Law and Justice 'on the Ground' (LA)

Teaches students the fundamentals of qualitative social science research, with the aim of examining questions of law and legality, broadly defined. After providing a broad overview of qualitative research as conceived through the lens of social science – and a brief examination of the particular qualitative methods of [participant] observation and interviewing – the course turns to an empirical and qualitative examination of a series of interdisciplinary research studies on topics related to law and justice. This course is required for all Legal Studies majors. Prerequisites: LGST 10100. (Y)

Attributes: LMAL, LMEL

4 Credits

LGST 32410 Human Rights & Genocide (LA)

The course examines some of the key debates within the field of human rights, including debates between universalism and cultural relativity, and between individual and collective rights. It also looks at some of the main critiques of human rights: Does it matter if there is an international human rights regime if human rights are not enforced? In what ways can human rights be considered a colonialist enterprise? The course focuses in particular on the crime of genocide and attempts by individuals and groups to recover or seek justice in the wake of genocidal-type violence. Course is cross-listed with POLT 32410; students cannot earn credit for POLT 32410. Prerequisites: One 100-level LGST or POLT course. (S,Y)

4 Credits

LGST 37500-37501 Selected Topics in Legal Studies (LA)

Explores contemporary topics, concepts, and controversies in the field of law and society at an advanced level. Maybe be repeated for a total of eight credits when topics vary. Prerequisites: One LGST course at 100-level or above. (Y)

Attributes: AN3, LSAP

1-8 Credits

LGST 39700 Internship in Legal Studies (NLA)

Permits students to explore experiential law-related work in a variety of settings. Students are expected to perform work at an internship site, chosen in consultation with their faculty advisor, to keep a journal, and to submit, as part of their course obligations, a thorough written evaluative report based on their experiences. Internships may be taken at national, state, and local levels, in London under the auspices of the Ithaca College London Center, as well as in other international locations. Prerequisites: permission of instructor. (F,S,U,Y)

0.5-9 Credits

Management (MGMT)

MGMT 10300 Minicourses in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10301 Minicourses in Mgmt (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10302 Minicourses in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10303 Minicourses in Mgmt (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10304 Management Minicourse: Women in Business (NLA)

This course includes lectures, readings and guest speakers, which will help us to explore present-day findings of women in corporate and entrepreneurial settings. Topics will include current research of women in business, leadership development, family/life balance, mentorship, network influence and ultimately gender differences in the workplace. Open only to Business Administration majors. (IRR)

Attributes: WGS

1.5 Credits

MGMT 10305 Minicourse in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 11100 Introduction to Business (NLA)

Overview of the world of business, its management, and its economic, political, and social environment. Particular note is taken of the areas of finance, accounting, personnel, production/operations, marketing/sales, and their interdependence. Not available to declared business majors. (Y)

3 Credits

MGMT 20600 Organizational Behavior and Ethics (LA)

Exposes students to two major areas of inquiry: 1) how to successfully manage life at work, and 2) how to apply ethical concepts/tools related to the management of organizations. In doing so, it investigates ethical theories and their application in the workplace, as well as topics on how individuals and groups act within the organizations where they work including: employee attitude development, personality, motivation, group structure and dynamics, leadership, decision-making, and job design.

Sophomores who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: Two courses in business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT), or ECON. (F,S,Y)

4 Credits

MGMT 21300 Hidden Entrepreneurs (NLA)

Hidden Entrepreneurs is the study of unique and unexpected entrepreneurs and how their entrepreneurial spirit helps drive American business at so many levels. Unwinding the general public's modern-day conception of "entrepreneurs", this course focuses on a variety of businesses and business people that embody the concept of entrepreneurship in different ways and forms. Some entrepreneurs are groups within larger companies, while some are in government agencies. Some are unexpected and each one is unique - yet all bonded together by a common passion. (S,Y)

3 Credits

MGMT 21400 Startup Tactics: From Accounting to Zoning, Tactical Considerations When Starting a New Company (NLA)

Study the tactics for running a new business venture's day to day activities in an interactive, hands-on way. Learn how to incorporate a business, raise money, hire a lawyer, run a board meeting, do a marketing campaign, negotiate a contract, hire and fire employees, and many more skills. Understand how to execute on the actions necessary for a well-run startup to set and achieve its goals. (S,Y)
3 Credits

MGMT 22500 Business Models and the Art of Profitability (NLA)

Learn the design and economic drivers for over 30 unique business models, and how to identify them when you learn about a new company. Develop the capability to understand what business model a company is currently using, and how to assess whether they should modify their business model. Discuss and debate business model similarities and difference in an interactive classroom environment. (F,Y)
3 Credits

MGMT 23000 Entrepreneurial Innovation (NLA)

Learn how to generate ideas for a new business venture. Once that list of great business ideas is created, analyze and validate which idea is most worthy of pursuing. Succinctly communicate this validated business idea in order to attract customers, investors, partners, and employees. The class is hands-on and real world focused. As has happened in past semesters, students will go on to launch real companies. (F,Y)
3 Credits

MGMT 23500 Ideas into Action: Launching your Business Idea (NLA)

Launch your own entrepreneurial business by applying the best practices in starting new companies to your business idea. Learn the methodology of how to do quality Customer Discovery to best understand your customer's needs, and then design a business model for how to best succeed. Plan and communicate your business model in a business pitch to experienced and successful alumni and community entrepreneurs. Prerequisites: MGMT 23000. (S,Y)
3 Credits

MGMT 26000 Business Analytics and Technology I (NLA)

Concepts and principles of business data analytics and the role analytics plays in business management. The focus is on business data analytics techniques. Students will use up-to-date data analytic tools and must demonstrate proficiency in the use of these tools as part of the course requirement. Prerequisites: MATH 14400 or MATH 14500 or PSYC 20700. (F,S,Y)
2 Credits

MGMT 29800 ITHACON: Promoting and Managing Conventions (NLA)

The course will use the creation, implementation, and assessment of the long-running, annual pop culture ITHACON event to help students learn about trade shows and conventions. Students will be exposed to event studies theory and techniques and be provided with a unique hands-on experience. The course will also focus on analysis and advance planning for the next iteration. Students will also learn about the entrepreneurial world of entertainment, publishing, and pop culture. (S,Y)
3 Credits

MGMT 30500 Data-Driven Management Decisions (NLA)

Managers are frequently given business advice whose validity is seldom questioned. This course sheds light on this process by helping students develop solid analytic practices using data from surveys and interviews. The goal is to improve students' ability in assessing the quality of knowledge derived from management research. Students evaluate the validity of managerial reports, learn to exercise caution in accepting research conclusions, get experience with basic analytic techniques, and craft stories based on data they have analyzed. Prerequisites: MGMT 20600; MATH 14400, MATH 14500, or PSYC 20700. (S)
3 Credits

MGMT 31200 Leadership and Collaboration (LA)

This course focuses on the nature of leadership and power dynamics in modern organizations. This course develops students' abilities to create and use sources of power and to create a climate for leadership and change. In addition, the course provides a survey of methods to sustain and develop both personal and organizational power, including the network-building and conflict-handling skills needed to manage the increasingly pluralistic interests found in organizations. This course develops students' abilities to motivate human resources, facilitate team building, and guide organizational change. Prerequisites: MGMT 20600 or both PSYC 31600 and PSYC 33400. (F,Y)
3 Credits

MGMT 34000 Human Resource Management (NLA)

This survey course provides an overview of human resource policies and procedures within the context of managerial decision making in organizations. Primary topics include human resource planning and analysis, equal employment opportunity, staffing, human resource development, compensation and benefits, health and safety, and labor-management relations. Prerequisites: Three courses in business or social sciences; junior standing. (Y)
3 Credits

MGMT 34500 Operations Management (NLA)

An introduction to operations management for managing the resources (including people, facilities, inventories, processes, and systems) that create value (in the form of a product or a service) for an organization. Prerequisites: MATH 10400, MATH 10800, or MATH 11100 and MATH 14400, MATH 14500, or PSYC 20700. (F,S,Y)
2 Credits

MGMT 36500 Intermediate Business Analytics (NLA)

Provides the background and skills necessary to analyze data, including big data, in support of decision making in the business environment. The following topics will be covered: foundations of business analytics, descriptive analytics, predictive analytics, and prescriptive analytics. Computer-based tools will be incorporated throughout the course and selected for their applicability to business applications, but the analytical foundation will be the spreadsheet and, to a lesser extent, the database. Students will develop expertise in database technology to the point at which forms and reports can be created and generated, and advanced spreadsheet technologies to include use of dashboards. Prerequisites: MGMT 26000. (S, Y)
3 Credits

MGMT 39100 Managing for Sustainability (NLA)

Examines the challenge of maintaining sustainable business strategies while meeting the needs of various stakeholders. Will investigate various models of business sustainability and how to integrate sustainability concerns into managerial functions. Prerequisites: MGMT 20600. (IRR)
3 Credits

MGMT 39700-39705 Selected Topics in Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

Attributes: UND

1-3 Credits

MGMT 39706 ST: Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MGMT 42100 Strategic Management (NLA)

Deals with upper-level management skills and attitudes as they encompass all basic business fields. Stresses the integration of the various disciplines studied and the opportunity to develop managerial decision-making abilities. Students will utilize professional communication and teamwork skills. Open only to students in the School of Business. Prerequisites: ACCT 22600; MGMT 20600; FINA 31100; MKTG 31200; MGMT 34500. (F,S,Y)

Attributes: CP

3 Credits

MGMT 45100 Small Business Seminar I (NLA)

Introduction to the concepts and principles of small business management. Case study analysis will lead to practical understanding and application of management concepts. Prerequisites: Upper-level standing, permission of instructor. (F,IRR)

3 Credits

MGMT 46000 Leading Organizational Change (NLA)

Capstone course for the management concentration. In-depth examination of the nature, strategies, models, and intervention activities associated with planned change efforts for organizational improvement. Students build on previous knowledge of organizational structure and processes through independent readings and research, culminating in a challenging team-consulting experience in an ongoing organization. Prerequisites: MGMT 31000 or MGMT 31200, management elective from approved list; senior standing. (S,Y)

3 Credits

MGMT 48100 Advanced Decision Making with Analytics (NLA)

Course provides a multidisciplinary perspective on analytics, applying a wide range of techniques in diverse settings. Students will employ basic statistical tools (tabulation, hypothesis testing, correlation) in a variety of new applications as well as some new tools used for prediction (decision trees, neural networks, logistic regression) and clustering. All content and exercises will be based on large data sets ("big data") and use appropriate state-of-the-art software for data analysis. Emphasis will also be placed on visualization and reporting results. Prerequisites: MATH 24600; MGMT 36500. (S,Y)

3 Credits

MGMT 49600 Negotiations (NLA)

Negotiation is the science of securing agreements between two or more interdependent parties. The central issues of this course deal with understanding the behavior and relationships of managers, departments/units, and organizations in a business setting. The course is designed to build a negotiation skill-set that can be applied to a broad set of situations in organizations. In this light, a range of cooperative and competitive situations will be examined. A basic premise of the course is that while you need analytic skills to discover optimal solutions to problems, a broad array of skills are needed for these solutions to be accepted and implemented. The course will allow participants the opportunity to develop these skills experientially and to understand useful analytic frameworks. Considerable emphasis will be placed on simulations, role plays, and cases. Prerequisites: Junior standing. (S,Y)

3 Credits

MGMT 49700-49704 Selected Topics in Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MGMT 49714 ST: Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MGMT 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

MGMT 49900 Independent Study: Management (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y)

1-3 Credits

Marketing (MKTG)

MKTG 10300-10303 Minicourses in Marketing (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: as appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MKTG 31000 Quantitative Methods in Business (NLA)

A study of quantitative tools used in solving business problems. Statistical quality control and decision models, regression methods, linear programming, and CPM- and PERT-type models. Using computers to solve problems is an important aspect. Prerequisites: MATH 14400 or PSYC 20700; junior standing. (IRR)

3 Credits

MKTG 31200 Principles of Marketing (NLA)

Study of concepts, activities, and decisions related to the exchange process, management of the marketing mix, and development of marketing strategy for profit and not-for-profit organizations. Addresses the sociocultural, legal and regulatory, technological, economic, ethical, political, and social responsibility dimensions to marketing in the global environment. Juniors who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: Three courses in business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT) or STCM, with at least one course at the 200-level. (F,S,Y)

3 Credits

MKTG 32300 Consumer Behavior (NLA)

Study of consumer behavior variables and their impact on marketing. Includes consumer behavior models, motivation, perception, attitudes, and the influences of family, society, and culture. Prerequisites:

MKTG 31200. (F,S,Y)

3 Credits

MKTG 32500 Sales and Sales Promotion (NLA)

Examines the roles of personal selling and sales promotion in an organization's integrated marketing communications (IMC) mix. Students will learn how sales and sales promotion work together and with other IMC tools (advertising, publicity) to accomplish marketing strategies. Students will gain knowledge of traditional and cutting-edge consumer and trade promotions, as well as personal selling tactics and techniques. Prerequisites: MKTG 31200; junior standing. (Y)

3 Credits

MKTG 38000 International Marketing (NLA)

Focus on marketing management problems, techniques, and strategies necessary to incorporate the marketing concept into the world marketplace. A multidisciplinary approach creates a broad understanding of the subject matter. Concepts from economics, political science, anthropology, sociology, management, and marketing are integrated. Readings include text plus journal and magazine articles. Prerequisites:

MKTG 31200; junior standing. (F-S,Y)

3 Credits

MKTG 39700 Selected Topics: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MKTG 41100 Marketing Analytics (NLA)

Introduction to analysis of data related to marketing decisions, including program data in marketing information systems and project data collected through primary research. Includes both analysis of existing databases and the most common and practical problems associated with collecting and analyzing new data. Emphasis is on both qualitative methods and quantitative methods. Computer assignments require students to apply latest software packages. Prerequisites: MATH 14400 or MATH 14500 or PSYC 20700 or TVR 26300 or STCM 28800; MKTG 31200; junior standing. (F-S,Y)

3 Credits

MKTG 44400 Services Marketing (NLA)

This course will introduce students to the issues and problems unique to the marketing of services. Topics include relationship marketing, the seven P's of service delivery, complaint management and recovery, service guarantees, measures of customer satisfaction, managing the moment of truth, servicescapes, employee empowerment, blueprinting services, and managing overall service strategy. Prerequisite: MKTG 31200. (IRR)

3 Credits

MKTG 48600 Senior Seminar in Marketing (NLA)

A capstone course for marketing majors, challenging them to identify and apply appropriate marketing concepts gained through earlier coursework. Specifically, the student is required to analyze actual and hypothetical marketing situations and react to or solve marketing problems by demonstrating an understanding of the marketing concept, mix, and strategy, as well as a strategic perspective. Prerequisites: MKTG 31200; MKTG 32300; MKTG 41100; senior standing. (S,Y)

3 Credits

MKTG 49100 Digital Marketing (NLA)

This course provides a thorough overview of marketing concepts and strategies for the digital age. Students will gain an understanding of the paradigm changes in marketing and the impact of digital communication technologies. By combining theory and practice, students will learn strategies and develop skills in using new media tools to achieve marketing objectives. Prerequisites: MKTG 31200; junior standing. (F,S,Y)

3 Credits

MKTG 49700 ST: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: MKTG 31200; junior standing. (IRR)

1-3 Credits

MKTG 49708 Selected Topics: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: MKTG 31200; junior standing. (IRR)

1-3 Credits

MKTG 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

MKTG 49900 Independent Study: Marketing (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y)

1-3 Credits

Mathematics (MATH)

MATH 10000 Mathematics Fundamentals (LA)

Basic concepts underlying algebra, functions, exponents, areas, fractions, and percents. Reasoning skills required for these concepts. Word problems. Meets three hours. See also MATH 18000; credit cannot be earned for both MATH 10000 and MATH 18000. Prerequisites: Math placement in group 4, math placement assessment score of 0-45. (F,S,Y)

Attributes: UND

1 Credit

MATH 10400 Finite Mathematics with Calculus (LA)

Introduction to differential calculus, mathematics of finance, and linear programming. Additional topics at the instructor's discretion. Intended for students in the School of Business. Students may not receive credit for both MATH 10400 and MATH 10500, 10600, or 10700. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 or MATH 18000 with a grade of C- or better. (F,S,Y)

Attributes: NS

4 Credits

MATH 10500 Mathematics for Decision Making (LA)

Introduction to probability theory, mathematics of finance and linear programming. Additional topics at the instructor's discretion. Students may not receive credit for both MATH 10500 and MATH 10600. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 or MATH 18000 with a grade of C- or better. (F,S,Y)

Attributes: QL

3 Credits

MATH 10800 Applied Calculus (LA)

Introduction to calculus, with an emphasis placed on problems in the business, economics, social sciences and life sciences. Topics include polynomial, exponential, and logarithmic functions and their derivatives; curve sketching, optimization, and rates of change; the definite integral and area. Further topics may be chosen from applications of differential equations and trigonometric functions. Not open to students who have taken MATH 11100. Completion of this course with a grade of C- or better will move students in group 3 to group 2. Students with group 1 placement who plan to take more than one semester of calculus should instead take MATH 11100. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 with a grade of C- or better. (F,S,Y)

Attributes: QL

4 Credits

MATH 11100 Calculus I (LA)

Calculus of functions of one variable. Topics include limits, continuity, derivatives, applications of derivatives (problems of motion, graphing, and optimization), antiderivatives, and an introduction to the definite integral. Functions covered include polynomial, rational, exponential, logarithmic, trigonometric, and piecewise-defined functions. Prerequisites: Math placement in group 1 or higher, math placement assessment score of 76 or greater, or completion of MATH 11000 with a grade of C- or better. (F,S,Y)

Attributes: 2B, NS

4 Credits

MATH 11200 Calculus II (LA)

Continuation of calculus of functions of one variable. Topics include differential equations, including slope fields, numerical solutions, and separation of variables; evaluation of integrals and antiderivatives; applications of integration; improper integrals; series, with an emphasis placed on power series. Prerequisites: MATH 11100 with a grade of C- or better or MATH 10800 with a grade of B or better. (F,S,Y)

Attributes: ESTS, NS

4 Credits

MATH 14400 Statistics for Business, Economics and Management (LA)

A first course in statistics covering descriptive statistical techniques; introduction to probability; statistical inference including problems of estimation and hypothesis testing; correlation and regression analysis; and multiple regression. Data sets and exercises will be chosen from the fields of business, economics, and management. Technology used in this course may include graphing calculators and statistical software. Prerequisite: Math placement in group 2 or higher, math placement assessment score of 54 or greater, or completion of MATH 10400, MATH 10800 or MATH 11000 with a grade of C- or better. Not open to students who have completed MATH 14500 or MATH 21600. (F,S,Y)

Attributes: 2B, ESTS, NS, QL

4 Credits

MATH 14500 Statistics for the Health, Life, and Social Sciences (LA)

A first course in statistics covering descriptive statistical techniques; introduction to probability; statistical inference including problems of estimation and hypothesis testing; one-way ANOVA; and design of experiments. Most of the data sets and exercises will be chosen from the fields of biology, health, and life sciences, as well as from everyday life. Technology used in this course may include graphing calculators and statistical software. Prerequisite: Math placement group 2 or higher, math placement assessment score of 54 or greater, or completion of MATH 10400, MATH 10800 or MATH 11000 with a grade of C- or better. Not open to students who have completed MATH 14400 or MATH 21600. (F,S,Y)

Attributes: 2B, ESTS, NS, QL

4 Credits

MATH 15200 Selected Topics: What Is Mathematics? (LA)

Cultural approach to selected topics in mathematics. See instructor for current list of topics. Students may not receive credit for both MATH 15200 and MATH 25200. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 or MATH 18000 with a grade of C- or better. (F,S,Y)

Attributes: 2B, NS

3 Credits

MATH 15300 Mathematics as a Cultural Institution (LA)

Students reflect on and find their own answer to the questions: "What is Mathematics and where does it come from?" Investigates the nature of the institution of mathematics by experiencing, reading about, and discussing several aspects of mathematical thinking and learning. Uses ideas from philosophy, psychology, history, sociology, and biology to explore and gain insight into math as it has developed historically, as it is taught in schools, and as it is used in society. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 with a grade of C- or better. (S,Y)

Attributes: NS, SO, SS, TIII, TWOS

3 Credits

MATH 15500 Basic Statistical Reasoning (LA)

Basic concepts involved in statistical reasoning, such as sampling and experimental design, description of data, normal approximation to data, correlation and regression, and probability. Emphasis is placed on understanding the use of statistics rather than on how to do statistical analysis. Not open to students who have taken MATH 14400, MATH 14500, MATH 21600 or PSYC 20700. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 or MATH 18000 with a grade of C- or better. (F,S,Y)

Attributes: 2B, ESTS, NS, QL

3 Credits

MATH 15900 Introduction to R Computing Software (LA)

An introduction to R, a free, open-access scientific computing platform that is especially good at statistics, including simulation, large data sets, and graphing. Focuses on the use of R by covering a variety of applied problems. Prerequisite: Math placement in group 2 or higher, math placement assessment score of 54 or greater. (F,Y)

1 Credit

MATH 16100 Math and Society (LA)

Explores connections between mathematics and the liberal arts. Covers three to six topics chosen for their mathematical and societal component, with comparable emphasis given to each component. Only a high school math background is assumed, but students must have scored in group 2 or 1 on the math placement exam. Actual course content varies with instructor, but examples of topics are exponential growth and world population; symmetry and group theory in art and architecture; fair allocation and equity; binomial models and the death penalty; quantitative communication and the media. Prerequisites: Math placement in group 2 or higher, math placement assessment score of 54 or greater, or completion of MATH 11000 with a grade of C- or better. (F,S,Y)

Attributes: 2B, NS, SO, TIII, TWOS

3 Credits

MATH 16300 Numbers in Education (LA)

Introduces different quantitative methods that are used by different stakeholders (teachers, administrators, and policy makers) to make decisions related to education. Topics include the achievement gap in education and data-driven instruction. (Y)

Attributes: ESE, NS, QL

3 Credits

MATH 16400 Math, Fairness, and Democracy (LA)

Addresses mathematical topics that have close connections to politics: apportionment, voting and weighted voting, fair division, and districting. (Y)

Attributes: QL, SO, TPJ, TWOS

3 Credits

MATH 18500 Math Experimentation (LA)

Students explore mathematical phenomena experimentally, detect patterns, and provide mathematical explanations for these patterns. Students gain insight into mathematical thinking and the process of conjecture by designing and implementing mathematical algorithms with a Computer Algebra System. Discrete dynamical systems including Markov chains will be investigated. Other topics vary but may include the distribution of prime numbers, modular arithmetic, the Collatz Conjecture. Prerequisites: Math placement in group 1 or higher, math placement assessment score of 76 or greater, or completion of MATH 11000 with a grade of C- or better. (F,S,Y)

Attributes: NS

3 Credits

MATH 18700 Introduction to Applied Linear Algebra (LA)

Introduction to the objects and tools of applied linear algebra. Emphasis placed on computation, both by hand and with computer algorithms, and applications to modern and growing fields such as data science, machine learning, statistics, and computer science. Prerequisites: Math placement group 3 or higher, math placement assessment score of 46 or greater. (F,Y)

Attributes: QL

3 Credits

MATH 19000 Selected Topics in Mathematics (LA)

Topics to be determined by instructor and department. May be repeated for credit for selected topics on different subjects. Prerequisites:

Appropriate to topics. (IRR)

Attributes: 2B, NS

1-4 Credits

MATH 19100 World of Mathematics (LA)

Introduction to advanced mathematics through faculty presentations and problem-solving activities. Prerequisites: MATH 11200 or MATH 18500 (either may be taken concurrently). Pass/Fail only. (S,Y)
1 Credit

MATH 19200 Independent Study: Math (LA)

Individual study of selected subjects extending the student's mathematical knowledge. Prerequisites: Permission of instructor. (IRR)
Attributes: UND
1-3 Credits

MATH 21100 Calculus III (LA)

Introduction to vectors and the geometry of vector spaces. Calculus of functions of several variables: partial derivatives, gradients, optimization, double integrals. Prerequisites: MATH 11200 with a grade of C- or better. (F-S,Y)
Attributes: 2B, NS
4 Credits

MATH 21200 Calculus IV (LA)

Multiple integrals and change of variables. Line and surface integrals. Classical theorems of vector calculus. Prerequisites: MATH 21100 with a grade of C- or better. (S,Y)
Attributes: NS
3 Credits

MATH 21400 Differential Equations (LA)

Topics will include modeling with differential equations, existence and uniqueness of solutions, separation of variables; first order linear equations; second order equations with constant coefficients; homogeneous equations, phase plane analysis, eigenvalues; and systems of differential equations. Additional topics may include: series solutions of differential equations, non-linearity and equilibrium analysis, and transforms among others. Prerequisites: MATH 11200 with a grade of C- or better. (S,Y)
Attributes: NS
3 Credits

MATH 21600 Statistical Analysis (LA)

An introduction to statistical analysis for students with a calculus background, developing an understanding of descriptive and inferential statistics through the use of a variety of traditional and simulation methods. Topics will include hypothesis testing and parameter estimation. Additional topics to be selected from experimental design and data collection, exploratory data analysis, non-parametric methods, monte carlo and resampling methods, analysis of variance, correlation and regression. Statistical literacy and data analysis concepts will be emphasized. Prerequisites: MATH 10800 with a grade of B or better, or MATH 11100 with a grade of C- or better. (F,Y)
Attributes: NS, QL
3 Credits

MATH 22000 Mathematics for Childhood Education (LA)

This is a math content course for future elementary school teachers. Students develop a deep understanding of mathematical content, strengthen their mathematical reasoning and problem-solving skills, and learn how to help elementary students make mathematical sense of their world. (S,Y)
Attributes: ESE, NS, QL
3 Credits

MATH 22100 Spatial Data Analysis with ArcGIS (LA)

Provides an introduction to spatial data management, analysis, modelling and visualization, and their applications, with a focus on problem solving with a geographic information system. The context for applications in this course will mainly be environmental. The industry-standard ArcGIS software will be used. Prerequisites: MATH 14400, MATH 14500, MATH 21600, MATH 24600, or PSYC 20700. (S,Y)
Attributes: ENRE, ESTS
3 Credits

MATH 23100 Linear Algebra (LA)

Topics include systems of linear equations and solutions; matrix operations; linear independence, span, basis, dimension, rank; linear operators and matrix representations; vector spaces, subspaces, change of coordinates; eigenvalues, eigenvectors; and applications. Prerequisites: MATH 11100 or MATH 18700 with a grade of C- or better. (S,Y)
Attributes: NS
3 Credits

MATH 24000 Basic Statistics with R (LA)

An introduction to R, a free scientific computing platform, as applied to basic statistics. Students learn how to manage data, create appropriate graphs, perform basic statistical tests (t-tests, chi-square, ANOVA, regression, etc), and compute confidence intervals. Additional topics include tests of assumptions (e.g., normality) and post hoc tests. Prerequisites: MATH 14400, MATH 14500, MATH 21600, MATH 24600, or PSYC 20700. (S,Y)
1 Credit

MATH 24600 Intermediate Statistics (LA)

Covers statistical methods not typically covered in introductory statistics courses. Topics include multivariate analysis and nonparametric techniques, bootstrapping and jackknife methods, and two-way ANOVA. Emphasis will be placed on working with data sets from a broad variety of disciplines with an exploratory data analysis approach. The statistical software environment R will be used in analyzing data. Prerequisite: MATH 14400, MATH 14500, MATH 21600, or PSYC 20700 with a grade of C- or better. (S,Y)
Attributes: NS, QL
3 Credits

MATH 25000 Problem-Solving Seminar (LA)

Techniques used in the solution of diverse mathematical problems are developed and discussed. Problems will often be drawn from national competitions, such as the Putnam exam and the COMAP Modeling Competition, or from problem sections of mathematics journals. The course will be offered for either 0.5 or one credit ; it may be repeated for credit up to a total of four credits. Prerequisites: MATH 11100 with a grade of C- or better. Pass/fail only. (F,S)
Attributes: NS
0.5-1 Credits

MATH 27000 Mathematical Reasoning with Discrete Mathematics (LA)

Focus is on the underpinnings of and strategies for mathematical arguments that constitute mathematical proof. These underpinnings include logical connectives, (universal and existential) quantification, and rules of deductive inference. Strategies include direct proof, indirect proof, "proof" by counterexample, proof by cases, and proof by induction. Students learn to employ these strategies and concepts to create basic mathematical proofs. Content topics include, but are not limited to, fundamentals concepts of sets and functions as well as multiple topics from discrete mathematics that include elementary counting principles. Prerequisites: MATH 23100 or MATH 18500 with a grade of C- or better. MATH 18500 may be taken concurrently. (S,Y)

Attributes: NS

3 Credits

MATH 29000 Selected Topics in Mathematics (LA)

Topics to be determined by instructor and department. This course may be repeated for credit when topics vary. Prerequisites: Permission of instructor. (IRR)

Attributes: NS

1-4 Credits

MATH 29200 Independent Study: Math (LA)

Individual study of selected subjects extending the student's mathematical knowledge. Prerequisites: Permission of instructor. (IRR)

Attributes: UND

1-3 Credits

MATH 30300 Abstract Algebra (LA)

Introduction to algebraic structures. Study includes concepts from group theory, ring theory, or field theory. Topics may include Abelian groups, cyclic groups, permutation groups, factor groups, ideals, quotient rings, integral domains, isomorphisms, and homomorphisms. Additional topics may be included. Prerequisites: One three or four credit level 2 MATH course with a grade of C- or better. (F,Y)

Attributes: NS

4 Credits

MATH 30500 Introduction to Analysis (LA)

Topology of the real line. Continuity, differentiability, and integrability of functions of a real variable. Prerequisites: One three to four credit level 2 MATH course with a grade of C- or better. (S,Y)

Attributes: NS

4 Credits

MATH 31100 Complex Analysis (LA)

Students explore the theory of functions defined in the complex plane, highlighting the interplay between geometric visualization and analysis. Topics may include the geometry of analytic mappings, power series, Cauchy's Theorem, and the Residue Theorem. Connections to other areas of mathematics and to other scientific fields will be explored through applications. Prerequisites: MATH 21100 or MATH 23100. (E,S)

3 Credits

MATH 31600 Probability (LA)

Topics include probability systems; random variables, their distributions, and expected values. Additional topics may include queueing theory, the theory of Poisson processes and the theory of Markov processes. Prerequisites: MATH 21100 with a grade of C- or better. (S,Y)

Attributes: NS

3 Credits

MATH 32100 Graph Theory and Combinatorics (LA)

Topics in graph theory include basic properties of graphs, Eulerian trails, Hamilton chains, trees, and may include the chromatic polynomial, planar graphs, and the independence number. Topics in combinatorics include the pigeonhole principle, permutations and combinations, the binomial theorem, and may include generating functions, Catalan numbers, and Stirling numbers. Prerequisites: COMP 22000 or one MATH course at the 200-level. (E,F)

3 Credits

MATH 33100 Numerical Analysis (LA)

Theory and applications of numerical techniques. Topics will include error analysis, solution of non-linear equations and systems of equations, interpolation, approximation, numerical integration and differentiation and numerical solution of initial-value problems. Prerequisites:

MATH 21100 or MATH 23100. (O,S)

3 Credits

MATH 34800 Modern Data Science with R (LA)

Modern data science brings together programming, statistics, and mathematical skills to understand the world. The course focuses on data visualization and modeling, while also covering topics related to data management and programming in the R environment. Students use theory together with programming and statistical methods to develop the capacity to create new and unique models, visualizations, and/or solutions in data-based multidisciplinary investigations into problems from a variety of fields. Prerequisites: MATH 11200 (may be taken concurrently) and MATH 24600. (F,Y)

3 Credits

MATH 34900 Interactive Graphics (LA)

Introduces students to the creation of interactive and animated graphics for the visualization of data. Prerequisites: MATH 34800, or COMP 17100 and MATH 24600. (S,Y)

1 Credit

MATH 36200 Modern Geometry (LA)

Rigorous development of Euclidean and hyperbolic geometry from both a metric and synthetic point of view. Some topics in transformational geometry are also covered. Prerequisites: One three to four credit level 2 MATH course with a grade of C- or better. (F,O)

Attributes: NS

4 Credits

MATH 39000 Selected Topics in Mathematics (LA)

Topics to be determined by instructors and department. Fulfills a required mathematics elective. This course may be repeated for credit when topics vary. Prerequisites: Permission of instructor. (IRR)

Attributes: NS

1-4 Credits

MATH 39100-39200 Independent Study: Mathematics (LA)

Individual study of selected subjects extending the student's mathematical knowledge. This course may be repeated for credit for different studies. Does not fulfill a required mathematics elective. Prerequisites: MATH 27000 with a grade of C- or better. (IRR)

Attributes: UND

1-3 Credits

MATH 39700 Junior Seminar (LA)

Students will work with faculty on focused mathematical investigations. Research problems will be presented by faculty teaching MATH 39810 Research Experience in Mathematics. Students will attend a variety of talks related to mathematics. Weekly problem solving related to research topics. Prerequisites: One level-2 MATH course. Pass/fail only. (F, Y)
Attributes: NS, UND
1 Credit

MATH 39810 Research Experience in Mathematics (LA)

Students actively participate in mathematical investigation and exposition, working collaboratively on research questions. Review of relevant literature and research methods will be incorporated. Students are required to present their findings both in writing (consistent with the standards of the discipline) and in public presentations. Topics vary by instructor. Prerequisites: MATH 39700; permission of instructor. (S,Y)
Attributes: NS
3 Credits

MATH 48000 Connections in Advanced Mathematics (LA)

Study of connections and relationships among various disciplines within mathematics. Specific content varies. Topics may include, but are not limited to, the following: historical development of mathematics and various philosophies of mathematics, cultural similarities and differences in viewpoints and developments in mathematics, cross-discipline approaches that combine subdisciplines such as probability techniques in number theory and random graph theory, field theory and geometric constructions, and algebraic topology. This course may be repeated for credit when topics vary. Prerequisites: One 300-level course in mathematics with a grade of C- or better. (F,Y)
Attributes: NS
3 Credits

MATH 49000 Selected Topics in Advanced Mathematics (LA)

Topics to be selected by instructor and students. Fulfills a required mathematics elective. This course may be repeated for credit when topics vary. Prerequisites: Permission of instructor. (IRR)
Attributes: NS
3 Credits

MATH 49200-49201 Independent Study: Mathematics (LA)

Individual study of selected subjects extending the student's mathematical knowledge. Fulfills a required mathematics elective. This course may be repeated for credit. Prerequisites: Permission of instructor. (IRR)
Attributes: NS, UND
1-3 Credits

MATH 49300 Honors Course in Math (LA)

Preparation of honors thesis in partial fulfillment of requirement for graduation with honors in mathematics. Prerequisites: Honors standing in mathematics. (IRR)
Attributes: NS
1-2 Credits

MATH 49400 Honors Course: Math (LA)

Preparation of honors thesis in partial fulfillment of requirement for graduation with honors in mathematics. Prerequisites: Honors standing in mathematics. (IRR)
Attributes: NS
1-2 Credits

MATH 49800 Capstone in Mathematics I (LA)

Students develop a capstone project proposal that will be completed in MATH 49900. Students reflect on how their prior math courses have prepared them for their project. Prerequisites: Junior standing; six credits in mathematics at level 3 or 4 with a grade of C- or better. (S,Y)
Attributes: CP, WI
1 Credit

MATH 49900 Capstone in Mathematics II (LA)

Students reflect upon the field of mathematics via an integrative project developed in concert with a faculty mentor. Students analyze mathematical ideas related to their projects and integrate this knowledge with ideas learned in the mathematics curriculum. Students complete a comprehensive thesis (begun in MATH 49800) and give a public presentation. Prerequisites: MATH 49800 with a grade of C- or better. (F,Y)
Attributes: CP, WI
2 Credits

Media Arts, Sciences & Studies (MASS)

MASS 10100 History of Narrative Film, Television, and Emerging Media Part I (LA)

An examination of the evolution of narrative film and television from the perspective of the screenwriter. The course will explore storytelling and the development of screenwriting from the dawn of cinema in the 1880s to the New Hollywood era of the 1960s. The focus of the course will be narrative works of fiction and not experimental or documentary media. Discussions will center on script writing elements such as structure, plot, character, theme, and dialogue. Weekly class screenings and readings will introduce students to important cinematic works and media milestones. Students will be expected to read and view additional content outside of class. (F)
4 Credits

MASS 10200 History of Narrative Film, Television, and Emerging Media Part II (LA)

An examination of the evolution of narrative film, television, and emerging media from the perspective of the screenwriter. The course will explore the continued development of storytelling in film, television, and emerging media from the Golden Age of Television in the 1950s through the end of the millennium. The focus of the course will be narrative works of fiction and not experimental or documentary media and discussions will center on storytelling elements within films, shows, and emerging media, such as structure, plot, character, theme, and dialogue. Weekly class screenings and readings will introduce students to important cinematic works, television milestones, and emerging media developments. Students will be expected to read and view additional content outside of class. (S)
4 Credits

MASS 10400 Story: From Cave Paintings to Emerging Media (LA)

Students will explore story in myriad forms, from cave paintings to film, television, video games, and emerging media. Part lecture, part writing workshop, the course is designed to provide students with a foundation in the principles of dramatic structure. (F,S)
4 Credits

MASS 13400 Writing for Screen Media (LA)

An introduction to the theory and practice of writing for film, television, and emerging media. Instruction in the fundamentals of visual writing, character, plot, dialogue, and theme, as well as the integration of these elements into scenes and short scripts. (F,S)
4 Credits

MASS 20100 Introduction to Animation (NLA)

Intensive exploration of the art and craft of animated cinema. Through directed productions, screenings, readings, and workshops, students develop experience in a range of processes, compositing techniques, as well as digital and traditional methods. Prerequisites: CNPH 11100 or TVR 11500. (F-S)
4 Credits

MASS 20200 Introduction to Stop Motion Animation (NLA)

Are you a fan of Wallace and Grommet? Ever wonder how Nightmare Before Christmas was made? This course is a hands-on exploration of how to design, construct, and animate 3D models. Using stop-motion techniques, you will construct animation characters based on your design and use digital tools to capture their movements. We will also look into the history and traditions of this type of animation and discuss aesthetic trends and theories. Prerequisites: CNPH 11100 or TVR 11500. (IRR)
4 Credits

MASS 23300 Structuring the Feature Film (LA)

Theory and practice of screenwriting, with analysis of both classic and contemporary screenplays. Students focus heavily on the pre-writing process, drafting a treatment and outline for an original feature-length screenplay. Students participate in written and oral critiques of each other's work and complete, at minimum, the first act of a feature screenplay. Prerequisites: MASS 13400. (F,S)
4 Credits

MASS 23600 Writing for Series TV (LA)

Theory and practice of dramatic writing for series television with analysis of half-hour and hour-long television scripts. The course will feature a writing workshop where students focus on pitching stories, structuring multiple story lines and capturing character voices for their own original episode of an existing series. Prerequisites: MASS 13400. (F,S)
4 Credits

MASS 33300 Writing the Feature Film (LA)

Advanced theory and practice of screenwriting, with continued analysis of both classic and contemporary screenplays. Utilizing the pre-writing skills learned in MASS 23300, students will complete the first draft of an original feature-length screenplay and participate in written and oral critiques of each other's work. Prerequisites: MASS 23300. (F,S)
4 Credits

MASS 33400 Writing for Series TV (LA)

Theory and practice of dramatic writing for series television with analysis of half-hour and hour-long television scripts. The course will feature a writing workshop where students focus on pitching stories, structuring multiple story lines and capturing character voices for their own original episode of an existing series. Prerequisites: MASS 23300; Junior standing. (F; F-S in Los Angeles)
4 Credits

MASS 33500 Writing for Video Games and Emerging Media (LA)

An examination of the process of creating non-linear narratives. Students will develop an idea for an original video game, a video game based on an existing literary property, or an idea for a multi-platform narrative - and write parts of that narrative. Students will also study existing non-linear narratives to explore the basic principles of writing and they will examine the needs and expectations of the audience/viewer/player for immersive/interactive media and that of established media. Prerequisites: MASS 23300 or MASS 23600. (Y)
4 Credits

MASS 33600 Writing the Series Pilot (LA)

Theory and practice of dramatic writing for series television with analysis of original pilot scripts and series bibles. In a writing workshop students focus on creating a story world and a core cast of characters for their own original series. They will structure a step-outline for the first episode and write the pilot script. Prerequisites: MASS 23600. (F,S)
4 Credits

MASS 33701 Writing Speculative Fiction for the Screen (LA)

An examination of the unique traits of Speculative Fiction and its subgenres: Science Fiction, Fantasy, and Horror. Students will explore the special processes that are involved in writing those genres for the screen while developing an original script representing either Horror, Science Fiction, or Fantasy. Prerequisites: MASS 23300 or MASS 23600. (IRR)
4 Credits

MASS 33702 Writing the Adaptation (LA)

An examination of the process of adapting material from literary sources to both short and feature-length screenplays. The class will study one novel and its adaptations, as well as several other properties that have been adapted to screenplay format. Working individually and in teams, students will develop multiple screenplay adaptations based on pre-existing material. Prerequisites: MASS 23300. (IRR)
4 Credits

MASS 33703 Selected Topics in Writing for Screen Media (LA)

Exploration and analysis of a specific genre or type of writing for screen media, designed to enhance and enrich the established writing for the screen curriculum. Topics will vary to reflect current and future trends in writing for screen media. May be repeated once for credit under a different topic. Prerequisites: MASS 23300; junior standing. (Y)
4 Credits

MASS 43300 Thesis Screenwriting (LA)

Capstone workshop in the theory and practice of writing feature-length narrative screenplays. Students complete an original feature-length screenplay, with an emphasis on instructor and peer critique of works-in-progress. Prerequisites: MASS 33300. (Y)
4 Credits

MASS 43400 Thesis Writing for Screen Media (LA)

Capstone workshop in the theory and practice of writing for the screen. Students work individually or in teams to create original works for film, television, or emerging media, with an emphasis on instructor and peer critique of works-in-progress. Prerequisites: One course from the following: MASS 33300, MASS 33500, MASS 33600. (Y)
4 Credits

MASS 43500 Thesis Writing for Emerging Media (LA)

Capstone workshop in the theory and practice of creating screen narratives. Students work individually or in teams to create stories for video games, virtual worlds, or transmedia properties. Students critique each other's works-in-progress before turning in their own completed portfolio. Prerequisites: MASS 33500. (Y)
4 Credits

MASS 43600 Thesis TV Writing (LA)

Capstone writing workshop in which students complete two original projects - one individual and one in a group. For the individual project, each student will conceive, outline and draft the pilot episode of an original comedy or drama. For the group efforts, students will collaborate to develop a second original pilot as if they would in a professional writer's room. Prerequisites: MASS 33600. (Y)
4 Credits

MASS 43700 Thesis Writing for Film and Television (LA)

Capstone workshop in the theory and practice of writing for film and television. Students work individually or in teams to create either a feature-length narrative screenplay or the pilot episode of a television series, with an emphasis on instructor and peer critique of works-in-progress. Prerequisites: MASS 33300 or MASS 33600. (Y)
4 Credits

MASS 49000 Internship: Writing for Film, Television, and Emerging Media (NLA)

Jointly supervised work experience with a cooperating institution in the field of writing, film, television, or emerging media, intended to motivate the intern toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Total may not exceed including London and Los Angeles internships. (F,S,U,W)
1-8 Credits

MASS 49900 Independent Study: Writing for Film, Television, and Emerging Media (LA)

Intensive study under the supervision of a faculty advisor. Topics of study may include the development of a script, screenplay, or other creative project, or investigation of a particular element of film, television, or emerging media content. Comprehensive research paper and/or creative project is required. (IRR)
1-4 Credits

Music Sound Recording Technology (MSRT)

MSRT 14200 Audio-Recording Systems I (NLA)

Introduction to equipment, operation and techniques necessary to work as a staff engineer in a recording facility. Focuses on fundamentals of concert recording, live sound reinforcement, recording sessions, media duplication and distribution, and office management. Study of basic audio concepts with weekly hands-on training in operation of industry-standard audio software. Prerequisites: Acceptance in the sound recording technology major. (F,Y)
2 Credits

MSRT 14300 Audio-Recording Systems II (NLA)

Basic technical support and repair techniques for audio electronics used in recording and live sound reinforcement, including hazards and safety issues. Emphasis is on basic construction skills (soldering and wiring), analog-digital calibration, and computer and software troubleshooting. Study of intermediate audio concepts with continued hands-on training in operation of industry-standard audio software. Prerequisites: MSRT 14200. (S,Y)
2 Credits

MSRT 24100 Recording Workshop I (NLA)

Application of basic microphone use skills. Emphasis on refined stereo microphone placement techniques. Laboratory and discussion format explores stereo microphone placements for classical two track and multi-track recording sessions. Hands-on study of workflow and technical operation in a large-format recording studio. In-depth training on the SSL Duality console and other relevant studio equipment. Lecture/hands-on laboratory format with frequent group discussions. Prerequisites: MSRT 14300. (F,Y)
2 Credits

MSRT 24200 Recording Workshop II (NLA)

Live sound techniques and the acoustical environments including stage preparation, sound system placement, monitor mixes, sound system speaker placement, electrical wiring, compression and limiting, system equalization and effect processing. Emphasis on remote recording techniques. Hands-on component includes operation of a large-scale PA System, use of Real-Time Analyzers in PA tuning and acoustical analysis, and advanced live mixing techniques. Ear-training curriculum focuses on developing aural skills for the audio engineer. Prerequisites: MSRT 24100. (S,Y)
2 Credits

MSRT 24300 Critical Listening for the Recording Studio (NLA)

Analysis and comparison of specific recording techniques. Weekly meetings include discussion of artists and recording processes. Pass/fail only. Prerequisites: MSRT 14300. (F-S)
0.5 Credit

MSRT 34100 Advanced Recording Workshop I (NLA)

Advanced application of recording equipment and technology. Students re-create previously recorded music using current technology. Students conduct thorough research on the original production and establish communication with artist management, artist, and individuals responsible for the production of the original work of music. Course material focuses on recording session management, advanced tracking techniques, critical listening and analysis, production methods, and psychological aspects of the recording session. Prerequisites: MSRT 24200. (F-Y)
2 Credits

MSRT 34200 Advanced Recording Workshop II (NLA)

Continuation of MSRT 34100 Advanced Recording Workshop I with additional emphasis on tracking and acoustical microphone techniques. Students are limited to use of "legacy" technologies, such as magnetic tape and analog signal processing. Course material focuses on classic analog recording methods, tape machine calibration and alignment, machine synchronization, Dolby noise reduction systems, RIAA equalization curves, track bouncing, and stereo mastering. Prerequisites: MSRT 34100. (F,S,Y)
2 Credits

MSRT 34800 Advanced Microphone Techniques (NLA)

Advanced application of microphone use skills. Emphasis on refined professional techniques of placement both in stereophony and multi-track usage. Students learn techniques from in-class observations and lab experiences, self-experience in outside situations, and from others' experience. Prerequisites: MSRT 24200 or TVR 37100. (F)
3 Credits

MSRT 34900 Advanced Recording Techniques (NLA)

Advanced application of mixing and recording techniques. Students develop proficiencies in the areas of submixing, signal flow, signal processing, patching, mastering, multi-track sessions, mixing board topology, monitoring systems, and mixes and automation. Prerequisites: MSRT 34800. (S,Y)
3 Credits

MSRT 39100 Music Internship Preparation (NLA)

Career preparatory course for SRT students planning for their accredited internship. Students research potential internship sites and prepare for the application process by creating resumes and cover letters, establishing contact with professionals in the industry, and developing valuable skills key to a successful internship. Prerequisite: MSRT 24200. (F-S,Y)
2 Credits

MSRT 49100 Music Recording Internship (NLA)

Students work in an approved practicum environment such as a recording studio, postproduction facility, sound reinforcement company, or multimedia production or development company, applying theories and developing techniques learned previously. Prerequisites: MSRT 39100. (S,F,U)
1-12 Credits

MSRT 49200 Senior Project (NLA)

Students produce and master a portfolio of materials for presentation. Materials for the senior project may be drawn primarily from previously recorded projects but should involve additional work, such as final mastering, including appropriate coding, development of artwork, and registering and securing appropriate rights and copyrights. Prerequisites: MSRT 49100. (S,Y)
Attributes: CP
3 Credits

Music Education (MUED)

MUED 10100 Introduction to Music Education: Career Orientation (NLA)

An orientation for first semester music education majors, including an overview of music education philosophy and contemporary issues in music education. (F,Y)
Attributes: TE
1 Credit

MUED 10200 Music Field Experience I (NLA)

Second of four semesters of observations or participation in music teaching in a variety of settings and student development levels. Prerequisites: MUED 10100. (S-Y)
Attributes: TE
0.5 Credit

MUED 10300 Vocal Techniques (NLA)

Primarily for the instrumental music education major, this MUED course focuses on healthy vocal production and pedagogy in school music settings. Basics of singing and vocal development will be covered, as will the pedagogical uses of the voice in instrumental music education settings and personal connections to vocal music. (F,S)
1 Credit

MUED 12700 Double Reed Methods (NLA)

This course provides performance and pedagogy techniques for oboe and bassoon to prepare students as future music teachers and instrumental ensemble directors. (F,S)
1 Credit

MUED 14000 Drum Set Methods (NLA)

Drum set secondary instrument study for percussion music education students. Exploration of drum set musicianship, technique, coordination, instrument setup/maintenance, repertoire development, and teaching methods. (IRR)
1 Credit

MUED 14100 Percussion Methods (NLA)

Orchestral and rudimentary snare drumming with like-hand and traditional hand holds. Standard rudimentary drum literature, teaching methods, and techniques for all percussive instruments. Maintenance and repair of instruments. (F,S)
1 Credit

MUED 14700 String Methods I (NLA)

This course is designed to provide string music education majors with strategies for teaching and playing string instruments as future music teachers and instrumental ensemble directors. Focus is placed on NYSSMA Levels 1 & 2 (beginning) performance standards for the violin, viola, cello, and double bass. (S)
2 Credits

MUED 20100 Music Field Experience II (NLA)

Third of four semesters of observations of or participation in music teaching in a variety of settings and student developmental levels. Prerequisites: MUED 10200. (F-Y)
Attributes: TE
0.5 Credit

MUED 20200 Current Topics in Music Education: Career Orientation (NLA)

This course is designed to address topics relevant to success in contemporary music education and will include several areas of focus required by NYSED regulations. Current Topics in Music Education serves as the fourth of four classes in the music field-experience sequence. Prerequisites: MUED 20100. (S-Y)
Attributes: TE
0.5 Credit

MUED 20900 String Techniques (NLA)

This course is designed to provide the non-string music education major with strategies for teaching and playing string instruments as future music teachers and instrumental ensemble directors. (F,S)
1 Credit

MUED 21100 Band Techniques (NLA)

This course is designed to help students develop knowledge of woodwind, brass, and percussion techniques as future music teachers and instrumental ensemble directors. (F,S)
2 Credits

MUED 23000 Brass Methods (NLA)

This course provides performance and pedagogy techniques for brass instruments to prepare students as future music teachers and instrumental ensemble directors. (F,S)
2 Credits

MUED 23100 Woodwind Methods (NLA)

This course provides performance and pedagogy techniques for woodwind instruments to prepare students as future music teachers and instrumental ensemble directors. (F,S)
2 Credits

MUED 24600 Classroom Instruments (NLA)

Techniques and materials for teaching children to play classroom instruments, including Orff instrumentarium, soprano recorder, autoharp, and guitar. Prerequisites: Sophomore standing; MUED 10200. (F-S)

Attributes: TE

1 Credit

MUED 24700 String Methods II (NLA)

This course is a continuation of MUED 14700: String Methods I and is designed to provide string music education majors with strategies for teaching and playing string instruments as future music teachers and instrumental ensemble directors. Focus is placed on NYSSMA Levels 3 & 4 (intermediate) performance standards for the violin, viola, cello, and double bass. Prerequisites: MUED 14700. (S)

2 Credits

MUED 26700 Music Education for Children (NLA)

Emphasis is placed on planning, implementing, and evaluating an eclectic curriculum based on conceptual pedagogy. Study of the influences of Dalcroze, Orff, and Kodály. Projects in designing materials for large group, small group, and individualized instruction of pre-kindergarten through grade 6. Survey of adaptations necessary for the special learner in music in mainstreamed and inclusive settings. Prerequisites: Sophomore standing; MUED 10200. (F-S)

Attributes: SL, TE

2 Credits

MUED 28000 Contemporary Ensembles in the Public Schools: Vocal-Choral (NLA)

Philosophical and pedagogical foundations for providing successful diverse musical experiences within the public schools. Special focus will be given to a broad range of musical genres and ensembles, including how to incorporate and support their inclusion into the traditional public school music program. The course will include experiential opportunities related to contemporary ensembles in the public school and will place added emphasis on world music. Prerequisites: MUED 20100. (S,Y)

Attributes: TE

1 Credit

MUED 28100 Contemporary Ensembles in the Public Schools: Instrumental-Band (NLA)

Philosophical and pedagogical foundations for providing successful diverse musical experiences within the public schools. Special focus will be given to a broad range of musical genres and ensembles, including how to incorporate and support their inclusion into the traditional public school music program. The course will include experiential opportunities related to contemporary ensembles in the public school and will place added emphasis on jazz. Prerequisites: MUED 20100. (S,Y)

Attributes: TE

1 Credit

MUED 28200 Contemporary Ensembles in the Public Schools: Instrumental-Orchestra (NLA)

Philosophical and pedagogical foundations for providing successful diverse musical experiences within the public schools. Special focus will be given to a broad range of musical genres and ensembles, including how to incorporate and support their inclusion into the traditional public school music program. The course will include experiential opportunities related to contemporary ensembles in the public school and will place added emphasis on ethnic fiddling. Prerequisites: MUED 20100. (S-Y)

Attributes: TE

1 Credit

MUED 30000 Diversity, Equity and Inclusion in Music Education (NLA)

An examination of diversity, equity and inclusion in music education with special attention paid to public education in K-12 contexts. Topics address age-appropriate classroom music selection, pedagogical approaches, curriculum planning, assessment strategies, and arts integration. Students explore a balance of research and practice with an emphasis on expanding their skills and understandings for inclusive music education practices aimed to serving diverse populations. (F,S)

2 Credits

MUED 30100-30200 Choral Conducting (NLA)

Designed to develop proficiency in manual and aural skills. Prerequisites: Junior standing; MUTH 22100 or MUTH 22101. (F)

Attributes: TE

2 Credits

MUED 30300-30400 Instrumental Conducting (NLA)

Designed to develop proficiency in manual and aural skills. Prerequisites: Junior standing; MUTH 22100 or MUTH 22101. (F)

Attributes: TE

2 Credits

MUED 34700 String Pedagogy (NLA)

This course explores topics relating to the implementation of a successful school orchestra music program, including rehearsal techniques for teaching NYSSMA Levels 1-6 orchestral repertoire, philosophical issues, national and state standards, administrative duties, evaluation, assessment, recruitment techniques, ensemble classroom management, and advocacy/parent relations. The course also serves as a forum for field experience questions and issues. Corequisites: MUED 37100. Prerequisites: MUED 24700. (F)

Attributes: TE

2-3 Credits

MUED 35600 Laboratory Band (NLA)

A survey of elementary and junior high school ensemble materials. Students perform on instruments other than their major one and may, at the discretion of the instructor, be given opportunities to conduct rehearsals. Class meeting: Two hours per week. Prerequisites: Junior standing; MUED 30100 or MUED 30300. (S,B)

Attributes: UND

1 Credit

MUED 35700 Laboratory Orchestra (NLA)

A survey of elementary and junior high school ensemble materials. Students perform on instruments other than their major one and may, at the discretion of the instructor, be given opportunities to conduct rehearsals. Class meeting: Two hours per week. Prerequisites: Junior standing; MUED 30100 or MUED 30300. (S,E)

1 Credit

MUED 36100 Teaching Vocal - General Music (NLA)

Taught in tandem with the junior vocal student teaching experience at Immaculate Conception School. The pedagogical principles, philosophical issues, and the state and national standards that were introduced during the prerequisite courses are continued at a more advanced level and applied with children from preschool through grade 8 in the music classroom. Prerequisites: Junior standing; MUED 24600; MUED 26700. Corequisites: MUED 36900. (F)

Attributes: TE

1 Credit

MUED 36200 Teaching Instrumental Music (NLA)

Emphasis is placed on implementing a successful school instrumental music program, including philosophical issues, national and state standards, administration, evaluation, assessment, recruitment techniques, ensemble classroom management, and advocate/parent relations. Also a forum for field experience questions and issues.

Prerequisites: Junior standing; secondary instruments through the sophomore year. (S)

Attributes: TE

1 Credit

MUED 36400 General Music Methods (NLA)

In this course, students will examine specific approaches to general music teaching in the context of content, lesson, and curriculum development. Classroom management and logistics, teaching language, and strategies for student engagement are a part of this course.

Additionally, students will also learn to play a selection of classroom instruments and the appropriate pedagogies for teaching these instruments to children. Prerequisites: MUED 10100 and MUED 26700.

(F,S)

2 Credits

MUED 36800 Choral Methods (NLA)

The study and practical application of materials and techniques for teaching choral music in elementary, middle, and high school. Special consideration is given to music for the changing-voice choir. Additional topics include observation, discussion, practice, and planning of choral programming, choral classrooms, and choral programs. (F,S)

Attributes: TE

2 Credits

MUED 36900 Student Teaching: Vocal (NLA)

Junior year. Observation of experienced teachers, followed by biweekly teaching experience under supervision in a local lab school (Immaculate Conception School). Prerequisites: Junior standing; MUED 20200; MUED 24600; MUED 26700 with a minimum grade of C+. Corequisites: MUED 36100. (F)

Attributes: TE

2 Credits

MUED 37100 Student Teaching: Instrumental (NLA)

Junior year. Observation of experienced teachers, followed by weekly teaching experience under supervision in area elementary schools. Prerequisites: Junior standing; secondary instruments through sophomore year; MUED 20200. Corequisites: MUED 37500 or MUED 34700. (F)

Attributes: TE

2 Credits

MUED 37500 Wind Instrument Pedagogy (NLA)

Emphasis is placed on implementing a successful school instrumental music program, including philosophical issues, national and state standards, administration, evaluation, assessment, recruitment techniques, ensemble classroom management, and advocate/parent relations. Students learn techniques for teaching woodwind, brass, and percussion instruments in private, small group and large ensemble settings. Also a forum for field experience questions and issues. Corequisites: MUED 37100. Prerequisites: MUED 10100; MUED 23000; MUED 23100. (F)

Attributes: TE

2-3 Credits

MUED 38000 Student Teaching and Rehearsal Lab: Vocal-Choral (NLA)

Junior Year. Observation of experienced teachers, followed by weekly primary-level teaching experience under supervision. The rehearsal lab is a supplement to the junior-level student teaching experience and is an extension of the rehearsal practice covered in the conducting course. The lab provides more opportunities for students to lead peers in large ensemble choral rehearsals, including choral warm-ups and rehearsal of distinctive choral repertoire in a wide range of styles and periods. The course includes the study of excellent repertoire appropriate for middle school and high school. Prerequisite: MUED 30100 and MUED 36900.

Corequisite: MUED 30200. (S,Y)

2 Credits

MUED 38100 Student Teaching and Rehearsal Lab: Instrumental-Band (NLA)

Junior Year. Observation of experienced teachers, followed by weekly primary-level teaching experience under supervision. The rehearsal lab is a supplement to the junior-level student teaching experience and is an extension of the rehearsal practice covered in the conducting course. The lab provides more opportunities for students to lead peers in large ensemble band rehearsals, including band warm-ups and rehearsal of distinctive band repertoire in a wide range of styles and periods. The course includes the study of excellent repertoire appropriate for elementary school, middle school, and high school. Prerequisite: MUED 30300 and MUED 37100. Corequisite: MUED 30400. (S-Y)

2 Credits

MUED 38200 Student Teaching and Rehearsal Lab: Instrumental-Orchestra (NLA)

Junior Year. Observation of experienced teachers, followed by weekly primary-level teaching experience under supervision. The rehearsal lab is a supplement to the junior-level student teaching experience and is an extension of the rehearsal practice covered in the conducting course. The lab provides more opportunities for students to lead peers in large ensemble orchestra rehearsals, including orchestra warm-ups and rehearsal of distinctive orchestra repertoire in a wide range of styles and periods. The course includes the study of excellent repertoire appropriate for elementary school, middle school, and high school. Prerequisite: MUED 30300 and MUED 37100. Corequisite: MUED 30400. (S,Y)

2 Credits

MUED 40100 Advanced Choral Conducting (NLA)

Students engage in the study and practice of conducting choral music for improved clarity of basic conducting technique, working on advanced techniques and more challenging music. In addition, the course includes score study that leads to more artistic conducting and the study of rehearsal techniques that lead to expressive singing and musical understanding. Students will work through repertoire from a variety of periods and styles with varied conducting challenges. Prerequisites: MUED 30200 or MUED 30400. (B,F)

2 Credits

MUED 40200 Advanced Instrumental Conducting (NLA)

Studies and practices aimed toward improved clarity of basic stick technique through the use of unequal motions (rhythmic and melodic). Practical exploration of rehearsal techniques, with an emphasis placed on clarity and efficiency in solving problems of balance, ensemble, intonation, and phrasing. Prerequisites: MUED 30400. (F-B,E,S-B)

2 Credits

MUED 41000 Multicultural Perspectives in Music Education (LA)

An investigation of world musics in the context of cultural values and identities, with a focus on how to teach them to students in the public school setting. Prerequisites: MUED 36100, MUED 37500, or MUED 34700. (S-B, E)

2 Credits

MUED 44000 Materials and Rehearsal Techniques for the Public School (NLA)

The study and evaluation of materials appropriate for teaching elementary, junior high, and senior high school band. Included is the examination of method books, instructional materials, and music for wind band. Prerequisites: Junior standing; MUED 30300. (S)

2 Credits

MUED 44900 Marching Band Techniques (NLA)

A study of techniques employed by high school and college marching bands, including arranging, fundamentals, and charting procedures. Each student is required to chart an entire field band show. Includes extensive use of video. Prerequisites: Junior standing; MUED 37500 or MUED 35600, or permission of instructor. (S-B)

2 Credits

MUED 46800 Senior Block Student Teaching: Vocal (NLA)

Senior year. A diversified half-semester, full-time teaching experience in a carefully selected public school; emphasis on the junior and senior high school levels. Prerequisites: Senior standing; MUED 38000 within a minimum grade of C+ (see "prerequisites/eligibility" for the music education senior student teaching experience, in the "Music Education Student Teacher Handbook"). (F-S)

Attributes: TE

6 Credits

MUED 46900 Senior Block Student Teaching: Instrumental (NLA)

Senior year. A diversified half-semester, full-time teaching experience in a carefully selected public school; emphasis on the secondary school levels. Prerequisites: Senior standing; MUED 38100 or MUED 38200 with a minimum grade of C+ (see "prerequisites/eligibility" for the music education senior student teaching experience, in the "Music Education Student Teacher Handbook"). (F-S)

Attributes: TE

6 Credits

MUED 46912 Senior Semester Student Teaching (NLA)

Explore a full semester of full-time music teaching in a school. Working closely with the MUED department, placements are determined based on specific needs/preferences. Senior student teachers gain experience as a school music teacher under supervision and mentorship of an experienced cooperating teacher and college level supervisor. Emphasis will be on middle and high school music education. This is a capstone experience including significant student reflection and synthesis of prior coursework. (F,S)

Attributes: CP

12 Credits

MUED 47000 Senior Music Education Capstone and Portfolio (NLA)

An independent project in which the music education student reflects on the Junior Student Teaching experience and synthesizes the experience with all the other Integrative Core, Liberal Arts, and School of Music curricula. Prerequisite: Senior standing. Co-requisite: MUED 46800 or 46900. (F,S)

Attributes: CP

2 Credits

Music Ensembles (MUEN)

MUEN 10300 West African Drumming and Dance Ensemble (NLA)

This course explores the traditions of West African music through active performance of drumming, singing, and dancing. Students investigate specific musical styles and traditions directly on authentic African musical instruments, and also analyze social functions and dance movements in ritual, ceremonial, religious, and recreational contexts. Students are expected to participate in the final group performance at the end of the semester. Open to all students at Ithaca College. (Y)

0.5 Credit

MUEN 10500 Wind Ensemble (NLA)

A select wind and percussion ensemble with an active program of concerts scheduled throughout the school year. Open to any student who can qualify through audition. (F,S)

1 Credit

MUEN 10600 Concert Band (NLA)

A wind and percussion ensemble open to any student who can qualify through audition. Several concerts are scheduled each semester. (F,S)

1 Credit

MUEN 10700 Wind Symphony (NLA)

A wind and percussion ensemble open to any student who can qualify through audition. Several concerts are scheduled each semester. (F,S)

1 Credit

MUEN 10800 Choir (NLA)

A select choral ensemble with an active performance schedule. Open to any student who can qualify through audition. A commitment for both fall and spring semesters is recommended. (F,S)

1 Credit

MUEN 10900 Chorus (NLA)

A large choral ensemble open to any student who can qualify through audition. Several concerts are scheduled each semester. (F,S)

1 Credit

MUEN 11000 Treble Chorale (NLA)

A choral ensemble open to all students with treble voices who can qualify through audition. Several concerts are scheduled each semester. A commitment for both fall and spring semesters is required. (F,S)

1 Credit

MUEN 11100 Symphony Orchestra (NLA)

The orchestra is open to any student who can qualify through audition. An active program of concerts is scheduled each semester. (F,S)

1 Credit

MUEN 11200 String Orchestra (NLA)

A select string ensemble open to any student who can qualify through audition. Several concerts are scheduled each semester. (IRR)

0.5 Credit

MUEN 11300 Madrigal Singers (NLA)

A select vocal chamber ensemble with an active performance schedule. Open to any student who can qualify through audition. (F,S)

0.5 Credit

MUEN 11400 Contemporary Chamber Ensemble (NLA)

The rehearsal and performance of chamber music written in the 20th and 21st centuries, with emphasis placed on recently composed works. (F,S)

0.5 Credit

MUEN 11500 Guitar Ensemble (NLA)

Performance situations for small guitar ensembles of varying combinations. Open to any student who can qualify through audition. (F,S)
1 Credit

MUEN 11700-11800 The Pianist as Collaborator (NLA)

Survey of the diverse skills and roles of pianists in their work with other musicians. Develops initial skills needed in vocal and instrumental accompanying, score reduction, sight-reading, transposition, and work with conductors. Required of all keyboard majors. (F)
1 Credit

MUEN 11900 Jazz Ensemble (NLA)

A select jazz ensemble open to any student who can qualify through audition. Several concerts are scheduled each year. (F,S)
1 Credit

MUEN 11901 Jazz Repertory Ensemble (NLA)

Experience in jazz ensemble playing. Open to any student who can qualify through audition. Several concerts are scheduled each year. Focus on foundational big band repertoire. (F,S)
0.5 Credit

MUEN 11902 Jazz Lab Band (NLA)

Experience in jazz ensemble playing. Open to any student who can qualify through audition. Several concerts are scheduled each year. Designed to introduce the basics of jazz to students with little or no previous jazz experience. (F,S)
0.5 Credit

MUEN 12100 Ithaca College Chamber Orchestra (NLA)

The Ithaca College Chamber Orchestra is a smaller ensemble, flexible in size and instrumentation that performs repertory from a wide range of periods and styles. Participation is open to any student who can qualify through audition. (IRR)
0.5-1 Credits

MUEN 12200 Tuba/Euphonium Ensemble (NLA)

An ensemble for euphonium, bass tuba, and contrabass tuba. Readings and performances of literature written exclusively for 4-parts or more, including original compositions, transcriptions, and arrangements of music for tuba and euphonium. Literature will cover a wide variety of musical style periods, genres, and composers. (F,S)
0.5 Credit

MUEN 12300 Brass Choir (NLA)

Study, rehearsal, and performance of standard brass choir literature and orchestral works. Open to any student who can qualify through audition. (IRR)
0.5 Credit

MUEN 12400 Trombone Ensemble (NLA)

An ensemble for alto, tenor, and bass trombones. Readings and performances of literature written exclusively for four parts or more, both original compositions and transcriptions/arrangements, covering a wide variety of musical style periods and genre. (F,S)
0.5 Credit

MUEN 12500 Jazz Vocal Ensemble (NLA)

A select jazz chamber ensemble for singers and instrumentalists. Open to any student who can qualify through audition. An active program of concerts is scheduled each semester. (F,S)
1 Credit

MUEN 12501 Jazz Vocal Repertory Ensemble (NLA)

Experience in jazz vocal ensemble singing for any student who can qualify through audition, regardless of major within or outside of the School of Music. At least one concert will be scheduled each semester. The repertoire chosen will be foundational jazz choir literature. (IRR)
0.5 Credit

MUEN 12600 Trumpet Ensemble (NLA)

This course focuses on the development of ensemble skills for trumpet players, which includes intonation, precision, style, overall musical effect, and communication. Musical exercises and trumpet ensemble repertoire of a wide variety of musical style periods, genres, and composers will be used to develop these skills. Students will also develop leadership, group participation, individualism, professional commitment, and responsibility by having opportunities to lead the ensemble and by being a member of the ensemble. (F,S)
0.5 Credit

MUEN 12700 Percussion Ensemble (NLA)

Ensemble experience and exposure to contemporary percussion literature. Several concerts are scheduled each semester. Open to any student who can qualify through audition. (F,S)
1 Credit

MUEN 12800 Early Music Performance Practice Ensemble (NLA)

Ensemble experience and exposure to Early Music Literature. Several concerts are scheduled each semester. Open to any student who can qualify through audition. (IRR)
1 Credit

MUEN 12900 Improvisation Ensemble (NLA)

An ensemble dedicated to the performance of non-notated music created spontaneously, and not necessarily in any particular musical style. Introductory study of how compositions can be structured "in the moment" through the use of compositional principles including large-scale form, motivic development, melodic construction, harmony, and orchestration. The ensemble performs at Composition Recitals. Prerequisite: Music major or minor, or permission of instructor. (IRR)
0.5 Credit

MUEN 13100 Fundamentals of String Chamber Music (NLA)

An introduction to fundamental string chamber music skills, including developing group pulse, cueing, tone and articulation matching, pitch centering, dynamics, and balance. Students will also develop rehearsal and communication techniques and learn how to make interpretive and stylistic decisions as an ensemble. The course also supports the development of performance skills, including stage presence. (F,S)
1 Credit

MUEN 14000 Musical Pit Orchestra (NLA)

Rehearsal and performance-based ensemble that serves as orchestral accompaniment to the Fall or Spring Musical Theatre productions. (F,S)
0.5-1 Credits

MUEN 21700 Piano-Vocal Collaboration (NLA)

Develop historically and stylistically informed performances of the accompanied vocal literature. Explore poetry & lyrics on an in-depth level, as well as refine collaborative skills between pianist and vocalist with a focus on specific concerns such as interpretation of vocal music of varying languages and stylistic periods through masterclasses and individual coachings. Students will demonstrate their collaborative expertise via a public performance. Pianists enroll for vocalists enroll for . (F)
0.5-1 Credits

MUEN 21800 Piano-Instrumental Collaboration (NLA)

Develop historically and stylistically informed performances of accompanied instrumental literature. Address specific collaborative issues with regard to repertoire for piano and another instrument of varying styles and genres. Refine communication and listening skills between pianist and instrumentalist with a focus on specific concerns such as balance, phrasing, appropriate stylistic interpretation through masterclasses and individual coachings. Students will demonstrate their level of collaborative expertise via a public performance. Pianists enroll for instrumentalists enroll for .(S)

0.5-1 Credits

MUEN 22100 Chamber Music Masterclass (NLA)

A weekly chamber music masterclass. Weekly performances of chamber music literature in workshop/masterclass settings. Students have a chance to hear other groups perform in small groups and engage in faculty-led feedback. This modality allows for mixed instrumentation and small groups combinations of a more experimental nature. (F,S)

0.5 Credit

MUEN 30300 Piano Ensemble (NLA)

Study and performance of music for piano: four hands, one and two pianos, and eight hands, two pianos. Prerequisites: PFMJ 20300 or by audition. (S)

1 Credit

MUEN 31700 Piano/Instrumental Duo (NLA)

A performance master class focusing on literature for piano and instrument. Students enroll as a performance team and remain together for the semester. Appropriate literature is chosen in consultation with the course professor and major teachers. Students prepare assigned literature for class performance and critique. Prerequisites: MUEN 21800 or by audition. (Y)

0.5-1 Credits

MUEN 31800 Piano/Vocal Duo (NLA)

A performance master class focusing on literature for piano and voice. Students enroll as a performance team and remain together for the semester. Appropriate literature is chosen in consultation with the course professor and major teachers. Students prepare assigned literature for class performance and critique. Prerequisites: MUEN 21800 or by audition. (Y)

0.5-1 Credits

MUEN 32000 Lyric Theatre Ensemble (NLA)

Performance centered studio class focused on studying, rehearsing, analyzing, and performing scenes and/or arias from the staged vocal repertoire, including, but not limited to, opera, operetta, musical theater, oratorio, art song, and cabaret. Through this process topics such as lyric diction, acting, auditioning, lyric theater's social and political relevance, style, and performance practice will be explored. Permission of instructor required based on audition results. (F,S)

1 Credit

MUEN 32100 Chamber Music (NLA)

Study, rehearsal, and performance of a broad spectrum of chamber music. Groups receive seven 1-hr. private lessons. (F,S)

0.5 Credit

MUEN 32300 Chamber Music Performance (NLA)

Study, rehearsal, and performance of a complete, significant, or large work for chamber group. Groups receive fourteen 1-hr. private lessons. (F,S)

1 Credit

MUEN 42800 Early Music Performance Practice Ensemble (LA)

Ensemble experience and exposure to early music literature. Several concerts are scheduled each semester. Class meeting: Two hours per week. for music majors; for non-music majors. Prerequisite: MUMC 48300. (S)

0-1 Credits

Music Non-Major (MUNM)

MUNM 10300 Campus Band (LA)

A wind and percussion ensemble open to any student at Ithaca College who has previously played a wind or percussion instrument. There are no auditions for this ensemble. Campus Band is intended primarily for the non-music major who would like to continue to play an instrument in a large ensemble. One concert is scheduled each semester. Class meeting: Two hours per week. (F-S)

0-1 Credits

MUNM 10302 Ithaca College Campus Choral Ensemble (LA)

The Ithaca College Campus Choral Ensemble is a vocal ensemble open to any student at Ithaca College. It is intended primarily for the non-music major who would like to sing in a large vocal ensemble and is dedicated to the performance of repertoire that represents a wide variety of styles, time periods, and cultures. There are no auditions for this ensemble. One concert is scheduled each semester. (F-S)

0-1 Credits

MUNM 10304 Ithaca College Sinfonietta (LA)

The Ithaca College Sinfonietta (ICS) is an instrumental ensemble open to any student at Ithaca College who has prior experience performing a traditional orchestral instrument (woodwinds, brass, strings, or percussion). The repertoire is primarily based on full and string orchestra literature ranging from NYSSMA grade III to VI, and is selected to provide an enriching opportunity for a range of performers to experience both musical growth and enjoyment. There are no auditions for this ensemble. One concert is scheduled each semester. (F-S)

0-1 Credits

MUNM 10308 West African Drumming and Dance Ensemble (LA)

West African Drumming and Dance Ensemble is open to all registered students at Ithaca College and is comprised of three performance components - drumming, singing, and dancing. Students have the opportunity to explore first-hand the exciting traditions of West African music by investigating specific musical styles and traditions directly on "authentic" African musical instruments. Social functions and analytical study of dance movements in ritual, ceremonial, religious, and recreational contexts are also investigated. Students will be expected to drum, sing, dance and attend the final group performance each semester. (F,S,Y)

Attributes: ADSE, RPRE

0-1 Credits

MUNM 10400 Basic Materials of Music (LA)

Study of rhythm and meter, pitch, intervals, tonality, scales, key signatures and relationships, triads, notation, and terms and symbols. This course is designed primarily for B.F.A. musical theater and other non-music majors. (S)

Attributes: FA

2 Credits

MUNM 10600 Basic Music Skills for Musical Theatre Majors (LA)

Designed for B.F.A. in Musical Theatre majors, this course introduces foundational skills in music notation and theory through sight-reading, aural practice and creative musical lab experiences. (S)

1 Credit

MUNM 10700 Class Voice for the Non-Music Student (LA)

Small classes in voice to develop an understanding of the vocal mechanism and the application of sound principles of breath control and vowel placement. Course content is designed for the non-music student. (F-S)

1 Credit

MUNM 10800 Class Voice for the Non-Major Student (LA)

Small classes in voice to develop an understanding of the vocal mechanism and the application of sound principles of breath control and vowel placement. Course content is designed for the non-music student. (F-S)

1 Credit

MUNM 13000 Music in Society (LA)

An exploration of the social roles and implications of music in various cultures, leading to its role in contemporary America. The music is analyzed in terms of its elements – melody, harmony, rhythm, timbre, and form – as a means of identifying its aesthetic, cultural, and social functions. (S)

Attributes: 3B, CA, FA, G, MAP, TMBS

3 Credits

MUNM 14000 Rock Styles Since 1955 (LA)

An exploration of the styles of rock music since 1955. Rock is the primary topic, but also considered are styles that interact with rock (blues, gospel, pop, county, jazz, classical). The historical and sociological impact of various works and styles will be discussed, but the focus of the class is the identification of styles based on aural characteristics such as rhythm, melody, texture, and form. (F,S)

Attributes: 3B, CA, FA, H, MAP, TMBS

3 Credits

MUNM 16100 Worlds of Music (LA)

An introductory survey of the music of different cultures, with an emphasis on Native American, West African, South African, and South Asian contexts. Musical meaning is explored through classroom discussion, musical analysis, listening, and active participation in music making. (F)

Attributes: CA, G, INBG, TIDE, TIII

3 Credits

MUNM 16200 Pop 'n' Rock (LA)

For non-music and music majors. A historical overview of rock 'n' roll and popular music, based on listening and analysis of selected musical examples representing stylistic evolution from 1950 to the present. The first few classes are devoted to developing listening techniques (i.e., aural perception of melody, harmony, rhythm, meter, timbre, texture, form, tempo, and dynamics). (IRR)

Attributes: 3B, FA

2 Credits

MUNM 16205 British Popular Music (LA)

Broad overview of musical styles and genres of British popular music. Explores various innovative approaches to music taken by British artists since 1950. Includes a chronological outline of the continual turnover of genres and sub-genres. Includes class outings to relevant music venues, with an additional fee for concert tickets. For non-music and music majors. Offered through the London Center. (F,S)

Attributes: 3B, FA

3 Credits

MUNM 16300 Music in London (LA)

Explore the music of British composers, Victorian music halls, churches, academies, and musical theatre with music scholars and professional performers. Experience varied musical contexts through outings to famous London musical venues. Obtain special inside perspectives based on a backstage glimpse not afforded to the general public and meet instrumentalists and West End performers. Offered through the London Center. (F,S)

Attributes: INBG

3 Credits

MUNM 16400 British Popular Music (LA)

Broad overview of musical styles and genres of British popular music. Explores various innovative approaches to music taken by British artists since 1950. Includes a chronological outline of the continual turnover of genres and sub-genres. Includes class outings to relevant music venues, with an additional fee for concert tickets. For non-music and music majors. Offered through the London Center. (F,S)

Attributes: CA, TIII

3 Credits

MUNM 17100 Keyboard Musicianship I for Musical Theater Majors (NLA)

An introduction to the fundamentals of keyboard musicianship. Skill emphasis is placed on technique, repertoire, reading, rhythm, harmonization, transposition, playing by ear, and improvisation. Material drawn from popular and classical repertoire. Placement by audition only. (F)

1 Credit

MUNM 17200 Keyboard Musicianship II for Musical Theater Majors (NLA)

A continuation of keyboard skills developed in MUNM 17100. Additional emphasis is placed on accompaniment styles, reading, lead line notation, and development of arrangements from lead lines. Course material is drawn largely from popular music sources. Prerequisites: MUNM 17100. (S)

1 Credit

MUNM 17300 Keyboard Musicianship I for the Non-Music Major (LA)

An introduction to the fundamentals of music at the piano. Emphasis is placed on music notation, technique, rhythm, intervals, major and minor triads, tetrachords, improvisation, creating accompaniments, reading, and playing by ear. Material is drawn from popular and classical repertoire. Designed for the beginning pianist. (F-S)

1 Credit

MUNM 17400 Keyboard Musicianship II for the Non-Music Major (LA)

A continuation of keyboard skills developed in MUNM 17300. Additional emphasis is placed on major and minor keys and scales, modes, transposition, non-harmonic tones, and creating accompaniments using tonic and dominant harmonies. Solo and ensemble repertoire drawn from classical and popular styles. This course is appropriate for students who have completed MUNM 17300 successfully or who have studied piano previously. (F-S)

1 Credit

MUNM 22100 Musicianship for the Theater I (LA)

Musicianship studies designed specifically for B.F.A. musical theater majors: sight-singing, analysis, score reading, keyboard skills, and a variety of theoretical topics emphasizing diatonic music and music in traditional meters. Prerequisites: MUNM 10400. (F)

Attributes: FA

3 Credits

MUNM 22200 Musicianship for the Theater II (LA)

Musicianship studies designed specifically for B.F.A. musical theater majors – sight-singing, analysis, score reading, keyboard skills, and a variety of theoretical topics emphasizing chromatic music and music in non-traditional meters. Prerequisites: MUNM 22100. (S)

Attributes: FA

3 Credits

MUNM 25100 Music and the Media (LA)

A study and comparison of the forms and styles of music commonly used by the media, including radio, television, and film. Analysis of a variety of musical styles, especially music created expressly for media use, focuses on musical and media intent and function, methods of presentation, emotional response, and judgmental listening. No previous experience in music is required. (S)

Attributes: 3B, CA, FA, MAP, TIII

3 Credits

MUNM 25300 Involvement with Music (LA)

An exploration of practical music theory and structure designed for students with little or no music training. Skills are developed in the areas of aural perception (sight-singing, dictation, and listening), fundamentals, harmony, composition, conducting, and music analysis. For non-music majors only. (F-O)

Attributes: FA

3 Credits

MUNM 25400 Exploring Musical New York (LA)

Introduces the curious student to the classical musical arts by studying elements of selected live performing arts. Students attend up to five performances in New York City over Fall Break. Typical performances include a Broadway show, the New York Philharmonic Orchestra, the Metropolitan Opera and jazz musicians at a club. Students must be available to attend all events during Fall Break. A non-refundable lab fee must be paid no later than 6 weeks prior to the departure for the NYC shows, and covers transportation to and from NY, housing, and all tickets. (F,B)

2 Credits

MUNM 25500 Women in Music (LA)

An examination of the music and lives of women in various musical settings, beginning with classical music in medieval Europe and shifting, in the 20th century, to popular music in the United States. The class examines women's roles and contributions as singers, instrumentalists, composers, and conductors, as well as the challenges facing women as professional musicians. These are viewed within the context of society's perception of women at the time. Listening and analytical skills are developed through studying the music itself. The class is designed for non-music majors, with no musical background necessary, and issues raised are relevant to both men and women. (F)

Attributes: 3B, CA, FA, H, TIDE, WGS, WGSC

3 Credits

MUNM 25600 Women in Popular Music: From Bessie Smith to MTV (LA)

An examination of the lives and contributions of women in popular American music of the 20th century, focusing on their role in society as well as the challenges they have faced in developing their professional and personal lives, raising issues relevant to both men and women. The development of American popular culture is viewed in the context of its political climate and in terms of its roots in African American music, country and western music, and the music of American musical theater. The course focuses on the women practitioners in the genres of blues, jazz, gospel, country, and folk music; musical theater; rock; and contemporary pop music. The music is examined in detail, and listening and analytical skills are developed. This course is designed for non-music majors, with no musical background necessary. (F)

Attributes: 3B, ADCH, ADSE, CA, DV, FA, H, MAP, TIII, WGS, WGSC

3 Credits

MUNM 25700 History of American Popular Song (LA)

A survey of popular song in America from the Pilgrims to the present, in which the history of America is brought to life through the study of our continuing rich heritage of popular song. Discussion of the songs focuses on musical content, lyric meaning and message, performance practice and parameters, social and cultural functions, and the historical conditions and events that fostered the development and growth of the various popular styles. This course is designed for non-music majors, with no musical background necessary. (IRR)

Attributes: 3B, FA, H

3 Credits

MUNM 25800 Music of Latin America (LA)

Survey of the most significant music from Central and South America, with emphasis on the four most important Latin American styles: Mexican, Afro-Cuban, Brazilian, and Argentinean music. Aspects of each country's musical tradition and its most significant stylistic features will be analyzed and illustrated in class. (IRR)

Attributes: 3B, CA, DV, FA, G, H, TIDE, TIII

3 Credits

MUNM 25900 African American Popular Music: Blues to Hip Hop (LA)

Traces the evolution of African American music from its roots in the deep South to its urbanization and commercialization throughout the country. Explores the music's functions from plantation life to professional entertainment and studies how this music reflected the social and political environment of the times. Explores the lives and works of artists; the relationship between the industry and the artists from race records onward; and includes in-depth analysis of the music, text, and stylistic influences and evolution. (F)

Attributes: 3B, ADSE, CA, DV, FA, H, MAP, TIDE

3 Credits

MUNM 35100 American Musical Theater: History and Analysis (LA)

A historical study of the American musical theater from its origins to the present, including analysis of its musical and dramatic components, with special emphasis placed on the content, role, and function of the music. The course utilizes live performances in and out of class, focusing study on area productions. Students should have sufficient knowledge of musical notation to follow a written melody and lyrics while listening to a recording prior to taking this course. (F)

Attributes: 3B, FA, H

3 Credits

Music Performance Studies (MUPS)

MUPS 12000 The Singing Performer I: Body Awareness (NLA)

Develop body awareness through guided practice. Explore various techniques to emphasize physical presence and connection between body and space. Work primarily takes place during class time. (F,Y)
1 Credit

MUPS 12200 The Singing Performer II: Voice and Body Connection (NLA)

Develop body awareness through guided practice. Employ various techniques to emphasize physical and vocal presence, and connection between body, voice, and space. Work primarily takes place during class time. Prerequisites: MUPS 12000. (S,Y)
1 Credit

MUPS 13000 Wind/Brass/Percussion Excerpts and Reading (NLA)

An integral class to BM Performance degree in wind/brass/percussion. Students meet regularly in wind/brass/percussion section to rehearse repertoire with a faculty coach. Weekly preparation of individual parts is required for the students in pursuit of improving section-playing and ensemble skills while building knowledge of repertoire. (F,S)
0.5 Credit

MUPS 14000 Selected Topics: Woodwind Forum (NLA)

Engage in an in-depth discussion and analysis of selected topics for woodwind instruments. Primary focus will be on pedagogy and literature, but other topics will be covered as are pertinent to the various woodwind instruments. Topics will rotate to cover the broadest and most current range of materials. (IRR)
1-2 Credits

MUPS 14100-14103 Selected Topics: Brass Forum (NLA)

Engage in an in-depth discussion and analysis of selected topics for brass instruments. Primary focus will be on pedagogy and literature, but other topics will be covered as are pertinent to the various brass instruments. Topics will rotate to cover the broadest and most current range of materials. (IRR)
1-2 Credits

MUPS 14200 Selected Topics: String Forum (NLA)

Engage in an in-depth discussion and analysis of selected topics for string instruments. Primary focus will be on pedagogy and literature, but other topics will be covered as are pertinent to the various string instruments. Topics will rotate to cover the broadest and most current range of materials. (IRR)
1-2 Credits

MUPS 14300 Selected Topics: Vocal Forum (NLA)

Engage in an in-depth discussion and analysis of selected topics for the voice. Topics will rotate to cover the broadest and most current range of materials. (IRR)
1-2 Credits

MUPS 15000 Reed Making Lab (NLA)

This lab for double reed students complements private instruction and develops proficiency and consistency in reed construction, finishing, and adjusting. The course examines the botanical, physiological, and mechanical contributions to reed making and formulates a personalized reed model consistent with each individual's needs. (F,S)
0.5-1 Credits

MUPS 16100 Diction I (NLA)

A detailed study of the International Phonetic Alphabet, with particular attention to the rules and symbols of English, Italian, and German diction. Application of rules through written assignments, oral drill, language lab work, and individual performance in class. (F)
2 Credits

MUPS 16200 Diction II (NLA)

A detailed study of the International Phonetic Alphabet, with particular attention to the rules and symbols of French diction. Application of rules through written assignments, oral drill, language lab work, and individual performance in class. Prerequisites: MUMC 16100 or MUPS 16100. (S)
2 Credits

MUPS 16300 Diction for the Non-Vocal Music Major (NLA)

The study of the International Phonetic Alphabet (IPA) as it relates to English, Italian, German, and French vowel and consonant sounds. Application of rules through written assignments, oral drill, language lab work, and individual performance in class. For music majors in the Music Education, and four-and-one-half-year programs, piano and guitar tracks. (S)
2 Credits

MUPS 17100 Performance Diction I: IPA and English Lyric Diction (NLA)

This class examines the basics of the International Phonetic Alphabet (IPA). This will be applied to the singing pronunciation of English and then expanded to include resources for beginning comprehension and pronunciation of other languages. Through written exercises, lecture, listening lab, poetic recitation, repetition, and in-class coaching and performance, students will learn the basics of the International Phonetic Alphabet (IPA), develop their ability to identify the component sounds of English, and to enunciate and express them with clarity and physical ease. They will also learn how to effectively use English diction for expressive purposes. Corequisites: PFMJ 10100. (F)
1 Credit

MUPS 17200 Performance Diction II: Italian and Spanish Lyric Diction (NLA)

This class examines the basics of the International Phonetic Alphabet (IPA) as applied to the singing pronunciation of Italian and Spanish. Through written exercises, lecture, listening lab, poetic recitation, repetition, and in-class coaching and performance of recitative, arias and songs, students will continue to learn the basics of the International Phonetic Alphabet (IPA), develop their ability to identify the component sounds of Italian and Spanish, and to enunciate and express them with clarity and physical ease. Prerequisites: MUPS 17100 or MUPS 16300. (S)
1 Credit

MUPS 17300 Performance Diction III: German Lyric Diction (NLA)

This class examines the basics of the International Phonetic Alphabet (IPA) as applied to the singing pronunciation of German. Through written exercises, lecture, listening lab, poetic recitation, repetition, and in-class coaching and performance, students will continue to learn the basics of the International Phonetic Alphabet (IPA), develop their ability to identify the component sounds of German, and to enunciate and express them with clarity and physical ease. Prerequisites: MUPS 17100 or MUPS 16100 or MUPS 16300. (F)
1 Credit

MUPS 17400 Performance Diction IV: French Lyric Diction (NLA)

This class examines the basics of the International Phonetic Alphabet (IPA) as applied to the singing pronunciation of French. Through written exercises, lecture, listening lab, poetic recitation, repetition, and in-class coaching and performance, students will continue to learn the basics of the International Phonetic Alphabet (IPA), develop their ability to identify the component sounds of French, and to enunciate and express them with clarity and physical ease. Prerequisites: MUPS 17100, MUPS 16100, or MUPS 16300. (S)

1 Credit

MUPS 20000 Basic Piano Pedagogy (NLA)

The art and science of piano pedagogy is explored through an overview of the basic components of professional piano teaching. The emphasis is on teaching beginners focusing on principles of one-on-one instruction. A review of mainstream methods and materials focuses on technique and the early development of musicianship through piano study. Career opportunities as an independent studio teacher are explored through learning the strategies and standards for developing an independent studio business. Prerequisites: PFMJ 10300. (E,F)

1 Credit

MUPS 21000 Group Piano Pedagogy (NLA)

Explore the history, rationale, and logistical considerations of teaching group piano in a college setting or as part of an independent studio. Experience teaching piano in a group environment through active participation in peer teaching and guided observations. Discover how cooperative learning theory and creative curriculum development can motivate your students. Groups of all ages including small children, teens (in the public-school environment), college-aged music majors and non-majors, and senior adults are part of the practical teaching experiences. Prerequisites: PFMJ 10300. (F,O)

1 Credit

MUPS 22000 The Singing Performer III: Interpretation and Integration (NLA)

An interdisciplinary course designed to further develop body awareness and theatrical acting skills for singers. Emphasis on acting techniques and styles of movement. Culminates in a performance of a song or aria, using acting styles and movement techniques to create a fully formed, identifiable stage persona. Prerequisites: PFMJ 10100. (Y)

2 Credits

MUPS 23000 Percussion Pedagogy (NLA)

Engage students in discussion, analysis and the practice of teaching percussion in a studio setting. Explore planning for master classes/lessons, pedagogical literature, structuring curriculum, setting up a home studio, teaching methods, and experience sample lessons. Serves as preparation for students who wish to teach outside of/in addition to public-school teaching. (IRR)

1 Credit

MUPS 24000 Guitar Forum (NLA)

Engage in an in-depth study of selected topics such as foundations of guitar pedagogy, transcriptions and arrangements, Latin American sources for guitar music, and 18th c. performance practice. (IRR)

1-2 Credits

MUPS 25000 Conducting I (NLA)

A conducting course designed to introduce the basic skills required of a conductor. Topics covered will include gesture and baton technique, score reading and study, non-verbal and verbal communication, and critical listening skills. One of the secondary, but essential, goals of this course is comprehensive musicianship and ensemble skills. Understanding conducting and score study cultivates a musical awareness that enhances analytical, interpretative, and performance skills. (F,S)

2 Credits

MUPS 25500 Basics of Vocal Mechanics (NLA)

Explore the functions and human anatomy involved in using the voice: body alignment, breathing, phonation, resonance, and articulation. Students engage in classroom activities and demonstrations that provide visual, aural and kinesthetic illustrations that enhance their working understanding of the vocal instrument. Additionally, this course serves to educate students on vocal health, wellness and hygiene. Appropriate for vocalists, instrumentalists, actors, and other students pursuing professions that require an understanding of the mechanics of the singing instrument. (B,F,S)

1 Credit

MUPS 27300 Music Recital (NLA)

A solo or shared public recital. Full recitals (approximately one hour in length) are normally 1 or Shared or shorter programs are normally .5 - 1 cr. (F,S)

0.5-2 Credits

MUPS 27700 Introduction to the Organ (NLA)

Basic instruction in playing the organ, with an overview of organ history and construction. Covers the basics of legato, including substitution and thumb glissando, as well as pedal playing. Weekly meetings in a seminar setting include lecture, written, and keyboard components. Prerequisites: PFSM 17600. (F,S)

1 Credit

MUPS 27900 Introduction to the Harpsichord (NLA)

Basic instruction in playing the harpsichord, as well as insight into playing continuo, with an overview of harpsichord history, literature, and construction, and the basics of figured bass realization and figured bass in the context of continuo accompaniment. Adaptation of realized continuo parts into more usable accompaniments is emphasized. Prerequisites: PFSM 17600. (F,S)

1 Credit

MUPS 31000 Conducting II (NLA)

An intermediate conducting course consisting of review, refinement, and progression of foundational skills studied in MUPS 25000. Emphasis will be placed on the development of skills within the following categories: 1) Score Study, Musical Interpretation and Internalization 2) Nonverbal and Verbal Communication and 3) Listening Skills and Rehearsal Practices.

Prerequisites: MUED 30100 or MUED 30300 or MUPS 25000. (F,S)

2 Credits

MUPS 32000 The Singing Performer IV: Lyric Theatre Workshop (NLA)

Sing Performer IV: Lyric Theatre Workshop is designed to build and practice skills necessary to prepare and perform staged vocal repertoire. Repertoire will often focus on opera, but could include operetta, musical theater, oratorio, art song, cabaret and more. Permission of instructor required based on audition results. (F,S)

1 Credit

MUPS 33000 Survey of Percussion Literature (LA)

Listen to, research, analyze and connect compositions featuring percussion (solo, chamber, ensemble). Student and faculty presentations will introduce pieces in quasi-chronological order to provide context, along with weekly listening and regular research. (E,F)
1 Credit

MUPS 35000 Piano Pedagogy Practicum (NLA)

Piano pedagogy practicum is a hands-on mentored teaching experience for students interested in teaching in an independent private studio. Teaching assignments are individually designed to complement the student's interest. Opportunities exist in the on-campus Teaching Intern Program (average age beginners), off-campus studios and programs, individual or group lessons, and with a variety of age groups including adults and senior citizens. Mentoring involves guided preparation and assessment. Credit is determined by the scope of the teaching assignment. Prerequisites: MUMC 20000. (F,S)
0.5-2 Credits

MUPS 35100 Reaching Out to Audiences (LA)

An exploration of how musicians can reach and build broader audiences for the various genres of classical music. Topics include the importance of community involvement, musicians' interaction with audiences, visual presentation of performance (e.g., multimedia, lighting), presenting 20th- and 21st-century music to diverse audiences, connecting with music education programs in colleges and the public schools, and understanding several aspects of music management. Class meetings: Two hours per week for one block. Prerequisites: Two semesters of private lessons at level 2. (F,S)
1 Credit

MUPS 36300 Junior Recital Vocal Coaching and Lab (NLA)

The next level of the singer's collaborative sequence builds on the foundation of MUEN 21700 Piano/Vocal Collaboration. Further development and artistic application of collaborative partnership and musicianship skills. Specific repertoire is assigned by the student's studio teacher in preparation of their junior recital. Individual coaching times are scheduled in addition to regular class meetings. Prerequisites: MUEN 21700. Corequisites: PFMJ 30100. (F,S)
1 Credit

MUPS 37300 Required Junior Recital (NLA)

As a condition for graduation, students in the performance and four-and-a-half year programs are required to present a junior solo recital approximately one hour long. (F,S)
1 Credit

MUPS 41000 Piano Pedagogy Forum (NLA)

Engage in an in-depth study of selected topics in the art and science of piano pedagogy. Build upon foundational principles of piano pedagogy through research, discussion, and applied practice. This course is cross-listed with MUPS 51000 for graduate students. Prerequisites: MUPS 35000. (F,S)
1-2 Credits

MUPS 42000-42010 Selected Topics in Art Song Literature (NLA)

Changing topics in art song literature and performance practice. Prerequisites: PFMJ 30100 or PFMJ 30300. (IRR)
1 Credit

MUPS 45500 Vocal Pedagogy : Application and Practice of Voice Teaching (NLA)

This course combines lecture and experiential components related to teaching voice in the private lesson setting. The pedagogy of teaching voice, including teaching methods, voice science, performance psychology, and artistic concerns will be covered. In addition, students will teach one volunteer student in weekly singing lessons, culminating in a volunteer student recital. Included in the course are aspects of the business of running an independent voice studio. (Y)
2 Credits

MUPS 46300 Senior Recital Vocal Coaching and Lab (NLA)

The last level of the singer's collaborative sequence continues the work from Piano/Vocal Collaboration and Junior Recital Vocal Coaching and Lab, culminating in the performing student's capstone experience. Students further develop and apply artistry in collaborative partnership, musicianship, and interpretive skills. Specific repertoire is assigned with the guidance of the student's studio teacher in preparation of their senior recital. Prerequisites: MUPS 37300. (F,S)
1 Credit

MUPS 47300 Required Senior Recital (NLA)

As a condition for graduation, students in the performance and four-and-a-half-year programs are required to present a senior solo recital, approximately one hour long. (F,S)
2 Credits

MUPS 47301 Senior Voice Recital (NLA)

As a condition for graduation, students in the performance and four-and-a-half year programs are required to present a senior solo recital, approximately one hour long. This capstone experience includes preparation through private voice lessons as well as study of the languages, poetry, and musical and dramatic elements with a vocal coach. Prerequisites: MUMC 37300. (F,S)
Attributes: CP
2 Credits

MUPS 47500 Required Collaborative Recital (NLA)

Students prepare and perform a recital of standard length (approximately 50-60 minutes), composed of approximately one-half vocal and one-half instrumental literature, in collaboration with students from other studios. Students may also fulfill this requirement by appearing in two separate recitals (one instrumental, one vocal) and performing at least half of each recital. Repertoire is approved and coached by the supervising faculty member in PFMJ 44700-PFMJ 44800 Private Accompanying. Grading is by faculty committee. Prerequisites: Prior or concurrent registration in PFMJ 44700. (Y)
1 Credit

MUPS 48500 Survey of Piano Literature I (LA)

Examine the standard piano literature from the origins of the keyboard through the middle romantic period by listening, performing, and analyzing the repertoire. Develop an appreciation for, and a historical understanding of, the rich heritage of piano literature. (F,O)
2 Credits

MUPS 48600 Survey of Piano Literature II (LA)

Piano literature in the period from the mid 19th century Romantic Period through the present day is explored through listening, performing, and analyzing the repertoire. Through in-depth study of the literature, this course develops appreciation for the rich heritage, as well as the historical and cultural context of piano literature. (O,S)
2 Credits

MUPS 51000-51500 Piano Pedagogy Forum (NLA)

Engage in an in-depth study of selected topics in the art and science of piano pedagogy. Build upon foundational principles of piano pedagogy through research, discussion, and applied practice. This course is cross-listed with MUPS 41000 for graduate students. Prerequisites: MUPS 35000. (F,S)
1-2 Credits

MUPS 55500 Vocal Pedagogy (NLA)

This course combines lecture and experiential components related to teaching voice in the private lesson setting. The pedagogy of teaching voice, including teaching methods, voice science, performance psychology, and artistic concerns will be covered. In addition, students will teach two volunteer students in weekly singing lessons, culminating in a volunteer student recital. Included in the course are aspects of the business of running an independent voice studio. (S,Y)
2 Credits

MUPS 58500 Survey of Piano Literature I (LA)

The study of piano literature from the high baroque through the middle romantic periods. The unique facets of each style are explored through analysis, outside readings, score study, guided listening, and individual performances. Periodic examinations and individual projects are required. One hour of lecture and one half hour of lab meetings weekly. (F,O)
2 Credits

MUPS 58600 Survey of Piano Literature II (LA)

The study of piano literature from the middle romantic period through the 20th century. The unique facets of each style are explored through analysis, outside readings, score study, guided listening, and individual performances. Periodic examinations and individual projects are required. One hour of lecture and one-half hour of lab meetings weekly. (O,S)
2 Credits

MUPS 59000 Choral Literature and Performance Practice 1 (LA)

A survey of choral literature and performance practices from the Medieval era to the Classical era. (E,S)
2 Credits

MUPS 59100 Choral Literature and Performance Practice 2 (LA)

A survey of choral literature and performance practices from the Romantic era to the present including world musics. (O,S)
2 Credits

MUPS 65000 Piano Pedagogy Practicum (NLA)

A mentored teaching experience for students interested in teaching piano in a "real world" environment. Teaching assignments are individually designed to complement the student's interest. Opportunities exist in the on-campus Teaching Intern Program (average age beginners), off-campus studios and programs, individual or group lessons, and with a variety of age groups including adults and senior citizens. Mentoring involves guided preparation and assessment. Credit is determined by the scope of the teaching assignment. (F,S,Y)
1-2 Credits

Music Thry, Hist, Aural, Comp (MUTH)

MUTH 10100-10101 Fundamentals of Music Theory (LA)

Study of rhythm and meter, pitch, intervals, tonality, scales, key signatures and relationships, triads, notation, and terms and symbols. (F-B)
Attributes: FA
1 Credit

MUTH 10200 First-Year Music Theory Seminar (LA)

Changing topics in introductory music theory and analysis for first-year music majors with some prior knowledge of music theory. (F,B,Y)
1 Credit

MUTH 11100 Introduction to Music Studies (LA)

An introduction to aural, notated, cultural, analytical, and technological approaches to music, setting the stage for a wide range of future music studies at the college level. Students learn about the elements of music and apply this knowledge to aurally analyze music representing diverse styles, contextualized within cultural traditions. Students develop fluency in reading, recognizing, and writing elements of Western staff notation. Students explore how technology can manipulate, analyze, notate, compose, and record music. Students cultivate productive and responsible study habits that are essential for success in the School of Music, Theatre, and Dance. #Intended for first-year students. (F,Y)
4 Credits

MUTH 11200 Strategies for Success in Music Studies (LA)

Designed for students who attempted and did not successfully complete Introduction to Music Studies. In addition to building essential musical skills necessary for success in Music Theory, Aural Skills, and Music in Context classes, helps students identify their barriers to success and supports growth in skills such as time management, organization, and resilience. Intended for first-year students. Permission of instructor required. (S,Y)
2 Credits

MUTH 12100 Introduction to Musical Styles (LA)

Students will develop the ability to understand music in many historical and cultural contexts, and will develop and advance their basic music literacy, especially a working knowledge of the elements of musical design. In addition, students will develop critical listening skills and an awareness of chronology and will learn a variety of music literature. (F-S)
Attributes: 3B, FA, H
2 Credits

MUTH 12200 Music Theory I (LA)

Study of two-voice contrapuntal frameworks, triads and seventh chords and their inversions, nonchord tones, and tonal structure involving diatonic harmony. Written application of all subject material, demonstrating the principles of good voice leading. Keyboard and vocal demonstration of harmonic concepts. Harmonic and structural analysis of selected works. Aural recognition of chord sonority types, harmonic progressions, cadences, and textures. Prerequisites: MUTH 10100 or successful results from the placement exam. (F-S)
Attributes: FA
2 Credits

MUTH 12201 Music Theory I -- Honors (LA)

A more in-depth study of the material covered in MUTH 12200. Prerequisites: Placement testing. (S)
Attributes: FA
2 Credits

MUTH 12300 Music Theory I (LA)

In this course, we will examine how tonal music expresses opening, development, and closure. To this end we will analyze musical excerpts and complete pieces, communicate analytical interpretations through prose, compose voice-leading paradigms in two and four parts, and aurally identify theme types, harmonic progressions, and formal sections. Prerequisites: MUTH 11100 or MUTH 11200. (F,S,Y)
3 Credits

MUTH 12600 Aural Skills I (LA)

Development of musical skills through vocalizing prepared and unprepared material, melodic and rhythmic dictation, corrective listening, and vocal/keyboard exercises. Uses moveable DO solfège syllables in the major and minor modes in treble, alto, and bass clefs. Uses Takadimi beat-level rhythm syllables in simple, compound, and changing meters, including first and second divisions of the beat, fundamental rhythm patterns, and complementary rhythm. A minimum grade of C-minus must be earned to advance on to Aural Skills II. (F,S,Y)

2 Credits

MUTH 12601 Aural Skills I - Honors (LA)

A more in-depth study of the material covered in MUTH 12600. Registration is based on placement testing. Development of musical skills through vocalizing prepared and unprepared material, melodic and rhythmic dictation, corrective listening, and vocal/keyboard exercises. Uses moveable DO solfège syllables in the major and minor modes in treble, alto, and bass clefs. Uses Takadimi beat-level rhythm syllables in simple, compound, and changing meters, including first and second divisions of the beat, fundamental rhythm patterns, and complementary rhythm. A minimum grade of C-minus must be earned to advance on to Aural Skills II. Registration is based on placement testing. (F,S,Y)

2 Credits

MUTH 13300 Aural Skills I (LA)

Development of musical skills through singing prepared and unprepared material, melodic and rhythmic dictation, and vocal/keyboard exercises. Uses moveable "do" solfeggio syllables in the major and minor modes, in treble, alto, and bass clefs. Rhythmic material in simple, compound, and changing meters, including first and second divisions of the beat, fundamental rhythm patterns, and complementary rhythm. (F,S)

Attributes: FA

1.5 Credits

MUTH 13301 Aural Skills I - Honors (LA)

A more in-depth study of the material covered in MUTH 13300. Registration is based on placement testing. (F)

Attributes: FA

1.5 Credits

MUTH 13400 Aural Skills II (LA)

Continued development of basic musical skills learned in MUTH 13300 or MUTH 13301. Additional work with minor mode. Introduction of chromatic passing and neighbor tones, tonicization of the relative major and the dominant, tenor clef, and changing clefs. Presentation of anacrusic phrasing, syncopation, and changing meter. Prerequisites: Grade of C- or above in MUTH 13300 or MUTH 13301. (F-S)

Attributes: FA

1.5 Credits

MUTH 13401 Aural Skills II - Honors (LA)

A more in-depth study of the material covered in MUTH 13400. Prerequisite: Grade of C- or above in MUTH 13301 or excellent achievement in MUTH 13300 and departmental approval. (S)

Attributes: FA

1.5 Credits

MUTH 14100-14200 First-Year Composition (NLA)

Practical study of the techniques necessary for coherent expression in a creative work. Students examine established works and are assigned original musical excerpts and original compositions, exploring aspects of formal structure and style. Prerequisites: First-year Composition majors only. (F)

3 Credits

MUTH 22100 Music Theory II (LA)

Continued study of diatonic harmony. Study of period design and other small musical formal structures, harmonic sequences, applied chords, and tonicization and modulation. Written application of all subject material, demonstrating the principles of good voice leading. Keyboard and vocal demonstration of harmonic concepts. Harmonic and structural analysis of selected works. Aural recognition of sonority types, harmonic progressions, textures, and form. Prerequisites: MUTH 12200 or MUTH 12201. (F-S)

2 Credits

MUTH 22101 Music Theory II -- Honors (LA)

A more in-depth study of the material covered in MUTH 22100. Prerequisite: MUTH 12201 or excellent achievement in MUTH 12200 and departmental approval. (F)

2 Credits

MUTH 22200 Music Theory III (LA)

Study of mode mixture, chromatic tonicization and modulation, the Neapolitan sixth chord, augmented sixth chords, extended tertian chords, and more advanced harmonic topics. Written application of all subject material, demonstrating the principles of good voice leading. Keyboard and vocal demonstration of harmonic concepts. Harmonic, structural, and aural analysis of selected works in binary and ternary form. Aural recognition of sonority types, harmonic progressions, textures, and form. Prerequisites: MUTH 22100 or MUTH 22101; MUTH 12100. (F,S)

2 Credits

MUTH 22201 Music Theory III -- Honors (LA)

A more in-depth study of the material covered in MUTH 22200. Prerequisite: MUTH 22101 or excellent achievement in MUTH 22100 and departmental approval. (S)

2 Credits

MUTH 22400 Music Theory II (LA)

In this course we will examine the harmonic function and stylistic conventions of chromatic harmony in common-practice tonality. We will explore how chromatic harmony is used in musical forms from the phrase level to complete pieces in binary and ternary form. We will refine and continue study of music analysis begun in Music Theory I, including relationships between harmony, formal design, and texture to create areas of stability and instability. Prerequisites: MUTH 12300. (F,S,Y)

3 Credits

MUTH 22500 Aural Skills II (LA)

Continued development of basic musical skills learned in MUTH 12600 or MUTH 12601. Additional work with minor mode. Introduction of chromatic passing and neighbor tones, tonicization of the relative major and the dominant, tenor clef, and changing clefs. Rhythmic materials include anacrusic phrasing, syncopation, and changing meter. A minimum grade of C-minus must be earned to advance on to Aural Skills III. #Prerequisites: Grade of C- or above in MUTH 12600 or MUTH 12601. (F,S)

2 Credits

MUTH 22501 Aural Skills II - Honors (LA)

A more in-depth study of the material covered in MUTH 22500. Continued development of basic musical skills learned in MUTH 12600 or MUTH 12601. Additional work with minor mode. Introduction of chromatic passing and neighbor tones, tonicization of the relative major and the dominant, tenor clef, and changing clefs. Rhythmic materials include anacrusic phrasing, syncopation, and changing meter. A minimum grade of C-minus must be earned to advance on to Aural Skills III. #Permission of instructor required. (F,S,Y)

2 Credits

MUTH 22600 Aural Skills III (LA)

Development of advanced musical skills, building on skills from MUTH 22500 or MUTH 22501. Continued exploration of chromaticism through secondary dominant chords and modulation (both closely and distantly related). Introduction to 20th-century materials including modal melodies, whole tone and octatonic collections, and pitch-centric post-tonal melodies. Rhythmic materials include irregular division of the beat, asymmetric meters, common triplets, polyrhythms, and advanced tempo/meter modulation. A minimum grade of C-minus must be earned to successfully complete a music major. Prerequisites: Grade of C- or above in MUTH 22500 or MUTH 22501. (F,S,Y)

2 Credits

MUTH 22601 Aural Skills III -- Honors (LA)

A more in-depth study of the material covered in MUTH 22500 or MUTH 22501. Continued exploration of chromaticism through secondary dominant chords and modulation (both closely and distantly related). Introduction to 20th-century materials including modal melodies, whole tone and octatonic collections, and pitch-centric post-tonal melodies. Rhythmic materials include irregular division of the beat, asymmetric meters, common triplets, polyrhythms, and advanced tempo/meter modulation. A minimum grade of C-minus must be earned to successfully complete a music major. Permission of the instructor required. Prerequisites: MUTH 22501 or MUTH 22500. (F,S,Y)

2 Credits

MUTH 23300 Aural Skills III (LA)

Development of advanced musical skills, building on skills from MUTH 13400 or MUTH 13401. Assigned work with vocal/keyboard exercises leading to the skill level necessary to perform a simple art song. Continued exploration of chromaticism through secondary dominant chords, and modulation. Rhythmic materials include irregular division of the beat, asymmetrical meters, and changing meters. Prerequisites: Grade of C- or above in MUTH 13400 or MUTH 13401. (F-S)

1 Credit

MUTH 23301 Aural Skills III - Honors (LA)

A more in-depth study of the material covered in MUTH 23300. Prerequisite: Grade of C- or above in MUTH 13401 or excellent achievement in MUTH 13400 and departmental approval. (F)

1 Credit

MUTH 23400 Aural Skills IV (LA)

Continued development of advanced musical skills learned in MUTH 23300 or MUTH 23301. Presentation of transient modulations, and modal melodies. Introduction to 20th-century music through impressionist, post-tonal and atonal melodies, trichord patterns, and complex rhythmic and metric combinations. Prerequisites: Grade of C- or above in MUTH 23300 or MUTH 23301. (F-S)

1 Credit

MUTH 23401 Aural Skills IV - Honors (LA)

A more in-depth study of the material covered in MUTH 23400. Prerequisite: Grade of C- or above in MUTH 23301 or excellent achievement in MUTH 23300 and departmental approval. (S)

1 Credit

MUTH 24100-24200 Composition (NLA)

Study and application of the techniques necessary for coherent expression in creative musical work. Students are assigned original compositions to explore motivic, harmonic, and formal design, as well as style, idiom, and orchestration, in order to create effective and meaningful works. Registration is based on previous written work and the permission of the instructor. Private tutorial instruction and one class meeting per week. Prerequisites: MUTH 14200. (F,S)

3 Credits

MUTH 24400 Composing in the Schools (NLA)

Composing in the Schools is a collaborative program between the Ithaca College composition department, and local and regional-area schools. The IC composition student receives hands-on experience working with children in a creative capacity by co-creating a musical work with and for K-12 children. Instrumentation varies from band and string ensembles to vocal groups. The IC student attends rehearsals and the premiere performance of the work and speaks. The student also speaks to the audience prior to the performance. The partnership provides real-life experiences for the IC student while providing a valuable service to the greater Ithaca community. Prerequisite: MUTH 14200. (F,Y)

1 Credit

MUTH 25200 Songwriting (LA)

Students creatively and critically develop modern songwriting skills, moving beyond the basics of mere musical self-expression. Songwriting is a learnable craft involving musical and textual clarity, thrift, and depth. Across genres, certain compositional and thematic qualities consistently underlie songs that are artistically and/or popularly successful, independent of their production and performance. This class focuses on these qualities. Activities include discussion, listening, creative exploration, collaboration, peer evaluation, and analysis of popular songs past and present. Students from all musical backgrounds are welcome, but the course presupposes a familiarity with keys, scales, chords, and rhythms. (S,Y)

3 Credits

MUTH 25300 Music in Context: The Academy, the Temple, and the Palace (LA)

An investigation of music in social and historical contexts. Using a case study approach, we will study institutional structures that encourage, support, inspire, require, regulate, or control music, and the musical practices that have taken place within these structures. Focuses on music in places of learning and study, in religious contexts, and in political or governmental contexts. Invites inquiry into how performers, audiences, impresarios, financiers, inventors, composers, and technologies shape musical practices, and how these musical practices shape our identities. Prerequisites: MUTH 11100 or MUTH 11200. (F,Y)

3 Credits

MUTH 25400 Music in Context: The Stage, the Home, and the Marketplace (LA)

An investigation of music in social-historical contexts. Using a case study approach, we will study institutional structures that encourage, support, inspire, require, regulate, or control music, and the musical practices that have taken place within these structures. Focuses on music for the public stage, the domestic sphere, and in the marketplace. Invites inquiry into how performers, audiences, impresarios, financiers, inventors, composers, and technologies shape musical practices, and how these musical practices shape our identities. Prerequisites: MUTH 11100 or MUTH 11200. (S,Y)

3 Credits

MUTH 25500 History and Literature of Music I (LA)

Examination of musical practices, styles, social institutions, and cultural events from approximately 1000 to 1750. Using a case method pedagogy, this class studies narratives about specific moments in time in order to develop critical musicological skills. Students will be actively participating in the creation of knowledge through inquiry and research related to each case study. Prerequisites: Any MUTH course. (F)

Attributes: 3B, G, H, HU

3 Credits

MUTH 25600 History and Literature of Music II (LA)

Examination of musical practices, styles, social institutions, and cultural events from approximately 1750 to 1900. Using a case method pedagogy, this class studies narratives about specific moments in time in order to develop critical musicological skills. Students will be actively participating in the creation of knowledge through inquiry and research related to each case study. Prerequisites: MUTH 25500; WRTG 10600 or ICSM 10800 or ICSM 11800. (S)

Attributes: 1, 3B, G, H, HU, WI

3 Credits

MUTH 32100 Form and Analysis (LA)

Examination of the traditional techniques of musical form and structure and their application to compositions primarily from the 18th and 19th centuries. Prerequisites: MUTH 22200 or MUTH 22201. (F)

2 Credits

MUTH 32101 Form and Analysis -- Honors (LA)

A more in-depth study of the material covered in MUTH 32100.

Prerequisite: MUTH 22201 or excellent achievement in MUTH 22200 and departmental approval. (F)

2 Credits

MUTH 32200 Analysis of Music since 1900 (LA)

Study of harmonic, rhythmic, melodic, and formal techniques from about 1900 to the present. Introduction of various analytical systems.

Prerequisites: MUTH 22200 or MUTH 22201. (S)

2 Credits

MUTH 32201 Analysis of Music since 1900 - Honors (LA)

A more in-depth study of the material pertaining to the harmonic, rhythmic, melodic, and formal techniques from about 1900 to the present covered in MUTH 32200. Prerequisite: MUTH 32101. (S)

2 Credits

MUTH 34100-34200 Composition (NLA)

Study and application of the techniques necessary for coherent expression in creative musical work. Students are assigned original compositions to explore motivic, harmonic, and formal design, as well as style, idiom, and orchestration, in order to create effective and meaningful works. Registration is based on previous written work and the permission of the instructor. Private tutorial instruction and one class meeting per week. Prerequisites: MUTH 24200. (F,S)

3 Credits

MUTH 34500 Orchestration for Composers I (LA)

This course is an intensive study of orchestration techniques from the early Classical period to the 21st Century from a compositional perspective. Students will analyze instrumental/orchestral works and transcribe piano/small chamber scores. Prerequisites: MUTH 24100. (S,E)

2 Credits

MUTH 35300-35312 Selected Topics in Music Studies (LA)

Selected Topics in Music Studies provides students with the opportunity for in-depth academic study in any area of music including but not limited to music history, music theory, composition, ethnomusicology, or some combination thereof, and will build on material discussed in Music Theory I and II; Music in Context: The Academy, the Temple, and the Palace; Music in Context: The Stage, the Home, and the Marketplace; and Aural Skills I – III. #Possible topics include The American Avant-Garde: Analysis of Contemporary Opera; Stylistic Composition. Prerequisites: MUTH 22400 and MUTH 25300 or MUTH 25400. (F,S,Y)

3 Credits

MUTH 35400-35412 Selected Topics in Music Studies (WI) (LA)

This course provides students with the opportunity for in-depth academic study in any area of music including but not limited to music history, music theory, composition, ethnomusicology, or some combination thereof, and will build on material discussed in Music Theory I and II, Music in Context I and II, and Aural Skills I – III. # Students compose one or more documents totaling at least 3000 words through multiple stages of writing, including brainstorming, drafting, integrating sources, and revising comprehensively after receiving substantial, formative feedback on drafts. Possible topics include The American Avant-Garde: Analysis of Contemporary Opera; Stylistic Composition. Prerequisites: MUTH 22400 and MUTH 25300 or MUTH 25400 and WRTG 10600 or ICSM 10800 or ICSM 11800. (IRR)

Attributes: WI

3 Credits

MUTH 35500 History and Literature of Music III (LA)

Examination of musical practices, styles, social institutions, and cultural events from approximately 1900 to today. Using a case method pedagogy, this class studies narratives about specific moments in time in order to develop critical musicological skills. Students will be actively participating in the creation of knowledge through inquiry and research related to each case study. Prerequisites: MUTH 25600. (F)

Attributes: 3B, G, H, HU

3 Credits

MUTH 36000 Chord Symbol Realization at the Keyboard (LA)

Decode and perform the two most common keyboard notation shorthands used in Western music—figured bass and lead-sheet symbols. Explore useful voicing techniques in various contexts. Prerequisites:

MUTH 22200 or MUTH 22400. (S,E)

1 Credit

MUTH 42100 Topics in Music Theory and Analysis (LA)

Changing topics in music theory and analysis. Prerequisites:

MUTH 32200 or MUTH 32201. (Y)

2 Credits

MUTH 42900 Advanced Aural Skills (LA)

Extends aural skills developed in lower-level courses in the aural skills, music theory, and music history core, including emphases on formal analysis and music since 1900. Prerequisites: MUTH 23400 or MUTH 23401; MUTH 32100 or MUTH 32101; MUTH 35500; and prior or concurrent registration in MUTH 32200 or MUTH 32201. (S,B,O)

1 Credit

MUTH 43100 Sixteenth-Century Counterpoint (LA)

Study of polyphonic techniques based on the stylistic principles of the 16th-century sacred literature. Composition of canons, motets, and movements from the mass. Prerequisites: MUTH 25500 and MUTH 23300 or MUTH 23301. (F,O)

2 Credits

MUTH 43200 Eighteenth-Century Counterpoint (LA)

Study of polyphonic techniques based on the stylistic principles of the 18th-century keyboard literature. Invention (two- and three-voice), chorale prelude, canon, and fugue are studied. Analysis and written projects. Prerequisites: MUTH 22200, MUTH 25600, and MUTH 23300 or MUTH 23301. (F,E)

2 Credits

MUTH 43500 Choral Arranging (LA)

Arranging for elementary through high school choruses and special choirs. Analysis and study of choral part-writing, encompassing unison, simple two-, three-, and four-part, and multi-voice units. Prerequisites: MUTH 22200 or MUTH 22201. (Y)

2 Credits

MUTH 43700 Instrumentation and Orchestration (LA)

Study of orchestral and band instruments in terms of range, transposition, and individual characteristics. Scoring of works for both standardized and less common ensembles of various sizes.

Prerequisites: MUTH 32200 or MUTH 32201. (F,S)

2 Credits

MUTH 44100-44200 Composition (NLA)

Study and application of the techniques necessary for coherent expression in creative musical work. Students are assigned original compositions to explore motivic, harmonic, and formal design, as well as style, idiom, and orchestration, in order to create effective and meaningful works. Registration is based on previous written work and the permission of the instructor. Private tutorial instruction and one class meeting per week. Prerequisites: MUTH 34200. (F,S)

3 Credits

MUTH 44300 Pedagogy of Music Theory (NLA)

A survey of the pedagogical aspects of teaching music theory and aural skills on the high school and college levels. Focus on current approaches, presentation, and implementation of materials suitable for the study of theory, harmony, and aural skills. Prerequisites: MUTH 32100 or MUTH 32101. (S, O)

3 Credits

MUTH 44500 Orchestration for Composers II (LA)

This course is a continuation of MUTH 34500. The course is an intensive study of orchestration techniques from the early Classical period to the 21st Century from a compositional perspective. Students will learn to transcribe piano/small chamber scores, works for orchestra, and will learn to reduce orchestral works to scores for one or two pianos.

Students will also write original, short compositions for orchestra.

Prerequisites: MUTH 34500. (F,O)

2 Credits

MUTH 45100 Instrumental Chamber Music Literature (LA)

A historical survey of instrumental chamber music from the Renaissance to the present. Prerequisites: MUTH 35500. (S,E)

3 Credits

MUTH 45200 The History and Literature of the Art Song (LA)

A broad historical survey of the secular art song from the Middle Ages to the present, with greatest emphasis placed on the German, French, Italian, and English song repertory of the 18th and 19th centuries.

Prerequisites: MUTH 35500. (IRR)

Attributes: GERM

3 Credits

MUTH 45700 History and Literature of Opera (LA)

Traces the history, development, and repertory of opera from the beginning of the Baroque period to the present. The primary focus of the course, however, is on the standard performing repertory from Handel through Britten. Live performance in class and video excerpts of great performances provide stimuli for class discussion. Prerequisites: MUTH 35500. (Y)

Attributes: FA

3 Credits

MUTH 45800 The Symphony (LA)

The study of orchestral music, tracing its development from the baroque era to the present. Representative examples of the concerto and symphonic poem are included. Prerequisites: MUTH 35500. (S,O)

3 Credits

MUTH 46400 Introduction to Composition (LA)

The study and practice of compositional procedures used in traditional and contemporary concert music, leading to composing brief works for solo instruments and small chamber ensembles. Prerequisites: MUTH 22200 or MUTH 22201; MUTH 23400 or MUTH 23401.

Corequisites: MUTH 35500. (F)

2 Credits

MUTH 49100 Advanced Music Theory Seminar I (LA)

Introduction to Schenkerian notation and thought; discussion of interdisciplinary approaches to music theory and current trends in music theory, overview of discipline of music theory, exploration of relationships between liberal arts studies and studies in music theory. Prerequisites: MUTH 32200 or 32201. (F)

Attributes: CP

1 Credit

MUTH 49200 Advanced Music Theory Seminar II (LA)

Current trends in music theory, overview of discipline of music theory, mathematically-based research in music theory, application of relationships between liberal arts studies and studies in music theory.

Prerequisites: MUTH 49100. (S)

Attributes: CP

1 Credit

MUTH 49800 Composition Recital (NLA)

Performance of representative compositions. The program should include approximately 45 minutes of music. (F,S)

Attributes: CP

2 Credits

Music-Miscellaneous (MUMC)

MUMC 10100 Required Recital Attendance (NLA)

All full-time students in the School of Music are required to attend 12 performances during the semester. The distribution is as follows: at least 3 Guest Artist or Faculty, at least 3 ensemble, at least 3 student, and 3 free choice (any of the above or a master class). The associate dean will determine how this policy applies to transfer students. Additional attendance requirements are at the option of the major teacher. (F,S)

Attributes: FA

0 Credit

MUMC 10300 Introduction to Music Technology (NLA)

Introduction to hardware and software technologies and their specific application to the music field. This course requires music reading ability and basic keyboard skills. Prerequisites: majors in the School of Music or consent of the instructor. (F-S)

Attributes: TE

1 Credit

MUMC 14000 Musical Theater Rehearsal and Performance (NLA)

Participation in rehearsal and performance of a major musical theater production sponsored jointly by the Department of Theatre Arts in the School of Humanities and Sciences. Students receive credit for assignments in instrumental or vocal performance. Evaluated for pass/fail grade only by the music faculty member in charge of the designated area of specialization. Evaluation based on degree of professional attitude and quality of performance. Audition required prior to enrolling. Class meeting: Varies according to the extent of the role/credit granted. Music students may not enroll in THPA 13000 Rehearsal and Performance. May be taken for a maximum of (F-S)

0-2 Credits

MUMC 14500 Introduction to Electroacoustic Music (LA)

Introduces the essential elements of classical and contemporary electroacoustic music. Theoretical and practical studies focus on the elements of sound synthesis, audio mixing, and recording. Students are exposed to major works in the classical electroacoustic field while creating their own compositions. No prior formal training in music or electronics is required. Students meet for one lecture and one lab per week and are assigned biweekly studio time for assignments and their own explorations. (F,S,Y)

Attributes: 3B, FA

2 Credits

MUMC 16100 Diction I (NLA)

A detailed study of the International Phonetic Alphabet, with particular attention to the rules and symbols of English, Italian, and German diction. Application of rules through written assignments, oral drill, language lab work, and individual performance in class. (F)

Attributes: GERM

2 Credits

MUMC 16200 Diction II (NLA)

A detailed study of the International Phonetic Alphabet, with particular attention to the rules and symbols of French diction. Application of rules through written assignments, oral drill, language lab work, and individual performance in class. Prerequisites: MUMC 16100 or MUPS 16100. (S)

2 Credits

MUMC 16300 Diction for the Non-Vocal Music Major (NLA)

The study of the International Phonetic Alphabet (IPA) as it relates to English, Italian, German, and French vowel and consonant sounds. Application of rules through written assignments, oral drill, language lab work, and individual performance in class. For music majors in the Music Education and four-and-one-half-year programs, piano and guitar tracks. (S)

2 Credits

MUMC 16600 Career Orientation (NLA)

Lectures, films, panel discussions, workshops, and performances present thorough coverage of careers in the music field. Members of the School of Music faculty, all of whom are experienced in the areas they discuss, are present during class sessions. These appearances, together with those of selected off-campus guests, permit a realistic appraisal of current vocational opportunities. Students are assisted in (1) selecting goals in the music profession that are realistic in view of present conditions of employment, and (2) evaluating their career goals in light of their own qualifications and those apparently essential for success in the field. Also provides a summary of United States copyright law and its implications for music teachers, performers, and composers. (S)

1 Credit

MUMC 19900-19901 Independent Study: Music (NLA)

Independent study under the direction of a music faculty member for areas of study otherwise not available in the curriculum. A written proposal must be submitted not later than the end of the first week of classes. Requires approval of the sponsoring faculty member and the dean. Request forms for independent study are available in the music office. Also offered through the London Center. (F-S)

1-3 Credits

MUMC 21000 Scoring for Visual Media I (NLA)

This course introduces students to the theory and practice of musical scoring for film and other visual media. Students will learn the technical processes of syncing music to image, compositional strategies and techniques used to support the visual narrative, and the use of software and sample libraries for the creation of film scores. Students will develop the ability to understand musical and visual decisions made in the film making process. Course includes practical scoring exercises and projects. Prerequisites: MUTH 10100. (FY)

2 Credits

MUMC 21100 Music in NYC (LA)

A seminar designed around music performances such as orchestral, opera, musical theatre, chamber, and new music performances programmed in NYC during the semester. Students enrolled in the ICNYC program will attend a planned selection of at least seven performances and meet weekly for preparation, discussion, and reflection. As appropriate students will have the opportunity to attend rehearsals and meet the artists. Prerequisites: Sophomore standing and MUTH 12100. (F)

3 Credits

MUMC 22000 Acting and Movement for the Singing Performer (NLA)

An interdisciplinary course designed to develop body awareness and theatrical acting skills for singers. Emphasis on acting techniques and styles of movement. Culminates in a performance of a song or aria, using acting styles and movement techniques to create a fully formed, identifiable stage persona. Prerequisites: PFMJ 20100. (F)

2 Credits

MUMC 22100 NYC Music Special Topics Mini-Course (LA)

Exploration and discussion of a special topic over two or three days and linked to events in NYC. Prerequisites: Sophomore standing and music majors only. (F)

1 Credit

MUMC 24500 Music Industry Past and Present: History of Recorded Music (LA)

Historical survey of the past 150 years in music making, told through the lens of recording technology. Emphasis on the evolution of recording technology and exploration of its role in the musical experience. Through four chronologically oriented units, students explore the specific equipment developed, operational techniques, key figures in the industry, technology's relationship with prevalent musical styles, and relevant sociological effects. Prerequisite: sophomore standing. (S)

Attributes: CA, MAP, TIII, TWOS
3 Credits

MUMC 24800 Digital Sound Production (LA)

This studio-oriented course explores the concepts and basic applications of MIDI systems. Students learn to use software sequencers in the process of composing and creating classical, electroacoustic, and popular music. This course may be used as a music elective for the bachelor of music degree. Students meet for one lecture and one lab per week, and are assigned biweekly studio time for assignments and their own explorations. Prerequisites: MUMC 14500. (S)

Attributes: FA
2 Credits

MUMC 24900 Techniques and Analysis of Electroacoustic Music Composition (LA)

An elective for the music major or non-music major with prior electroacoustic composition experience. Subjects covered include alternate MIDI controllers, advanced sequencing techniques, timbre design using a variety of contemporary synthesis techniques, and analysis of representative electroacoustic works by contemporary composers. This course may be used as a music elective for the bachelor of music degree. Students meet for one lecture and one lab per week, and are assigned biweekly studio time for assignments and their own composing. Prerequisites: MUMC 14500; MUMC 24800. (IRR)

Attributes: FA
2 Credits

MUMC 25000 Digital Recording and Editing (LA)

Enables students to develop expertise in the art and science of digital recording and sound sampling. Topics include the theory and practice of digital recording, editing, and mixing; field sample collection; and music composition techniques using digital recording software. This course may be used as a music elective for the bachelor of music degree. Students meet for one lecture and one lab per week, and are assigned biweekly studio time for assignments and their own composing. Prerequisites: MUMC 14500. (F)

Attributes: FA
2 Credits

MUMC 25500 Basics of Vocal Mechanics (NLA)

Explore the functions and human anatomy involved in using the voice: body alignment, breathing, phonation, resonance, and articulation. Students engage in classroom activities and demonstrations that provide visual, aural and kinesthetic illustrations that enhance their working understanding of the vocal instrument. Additionally, this course serves to educate students on vocal health, wellness and hygiene. Appropriate for vocalists, instrumentalists, actors, and other students pursuing professions that require an understanding of the mechanics of the singing instrument. (S,F,B)

1 Credit

MUMC 27300 Music Recital (NLA)

A solo or shared public recital. Full recitals (approximately one hour in length) are normally 1 or Shared or shorter programs are normally .5 - 1 cr. (F,S)

0.5-2 Credits

MUMC 27700 Introduction to the Organ (NLA)

Basic instruction in playing the organ, with an overview of organ history and construction. Covers the basics of legato, including substitution and thumb glissando, as well as pedal playing. Weekly meetings in a seminar setting include lecture, written, and keyboard components. Prerequisites: PFSM 17600. (F,S)

1 Credit

MUMC 27900 Introduction to the Harpsichord (NLA)

Basic instruction in playing the harpsichord, as well as insight into playing continuo, with an overview of harpsichord history, literature, and construction, and the basics of figured bass realization and figured bass in the context of continuo accompaniment. Adaptation of realized continuo parts into more usable accompaniments is emphasized.

Prerequisites: PFSM 17600. (F,S)

1 Credit

MUMC 28100 Selected Topics in Music (LA)

Study of topics in music chosen by the instructor and approved by the appropriate department chair. Prerequisites: As appropriate to the topic.

Attributes: FA

1-3 Credits

MUMC 29900-29901 Independent Study: Music (NLA)

Independent study under the direction of a music faculty member for areas of study otherwise not available in the curriculum. A written proposal must be submitted not later than the end of the first week of classes. Requires approval of the sponsoring faculty member and the dean. Request forms for independent study are available in the music office. Also offered through the London Center. (F-S)

1-3 Credits

MUMC 35100 Reaching Out to Audiences (LA)

An exploration of how musicians can reach and build broader audiences for the various genres of classical music. Topics include the importance of community involvement, musicians' interaction with audiences, visual presentation of performance (e.g., multimedia, lighting), presenting 20th- and 21st-century music to diverse audiences, connecting with music education programs in colleges and the public schools, and understanding several aspects of music management. Class meetings:

Two hours per week for one block. Prerequisites: Two semesters of private lessons at level 2. (F,S)

1 Credit

MUMC 35500 Composition for Multimedia (LA)

This course offers a theoretical and practical introduction to the art and craft of composition for multimedia. It comprises lectures on theoretical aspects of sound and image and their relationship, as well as practical, hands-on projects in various media. Students will develop skills in underscoring for film and scoring for gaming and other interactive media using appropriate compositional techniques and strategies. Students will learn to use technology that effectively integrates sound and visual media, making use of special effects informed by audiovisual literature and psychoacoustics. Students meet for one lecture and one lab per week. Prerequisites: MUMC 14500 and MUTH 11100 or MUTH 11200. (E,F)

2 Credits

MUMC 35700 Creative Sound Design (LA)

This course focuses on the theoretical and practical study of creative sound design through exploring software and hardware and applying electronic music composition processes and techniques. Topics include the history, theory, aesthetics, repertoire, and practice of electronic music, as well as studio techniques and copyright principles. Students will complete practical and theoretical projects and use a variety of Digital Audio Workstations. The course will meet for one lecture and one lab a week. Prerequisites: MUMC 14500. (F,O)

2 Credits

MUMC 37100 Band Instrument Management and Maintenance (NLA)

An introduction to the methods, procedures, and terminology necessary to organize, maintain, and distribute an inventory of brass and woodwind instruments in a public school setting. Addresses basic inspection and cleaning techniques, as well as preventative maintenance and instrument storage issues. Inventory control procedures, contracts, and repair budget estimation are covered. This course is open to all instrumental and vocal music majors who plan to teach in public or private schools. Prerequisites: Junior standing. (S,B)

1 Credit

MUMC 37300 Required Junior Recital (NLA)

As a condition for graduation, students in the performance and four-and-a-half year programs are required to present a junior solo recital approximately one hour long. (F,S)

1 Credit

MUMC 37500 Style Registration in Organ Music (LA)

Study of various stylistic concepts in organ composition and the corresponding types of registration. Exercises in the appropriate registration for instruments of different specifications. (IRR)

2 Credits

MUMC 38100 Selected Topics in Music (LA)

Study of topics in music chosen by the instructor and approved by the appropriate department. Prerequisites: As appropriate to the topic.

1-3 Credits

MUMC 39000 Internship: Music (NLA)

Practical experience in a music-related field. A supervised work experience with a cooperating institution or business to provide the student with an opportunity to meet active professionals and to guide career planning. The student must develop a proposed project and carry out its requirements under the supervision of a faculty sponsor. Pass/fail only. Prerequisites: Junior or senior standing; approval of faculty sponsor and dean. (F-S)

1-3 Credits

MUMC 39900-39901 Independent Study: Music (NLA)

Independent study under the direction of a music faculty member for areas of study otherwise not available in the curriculum. A written proposal must be submitted not later than the end of the first week of classes. Requires approval of the sponsoring faculty member and the dean. Request forms for independent study are available in the music office. Also offered through the London Center. (F-S)

1-3 Credits

MUMC 40300 Computer Technology in Music Education (NLA)

Advanced course in computer technology for students majoring in music education. Activities include surveying current CAI materials, creating MIDI and digital audio resources for web delivery, and developing musical resources designed for use in teaching. Prerequisites: MUMC 10300; MUED 36900, MUED 37000, MUED 37100, or MUED 37200. (F-S)

2 Credits

MUMC 40400 Interactive Multimedia Design for Musicians (NLA)

Advanced course for musicians interested in learning how to design and create interactive multimedia. The goal is to help students learn to create different types of multimedia materials specifically designed to focus on their area of musical interest and expertise. These materials may take many different forms, but they will all be content rich and stress the musicianship and interests of each individual student. Prerequisites: MUMC 10300 and MUTH 32100 or MUTH 32101. (S)

2 Credits

MUMC 41000 Feldenkrais (NLA)

This course is based on the Awareness Through Movement® lessons developed by Moshe Feldenkrais. Through gentle movement sequences, musicians can learn to improve coordination, posture, and balance, which can lead to more artistic performance. Prerequisites for music majors: Junior standing. Prerequisites for non-music majors: Permission of instructor. (F)

1 Credit

MUMC 41100 Creative Arts Methods for Older Adults (NLA)

Techniques for developing a creative arts program including music, drama, and movement for older adults. The process combines an overview of gerontological issues and their relationship to the needs of older adults. Classes meet on campus and at local adult-care facilities. Prerequisites: Junior standing. (S,O)

3 Credits

MUMC 44500 Musical Theater Workshop (NLA)

A team-taught, interdisciplinary, performance-oriented course designed to integrate musical and theater performance skills through the selection, development, and presentation of scenes from musicals. Audition required. Prerequisite: Permission of instructor. (F-S)

2 Credits

MUMC 44700 Opera Workshop (NLA)

A team-taught, interdisciplinary, performance-oriented course designed to integrate musical and theater performance skills through the presentation of scenes from the standard and contemporary operatic repertoire. Audition required. Prerequisite: Permission of instructor. (F-S)

2 Credits

MUMC 44800 Audio Repair, Maintenance, and Calibration (NLA)

A workshop course on the theoretical and practical skills behind normal maintenance and calibration of both analog and digital equipment in the audio recording studio. This includes tape head alignment, level calibration, mixing console maintenance and repair, the development of troubleshooting and analytical skills, room equalization and acoustics, computer repair, maintenance, and memory management. Prerequisites: COMP 17100; PHYS 16000 or THPA 30600. (F,B)

2 Credits

MUMC 45000 Scoring for Visual Media II (NLA)

This course is a continuation of MUMC 21000. This course presents an examination and application of the aesthetic, technical, and compositional decision-making processes used in scoring for film and television. Students study the roles of music in film and television and the compositional techniques used to further the drama and plot. They learn about the mechanics of synchronization, including free-timing, the use of click tracks, and Society of Motion Picture and Television Engineering synchronization, and then apply them in their own scores. The class studies representative cues from classic and contemporary film music repertoire. Students participate in spotting, scoring, mixing, and recording their own cues. Prerequisites: MUMC 21000; MUTH 34500, MUTH 43700, or JAZZ 32600 may be taken as a prerequisite or a corequisite. (S,E)

2 Credits

MUMC 45500 Vocal Pedagogy : Application and Practice of Voice Teaching (NLA)

This course combines lecture and experiential components related to teaching voice in the private lesson setting. The pedagogy of teaching voice, including teaching methods, voice science, performance psychology, and artistic concerns will be covered. In addition, students will teach one volunteer student in weekly singing lessons, culminating in a volunteer student recital. Included in the course are aspects of the business of running an independent voice studio. (Y)

2 Credits

MUMC 46000 Opera in London (LA)

The class takes advantage of the wide range of operatic activity in London, not only by attending as many live performances as possible, but also by meeting with opera performers and directors and by making backstage visits to London's two main opera houses. Offered through the London Center. (S)

3 Credits

MUMC 46100 Senior Seminar in Music, Liberal Arts, and Outside Fields (LA)

A capstone experience for students in the Bachelor of Music in Combination with an Outside Field and the Bachelor of Arts degree programs. Students will engage in individual research that combines music with another major area of interest and that explores the relationship between music and each student's studies in liberal arts and outside fields. Discussions will center on developing and understanding these relationships. Presentations and a final eportfolio are required. Presentation projects may be based in part on performances, internships, or other experiential learning. Prerequisites: Senior standing; open only to majors in BA music and BM in Combination with an Outside Field. (S)

Attributes: CP

2 Credits

MUMC 46900 String Instrument Maintenance and Repair (NLA)

An introductory course dealing with string instrument adjustments, troubleshooting, and emergency repairs typically encountered by teachers in public school music programs. Prerequisites: Senior standing. (S,O)

1 Credit

MUMC 47000 Introduction to Brass Repair (NLA)

An introduction to the care, maintenance, and repair of the trumpet, horn, trombone, and tuba. (IRR)

1 Credit

MUMC 47100 Introduction to Woodwind Repair (NLA)

An introduction to tools and tool making, care of woodwinds, emergency repairs, basic clarinet repair skills, and flute and saxophone work. This course is less detailed than MUMC 47200. Those electing this course may not enroll in the spring-semester offering of MUMC 47200. (F)

1 Credit

MUMC 47300 Required Senior Recital (NLA)

As a condition for graduation, students in the performance and four-and-a-half-year programs are required to present a senior solo recital, approximately one hour long. (F,S)

2 Credits

MUMC 47301 Senior Voice Recital (NLA)

As a condition for graduation, students in the performance and four-and-a-half year programs are required to present a senior solo recital, approximately one hour long. This capstone experience includes preparation through private voice lessons as well as study of the languages, poetry, and musical and dramatic elements with a vocal coach. Prerequisites: MUMC 37300. (F,S)

Attributes: CP

2 Credits

MUMC 47500 Required Collaborative Recital (NLA)

Students prepare and perform a recital of standard length (approximately 50-60 minutes), composed of approximately one-half vocal and one-half instrumental literature, in collaboration with students from other studios. Students may also fulfill this requirement by appearing in two separate recitals (one instrumental, one vocal) and performing at least half of each recital. Repertoire is approved and coached by the supervising faculty member in PFMJ 44700-PFMJ 44800 Private Accompanying. Grading is by faculty committee. Prerequisites: Senior standing; piano performance-collaborative emphasis major; prior or concurrent registration in PFMJ 44700. (F-S,Y)

1 Credit

MUMC 48100 Selected Topics in Music (LA)

Study of topics in music chosen by the instructor and approved by the appropriate department. Prerequisites: As appropriate to the topic.

1-3 Credits

MUMC 48300 Performance Studies in Early Music (LA)

The study and performance of early music for singers and instrumentalists. Projects require transcribing music from primary and secondary sources, studying performance techniques on available historical instruments, and rehearsing and performing the transcribed music. Historical authenticity versus modern practicality are discussed. May be repeated for credit. (F-S)

2 Credits

MUMC 48500 Survey of Piano Literature I (LA)

The study of piano literature from the high baroque through the middle romantic periods. The unique facets of each style are explored through analysis, outside readings, score study, guided listening, and individual performances. Periodic examinations and individual projects are required.

The course includes one hour of lecture and one half-hour lab meeting weekly, and is required of keyboard majors in the performance program in the senior year. (F,IRR)

1 Credit

MUMC 48600 Survey of Piano Literature II (LA)

The study of piano literature from the middle romantic period through the 20th century. The unique facets of each style are explored through analysis, outside readings, score study, guided listening, and individual performance. Periodic examinations and individual projects are required.

The course includes one hour of lecture and one half-hour lab meeting weekly, and is required of keyboard majors in the performance program in the senior year. (S,IRR)

1 Credit

MUMC 48700 String Literature and Practices (LA)

The study of string literature from the 17th century through the present. The unique facets of each style are explored through analysis, outside readings, score study, guided listening, and individual performances.

The course includes weekly aural assignments, individual projects, and periodic examinations. (IRR)

2 Credits

MUMC 49000 Internship: Music (NLA)

Practical experience in a music-related field. A supervised work experience with a cooperating institution or business to provide the student with an opportunity to meet active professionals and to guide career planning. The student must develop a proposed project and carry out its requirements under the supervision of a faculty sponsor. Pass/fail only. Prerequisites: Junior or senior standing; approval of faculty sponsor and dean. (F-S)

Attributes: UND

1-3 Credits

MUMC 49300 Piano Pedagogy (NLA)

In-depth study for keyboard majors of methods and materials pertaining to the study of piano as both a major and a minor instrument. Special consideration is given to the area of beginning piano study. Various aspects of both group and individual lessons are considered. (S,IRR)

2 Credits

MUMC 49400 Piano Technology (NLA)

Study of the art and science of piano tuning, repair, and action regulating, including history of the piano and its predecessors; physics of keyboard instruments; and practical work in maintaining and rebuilding pianos. (F)

2 Credits

MUMC 49900-49901 Independent Study: Music (NLA)

Independent study under the direction of a music faculty member for areas of study otherwise not available in the curriculum. A written proposal must be submitted not later than the end of the first week of classes. Requires approval of the sponsoring faculty member and the dean. Request forms for independent study are available in the music office. Also offered through the London Center. (F-S)

Attributes: TE

1-3 Credits

Occupational Therapy-Undergrad (OTBS)

OTBS 10000 Introduction to Occupational Therapy (NLA)

Explore how practitioners in the field of occupational therapy use purposeful activity to promote health and wellness at individual and population levels. Investigate current areas of practice for occupational therapists and explore the historical roots of the profession. (S,Y)

1 Credit

OTBS 10600 Introduction to Occupational Science (LA)

An overview of the science of human occupation and theoretical models that are used to describe the impact of occupation on individuals. Includes the personal, physical, psychosocial, cultural, and environmental factors of work, self-care, and play/leisure. An introduction to the domain of occupational therapy is included. (F-S, Y)

3 Credits

OTBS 20100 Human Development I (LA)

Explore developmental theories as they pertain to child development and childhood occupations. Study how children develop by examining theories and principles pertaining to the development of cognition, social and emotional behaviors, sensorimotor skills, play skills, and social identities. Apply developmental theories to developmental patterns and observations of children. Prerequisites: OTBS 10000. (F,S,Y)

Attributes: 1

3 Credits

OTBS 20200 Human Development II (LA)

Explore theories and factors influencing typical developmental progression from adolescence through older adulthood. Study how adolescents and adults develop by examining theories and principles pertaining to the development of cognition, social and emotional behaviors, sensorimotor skills, and social identities. Examine self-care, work, play, and leisure occupations related to development and role performances through older adulthood. Prerequisites: OTBS 20100. (F,S,Y)

Attributes: 1

3 Credits

OTBS 20600 The Culture of Disability (LA)

An examination of the historical and sociocultural construction of disability through readings, discussion, film, and personal narrative. The history of several disability groups will be used as case studies to analyze the ideological, socioeconomic, political, and cultural experience of disability. Prerequisites: Sophomore standing or permission of instructor. (F,Y)

Attributes: 1, DV, H, SS

3 Credits

OTBS 21000 The Cancer Experience (LA)

Introduction to the major types of cancer, impact of cancer on the individual, basic medical terminology, cultural differences in types of cancer, and external and internal influences on cancer, as well as treatment, adjustments, and coping strategies. Prerequisites: Sophomore standing. (IRR)

Attributes: SO, TIDE, TMBS

3 Credits

OTBS 21100 Occupational Therapy in Life Skills (NLA)

Concepts of occupational therapy and other allied health disciplines are applied through observation and direct interaction with the neurologically impaired adult population, attending interdisciplinary team meetings and rounds, and seminar group discussions. Emphasis is on integrating professional behaviors, group activities, basic activity analysis, medical record documentation and client/family interaction within a clinical setting. Prerequisites: OTBS 10600. (S,Y)

1-2 Credits

OTBS 22000 Adult Clinical Practice in Occupational Therapy (NLA)

Observation and participation in clinical treatment provided through the OT/PT clinic at Ithaca College. Treatment of occupational therapy adult clients, as well as participation in other occupational therapy services provided by the clinic. The clinic will provide students with an experiential learning opportunity while serving the needs of adults in the college and local communities. Prerequisites: OTBS 10600. (F,S,U,Y)

1 Credit

OTBS 22100 Pediatric Clinical Practice in Occupational Therapy (NLA)

Observation and participation in clinical treatment provided through the OT/PT clinic at Ithaca College. Treatment of occupational therapy pediatric clients, as well as participation in other occupational therapy services provided by the clinic. The clinic will provide students with an experiential learning opportunity while serving the needs of children in the college and local communities. Prerequisites: OTBS 10600. (F,S,U,Y)

1 Credit

OTBS 30500 Applied Occupations (NLA)

Occupational therapy theory and process are the concentration of this course. Selected theoretical approaches used in occupational therapy are introduced, discussed, compared, and critiqued. Analysis of occupations using occupational therapy models is discussed and practiced. Historical, social, cultural, and political influences on theory development are examined. The teaching-learning process in therapy is applied to the therapeutic process. Prerequisites: OTBS 10600; OTBS 33500. (S,Y) 3 Credits

OTBS 30600 Occupational Apartheid (LA)

Expands on content from OTBS 10600. The premise of occupational justice will be explored: personal, political, historical, sociological, cultural, and environmental influences on individual. Engagement in occupation will be analyzed in relation to occupational apartheid. Application of methods to ameliorate identified problems will be incorporated. Prerequisites: OTBS 10600. (S,O)

Attributes: SS

3 Credits

OTBS 32000 Clinical Psychiatry in Occupational Therapy (NLA)

Study of the basic concepts of identification, definition, and management of psychosocial problems. Major pathological syndromes and their etiologies are examined. Includes an introduction to pharmacology and medical terminology. Emphasis is placed on understanding not only the pathology and medical treatment, but also the effect of the condition on the individual's ability to perform functional activities. Additional emphasis will be placed on children, the elderly, and interdisciplinary teams. Prerequisites: PSYC 32100; OTBS 20200. (S,Y)

3 Credits

OTBS 33500 Individual and Group Work in Health Sciences (LA)

Focuses on therapeutic use of self in individual and group relationships. Emphasis is on an action-based, helping, problem-solving model to guide individual interventions. Provides the cognitive, affective, and occupational basis to helping groups for various client populations and settings across the life span. Presents knowledge and experiential opportunity to gain skill to be a competent group leader. Lecture and lab format. This course includes a Level I Fieldwork experience. Prerequisites: PSYC 10300; OTBS 10600; OTBS 20100; OTBS 20200; and three credits in sociology and/or anthropology. (F,Y)

4 Credits

OTBS 38500 Quantitative Concepts in Professional Reasoning (LA)

An introduction to quantitative concepts as they relate to professional reasoning in clinical contexts. Particular emphasis will be placed on the statistical interpretation of clinical research studies, utilizing the interplay between descriptive and inferential techniques and critical statistical reasoning. Laboratory sessions focus on developing skills for analyzing data using a commercial statistical software package (SPSS), reflecting on concepts related to data analysis, and presenting quantitative information in charts and tables, and written and oral arguments. Corequisite: OTBS 46000. Prerequisites: Math placement group 1 or 2, or successful completion of MATH 10800 or MATH 11000 with a grade of C- or higher; junior standing. (F,Y)

Attributes: QL

3 Credits

OTBS 39900-39907 Selected Topics in Occupational Therapy

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

1-3 Credits

OTBS 40000 Functional Human Anatomy (LA)

Study of the gross anatomical components of the human body through the use of lecture and lab activities using models and electronic media. Emphasis is placed on the musculoskeletal, neurological, and vascular systems of the human body. Prerequisites: BIOL 20600, PTBS 31300, or EXSS 12000 and EXSS 12100 with a C or higher. (U,Y) 5 Credits

OTBS 41000 Neuroscience (LA)

Introduction to the science of the nervous system. Provides a framework for understanding the nervous system and the area of applied neurosciences. This course provides a scientific basis for improved patient care by clarifying the relationships between the nervous system and behavior. Selected laboratory and experiential activities enhance lecture, discussion, and reading materials. Prerequisite: OTBS 40000. (F,Y)

Attributes: NS

3 Credits

OTBS 42100 Kinesiology (LA)

The application of gross anatomy to the study of human movement, with emphasis on understanding the interrelated kinetics of normal motion of the musculoskeletal system as they influence functional activities. Evaluation procedures such as manual muscle testing (MMT), joint range of motion (ROM), palpation of surface anatomy, and kinesiological analysis of functional activities are used in laboratory sessions. Prerequisites: OTBS 40000. (F,Y).

Attributes: NS

4 Credits

OTBS 43000 Applied Interventions in Occupational Therapy (NLA)

Emphasis is on selected occupational therapy intervention methods. The use of orthotics as a preparatory method in intervention, the evaluation and intervention of biomechanical components, and prosthetics as an occupation-based activity are explored. Adaptation of methods of instructing activities of daily living and design of equipment are also covered. Prerequisites: OTBS 30500; OTBS 40000; OTBS 42100. (S,Y) 3 Credits

OTBS 44000 Concepts in Adult Occupational Therapy (NLA)

Concepts in occupational therapy for the adult population will be explored. Practice models that are suitable for the adult client population will be addressed within the context of the occupational therapy process. Includes a case based seminar to integrate theory with practice.

Prerequisites: OTBS 30500; OTBS 40000. (F,Y)

4 Credits

OTBS 44500 Concepts in Pediatric Occupational Therapy (NLA)

Concepts in occupational therapy for the pediatric population will be explored. Practice models that are suitable for the pediatric client population will be addressed within the context of the occupational therapy process. Includes a case based seminar to integrate theory with practice. Prerequisites: OTBS 30500; OTBS 40000. (S,Y)

4 Credits

OTBS 45000 Adult Evaluation and Intervention Processes in Occupational Therapy (NLA)

The occupational therapy evaluation and intervention processes for the adult population will be explored. This includes development of an occupational profile of the client and conducting an analysis of occupational performance. The intervention phase involves implementation and re-evaluation of the intervention plan. This course includes a clinical FW experience. Prerequisites: OTBS 30500; OTBS 32000; OTBS 40000. (F,Y)

3 Credits

OTBS 45500 Pediatric Evaluation and Intervention Processes in Occupational Therapy (NLA)

Explores the occupational therapy evaluation and intervention processes for the pediatric population. Emphasis placed on development of an occupational profile of the client, analysis of occupational performance, and implementation and re-evaluation of the intervention plan. Includes a clinical fieldwork experience. Prerequisites: OTBS 30500; OTBS 40000. (S,Y)

3 Credits

OTBS 46000 Research Methods in Occupational Therapy (LA)

Review of the basic methods and designs used in occupational therapy research and inquiry. Includes conceptual foundations of research, basic research methodology, and analysis and interpretation of data and reading and use of scholarly literature to write effective arguments. Emphasizes critical evaluation of occupational therapy research literature based on both quantitative and qualitative methods in order to develop evidence-based practitioners. Development of the components of the individual thesis proposal and comprehensive literature reviews with emphasis on writing for professional audiences. Prerequisites: WRTG 10600 or ICSM 10800 or ICSM 11800. Corequisite: OTBS 38500. (F,Y)

Attributes: WI

3 Credits

OTBS 46500 Occupational Therapy Research Seminar (NLA)

A seminar/tutorial-based course that builds on previous classes in research statistics and design, and on clinical/professional courses in the senior year. This course is taken with a faculty member who is conducting research in an area of interest to the student. Construction of a research paper, including the development of a problem statement and research questions suitable for thesis research, and support of these elements with a background, definition, and rationale. Oral presentation of the proposal is required. Prerequisites: OTBS 46000; senior status. (S,Y)

1 Credit

OTBS 47100 Adult Clinical Conditions in Occupational Therapy (NLA)

A study of selected systemic, medical-surgical, orthopedic, and neurological conditions. Basic concepts in the identification, definition, and medical management of these conditions affecting adults and older persons. Emphasis is placed on understanding not only the etiology, pathology, and medical treatment, but also the effect of the condition and its treatment on the person's ability to perform functional activities. Prerequisites: OTBS 40000. (F,Y)

3 Credits

OTBS 47500 Pediatric Clinical Conditions in Occupational Therapy (NLA)

Exploration of the salient medical background of pediatric diseases and conditions. Principles of medical management of selected systemic diseases in children and young adults as a basis for intervention by an occupational therapist. Prerequisites: OTBS 40000; OTBS 41000. (S,Y)

2 Credits

OTBS 48100 ICC Capstone in OT (LA)

Exploration and reflection upon the relationship between experiences with the Ithaca College core curriculum courses and the individual as an occupational being and emerging occupational therapy professional. Emphasis on the proposal, design, and creation of a reflective artifact that demonstrates the changes that have occurred as a result of the ICC experience inside and outside of the study of occupational therapy. An analysis of how learning in the Integrative Core Curriculum contributes to the preparation of the individual in the study of occupational therapy will be discussed and developed. Prerequisites: Senior, permission of instructor. (S,Y)

Attributes: CP

1 Credit

OTBS 49900-49903 Independent Study in Occupational Therapy (NLA)

Individual research and writing in a particular area of occupational therapy, supervised by a faculty member in the department. An approved design statement is required before registration for this course.

Prerequisites: Permission of supervising faculty member, student's adviser, department chair, and dean. (F-S,Y)

1-3 Credits

Performance Non-Major (PFNM)

PFNM 10100 Voice Non-Major (LA)

1-3 Credits

PFNM 10300 Piano Non-Major (NLA)

1-3 Credits

PFNM 10500 Organ Non-Major (LA)

1-3 Credits

PFNM 10700 Harpsichord Non-Major (LA)

1-3 Credits

PFNM 10900 Violin Non-Major (LA)

1-3 Credits

PFNM 11100 Viola Non-Major (LA)

1-3 Credits

PFNM 11300 Cello Non-Major (LA)

1-3 Credits

PFNM 11500 Double Bass Non-Major (LA)

1-3 Credits

PFNM 11700 Guitar Non-Major (LA)

1-3 Credits

PFNM 12100 Flute Non-Major (LA)

1-3 Credits

PFNM 12300 Oboe Non-Major (LA)

1-3 Credits

PFNM 12500 Clarinet Non-Major

1-3 Credits

PFNM 12700 Bassoon Non-Major (LA)

1-3 Credits

PFNM 12900 Saxophone Non-Major

1-3 Credits

PFNM 13100 French Horn Non-Major (LA)

1-3 Credits

PFNM 13300 Trumpet Non-Major (LA)

1-3 Credits

PFNM 13500 Trombone Non-Major (LA)

1-3 Credits

PFNM 13700 Bass Trombone Non-Major (LA)

Attributes: UND

1-3 Credits

PFNM 13900 Euphonium Non-Major (LA)

1-3 Credits

PFNM 14100 Tuba Non-Major (LA)

1-3 Credits

PFNM 14300 Percussion Non-Major (LA)

1-3 Credits

PFNM 16100-16200 Recorder Non-Major (LA)

1-3 Credits

PFNM 16300-16400 Electric Bass Non-Major (LA)

1-3 Credits

Performance-Major (PFMJ)

PFMJ 10000 Private Studio Performance Class (NLA)

A weekly performance class for students enrolled in PFMJ XXX00 Private Study. Functions as a lab for the private lesson. (FS)

0 Credit

PFMJ 10100 Voice I - Music Major (NLA)

The development of artistic vocal musicianship through the study and performance of carefully selected and individualized vocal literature. The acquisition of a functional vocal technique through attention to posture, breathing, tonal onset, vowel purity, reduction of inhibitory physical tensions, body coordination, and a balanced registration. Appropriate vocalises constructed to meet the individual technical problems of the student. Upper-level studies focus on range extension, vocal flexibility, melismatic singing, and the "messa di voce." (FS)

1-4 Credits

PFMJ 10101 Voice I - Music Minors (NLA)

The development of artistic vocal musicianship through the study and performance of carefully selected and individualized vocal literature. The acquisition of a functional vocal technique through attention to posture, breathing, tonal onset, vowel purity, reduction of inhibitory physical tensions, body coordination, and a balanced registration. Appropriate vocalises constructed to meet the individual technical problems of the student. Upper-level studies focus on range extension, vocal flexibility, melismatic singing, and the "messa di voce."

1 Credit

PFMJ 10102 Voice I - Secondary Instrument (NLA)

The development of artistic vocal musicianship through the study and performance of carefully selected and individualized vocal literature. The acquisition of a functional vocal technique through attention to posture, breathing, tonal onset, vowel purity, reduction of inhibitory physical tensions, body coordination, and a balanced registration. Appropriate vocalises constructed to meet the individual technical problems of the student. Upper-level studies focus on range extension, vocal flexibility, melismatic singing, and the "messa di voce."

1 Credit

PFMJ 10300 Piano I - Music Majors (NLA)

Repertoire is chosen by the instructor as appropriate for the technical abilities, stylistic awareness, and musical growth of the individual student. (FS)

1-4 Credits

PFMJ 10301 Piano I - Music Minors (NLA)

Repertoire is chosen by the instructor as appropriate for the technical abilities, stylistic awareness, and musical growth of the individual student. Variable credit.

1 Credit

PFMJ 10302 Piano I - Secondary Instrument (NLA)

Repertoire is chosen by the instructor as appropriate for the technical abilities, stylistic awareness, and musical growth of the individual student. Variable credit.

1 Credit

PFMJ 10500 Organ I - Music Majors (NLA)

Technical studies and selected pieces from Gleason, "Method of Playing Organ"; easier Bach works; works of appropriate difficulty from all periods. Hymn playing. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 10501 Organ I - Music Minors (NLA)

Technical studies and selected pieces from Gleason, "Method of Playing Organ"; easier Bach works; works of appropriate difficulty from all periods. Hymn playing.

1 Credit

PFMJ 10502 Organ I - Secondary Instrument (NLA)

Technical studies and selected pieces from Gleason, "Method of Playing Organ"; easier Bach works; works of appropriate difficulty from all periods. Hymn playing.

1 Credit

PFMJ 10700 Harpsichord I - Music Majors (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingering, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 10701 Harpsichord I - Music Minors (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingering, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice.

1-3 Credits

PFMJ 10702 Harpsichord I-Secondary Instrument (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingering, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice.

1-2 Credits

PFMJ 10900 Violin I - Music Majors (NLA)

Technique based on Carl Flesch's "Scale System": three-octave major and minor scales, arpeggios, chromatic scales, broken thirds, and selected one-string systems. Technical work on shifting and higher position playing, as well as bow technique covering détaché, martelé, staccato, and spiccato bow strokes. Representative études including Schradieck, Sevcik, Mazas, Whistler, and Kreutzer. Representative repertoire including concerti by Bach, Charles de Beriot, Pierre Rode, Ludwig Spohr, and Giovanni Viotti; solo sonatas and partitas by Bach; and sonatas by Handel, Corelli, Schubert, and Vivaldi. (F,S)

1-4 Credits

PFMJ 10901 Violin I - Minors (NLA)

Technique based on Carl Flesch's "Scale System": three-octave major and minor scales, arpeggios, chromatic scales, broken thirds, and selected one-string systems. Technical work on shifting and higher position playing, as well as bow technique covering détaché, martelé, staccato, and spiccato bow strokes. Representative études including Schradieck, Sevcik, Mazas, Whistler, and Kreutzer. Representative repertoire including concerti by Bach, Charles de Beriot, Pierre Rode, Ludwig Spohr, and Giovanni Viotti; solo sonatas and partitas by Bach; and sonatas by Handel, Corelli, Schubert, and Vivaldi.

1 Credit

PFMJ 10902 Violin I - Secondary Instrument (NLA)

Technique based on Carl Flesch's "Scale System": three-octave major and minor scales, arpeggios, chromatic scales, broken thirds, and selected one-string systems. Technical work on shifting and higher position playing, as well as bow technique covering détaché, martelé, staccato, and spiccato bow strokes. Representative études including Schradieck, Sevcik, Mazas, Whistler, and Kreutzer. Representative repertoire including concerti by Bach, Charles de Beriot, Pierre Rode, Ludwig Spohr, and Giovanni Viotti; solo sonatas and partitas by Bach; and sonatas by Handel, Corelli, Schubert, and Vivaldi.

1 Credit

PFMJ 11100 Viola I - Music Majors (NLA)

Basic technical work: posture, stretching, and strengthening exercises; principles of movement; Sevcik, op. 1, pt. 1, for left-hand fluency and efficiency; principles of string crossing; Sevcik, op. 2, pt. 3, for understanding right-hand and arm actions; tonal development; Sevcik, op. 8, shifting exercises; vibrato exercises. Flesch, "Scale System": three-octave scales, arpeggios, broken thirds, chromatics, and whole tone. Viola ensemble. Repertoire from Flackton and Marcello sonatas; Jacob, Sonata; Bach, Suites; Telemann, concerto and fantasias; movements from Vaughan Williams suite. Mazas, Kayser, and Bruni studies. Repertoire classes throughout four years include discussions on performance practice; films such as Rolland, Galamian, and Primrose; teaching practice; musical awareness. (F,S)

1-4 Credits

PFMJ 11101 Viola I - Music Minors (NLA)

Basic technical work: posture, stretching, and strengthening exercises; principles of movement; Sevcik, op. 1, pt. 1, for left-hand fluency and efficiency; principles of string crossing; Sevcik, op. 2, pt. 3, for understanding right-hand and arm actions; tonal development; Sevcik, op. 8, shifting exercises; vibrato exercises. Flesch, "Scale System": three-octave scales, arpeggios, broken thirds, chromatics, and whole tone. Viola ensemble. Repertoire from Flackton and Marcello sonatas; Jacob, Sonata; Bach, Suites; Telemann, concerto and fantasias; movements from Vaughan Williams suite. Mazas, Kayser, and Bruni studies. Repertoire classes throughout four years include discussions on performance practice; films such as Rolland, Galamian, and Primrose; teaching practice; musical awareness.

1 Credit

PFMJ 11102 Viola I - Secondary Instrument (NLA)

Basic technical work: posture, stretching, and strengthening exercises; principles of movement; Sevcik, op. 1, pt. 1, for left-hand fluency and efficiency; principles of string crossing; Sevcik, op. 2, pt. 3, for understanding right-hand and arm actions; tonal development; Sevcik, op. 8, shifting exercises; vibrato exercises. Flesch, "Scale System": three-octave scales, arpeggios, broken thirds, chromatics, and whole tone. Viola ensemble. Repertoire classes throughout four years include discussions on performance practice; films such as Rolland, Galamian, and Primrose; teaching practice; musical awareness.

1 Credit

PFMJ 11300 Cello I - Music Majors (NLA)

Technique including seating position and holding instrument, bowing, use of left hand, scales, arpeggios, broken thirds through tenths, position-setting double stops, (i.e., Rowell position exercise, thumb position, and shifting development). Emphasis is placed on introduction of bowing types and techniques and the art of good practicing. Representative études including Lee, op. 31; Duport, "Twenty-One Études"; Grutzmacher, book I; Franck, "12 Caprices"; Cossmann, "Studies". Representative repertoire including sonatas of Vivaldi, Marcello, Corelli, and Eccles; Bach, Suites 1-3; pieces such as Fauré's Elegy, Van Goens's Scherzo; concerti of Saint-Saëns, Boccherini (B-flat), and Haydn (C major). (F,S)

1-4 Credits

PFMJ 11301 Cello I - Music Minors (NLA)

Technique including seating position and holding instrument, bowing, use of left hand, scales, arpeggios, broken thirds through tenths, position-setting double stops, (i.e., Rowell position exercise, thumb position, and shifting development). Emphasis is placed on introduction of bowing types and techniques and the art of good practicing. Representative études including Lee, op. 31; Duport, "Twenty-One Études"; Grutzmacher, book I; Franck, "12 Caprices"; Cossmann, "Studies". Representative repertoire including sonatas of Vivaldi, Marcello, Corelli, and Eccles; Bach, Suites 1-3; pieces such as Fauré's Elegy, Van Goens's Scherzo; concerti of Saint-Saëns, Boccherini (B-flat), and Haydn (C major).

1 Credit

PFMJ 11302 Cello I - Secondary Instrument (NLA)

Technique including seating position and holding instrument, bowing, use of left hand, scales, arpeggios, broken thirds through tenths, position-setting double stops, (i.e., Rowell position exercise, thumb position, and shifting development). Emphasis is placed on introduction of bowing types and techniques and the art of good practicing. Representative études including Lee, op. 31; Duport, "Twenty-One Études"; Grutzmacher, book I; Franchomme, "12 Caprices"; Cossmann, "Studies." Representative repertoire including sonatas of Vivaldi, Marcello, Corelli, and Eccles; Bach, Suites 1-3; pieces such as Fauré's Elegy, Van Goens's Scherzo; concerti of Saint-Saëns, Boccherini (B-flat), and Haydn (C major).

1-3 Credits

PFMJ 11500 Double Bass I - Majors (NLA)

Technique including one- and two-octave scales up to C in thumb position. Bowing patterns including one, two, and three in a bow. Complete study of Simandl, "New Method for Double Bass," book 1, and Simandl, "30 Études." Studies from Sturm, "110 Studies," book 1. Solo repertoire chosen from sonatas by Marcello, Vivaldi, and others. (F,S)

1-4 Credits

PFMJ 11501 Double Bass I - Music Minors (NLA)

Technique including one- and two-octave scales up to C in thumb position. Bowing patterns including one, two, and three in a bow. Complete study of Simandl, "New Method for Double Bass," book 1, and Simandl, "30 Études." Studies from Sturm, "110 Studies," book 1. Solo repertoire chosen from sonatas by Marcello, Vivaldi, and others.

1 Credit

PFMJ 11502 Double Bass I - Secondary Instrument (NLA)

Technique including one- and two-octave scales up to C in thumb position. Bowing patterns including one, two, and three in a bow. Complete study of Simandl, "New Method for Double Bass," book 1, and Simandl, "30 Études." Studies from Sturm, "110 Studies," book 1. Solo repertoire chosen from sonatas by Marcello, Vivaldi, and others.

PFMJ 20700 Harpsichord II - Music Majors (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingering, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice. Co-requisite: PFMJ 19900.

PFMJ 30700 Harpsichord III - Music Majors (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingerings, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice. Co-requisite: PFMJ 19900.

PFMJ 34300 Percussion III - Music Majors (NLA)

The order and amount of study vary from student to student, depending on strengths and deficiencies upon matriculation. Variations also occur when a student, in consultation with the major teacher, decides to concentrate in one or more particular areas. An examination is conducted by the instructor at the end of each semester. This examination includes performance and sight-reading. Specific requirements are provided by the instructor. (F,S)

1-4 Credits

PFMJ 34302 Percussion III - Secondary Instrument (NLA)

The order and amount of study vary from student to student, depending on strengths and deficiencies upon matriculation. Variations also occur when a student, in consultation with the major teacher, decides to concentrate in one or more particular areas. An examination is conducted by the instructor at the end of each semester. This examination includes performance and sight-reading. Specific requirements are provided by the instructor.

1 Credit

PFMJ 34500 Drum Set III - Music Majors (NLA)

Continued private instruction in drum set with emphasis on style fluency. Focus on large ensemble performance practices. Engagement of transcription and execution technique. Repertoire may include Reed asymmetrical technical studies and Garibaldi linear concepts. Variations may occur when a student, in consultation with the major teacher, decides to concentrate in one or more particular styles. (F,S)

1-4 Credits

PFMJ 36300 Electric Bass III - Music Majors (NLA)

Soloing; modes and altered scales for improvisation; more advanced substitute chord changes; blues progressions and altered chord changes; longer duration chord changes; patterns and arpeggios; harmonic cycles; standard introduction and endings. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 36302 Electric Bass III - Secondary Instrument (NLA)

Soloing; modes and altered scales for improvisation; more advanced substitute chord changes; blues progressions and altered chord changes; longer duration chord changes; patterns and arpeggios; harmonic cycles; standard introduction and endings.

1 Credit

PFMJ 40100 Voice IV - Music Majors (NLA)

The development of artistic vocal musicianship through the study and performance of carefully selected and individualized vocal literature. The acquisition of a functional vocal technique through attention to posture, breathing, tonal onset, vowel purity, reduction of inhibitory physical tensions, body coordination, and a balanced registration. Appropriate vocalises constructed to meet the individual technical problems of the student. Upper-level studies focus on range extension, vocal flexibility, melismatic singing, and the "messa di voce." (F,S)

1-4 Credits

PFMJ 40300 Piano IV - Music Majors (NLA)

Repertoire is chosen by the instructor as appropriate for the technical abilities, stylistic awareness, and musical growth of the individual student. (F,S)

1-5 Credits

PFMJ 40500 Organ IV - Music Majors (NLA)

Bach, larger preludes and fugues, such as BWV 548 and 582; Franck, Chorales; 19th- and 20th-century virtuoso works by Vierne, Widor, Reger, Dupré, Reubke, Messiaen, etc. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 40700 Harpsichord IV - Music Majors (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingering, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 40900 Violin IV - Music Majors (NLA)

Continuation of all previous technical work. Representative études including Rode, "Caprices"; Gavinies, "Studies"; Paganini, op. 14 and the "24 Caprices." Representative repertoire including concerti by Saint-Saëns, Khachaturian, Tchaikovsky, Sibelius, Vivaldi ("Four Seasons"), and Prokofiev; solo sonatas and partitas by Bach; sonatas by Franck, Copland, Brahms, and Debussy; pieces by Bloch, Vaughan Williams, Stravinsky, and other 20th-century works. (F,S)

1-4 Credits

PFMJ 41100 Viola IV - Music Major (NLA)

Continuation of all previous work; establishing secure technical facility. Flesch, "Scale System"; advanced bowing and left-hand techniques. Viola ensemble. Studies from Fuchs, "Twelve Caprices"; Hermann, "Concert Studies"; Dont, "Études and Caprices," op. 35. Repertoire from Bartók; Walton; Hindemith; Jacob concertos; Vaughan Williams; Bloch and Reger suites; Bach, Violin Sonatas and Partitas; Brahms, sonatas; 20th-century literature. (F,S)

1-4 Credits

PFMJ 41300 Cello IV - Music Majors (NLA)

Continued study of scales, etc., as above; Bazelaire arpeggios. Representative études including the above and Paganini-Silva, "12 Caprices," and virtuosic solo pieces. Representative repertoire including suites; sonatas by Bach, Reger, Bloch; concerti by Locatelli, Bach, Beethoven, Brahms, Kodály, Shostakovich; Haydn; Dvorak (from list above); 20th-century pieces. Performance of solo and cello ensemble repertoire. (F,S)

1-4 Credits

PFMJ 41500 Double Bass IV - Music Majors (NLA)

Technique including all scales and arpeggios with bowings and rhythms. Études from all sources previously studied. Solo repertoire from any source including the Cello Suites of Bach, and works from all periods including the 20th century. (F,S)

1-4 Credits

PFMJ 41700 Classical Guitar IV - Music Majors (NLA)

Instruction in reading lute and baroque guitar tablatures; transcription of literature for keyboard, violin, cello, etc.; Renaissance and baroque ornamentation and performance practice; reading of figured bass and continuo playing. (F,S)

1-4 Credits

PFMJ 41900 Jazz Guitar IV - Music Majors (NLA)

Technique: scales, modes, melodic minor scale and modes, arpeggios, chord vocabulary, picking, patterns, chord superimposition, chord melody playing, rhythm guitar, comping, and improvisation. Solo repertoire from 1900 to the present. Standards, jazz tunes, pop and rock tunes, etc. Emphasis is placed on style periods and idiomatic playing. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 42100 Flute IV - Music Majors (NLA)

Taffanel-Gaubert, "17 Daily Exercises," and Marcel Moyse, "Tone Development through Interpretation." Orchestral excerpts. Representative études including Altes, "26 Selected Studies"; Andersen, "24 Études," op. 15; and Andersen, "24 Technical Studies," op. 63. Representative repertoire including Bach, Partita; Hindemith, "Acht Stücke"; Varese, "Density 21.5"; Bach sonatas; Martin, Ballade; Reinecke, "Undine" Sonata; and Schubert, "Introduction and Variations." (F,S)

1-4 Credits

PFMJ 42300 Oboe IV - Music Majors (NLA)

Technique continues as before. Études selected from Rothwell, Belinsky and deLancie's "Orchestra Studies," and G. Gillet's "Advanced Études." Representative repertoire selected from Bach and Telemann cantatas; Mozart, Oboe Quartet K. 370; Vaughan Williams, Concerto; Ibert, "Symphonie Concertante"; Riccardo Malipiero, Sonata; Britten, "Quartet and Metamorphoses." (F,S)

1-4 Credits

PFMJ 42500 Clarinet IV - Music Majors (NLA)

Concentrated review of every aspect of performance. Representative études including Stark, "24 Grand Virtuoso Studies"; Perier, "Recueil de Sonates"; Starlit, "25 Études de Virtuosité." Representative repertoire includes orchestral studies of Bonade, McGinnis, and Cailliet; Debussy, "Rhapsodie"; Ravel, "Fantasie"; Bartók, "Contrasts"; quintets by Mozart and Brahms; concertos by Copland, Tomasi, and Nielsen. (F,S)

1-4 Credits

PFMJ 42700 Bassoon IV - Music Majors (NLA)

Technique including all scales (100 mm). Continued study of all basic material. Representative études including Milde, "Studies," book 2; Paired, "Method," no. 3; Oubradous, "Method," no. 3. Representative repertoire including Mozart, Bassoon Concerto in B; V. Bruns, Concerto for Bassoon; Etlar, Sonata for Bassoon and Piano; Villa-Lobos, "Ciranda das Sete Notas"; symphonies of Beethoven, Brahms, and Tchaikovsky; and "Studio" book. (F,S)

1-4 Credits

PFMJ 42900 Saxophone IV - Music Majors (NLA)

Continued emphasis is placed on technical facility in various keys and modes. Continued study of extended techniques such as multiphonics, altissimo, timbre changes, tonguing effects. Representative repertoire including concertos by Creston, Dahl, Husa, and Tomasi; sonatas by DiPasquale, Denisov, and others; L. Basset, "Music for Saxophone and Piano"; J. Ibert, "Concertino da Camera"; and various chamber works. (F,S)

1-4 Credits

PFMJ 43100 French Horn IV - Music Majors (NLA)

Continued technique of previous years, the study of the 18th- and early 19th-century hand-horn technique. Representative études including Maxime-Alphonse, book 5; Barbotou, "Études Concertantes"; Reynolds, "48 Études" (18, 20, 21, 23, 28, 30, 35, 41). Orchestral excerpts from contemporary repertoire. Representative repertoire including Brahms, Trio; Porter, Sonata; Atterberg, Concerto; Glière, Concerto; Hindemith, Sonata for Alto Horn; Jacob, Concerto; and Schumann, Adagio and Allegro. (F,S)

1-4 Credits

PFMJ 43300 Trumpet IV - Music Majors (NLA)

Summary of tonal and technical development. Pettit, "La Semaine du Virtuoso"; Nagel, "Speed Studies"; études from Chartier, "36 Études Transcendantes," and Broiles, "Studies and Duets." Orchestral studies from volumes VI and VII; tone poems of Strauss (Rossbach) and operas of Wagner (Hoechne); and Pietzsch, "Die Trompete." Solo repertoire includes the Chaynes or Tomasi concertos; Corelli, Concerto in D; Hummel, Concerto; and Hindemith, Sonata. Graduate should be capable of a shared recital. (F,S)

1-4 Credits

PFMJ 43500 Tenor Trombone IV - Music Majors (NLA)

Concentrated study of Bach's Cello Suites as études for musical development; coaching of traditional orchestral excerpts. Introduction to less traditional solo repertoire by Berio, Bernstein, Bassett, Druckman, Cox, Eakin, Krol, Loetsier, and Schiffman. Preparation of a senior recital must include a major work, such as Hindemith, Krol, or Dutilleux. (F,S)

1-4 Credits

PFMJ 43700 Bass Trombone IV - Music Majors (NLA)

Concentrated study of Bach's Cello Suites as études for musical development; coaching of traditional orchestral excerpts. Introduction to less traditional solo repertoire by Hartley, Ross, and Muller. Preparation of a senior recital must include a major work, such as the George Concerto. (F,S)

1-4 Credits

PFMJ 43900 Euphonium IV - Music Majors (NLA)

Technique including Schlossberg, Daily Drills and Technical Studies; Arban, Method for Trombone (continued technical materials); St. Jacome, Cornet Method, velocity and other studies. Continuation of all scales and arpeggios, articulations, including double- and triple-tongue. Representative études including St. Jacome, Cornet Method, selected études; Smith, Top Tones for the Trumpeter; Charlier, 36 Études Transcendantes (trumpet); Rochut, Melodious Études (trombone, book 3). Representative repertoire including Boccalari, Fantasia di Concerto; Fitzgerald, Concerto in A-flat Minor; Sowerby, Sonata for Trumpet; Strauss, Concerto for Horn; Bozza, Prelude et Allegro; Baret, Morceau de Concours; plus selected band excerpts. (F,S)

1-4 Credits

PFMJ 44100 Tuba IV - Music Majors (NLA)

Technique including W. Bell, "Tuba Warmups" (part 2); Blazevich, "Advanced Daily Drills"; continued use of Arban materials. Continuation of all scales and arpeggios from memory, all articulations, including double- and triple-tongue. H. L. Clarke, "Technical Studies" (Series II, cornet). Representative études including Smith, "Top Tunes for the Trumpeter"; Charlier, "6 Études Transcendantes" (trumpet); Saint-Jacome, "Twelve Grand Artistic Studies" (cornet); Rochut, "Melodious Études" (book 3, trombone); Blazevich, "70 Études for BB-flat Tuba." Representative repertoire including Le Clercq, Concertino; Boccalari, "Fantasia di Concerto"; Hindemith, Sonata; Williams, Concerto; Levedev, Concerto Allegro; Brandt, "Erstes Konzertstück" (cornet); plus selected band and orchestral excerpts. (F,S)

1-4 Credits

PFMJ 44300 Percussion IV - Music Majors (NLA)

The order and amount of study vary from student to student, depending on strengths and deficiencies upon matriculation. Variations also occur when a student, in consultation with the major teacher, decides to concentrate in one or more particular areas. An examination is conducted by the instructor at the end of each semester. This examination includes performance and sight-reading. Specific requirements are provided by the instructor. (F,S)

1-4 Credits

PFMJ 44500 Drum Set IV - Music Majors (NLA)

Continued private instruction in drum set with emphasis on style and fluency. Focus on small ensemble performance practices. Processes will include additional transcription studies. May include continued asymmetrical technical studies in Reed and linear playing in Garibaldi. Variations may occur when a student, in consultation with the major teacher, decides to concentrate in one or more particular styles. (F,S)
1-4 Credits

PFMJ 44700-44800 Private Accompanying (NLA)

Private instruction in accompanying. Representative repertoire includes duo sonata literature, French and English art song, German lieder, operatic arias and short scenes, instrumental concerto accompaniment, and 20th-century French literature for brass and woodwinds. Student collaborates with instrumentalists and vocalists from other studios as assigned. This course fulfills the major ensemble requirement for piano performance-collaborative emphasis majors. Course meets one hour per week. Prerequisites: MUEN11700, MUEN11800, MUEN21700, MUEN21800, MUEN41700, and MUEN41800; piano performance-collaborative emphasis major. (F-S,Y)
1 Credit

PFMJ 45100 Voice V - Music Majors (NLA)

The development of artistic vocal musicianship through the study and performance of carefully selected and individualized vocal literature. The acquisition of a functional vocal technique through attention to posture, breathing, tonal onset, vowel purity, reduction of inhibitory physical tensions, body coordination, and a balanced registration. Appropriate vocalises constructed to meet the individual technical problems of the student. Upper-level studies focus on range extension, vocal flexibility, melismatic singing, and the "messa di voce." Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 45300 Piano V - Music Majors (NLA)

Repertoire is chosen by the instructor as appropriate for the technical abilities, stylistic awareness, and musical growth of the individual student. Variable Credit. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 45500 Organ V - Music Majors (NLA)

Weekly repertoire class is devoted to student performances, church music skills, and organ history and design. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 45700 Harpsichord V - Music Majors (NLA)

Technical studies may include trill exercises, finger independence exercises, scales, and excerpts from various method books. Repertoire initially emphasizes 18th-century literature (e.g., simpler works of Bach, D. Scarlatti, and Rameau). Further study includes earlier keyboard literature and the concomitant techniques (fingering, ornamentation, etc.). Repertoire classes often include discussions of the various schools of harpsichord construction and the corresponding literature, as well as different aspects of performance practice. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 45900 Violin V - Music Majors (NLA)

Continuation of all previous technical work. Representative études including Rode, "Caprices"; Gavinies, "Studies"; Paganini, op. 14 and the "24 Caprices." Representative repertoire including concerti by Saint-Saëns, Khachaturian, Tchaikovsky, Sibelius, Vivaldi ("Four Seasons"), and Prokofiev; solo sonatas and partitas by Bach; sonatas by Franck, Copland, Brahms, and Debussy; pieces by Bloch, Vaughan Williams, Stravinsky, and other 20th-century works. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 46100 Viola V - Music Majors (NLA)

Continuation of all previous work; establishing secure technical facility. Flesch, "Scale System"; advanced bowing and left-hand techniques. Viola ensemble. Studies from Fuchs, "Twelve Caprices"; Hermann, "Concert Studies"; Dont, "Études and Caprices," op. 35. Repertoire from Bartók; Walton; Hindemith; Jacob concertos; Vaughan Williams; Bloch and Reger suites; Bach, Violin Sonatas and Partitas; Brahms, sonatas; 20th-century literature. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 46300 Cello V - Music Majors (NLA)

Continued study of scales, etc., as above; Bazelaire arpeggios. Representative études including the above and Paganini-Silva, "12 Caprices," and virtuosic solo pieces. Representative repertoire including suites; sonatas by Bach, Reger, Bloch; concerti by Locatelli, Bach, Beethoven, Brahms, Kodály, Shostakovich; Haydn; Dvorak (from list above); 20th-century pieces. Performance of solo and cello ensemble repertoire. Co-requisite: PFMJ 19900. (F-S)
1-4 Credits

PFMJ 46500 Double Bass V - Music Majors (NLA)

Technique including all scales and arpeggios with bowings and rhythms. Études from all sources previously studied. Solo repertoire from any source including the Cello Suites of Bach, and works from all periods including the 20th century. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 46700 Classical Guitar V - Music Majors (NLA)

Instruction in reading lute and baroque guitar tablatures; transcription of literature for keyboard, violin, cello, etc.; Renaissance and baroque ornamentation and performance practice; reading of figured bass and continuo playing. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 46900 Jazz Guitar V - Music Majors (NLA)

Technique: scales, modes, melodic minor scale and modes, arpeggios, chord vocabulary, picking, patterns, chord superimposition, chord melody playing, rhythm guitar, comping, and improvisation. Solo repertoire from 1900 to the present. Standards, jazz tunes, pop and rock tunes, etc. Emphasis is placed on style periods and idiomatic playing. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 47100 Flute V - Music Majors (NLA)

Representative études including Andersen, "24 Virtuoso Studies," op. 60 and Karg-Elert, "30 Caprices." Orchestral excerpts. Representative repertoire including Berio, "Sequenza"; Bozza, "Image"; Jolivet, "Cinq Incantations"; Bach sonatas; Copland, "Duo"; Griffes, "Poem"; Ibert, Concerto; Muczynski, Sonata; Nielsen, Concerto; and Prokofiev, Sonata. Co-requisite: PFMJ 19900.
1-4 Credits

PFMJ 47300 Oboe V - Music Majors (NLA)

Repertory class for oboe majors includes the principles of reed making. Co-requisite: PFMJ 19900. (F-S)
1-4 Credits

PFMJ 47500 Clarinet V - Music Majors (NLA)

Concentrated review of every aspect of performance. Representative études including Stark, "24 Grand Virtuoso Studies"; Perier, "Recueil de Sonates"; Starlit, "25 Études de Virtuosité." Representative repertoire includes orchestral studies of Bonade, McGinnis, and Cailliet; Debussy, "Rhapsodie"; Ravel, "Fantasie"; Bartók, "Contrasts"; quintets by Mozart and Brahms; concertos by Copland, Tomasi, and Nielsen. Co-requisite: PFMJ 19900. (F-S)
1-4 Credits

PFMJ 47700 Bassoon V - Music Majors (NLA)

Technique including all scales (100 mm). Continued study of all basic material. Representative études including Milde, "Studies," book 2; Paired, "Method," no. 3; Oubradous, "Method," no. 3. Representative repertoire including Mozart, Bassoon Concerto in B; V. Bruns, Concerto for Bassoon; Etlar, Sonata for Bassoon and Piano; Villa-Lobos, "Ciranda das Sete Notas"; symphonies of Beethoven, Brahms, and Tchaikovsky; and "Studio" book. Co-requisite: PFMJ 19900. (F-S)

1-4 Credits

PFMJ 47900 Saxophone V - Music Majors (NLA)

Continued emphasis is placed on technical facility in various keys and modes. Continued study of extended techniques such as multiphonics, altissimo, timbre changes, tonguing effects. Representative repertoire including concertos by Creston, Dahl, Husa, and Tomasi; sonatas by DiPasquale, Denisov, and others; L. Basset, "Music for Saxophone and Piano"; J. Ibert, "Concertino da Camera"; and various chamber works. Co-requisite: PFMJ 19900. (F-S)

1-4 Credits

PFMJ 48100 French Horn V - Music Majors (NLA)

Continued technique of previous years, the study of the 18th- and early 19th-century hand-horn technique. Representative études including Maxime-Alphonse, book 5; Barboteu, "Études Concertantes"; Reynolds, "48 Études" (18, 20, 21, 23, 28, 30, 35, 41). Orchestral excerpts from contemporary repertoire. Representative repertoire including Brahms, Trio; Porter, Sonata; Atterberg, Concerto; Glière, Concerto; Hindemith, Sonata for Alto Horn; Jacob, Concerto; and Schumann, Adagio and Allegro. Co-requisite: PFMJ 19900. (F-S)

1-4 Credits

PFMJ 48300 Trumpet V - Music Majors (NLA)

Summary of tonal and technical development. Pettit, "La Semaine du Virtuoso"; Nagel, "Speed Studies"; études from Chartier, "36 Études Transcendantes," and Broiles, "Studies and Duets." Orchestral studies from volumes VI and VII; tone poems of Strauss (Rossbach) and operas of Wagner (Hoechne); and Pietzsch, "Die Trompete." Solo repertoire includes the Chaynes or Tomasi concertos; Corelli, Concerto in D; Hummel, Concerto; and Hindemith, Sonata. Graduate should be capable of a shared recital. Co-requisite: PFMJ 19900. (F-S)

1-4 Credits

PFMJ 48500 Tenor Trombone V - Music Majors (NLA)

Concentrated study of Bach's Cello Suites as études for musical development; coaching of traditional orchestral excerpts. Introduction to less traditional solo repertoire by Berio, Bernstein, Bassett, Druckman, Cox, Eakin, Krol, Loetsier, and Schiffman. Preparation of a senior recital must include a major work, such as Hindemith, Krol, or Dutilleux. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 48700 Bass Trombone V - Music Majors (NLA)

Concentrated study of Bach's Cello Suites as études for musical development; coaching of traditional orchestral excerpts. Introduction to less traditional solo repertoire by Hartley, Ross, and Muller. Preparation of a senior recital must include a major work, such as the "George" Concerto. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 48900 Euphonium V - Music Majors (NLA)

Technique including Schlossberg, "Daily Drills and Technical Studies"; Arban, "Method for Trombone" (continued technical materials); St. Jacome, "Cornet Method," velocity and other studies. Continuation of all scales and arpeggios, articulations, including double- and triple-tongue. Representative études including St. Jacome, "Cornet Method," selected études; Smith, "Top Tones for the Trumpeter"; Charlier, "36 Études Transcendantes" (trumpet); Rochut, "Melodious Études" (trombone, book 3). Representative repertoire including Boccalari, "Fantasia di Concerto"; Fitzgerald, Concerto in A-flat Minor; Sowerby, Sonata for Trumpet; Strauss, Concerto for Horn; Bozza, "Prelude et Allegro"; Baret, "Morceau de Concours"; plus selected band excerpts. Co-requisite: PFMJ 19900. (F-S)

1-4 Credits

PFMJ 49100 Tuba V - Music Majors (NLA)

Technique including W. Bell, "Tuba Warmups" (part 2); Blazeovich, "Advanced Daily Drills"; continued use of Arban materials. Continuation of all scales and arpeggios from memory, all articulations, including double- and triple-tongue. H. L. Clarke, "Technical Studies" (Series II, cornet). Representative études including Smith, "Top Tunes for the Trumpeter"; Charlier, "6 Études Transcendantes" (trumpet); Saint-Jacome, "Twelve Grand Artistic Studies" (cornet); Rochut, "Melodious Études" (book 3, trombone); Blazeovich, "70 Études for BB-flat Tuba." Representative repertoire including Le Clercq, Concertino; Boccalari, "Fantasia di Concerto"; Hindemith, Sonata; Williams, Concerto; Levedev, Concerto Allegro; Brandt, "Erstes Konzertstück" (cornet); plus selected band and orchestral excerpts. Co-requisite: PFMJ 19900. (F-S)

1-4 Credits

PFMJ 49300 Percussion V - Music Majors (NLA)

The order and amount of study vary from student to student, depending on strengths and deficiencies upon matriculation. Variations also occur when a student, in consultation with the major teacher, decides to concentrate in one or more particular areas. An examination is conducted by the instructor at the end of each semester. This examination includes performance and sight-reading. Specific requirements are provided by the instructor. Co-requisite: PFMJ 19900.

1-4 Credits

PFMJ 49500 Electric Bass V - Music Majors (NLA)

Soloing; modes and altered scales for improvisation; more advanced substitute chord changes; blues progressions and altered chord changes; longer duration chord changes; patterns and arpeggios; harmonic cycles; standard introduction and endings. Co-requisite: PFMJ 19900.

1-4 Credits

Performance-Secondary (PFSM)

PFSM 10100-10200 Class Voice (NLA)

Small classes in voice to develop an understanding of the vocal mechanism and the application of sound principles of breath control and vowel placement. Primarily for the non-voice major who will be dealing with voices and choral groups in public school and community positions. (F-S)

1 Credit

PFSM 10900 Class Violin I (NLA)

Proper position (holding); all major scales and arpeggios in first position; various exercises using martelé, staccato, spiccato at the frog, slurred, and legato bowings. Introduction of positions, including exercises in shifting; vibrato; ability to play the first three Bach minuets, the second using an alternate third-position fingering. (F)

1 Credit

PFSM 11000 Class Violin II (NLA)

Continuation of PFSM 10900, including spiccato in the middle of the bow. Some small ensemble playing, including violin duets and trios, and some using the viola. (Advanced classes include a more detailed study of the viola, instruction given in proper fingering, and bowing of string music.) Special effects, such as harmonics and ponticello. Discussion of string teaching techniques and method books. Prerequisite: PFSM 10900. (S) 1 Credit

PFSM 11200 Class Viola (NLA)

Instruction in correct positions (holding, posture, left hand, right hand) using all major scales and arpeggios in first position with various bowings (slurred, détaché, martelé, spiccato). Introduction to shifting, positions, vibrato, and three-octave scales. Selected études from Wolfhart, books I and II. Strong emphasis is placed on comprehension of principles of viola playing (includes fluency in reading alto clef) and on teaching techniques. (S)

1 Credit

PFSM 11300 Class Cello I (NLA)

Technique including seating, natural left- and right-hand position, shifting, basic bowing strokes, position studies through fourth position, and appropriate scales, arpeggios, and pieces. Modern fingering and bowing principles stressed. Representative books including Margaret Rowell, "Prelude to String Playing," and Dotzauer, "Violoncello Method" (vol. I). Playing by ear. Care of instrument. (F)

1 Credit

PFSM 11400 Class Cello II (NLA)

Continuation of PFSM 11300 and more advanced bowings including spiccato. Thumb position and vibrato stressed along with playing by ear. Representative books, including Dotzauer, "Violoncello Method" (vol. II), and pieces. Verbal emphasis for improved teacher communication. Light repair of instrument. Discussion of teaching techniques and method books. Prerequisite: PFSM 11300. (S)

1 Credit

PFSM 11500 Class Double Bass (NLA)

Technique to include seven positions, scales and arpeggios, use of German and French bows, exercises in common bowings, and representative études including Simandl, "New Method for Double Bass" (part I). Excerpts from orchestral literature. (F)

1 Credit

PFSM 11700 Class Guitar (NLA)

One-semester course, available after completion of prerequisite piano, mainly for piano and voice majors who wish to use guitar for classroom teaching. Basic and intermediate classic and folk guitar techniques including complete fingerboard, simple chords in first position, ascending and descending ligado, second and third positions, and accompanying school basal series pieces. (F-S)

1 Credit

PFSM 12100 Class Flute (NLA)

Technique including study of basic concepts of good tone production, embouchure, flexibility, simple tonguing, hand and body positions, and simple care of the instrument. Chromatic scales from C1 to B3, major scales in five-note patterns through three sharps and three flats; octaves, interval studies; long-tone studies with dynamics; simple articulations. Representative études including Rubank, "Beginning Method." Representative literature including Rubank, "Selected Duets" (vol. I); various reading assignments including Edwin Putnik, "Flute Pedagogy and Performance"; Fredrick Wilkins, "Flutists' Guide"; Westphal, "Guide to Teaching Woodwinds." (F-S)

1 Credit

PFSM 12300 Class Oboe (NLA)

Summary of playing technique (fingerings, blowing, and embouchure) with application in long tones and slow scales. Care of the instrument and the reed, treatment of other instruments in the oboe family, solo and chamber music literature, instrument makes, principles of reed making and mechanical adjustments. Pedagogical problems are treated in conjunction with a discussion of various étude books and methods in use today. All students will use a reed of their own making at the final playing examination. (F-S)

1 Credit

PFSM 12500 Class Clarinet (NLA)

Discussion of correct posture, breathing, embouchure, hand position, finger motion, and articulation in terms of starting a young beginner. Emphasis is placed on developing a full, resonant, clear, mellow sound; establishing consistent results; achieving clean articulation. Mention of problems commonly encountered in teaching and playing; noting error, resulting effect, and correction. Information on instrument, mouthpiece, and reed selection and care. Survey of instructional materials for beginning and intermediate levels. Performance includes chromatic scale from low E to high E in slurred eighth notes at mm 72; all major and minor scales (two octaves) through four flats and four sharps; representative études from Whistler (ed.), "Klose-Lazarus Method." Selected material from level I of clarinet majors includes Bonade's "Clarinetist's Compendium." (F-S)

1 Credit

PFSM 12700 Class Bassoon (NLA)

Technique including care of instrument (nomenclature, assembly, and maintenance). Fundamentals (standing, sitting position, embouchure, hand positions, correct sound, fingerings, and intonation problems). Representative études including Gekeler, "Method," "Easy Steps," "Breeze-Easy Method"; Rubank, books I, II, III; J. Weissenborn, books I, II. Representative repertoire including Telemann, Sonata in F Minor; Burrill Phillips, "Concert Piece"; J. Weissenborn, "Capriccio"; E. Siennicki, "Ballade for Bassoon" and "Concert Studies"; Claude S. Kessler, "Bassoon Passages"; Vincenzo Pezzi. Work of Tchaikovsky. (F-S)

1 Credit

PFSM 12900 Class Saxophone (NLA)

Fundamentals of saxophone technique including handling, care, and assembly; hand and body position; basic embouchure and tone production; basic articulation; alternate fingerings; instrument, mouthpiece, and reed selection; vibrato; and two-octave range. Techniques of playing and teaching are emphasized, including observation, analysis, and prescription of peer problems. Materials to include L. Teal, "The Art of Saxophone Playing"; S. Mauk and L. Teal, "A Class Method for Saxophone"; various handouts. (F-S)

0.5 Credit

PFSM 13100 Class Horn (NLA)

Emphasis is placed on embouchure development and breath control. Technique including all major scales, tongued and slurred, within the two-octave range G to C2; lip slurs. Performance from Pottag-Hovey, "French Horn Method," book I, including selected studies in E-flat horn. (F-S)

0.5 Credit

PFSM 13300 Class Trumpet (NLA)

Principles of embouchure formation, position, articulation, and the control of air to produce the characteristic tone of the trumpet and cornet.

Discussion of and reference to standard study and solo material and pedagogical techniques. Technique to include major scales and their relative minors through five sharps and flats, one octave in quarters and eighths at mm 72; ability to demonstrate C transposition; methods of effecting the lip slur; and multiple articulations. Material to include Beeler, "Method for Cornet"; Farkas, "Art of Brass Playing"; and Rassmussen, "Teacher's Guide to the Literature of Brass Instruments." 0.(F-S)

0.5-1 Credits

PFSM 13500 Class Trombone (NLA)

Designed to develop both playing ability and pedagogical competence for prospective teachers. Reference to standard study and solo literature.

Special attention to the acoustical and physiological characteristics of the brass family as applied to the slide trombone. Discussion of the F attachment and bass trombone. Technique including major and relative minor scales through five flats and sharps, mm 72 in quarters and eighths. Beeler, "Method for Trombone." (F-S)

0.5 Credit

PFSM 13700 Class Euphonium (NLA)

Function of the tuba, baritone, and euphonium in band, orchestra, and ensemble, with demonstration of musical examples from the literature.

The various keys and types of instruments, and uses for which each is best suited. Survey of tuba and baritone pedagogical materials and techniques, with emphasis placed on establishment of an effective and well-balanced daily practice routine. Representative solos from tuba and baritone repertory. Development of satisfactory tone production and articulation. Playing of major and minor scales and chords, one octave, eighth notes at mm 72, through five sharps and flats. Acquaintance with the intonation problems of the instruments studied and the techniques available for their correction. Development of adequate technique for performance of études and solos of medium difficulty. Farkas, "Art of Brass Playing"; Bell, "Tuba Warmups" (book I); Arban's "Bass Clef," complete method. (F).

0.5 Credit

PFSM 13900 Class Tuba (NLA)

Function of the tuba, baritone, and euphonium in band, orchestra, and ensemble, with demonstration of musical examples from the literature.

The various keys and types of instruments, and uses for which each is best suited. Survey of tuba and baritone pedagogical materials and techniques, with emphasis placed on establishment of an effective and well-balanced daily practice routine. Representative solos from tuba and baritone repertory. Development of satisfactory tone production and articulation. Playing of major and minor scales and chords, one octave, eighth notes at mm 72, through five sharps and flats. Acquaintance with the intonation problems of the instruments studied and the techniques available for their correction. Development of adequate technique for performance of études and solos of medium difficulty. Farkas, "Art of Brass Playing"; Bell, "Tuba Warmups" (book I); Arban's "Bass Clef," complete method. (F).

0.5 Credit

PFSM 14100 Percussion Class (NLA)

Orchestral and rudimentary snare drumming with like-hand and traditional hand holds. Standard rudimentary drum literature, teaching methods, and techniques for all percussive instruments. Maintenance and repair of instruments. Class meetings: Two hours per week. (F-S)

1 Credit

PFSM 16100 Class Recorder (NLA)

Basic techniques include breath support, fingerings, and articulations on soprano and alto recorders. Ensemble playing begins immediately with emphasis placed on music suitable for classroom situations in schools, followed by a brief survey of recorder literature from all historical periods along with folk music arrangements. (F-S)

1 Credit

PFSM 17100 Keyboard Musicianship I (NLA)

An introduction to fundamentals of keyboard musicianship. Skill emphasis is placed on grand staff reading, techniques, repertoire, sight-reading, diatonic harmonization, transposition, improvisation, and playing by ear. Designed for the non-pianist music major. Placement by audition only. (F-S)

1 Credit

PFSM 17200 Keyboard Musicianship II (NLA)

The continuation of keyboard skills developed in PFSM 17100. Additional emphasis is placed on harmonization, including secondary harmonies using a variety of accompanimental styles, lead line notation, open score reading, ensemble, and accompanying skills. Prerequisites: PFSM 17100 or by audition. (F-S)

1 Credit

PFSM 17500 Keyboard Musicianship I - Keyboard Majors (NLA)

The introduction and development of functional keyboard skills including sight-reading, score analysis, performing chord progressions, harmonization of melodies utilizing diatonic triads, seventh chords and secondary dominants; transposition of single lines and simple keyboard textures up to the interval of major/ minor third; playing of choral open score and the development of basic choral accompanying skills; playing by ear; and performing ensemble literature for multiple keyboards. Course is required of all keyboard majors and composition-keyboard emphasis students. Open to others by audition only. (F)

1 Credit

PFSM 17600 Keyboard Musicianship II - Keyboard Majors (NLA)

Continuation of developing functional keyboard skills including sight-reading, alto and tenor clef reading, and performing chord progressions and harmonization of melodies utilizing chromatic harmony; instrumental transposition; performing from instrumental open score; and an introduction to figured bass realization. Course is required of all keyboard majors and composition-keyboard emphasis students. Prerequisites: PFSM 17500 or by audition. (S)

1 Credit

PFSM 24700 String Class (NLA)

A course in the basic strategies of teaching and playing string instruments, with particular emphasis placed on development of beginners. Also included is a survey of materials useful in teaching these instruments. Class meetings: Two hours per week for one semester. (F-S)

1 Credit

PFSM 27100 Keyboard Musicianship III - Vocal Performance Majors (NLA)

A continuation of skills developed in PFSM 17200. Emphasis is placed on developing technical facility and keyboard skills appropriate for a vocal performance major such as playing vocal open score and solo or choral accompaniments. Prerequisites: PFSM 17200. (F,S,Y)

1 Credit

PFSM 27200 Keyboard Musicianship IV - Vocal Performance Majors (NLA)

A continuation of skills developed in PFSM 27100. Emphasis is placed on developing technical facility and keyboard skills appropriate for a vocal performance major such as playing vocal open score and solo or choral accompaniments. Prerequisites: PFSM 27100. (F,S,Y)

1 Credit

PFSM 27300 Keyboard Musicianship Skills for the Music Classroom (NLA)

Continued development of keyboard skills addressed in PFSM17200. Emphasis is placed on developing keyboard technical facility and skills appropriate for students who will be teaching in elementary and general music classrooms. Accompanying basal songs, creating accompaniments from chord symbols, sight-reading, and improvisation are examples of the types of skills the course will address. Prerequisites: PFSM 17200. (F,S)

1 Credit

PFSM 27400 Advanced Keyboard Musicianship Skills for the Music Classroom (NLA)

Building on skills developed in PFSM 27300, this course emphasizes developing technical facility and keyboard skills appropriate for those who will be teaching in more advanced choral ensemble settings. Using the piano to lead warm-ups, playing parts from open score, arranging and performing choral and vocal piano parts, are examples of the types of skills the course will address. Prerequisites: PFSM 27300. (S)

1 Credit

PFSM 27500 Keyboard Musicianship III (NLA)

A continuation of keyboard technical and musical skills introduced in PFSM17100 and PFSM17200. Emphasis will be placed on advancing keyboard technique particularly useful for a composer and best developed in a group setting modality. Basic keyboard technique will continue to be advanced as well as specific attention on sight reading and learning the various keyboard styles of composers of piano music from the past through present day. Students will apply their knowledge of keyboard style through composing and improvising short works in those styles. Prerequisites: PFSM 17200. (F)

1 Credit

PFSM 27600 Keyboard Musicianship IV (NLA)

A continuation of keyboard technical and musical skills introduced in PFSM 27500. Emphasis will be placed on advancing keyboard technique particularly useful for a composer and best developed in a group setting modality. Basic technique will continue to be advanced as well as specific attention on sight reading and learning the various keyboard styles of composers of piano music from the past and present day. Students will apply their knowledge of keyboard style through composing and improvising short works in those styles. Prerequisites: PFSM 27500. (S)

1 Credit

PFSM 34900 Woodwind Class (NLA)

A course in the basic strategies of teaching and playing woodwind instruments, with particular emphasis placed on the development of beginners. Also included is a survey of materials useful in teaching these instruments. Class meeting: Two hours per week. (F-S)

1 Credit

PFSM 35100 Brass Class (NLA)

A course in the basic strategies of teaching and playing brass instruments, with particular emphasis placed on the development of beginners. Also included is a survey of materials useful in teaching these instruments. Class meetings: Two hours per week. (F-S)

1 Credit

Philosophy (PHIL)

PHIL 10100 Introduction to Philosophy (LA)

Introduction to philosophy that focuses on perennial philosophical problems, such as the relation of the mind to the body, the possibility of truth and objectivity, the purpose of human life, and the existence of God, utilizing classical, early modern, or contemporary works. (F,S,Y)

Attributes: HM, LMSP, LSCO, TIDE, TMBS

4 Credits

PHIL 17500-17502 Selected Topics in Philosophy (LA)

Topics to be determined according to teacher and student interest. This course may be repeated when topics vary, for a total of eight credits. (IRR)

4 Credits

PHIL 20100 Plato and Aristotle (LA)

Study of selected texts and ideas of the founders of classical Western philosophy. Texts include selected dialogues of Plato and selections from Aristotle's writings, including the *Metaphysics* and *Nichomachean Ethics*.

Prerequisites: One liberal arts course. (O,S)

Attributes: CSA

4 Credits

PHIL 20300 Introduction to Logic (LA)

An introductory treatment of contemporary symbolic logic. Topics include argument structure, validity/invalidity, an exploration of formal propositional logic including truth-functions and formal proofs, and an exploration of elementary quantificational logic including interpretations and formal proofs. Prerequisites: One liberal arts course. (F,S,Y)

Attributes: ESTS, HM, LMEL, LMSP, LSCO, QL, TIII, TWOS

4 Credits

PHIL 20400 Choosing Wisely: An Introduction to Rational Choice (LA)

An introduction to rational choice theory, a theory that proposes rules that prescribe how individuals ought to behave so as to best satisfy their preferences. Special attention is paid to representing preferences numerically and using that formal representation to determine which action among a set of possible actions should be chosen. Applications include uses of probability and decision theory in epistemology, the philosophy of religion, and ethics. Some applications outside of philosophy are discussed as well, including economics, voting theory, and biology. General topics covered include probability, decision theory, game theory, and social choice. Additionally, time will be spent questioning the assumptions made by classical rational choice theory and considering alternatives. Prerequisites: One liberal arts course. (F,S,Y)

Attributes: QL

4 Credits

PHIL 20800 Puzzles and Paradoxes (LA)

This course provides an overview of some famous paradoxes and attempts to resolve them. We explore how some of the central historical paradoxes, like Zeno's paradoxes of motion, have brought about revolutionary advances in our thought. Central issues in philosophy of language, logic, metaphysics, decision theory, epistemology, and ethics will be introduced through the study of these paradoxes. Prerequisites: One liberal arts course; WRTG 10600 or ICSM 10800. (IRR)

Attributes: WI

4 Credits

PHIL 20900 Plato and Aristotle (LA)

Study of selected texts and ideas of the founders of classical Western philosophy. Texts include selected dialogues of Plato and selections from Aristotle's writings, including the *Metaphysics* and *Nichomachean Ethics*.

Prerequisites: One liberal arts course. (O,S)

Attributes: CSA

4 Credits

PHIL 21200 Introduction to Ethics (LA)

Introduction to the problems and theories of ethical thinking. Is there a right thing to do, and how can we tell what it is? Competing answers to these questions are examined, such as virtue-based approaches, consequentialist approaches, and Kantian approaches. Application of these approaches to current issues related to equality, harm, and truth-telling are explored. Readings selected from both classical and modern sources. Prerequisites: One liberal arts course. (Y)

Attributes: HM, LMEL, LMSP, LSCO, TIDE

4 Credits

PHIL 22000 Political Philosophy (LA)

Introduction to the central questions of political philosophy. Topics include the disputed necessity of a political authority; various attempts to justify a political obligation to comply with the demands of the state; an examination of the merits and weaknesses of democracy as a legitimate form of governing; the proper scope of a right to liberty within a democratic society; and questions of distributive justice, including the justice of redistribution of wealth to rectify large social inequities.

Prerequisites: One liberal arts course. (IRR)

Attributes: HM, LMEL, LMSP, LSCO, TPJ

4 Credits

PHIL 22300 Introduction to the Philosophy of Art (LA)

An overview of the historically significant problems and movements in the aesthetics and philosophy of art, addressing questions such as the source of value of art, its relationship to social and psychological functioning, and its cultural and historical significance. Prerequisites: One liberal arts course. (IRR)

Attributes: HM, TIII

4 Credits

PHIL 23000 Bioethics (LA)

This introductory course in bioethics focuses on ethical and philosophical issues that arise in today's medicine. Topics include ethical, religious, and legal aspects of abortion, end of life issues, ethical boundaries of assisted reproductive technology (for example, genetic enhancement and reproductive cloning), allocation of scarce medical resources, and ethical issues related to disability. The course aims to relate these applied issues in today's medical ethics to philosophical concepts such as 'autonomy', 'benefit', 'harm', 'justice', and 'empathy'. (S)

Attributes: ENHU, ENVE, ESHU, HM, LMEL, LMSP, LSCO, TMBS

4 Credits

PHIL 24000 Philosophy of Film (LA)

Exploration of various issues in contemporary philosophy of film. The course considers the questions and problems that arise when we consider film as both a distinctive art form and a political, social, public medium. Prerequisites: One liberal arts course. (IRR)

Attributes: ENHU, ESHU, MAP, SCE

4 Credits

PHIL 25200 Environmental Ethics (LA)

A critical examination of various moral problems raised when considering environmental issues. Questions regarding the moral status of animals, and the environment as a whole are explored. Also taken up are ethical issues raised by global climate change, such as our obligations to future generations, and how to resolve tensions between economic growth and environmental protection. These issues and others generate challenging and fundamental questions of moral philosophy: What is the basis of obligation? Do animals have rights? What does it mean to say something is intrinsically valuable? ENV5 25200 and PHIL 25200 are cross-listed courses; students cannot receive credit for both. Prerequisites: One liberal arts course. (Y)

Attributes: ABSS, AN2, AN3, HM, LMEL, LSCO, TPJ, TQSF

4 Credits

PHIL 26500 Philosophical Problems in Law (LA)

Examination and evaluation of basic practices and principles of law, focusing on such topics as the nature and extent of legal authority, the interpretation of law, and the justification of punishment, including capital punishment. Examination of prominent legal cases and their underlying principles, with applications to international law and to freedom of expression. Emphasis is placed on philosophical analysis and moral evaluation. Prerequisites: One liberal arts course. (Y)

Attributes: HM, TPJ

4 Credits

PHIL 27500-27502 Selected Topics in Philosophy (LA)

Topics to be determined according to teacher and student interest. This course may be repeated when topics vary, for a total of eight credits.

Prerequisites: One liberal arts course. (IRR)

4 Credits

PHIL 28300 Seeking the Buddha (LA)

Engages the historical evolution and lived experience of Buddhist religious traditions by exploring how people have variously attempted to search for, discover, imagine, understand, become, and even kill the Buddha. Considers how the Buddha and his teachings have been interpreted through stories, philosophies, rituals, images, and objects across Asia and beyond. Special attention is paid to the transmission and modernization of Buddhist traditions in the contemporary western world. PHIL 28300 and RLST 28300 are cross-listed courses; students may not receive credit for both. Prerequisites: One three credit liberal arts course. (E)

Attributes: DV, G, H, INBG

3 Credits

PHIL 28600 Philosophy and Literature (LA)

Explores philosophical issues related to literary fiction and focuses on philosophical questions related to literary discourse. Questions range from 'Do fictional entities exist?' and 'How is it possible to be emotionally moved by fictional events and characters?' to 'How do metaphors work?' and 'Who are the genuine authors of literary texts?' Prerequisites: WRTG 10600, ICSM 10800 or ICSM 11800. (S)

Attributes: WJ

4 Credits

PHIL 30300-30900 Plato and Aristotle (LA)

Study of selected texts and ideas of the founders of classical Western philosophy. Texts include selected dialogues of Plato (such as the *Meno* and the *Republic*) and selections from Aristotle's writings (such as the *Metaphysics* and *Nichomachean Ethics*). Emphasis on writing a research paper in history of philosophy. Prerequisites: One 200-level PHIL course. (O,S)

4 Credits

PHIL 31100 Philosophy of Religion (LA)

Study and discussion of a broad range of issues in the philosophy of religion, such as religious epistemology, the ontological argument, the cosmological argument, the teleological argument, religion and science, and the problem of evil. Primary source readings. Prerequisites: At least one 200-level PHIL course. (IRR)

Attributes: LMSP

4 Credits

PHIL 32100 Intermediate Logic (LA)

Topics include a review of propositional logic, first-order quantificational logic including relations and identity, and elementary logical metatheory for both propositional logic and basic first-order logic, including soundness and completeness proofs. The Incompleteness of higher first-order logics is presented conceptually but without formal proof techniques. Prerequisites: PHIL 20300 or MATH 27000. (IRR)

Attributes: NS

3 Credits

PHIL 32600 Seminar in Aesthetics (LA)

Examination of traditional and contemporary aesthetic concepts such as empathy, psychic distance, the beautiful and the sublime, and expressive form, with special attention to the nature of aesthetic responsiveness and judgment, and the kind of meaning to be found in art. Prerequisites: One 200-level PHIL course. (IRR)

4 Credits

PHIL 33000 The Good Life (LA)

This course examines one of the oldest and most compelling questions of all time: What is a good life? We all want good lives and we all strive to achieve good lives, but despite the overriding importance of the question, we give little reflective thought to what a good life might be. Is there one particular form that a life must exemplify in order to be good, or are there many kinds of good lives? Is judging a life to be good sufficient for it to be good, or is this the sort of thing one can get wrong? The course will consider what great thinkers – classical, modern, and contemporary – have written on this issue. Prerequisites: At least one 200-level PHIL course or permission of instructor. (IRR)

Attributes: HU

3 Credits

PHIL 33500 Socialism, Capitalism, Justice (LA)

This course examines, from a philosophical perspective, the debate between supporters of socialism and capitalism. After examining competing definitions of both capitalism and socialism, we will examine what philosophers (past and present) have had to say for and against each system of economic production. In particular, we will compare accounts of justice that endorse a capitalist mode of production with accounts of justice that endorse a socialist mode of production. Assigned authors will include (among others) John Locke, Adam Smith, Thomas Paine, John Stuart Mill, Karl Marx, Rosa Luxemburg, Friedrich Hayek, John Rawls, and Robert Nozick. Prerequisites: One 200-level PHIL course. (IRR)

4 Credits

PHIL 34000 Global Ethics (LA)

The course surveys significant ethical challenges that are global in scope: Are there such things as universal human rights, or is morality ultimately relative to one's particular culture? What, if any, duties do we have to the global environment? What is the difference between a just and unjust war, and between just and unjust ways of combating terrorism? Morally speaking, what can be said in defense of economic globalization, and against it? Are global inequalities in wealth morally defensible? Prerequisites: At least one 200-level PHIL course. (IRR)

Attributes: INBG, LMEL, LMSP, LSCO

4 Credits

PHIL 34800 Epistemology: Theories of Knowledge and Justified Belief (LA)

Philosophical study of knowledge and justified belief. The course will look at both classic epistemological topics including skepticism; analyses of knowledge; and the ethics of belief; and more contemporary epistemological topics including formal epistemology; disagreement; and fake news. Prerequisites: At least one 200-level PHIL course. (IRR)

4 Credits

PHIL 35000 Philosophy of Science (LA)

A comprehensive survey of issues in the philosophical foundations of science. Topics include the structure and function of scientific theories; the dispute over the existence or nonexistence of theoretical entities; reductionism and antireductionism; laws of nature and models of scientific explanation; Kuhn and historicist models of science; the realism/antirealism dispute over the philosophical implications of scientific theories. Prerequisites: PHIL 20300 or permission of instructor. (IRR)

Attributes: HU

3 Credits

PHIL 35200 Moral Philosophy (LA)

Critical exploration of foundational issues in metaethics and normative ethical theory. Topics for consideration include moral relativism, moral realism, and morality and self-interest, along with utilitarian, deontological, natural law, and contractarian theories of ethics. Moral concepts such as rights, duty, and value will also be considered. Readings will be from both classical and contemporary sources. Prerequisites: At least one 200-level PHIL course. (IRR)

Attributes: LMEL, LMSP, LSCO

4 Credits

PHIL 35500 Metaphysics (LA)

Metaphysics is the philosophical investigation into the ultimate nature of reality. This course examines issues and answers in traditional and contemporary metaphysics. Topics covered include some of the following: ontology, universals and particulars, issues surrounding material objects, the nature of time, persistence through time, necessity and possibility, causation, free will, and realism and anti-realism debates. Prerequisites: At least one 200-level PHIL course. (IRR)

4 Credits

PHIL 36000 Philosophy of Mind (LA)

The distinctive feature of human beings that traditionally has been held to separate us from the rest of the universe is our supposed possession of a special thing/capacity called "mind." In this course we investigate what kind of thing (or non-thing) the mind is, what relation it has to bodily behavior, and how and why the mind has the extraordinary ability to represent the world truly or falsely. Topics include such questions as, Is the mind physical or non-physical? What is a mental state? What kinds of beings can possess minds? Prerequisites: At least one 20000-level PHIL course or permission of instructor. (IRR)

Attributes: 1, HU
3 Credits

PHIL 36200 Philosophy of Language (LA)

Investigation of philosophical questions concerning linguistic representation, particularly concerning the meanings of names, definite descriptions, and sentences, and how those linguistic expressions acquire their meanings. Further topics include whether metaphors have meaning, whether meaning is subjective or public, and whether representation is the only function of language. Prerequisites: At least one 20000-level PHIL course or permission of instructor. (IRR)

3 Credits

PHIL 37500-37510 Selected Topics in Philosophy (LA)

Topics to be determined according to student and teacher interest, with primary focus on a problem or a person. Prerequisites: At least one 20000-level PHIL course or permission of instructor. (IRR)

Attributes: HU
1-4 Credits

PHIL 38100 Nineteenth-Century Philosophy (LA)

Major philosophical movements in the 19th century. Emphasis is placed on selections from the works of Hegel, Mill, Marx, Kierkegaard, and Nietzsche. Prerequisites: At least one 20000-level PHIL course or permission of instructor. (IRR)

Attributes: HU
3 Credits

PHIL 38200 Language, Mind, and Meaning: Themes in Twentieth Century Philosophy (LA)

Investigates the main trends and concerns of 20th century analytic philosophy. Readings will be from important works in logical positivism, the philosophy of the later Wittgenstein, and recent varieties of pragmatism and naturalism. Prerequisites: At least one 20000-level PHIL course or permission of instructor. (IRR)

Attributes: HU
3 Credits

PHIL 38300 Tradition, Interpretation, and Authority: Themes in Twentieth Century Philosophy (LA)

Examines some of the key debates among the key figures in 20th century European philosophy concerned with the problems of intellectual and political authority, the effectiveness and limits of interpretation in preserving, re-directing, or subverting authority, as well as the historically formed nature of institutions and social practices charged with maintaining the integrity of responsible and authoritative intellectual discourse. Focuses particularly on the work of Derrida, Gadamer, and Habermas. Prerequisites: one 200-level course in philosophy, or permission of instructor. (IRR)

Attributes: GERM, HU
3 Credits

PHIL 38400 Existentialism (LA)

In-depth philosophical analysis of concepts such as authenticity, the meaning of life, freedom of choice, responsibility, and mortality in the works of 20th-century existentialist thinkers such as Heidegger, Sartre, and Camus, and their 19th-century precursors such as Nietzsche, Dostoevsky, and Kierkegaard. Prerequisites: At least one 200-level course in PHIL. (F,O)

Attributes: GERM
4 Credits

PHIL 39100-39101 Independent Study: Philosophy (LA)

Study or research project of the student's own devising. Minimal consultation with professor; final projects evaluated by professor. Offered on demand only. May be repeated for credit for different projects.

Prerequisites: At least one 20000-level PHIL course and permission of instructor. (IRR)

Attributes: UND
1-4 Credits

PHIL 39300-39301 Tutorial in Philosophy (LA)

Work by student and teacher on a problem or project of interest to both. Prerequisites: At least one 20000-level PHIL course and permission of instructor. (IRR)

Attributes: UND
1-4 Credits

PHIL 41000 Philosophy Capstone Seminar (LA)

Serves as the capstone for philosophy majors and minors. Synthesizes students' experience in the program by having students apply the philosophical skills they have acquired in previous classes to a faculty-guided, largely independent research project on a prominent philosophical position, movement, or debate. Facilitates student reflection on achievements in both the major/minor and the Integrative Core Curriculum, and how these relate to personal intellectual formation while at Ithaca College. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (S,Y)

Attributes: CP, WI
4 Credits

PHIL 49100-49101 Independent Study: Philosophy (LA)

Study or research project of the student's own devising. Minimal consultation with professor; final projects evaluated by professor. Offered on demand only. May be repeated for credit for different projects.

Prerequisites: At least one 30000-level PHIL course and permission of instructor. (IRR)

Attributes: UND
1-4 Credits

PHIL 49300-49301 Tutorial in Philosophy (LA)

Work by student and teacher on a problem or project of interest to both. Prerequisites: At least one 30000-level PHIL course and permission of instructor. (IRR)

Attributes: UND
1-4 Credits

PHIL 49500-49501 Philosophy Seminar (LA)

Small group study of a topic not otherwise offered in the curriculum or not offered at the same level. May be repeated for credit. Prerequisites: At least one 30000-level PHIL course and permission of instructor. (IRR)

Attributes: HU
1-4 Credits

Phys Activity, Leis & Safety (PALS)

PALS 00070 Women's Intercollegiate Varsity Basketball (NLA)

0-0.5 Credits

PALS 00073 Womens Intercollegiate Varsity Gymnastics (NLA)

Students participating on an intercollegiate athletic team can register online for intercollegiate athletic course credit. Students who do not make the team or who discontinue participation for any reason must drop or withdraw from the course online. Intercollegiate athletic courses are offered on a pass/fail basis only. Credit is granted either in the fall or the spring for any given sport. No late requests for credit will be honored. (S)

0-0.5 Credits

PALS 00094 Men's Intercollegiate Varsity Lacrosse (NLA)

0-0.5 Credits

PALS 00095 Men's Intercollegiate Varsity Tennis (NLA)

0-0.5 Credits

PALS 00096 Men's Intercollegiate Varsity Track and Field (NLA)

0-0.5 Credits

PALS 00097 Men's Intercollegiate Varsity Wrestling (NLA)

0-0.5 Credits

PALS 00098 Men's Intercollegiate Varsity Basketball (NLA)

0-0.5 Credits

PALS 00099 Men's Intercollegiate Varsity Swimming (NLA)

0-0.5 Credits

PALS 00200 Basic Swimming (NLA)

For the person who cannot swim or who can swim but wants to improve his or her strokes. Covered are the front and back crawl, elementary backstroke, breaststroke, butterfly, and sidestroke. Elementary forms of rescue are also taught. Pass/fail only. (F-S,Y)
0.5 Credit

PALS 00400 Scuba Diving (NLA)

Covers the use of fins, mask, and snorkel. Donning and ditching of the skin-diving equipment is required before going on to scuba. In scuba, rigging of the tank, taking pressure readings, buddy breathing, entries off the deck, and ditching and donning of scuba equipment are all covered. On the last day of diving, an obstacle course involving all learned skills must be negotiated. During the course, the physiology of diving and the physics of scuba will also be covered. Prerequisites: Ability to (1) swim underwater 60 feet, (2) hold breath on bottom 30 seconds, (3) surface-dive to bottom and recover a 10-pound block, (4) tread water for 30 seconds, (5) swim 10 laps (250 yards) nonstop, (6) support a victim for 5 minutes, and (7) stay afloat for 10 minutes. Pass/fail only. (IRR)
0.5 Credit

PALS 00500 Introductory Scuba Diving and Certified Scuba (NLA)

Preparation for the safe and enjoyable recreation of underwater diving. Scuba equipment is furnished. The National Aquatic School program designed for colleges is used. Successful completion of classroom, pool, and open-water sessions results in lifetime international certification. Special conditions: An extra fee is charged for this course. Students are required to complete a medical form at the first class meeting. Prerequisites: Basic swimming proficiency; signed parental or guardian's release and indemnity agreement for students under 18 years of age. Pass/fail only. (F-S,Y)
1 Credit

PALS 00600 Community Water Safety (NLA)

Participants become familiar with the potential hazards of water activities. They learn to prevent accidents and to respond effectively if an accident does occur. A swimming test is required. Pass/fail only. (IRR)
0.5 Credit

PALS 00800 Lifeguarding (NLA)

The duties and responsibilities of a lifeguard and how to carry them out; lifeguarding techniques, such as how to tow or carry a victim to safety, manage a suspected spinal injury in the water, and use rescue equipment to help rescue a distressed or drowning victim. American Red Cross first aid and basic life support CPR are included in this course. To enroll in this course, a student must successfully complete a 500-yard swim, dive to 9 feet, swim underwater 15 yards, and tread water for one minute at the first meeting. Pass/fail only. (F-S,Y)
2 Credits

PALS 00810 Lifeguarding Recertification (NLA)

A review and update of the knowledge and skills required for recertification in lifeguarding. Covers lifeguarding techniques such as how to use rescue equipment to tow a victim to safety and how to manage a suspected spinal injury in water. Students demonstrate their ability to become recertified in the American Red Cross lifeguarding program. Maybe repeated once for credit. Prerequisites: Current American Red Cross lifeguarding and CPR for the professional rescuer certificates. Pass/fail only. (S,Y)
0.5 Credit

PALS 00900 Lifeguarding Instructor (NLA)

Provides the knowledge and skills necessary to become an American Red Cross instructor for community water safety, waterfront lifeguarding, head lifeguard and lifeguarding instructor aide, and lifeguard review courses. Prerequisites: Current American Red Cross certificate in lifeguarding and pretests based on the lifeguard training written test and lifeguarding skills test. Pass/fail only. (IRR)

1 Credit

PALS 01000 Water Safety Instructor (NLA)

Trains instructor candidates to teach American Red Cross water safety courses. Topics include improving and developing skills and knowledge of swimming and water safety; applying information from the instructor candidate training course to the teaching of swimming; planning and organizing swimming courses; and ensuring students' health and safety. Prerequisites: Proficiency in basic water safety and swimming strokes; current American Red Cross certificate in emergency water safety or lifeguard training. Pass/fail only. (F-S,Y)

2 Credits

PALS 01500 Fencing (NLA)

Beginning skills, techniques, and knowledge of foil fencing. Basic etiquette and rules of bouts. Techniques and practice in officiating a bout. Tournament-style bouts during the latter part of the course. Equipment is supplied. Pass/fail only. (IRR)

0.5 Credit

PALS 01700 Cross-Country Skiing (NLA)

Provides the knowledge and skills to cross-country ski over a variety of snow-covered terrain. Proper use of equipment, walking, step turns, diagonal stride as well as uphill and downhill techniques are covered on the hills and flats surrounding the campus. Other facets covered include winter safety and planning and preparing for a ski tour. Equipment is supplied. Pass/fail only. (S,Y)

0.5 Credit

PALS 01900 Basic Alpine Skiing (NLA)

Basic downhill skiing techniques. Special conditions: A fee is charged for this course. Meets one time per week, off campus. Transportation is provided. Pass/fail only. (S,Y)

1 Credit

PALS 02000 Intermediate Alpine Skiing (NLA)

This course focuses on a review of the fundamentals of skiing with emphasis on side slipping, basic skiing movements, and learning efficient, smooth, and continuous movements. Students will be introduced to moguls, varied terrain and conditions, gates and techniques for more efficient carving and games and exercises that provide the opportunity to progress to an advanced level. Student must have previous skiing experience. A fee is charged for this course. The course meets one time per week off-campus at Greek Peak Ski Mountain Resort. Transportation to and from site is provided. Pass/fail only.

1 Credit

PALS 02100 Advanced Alpine Skiing (NLA)

This course focuses on using the skis as a tool (carving), mogul skiing, racing, varied snow conditions, short radius turns, and expert terrain. Student must have previous skiing experience and be confident skiing on black diamond trails. A fee is charged for this course. The course meets one time per week off-campus at Greek Peak Ski Mountain Resort. Transportation to and from site is available. Pass/fail only. (S,Y)

1 Credit

PALS 02200 Basic Snowboarding (NLA)

Basic downhill snowboarding techniques. Special conditions: A fee is charged for this course. Meets one time per week, off campus.

Transportation is provided. Pass/fail only. (S,Y)

1 Credit

PALS 02201 Intermediate Snowboarding (NLA)

Focuses on a review of the fundamentals of snowboarding with emphasis on side slipping, heel/toe edging movements, and learning efficient, smooth and continuous movements. Introduction to moguls, varied terrain and conditions, gates and techniques for more efficient carving. An additional fee is required for this course. Meets one time per week at Greek Peak Ski Mountain Resort. Transportation to and from site is provided. Prerequisites: Student must have previous snowboarding experience. Pass/fail only. (S,Y).

1 Credit

PALS 02202 Advanced Snowboarding (NLA)

Focuses on using the board as a tool (carving), mogul boarding, racing, varied snow conditions, short radius turns and expert terrain. An additional fee is required for this course. Meets one time per week at Greek Peak Ski Mountain Resort. Transportation to and from site is provided. Prerequisites: Student must have previous snowboarding experience. Pass/fail only. (S, Y).

1 Credit

PALS 02500 Indoor Tennis (NLA)

Fundamental tennis strokes and rules of the game; increase proficiency in playing tennis by indoor techniques. Indoor rackets and balls provided. Pass/fail only. (S,Y)

0.5 Credit

PALS 02600 Basic Tennis (NLA)

Basic strokes, including ground strokes, slice serve, and block volley techniques, for use in singles and doubles play. Coverage of related rules and strategy necessary for game play, scoring, and etiquette. For students with no formal background in either the basic fundamentals or game strategy and no knowledge of scoring, rules, or etiquette. Tennis rackets and balls provided. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 02700 Intermediate Tennis (NLA)

Review of the ground strokes, slice serve, and block volley; lob and overhead are taught, stressing their use in both singles and doubles play. More game experience. Prerequisites: Ability to demonstrate ground strokes, slice serve, and block volley. Tennis rackets and balls provided. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 02800 Advanced Tennis (NLA)

Review of all basic strokes, with emphasis on executing them more efficiently. The flat serve and auxiliary strokes such as the half volley, chop, slice, drop volley, and lob volley are taught, stressing competitive play and strategy in both singles and doubles play. Prerequisites: Mastery of ground strokes, slice serve, block volley, lob, and overhead, performed in a game situation. Tennis rackets and balls provided. Pass/fail only. (F,Y)

0.5 Credit

PALS 03000 Field Archery I (NLA)

Prepares students for bow hunting, including orientation to New York State hunting laws, game conservation, and bow hunting techniques as well as the development of the bare-bow technique of shooting with a heavier-weight bow than is used in target archery. When proficiency at the target-butt has been demonstrated, shooting at simulated wild-game targets takes place on a natural wooded trail. Equipment is supplied.

Pass/fail only. (IRR)

0.5 Credit

PALS 03100 Field Archery II (NLA)

An extension of Field Archery I. Pass/fail only. (IRR)

0.5 Credit

PALS 03300 Golf I (NLA)

Develops an understanding and appreciation of the game through learning basic skills such as stance, grip, and swing. If time permits and student ability warrants, a visit to a local golf course will be made. This is a beginner's course. Equipment is supplied. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 03400 Golf II (NLA)

An extension of Golf I. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 03600 Badminton I (NLA)

Fundamental skills of badminton necessary to play both singles and doubles; rules and customs involved in badminton. Content includes offensive and defensive skills, singles and doubles strategy and play, rules, and etiquette. Evaluation involves a skills test and a written exam.

Pass/fail only. (F-S,Y)

0.5 Credit

PALS 03700 Badminton II (NLA)

An extension of Badminton I. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 03800 Badminton III (NLA)

Clears, drop shots, smashes, net shots, serving, and strategy, with special emphasis on doubles play. Prerequisites: PALS 03600, PALS 03700, or permission of instructor. Pass/fail only. (IRR)

0.5 Credit

PALS 04000 Run, Walk, and Jog I (NLA)

Provides students of all ability levels with an opportunity to understand and benefit from a lifetime activity. Techniques covered are warm-ups and flexibility, aerobics, running guidelines, and jogging safety. Training methods, various types of terrain, and special running events are covered. The course concludes with a fitness evaluation. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 04100 Run, Walk, and Jog II (NLA)

An extension of Run, Walk, and Jog I. The exercise program becomes more individualized. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 04400 Paddleball I (NLA)

This is a challenging sport and an opportunity for a vigorous workout. The course is suited for the beginner as well as the more experienced player. Basic skills and game strategy are covered, but most of the class time is devoted to playing informal games. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 04500 Paddleball II (NLA)

An extension of Paddleball I. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 04800 Billiards/Table Tennis (NLA)

Introduction to skills and strategies involved in billiards and table tennis with the majority of class time spent on pocket billiards. Students will develop the ability to execute various shots as well as understand different games within each activity. Course may be repeated for up to (F-S, Y)

0.5 Credit

PALS 05000 Basic Windsurfing (NLA)

Basic boardsailing technique. The class hours are flexible after the first three sessions. Special conditions: A fee is charged for this course.

Meets off campus. Transportation is provided. A swimming test is required. Pass/fail only. (IRR)

0.5 Credit

PALS 05100 Intermediate Windsurfing (NLA)

Intended for students who have mastered the basic boardsailing techniques. The class hours are flexible after the first three sessions.

Special conditions: A fee is charged for this course. Meets off campus. Transportation is provided. Prerequisites: PALS 05000. Pass/fail only.

(IRR)

0.5 Credit

PALS 05300 Sailing-Small Boat (NLA)

For the student with little knowledge of sailing. Instruction is on sailboats with two sails. A swimming test is required. Special conditions: A fee is charged for this course. Meets off campus. Transportation is provided.

Pass/fail only. (IRR)

0.5 Credit

PALS 05500 Sailing-Catamaran (NLA)

For students who want to learn to sail a catamaran. A swimming test is required. Special conditions: A fee is charged for this course. Meets off campus. Transportation is provided. Pass/fail only. (IRR)

0.5 Credit

PALS 05700 Boating Skills and Safety (NLA)

Introduces students to basic boating skills and techniques. Basic piloting, navigation rules, legal requirements, and dealing with emergencies are discussed. Pass/fail only. (IRR)

1 Credit

PALS 05900 Gymnastics Activities I (NLA)

General gymnastics instruction for both men and women. Combines basic gymnastics instruction with progressions individually designed to bring improvement to any ability level. Provides the opportunity to increase current level of gymnastics skill. Pass/fail only. (IRR)

0.5 Credit

PALS 06000 Gymnastics Activities II (NLA)

While Gymnastics Activities I introduces students to various gymnastic events and their basic skills, Gymnastics Activities II is structured to individual specialization, so as to further develop skills and spotting techniques and to combine three or more skills. Pass/fail only. (IRR)

0.5 Credit

PALS 07600 Basketball I (NLA)

Basic offensive and defensive philosophy and skills. Course content includes lead-up drills and games in all skills, team play, and some strategy. Designed for all levels of ability. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 07700 Basketball II (NLA)

An extension of Basketball I. Pass/fail only. (F-S,Y)

0.5 Credit

PALS 08000 Volleyball I (NLA)

Introduces the skills and strategies involved in power volleyball. Class periods are spent perfecting such skills as the bump, set, serve, and block. Basic forms of offense and defense are introduced during game play. Pass/fail only. (F-S,Y)
0.5 Credit

PALS 08100 Volleyball II (NLA)

An extension of Volleyball I. Pass/fail only. (F-S,Y)
0.5 Credit

PALS 08200 Volleyball III (NLA)

Emphasizes blocking, multiple attack, defensive systems, spiking, the dink, strategy, and a consistent serve. Prerequisites: PALS 08100; PALS 08200. Pass/fail only. (S,Y)
0.5 Credit

PALS 09000 Personal Defense (NLA)

Develops, through the learning of basic skills, an appreciation of the art of defending oneself or one's loved ones and property. Students learn strategy and knowledge of vulnerable areas, legal implications, and the need for physical exercise and safety precautions. Primarily for students who want to learn basic self-defense techniques. Pass/fail only. (F-S,Y)
0.5 Credit

PALS 09100 Triathlon and Multisport Training (NLA)

Provide students with an introduction to triathlon while emphasizing the importance of cross-training in an exercise routine. Swimming, running, weight training, and biking. Combination of lecture and exercise. Course is designed for both "first time" triathletes and those interested in fine-tuning their training regimen. Twice each semester, students will participate in an intra-campus sprint triathlon which will include a .5 mile swim, 15 mile stationary bike ride and a 5k run. Fitness evaluation conducted by instructor on first class. Course may be repeated for up to Pass/fail only. (F-S,Y)
1 Credit

PALS 09300 Personal Fitness I (NLA)

Provides the skills and activities needed to achieve a high degree of physical fitness. Exercises designed to improve cardiovascular endurance, muscle tone, flexibility, and personal appearance are emphasized. This course develops an appreciation for keeping in good physical condition. Pass/fail only. (F-S,Y)
0.5 Credit

PALS 09400 Personal Fitness II (NLA)

An extension of Personal Fitness I. Pass/fail only. (F-S,Y)
0.5 Credit

PALS 09500 Personal Fitness III (NLA)

Students set their own goals by incorporating more individualized instruction in their daily programs, including jogging, weight training, flexibility exercises, and circuit training. Pass/fail only. (IRR)
0.5 Credit

PALS 09800 Basic Jujitsu (NLA)

A basic course in Dan Zan Ryu Jujitsu. Involves the study of the history, philosophy, and skills of jujitsu. The techniques are a mixture of many of the martial arts and can be used for self-defense. An additional fee for a uniform may be required. Pass/fail only. (F-S,Y)
1 Credit

PALS 10400 Dance Exercise with Weights (NLA)

For the student who desires a more difficult workout through the use of wrist weights and ankle weights. Emphasis is placed on strengthening the upper body and on toning hips and legs as students learn about cardiovascular endurance, strength, and flexibility. Pass/fail only. (IRR)
0.5 Credit

PALS 13000 Cooperative Teambuilding (NLA)

Students are challenged in individual and group activities that promote self confidence and leadership to be successful. Success requires responsibility, trust, positive attitude and the desire to have fun in a physical activity and strategic setting. May be repeated for up to Pass/Fail only. (F-S, Y)
0.5 Credit

PALS 19900-19902 Selected Topics in PALS (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. Pass/fail only. 0.(IRR)
0.5-1 Credits

PALS 19903 Sltp: PALS (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. Pass/fail only. 0.(IRR)
0.5-1 Credits

PALS 19904-19998 Selected Topics in PALS (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. Pass/fail only. (IRR)
0.5-1 Credits

Physical Education (PHED)

PHED 10100 Teaching Strategies in Physical Education (NLA)

Introduces students to basic pedagogical skills relative to the successful teaching of physical education in a school setting. Topics include, but are not limited to, lesson planning, voice projection, physical movement in the teaching area, and effective transitions. The use of videotaped mini-lessons throughout the semester will encourage students to practice these teaching techniques, as well as to develop reflective and analytical skills in relation to their teaching. For physical education and health and physical education majors/coaching minors. (S,Y)
Attributes: TE
1 Credit

PHED 14400 Fundamentals of Dance and Movement (NLA)

This course will prepare the future teacher in the area of movement development, through basic dance. Emphasis will be placed on the teaching of dance in the public school setting, in both secondary and primary grades. Although there is a dance skill component, the majority of the class focuses on knowledge about pedagogy of fundamental movements in dance and progressions. Students will learn teaching progressions to be effective in the public school setting. (S,Y)
1 Credit

PHED 17800 Fundamental Movement Concepts Gymnastics (NLA)

This course will prepare the future teacher in the area of movement development, through basic gymnastics. Emphasis will be placed on the teaching of gymnastics in the public school setting, with particular focus on the primary grades. Although there is a movement component, the majority of this course will be cognitively based. Students will learn teaching progressions and deal with learning effectiveness in the public school setting. (S,Y)

1 Credit

PHED 20200 Teaching Goal-Oriented Games in Physical Education (NLA)

Introduces students to a tactical model/approach to higher-level games play, focusing specifically on the offensive and defensive strategies and skills common to goal-oriented games (e.g. soccer, football, lacrosse, basketball, handball). Corequisites: PHED 23000. (S, Y)

1 Credit

PHED 20400 Teaching Net/Wall Games in Physical Education (NLA)

Introduces students to a tactical model/approach to higher-level games play, focusing specifically on the offensive and defensive strategies and skills common to net/wall games (e.g. volleyball, tennis, racquetball, paddleball). Prerequisite: Sophomore standing. (F,Y)

1 Credit

PHED 20500 Teaching Target and Fielding Games in Physical Education (NLA)

Introduces students to a tactical approach to higher-level games play, focusing specifically on the offensive and defensive strategies of target and fielding games (e.g., softball, baseball, archery, golf, bowling).

Prerequisites: PHED 10100. (F,Y)

1 Credit

PHED 20700 Teaching Outdoor Pursuits and Contemporary Activities (NLA)

Introduces students to the basic principles involved in teaching outdoor pursuits and adventure education as part of the elementary and secondary physical education programs. Depending on the season, activities include basic rock climbing, mountain biking, cross country skiing, challenge course facilitation and/or backcountry travel techniques for different age groups and diverse populations. Prerequisites: HITH 15200. (S,Y)

1 Credit

PHED 20800 Teaching Individual Activities in Physical Education (NLA)

Introduces students to the basic principles involved in the planning, teaching, and assessment of a variety of individual activities taught as part of the secondary physical education curriculum. Activities include, but are not limited to, yoga, wrestling, personal defense, fencing, and track/field. Prerequisite: Sophomore standing. (F,Y)

1 Credit

PHED 21000 Teaching Sport Skills for Coaches (NLA)

Provides students with theoretical basis of skill learning, fundamental skills, and knowledge for effective coaching. Focuses on specific ways to teach sport skills for the development and improvement of skill and performance. Prepares students with the provision of practical in-class coaching experience in a variety of sports. Permission of instructor required. (S,Y)

3 Credits

PHED 21200 Motor Skills Development (NLA)

Students will be introduced to the fundamental theories and principles related to the motor, cognitive, and affective development of humans throughout the life span, with emphasis on children and adolescents. Detailed analysis of fundamental movement skills and their relationship to effective, developmentally appropriate movement programs will be explored. Students will demonstrate critical analysis of movement programs and compare and contrast them with best practice. Laboratory experiences involving children and adolescents in school settings will allow students to observe the skills and theories in real-life situations.

Prerequisites: HLTH 15200 or PHED 25500. (F-S, Y)

Attributes: TE

3 Credits

PHED 23000 Teaching Physical Activities in Elementary Physical Education (NLA)

Provides physical education teacher candidates with knowledge in the selection, planning, and implementation of developmentally appropriate physical activities for elementary school children. Introduces students to the "skill theme approach" to teaching games, gymnastics, and dance with an emphasis on the development and use of movement concepts in increasing physical activity as outlined by the National Standards for Physical Education. Emphasis is placed on developing an applied understanding of what to teach and practical lab experiences are included in the course. Prerequisites: PHED 10100 and HLTH 15200. (S, Y)

Attributes: TE

3 Credits

PHED 23400 Fitness Applications for Health Promotion (NLA)

Incorporates basic kinesiological, biomechanical, and physiological principles and concepts with practical applications for physical activity, health-related fitness, and health promotion. Clinical procedures include body composition measurement, submaximal oxygen uptake testing, assessing blood pressure, calculating body mass indexes, and cholesterol screening. A major emphasis is the assessment of health-related fitness and the prescription of various types of physical activities for children, adolescents, and adults. Prerequisites: EXSS 12000; EXSS 12100. Students can receive credits for HLTH 23400 or PHED 23400, not both. (S,Y)

Attributes: HE1

4 Credits

PHED 23500 Teaching Fitness in Physical Education (NLA)

Introduces students to the teaching and assessment of fitness concepts to children in the K-12 school setting. Emphasis is placed on the practical application, teaching, and assessment of the components of physiological aspects of fitness to children. Topics include the contemporary goals of and background to fitness education, developmentally and instructionally appropriate principles for teaching and assessing fitness, the use of technology in the instruction and assessment of fitness, using various testing batteries, the reporting of fitness results, and the use of goal setting as a motivational tool for improving one's fitness. This course will allow students to become nationally certified as a physical best health-fitness specialist.

Corequisites: Prior or concurrent enrollment in PHED 23400. (F-S, Y)

1 Credit

PHED 25500 Philosophy and Principles of Coaching (NLA)

The philosophy and principles of coaching young athletes. Emphasis is placed on development of a coaching philosophy through critical examination of issues relating to coaching. Coaching responsibilities, developmental characteristics of children and youth, and their implications for the conduct of athletic programs, instructional and administrative methods, effective design and conduct of practices, and enhancement of contest performance are also discussed. Prerequisites: Sophomore standing. (F-S,Y)

3 Credits

PHED 25600 Health Sciences Applied to Coaching (NLA)

The application of modern principles of the health sciences as they relate to youth coaching (up to 12th grade) including exercise physiology, kinesiology, sport psychology, and nutrition. Human growth and development, safety, first aid, training, and conditioning of youth athletes are covered. Prerequisite: PHED 25500 or concurrent enrollment. (F-S,Y)

3 Credits

PHED 31000 Contemporary Challenges in Sport Coaching (NLA)

Focuses on critical examination of significant challenges and controversies within sport coaching. Emphasis is on the identification of challenges and controversies, systematic analysis, and development of a realistic plan to address the issue. Prerequisites: PHED 25500. (S,Y)

3 Credits

PHED 33000 Adapted Physical Education and Sport (NLA)

Provides students with an understanding of individuals with disabilities. Students learn to adapt physical education activities to meet the abilities of an individual with special needs in order to provide a safe and successful learning experience. Topics addressed include, but are not limited to, philosophical approaches to teaching students with disabilities, legislation affecting the adapted physical education program, the process of identifying students with disabilities in the public school system, and development of the individual education plan. Laboratory experiences include working weekly with students with disabilities in an aquatics program. Prerequisites: PHED 21200. Corequisites: PHED 33200 or PHED 33300. (F-S,Y)

3 Credits

PHED 33200 Curriculum and Methods in Elementary School Physical Education (NLA)

Provides students with practical guidelines for the development and assessment of contemporary elementary physical education programs. Pedagogical skills and strategies for successful teaching as they pertain to the elementary school teaching situations are also emphasized. Developmentally appropriate physical education content using a movement framework (movement concepts and skill themes) serves as the basis for the course, which involves practicum teaching experiences in local elementary schools. Prerequisites: EDUC 21010; PHED 23000; junior or senior standing. (F,Y)

Attributes: TE

3 Credits

PHED 33300 Curriculum and Methods in Secondary School Physical Education (NLA)

Analysis of the program of physical education in secondary schools; criteria for the selection and grade placement of activities; consideration of methods and teaching techniques; and problems relating to program planning, time allotment, administration of facilities, and program evaluation. Observation and teaching of secondary physical education classes in the Ithaca school system, as well as micro-peer teaching on campus. Prerequisites: Junior or senior standing; EDUC 21010. (S,Y)

Attributes: TE

3 Credits

PHED 34900 Fieldwork in Physical Education (NLA)

Practical experience in public, voluntary, or commercial agencies or businesses providing various types of physical education, sports-related activities, or services. Prerequisites: Major or minor in the Department of Health Promotion and Physical Education or the Department of Exercise and Sport Sciences; junior standing or above; permission of department chair. (F-S,Y)

Attributes: TE

1-6 Credits

PHED 37400 Coaching Seminar-Field Hockey (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 37600 Coaching Seminar-Swimming (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 38500 Coaching Seminar - Track & Field (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 38600 Coaching Seminar-Soccer (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 38700 Coaching Seminar-Wrestling (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 38800 Coaching Seminar-Lacrosse (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 39900-39903 Selected Topics in Physical Education (LA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

Attributes: NLA

1-3 Credits

PHED 42000-42003 Independent Study in Sport Skills (NLA)

Prerequisites: Major or minor in Department of Health Promotion and Physical Education; PHED 33200 or PHED 33300; permission of department chair. 0.5-(F-S,Y)

0.5-1 Credits

PHED 43900 Assessment in Physical Education (NLA)

Prepares students to assess student learning in a K-12 physical education setting. Through a combination of lectures, labs, discussions, and field-based activities, opportunities are provided to understand and apply current educational testing and evaluation procedures. Course content includes study of the criteria for selection of tests, application of statistical procedures, construction and analysis of assessment tools, procedures for classification and grading of students, and program assessment techniques. Credit will not be given for both this course and HLTH43900. Prerequisites: PHED 33200, PHED 33300, or HLTH 36000.

(F,Y)

Attributes: TE

3 Credits

PHED 44000 Organization and Administration of Physical Education (NLA)

Policies and procedures in the organization and administration of physical education and athletics in the public school setting. Directed discussions and investigation of the nature and scope of administrative responsibilities in programs of physical education and athletics.

Prerequisites: PHED 33200 or PHED 33300, or permission of instructor. (F,Y)

Attributes: UND

3 Credits

PHED 44100 Student Teaching in Physical Education (NLA)

Observation and supervised student teaching. Assignment to approved, cooperating schools full-time for one semester in the senior year.

Experience in classroom observation, participation, teaching, coaching, and intramural and noon-hour supervision. Individual conferences with Ithaca College coordinators of field experiences. Required of all students preparing to teach physical education in elementary or secondary school. Prerequisites: Current American Red Cross CPR and first-aid card;

EDUC 21010; PHED 33200; PHED 33300; EDUC 34000. (F-S,Y)

Attributes: TE, UND

10 Credits

PHED 44500 Student Teaching in Physical Education (dual major) (NLA)

Observation and supervised student teaching. Assignment to approved, public schools full-time for a half semester in the senior year. Experience in structured observation, classroom assisting, and direct instruction; additional experience in planning, conferencing, and related school duties outside regular class periods. Individual conferences are held with Ithaca College supervisors of field experiences. Required of all dual health education and physical education majors. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010; PHED 33200; PHED 33300; EDUC 34000. (F-S,Y)

Attributes: TE

5 Credits

PHED 44800 Professional Seminar (NLA)

A field course to be taken in conjunction with PHED 44100 Student Teaching in Physical Education. Examines current trends and developments in teaching and extracurricular activities, as well as situations identified in student teaching. Special interest speakers. (F,S,Y)

Attributes: CP, TE

2 Credits

PHED 45000-45003 Independent Study in Physical Education (LA)

Individual study program for investigation of special problems in the field of physical education. Written report required. Prerequisites: Permission of instructor and department chair. (F-S,Y)

Attributes: TE

1-3 Credits

PHED 46000 Internship in Physical Education (NLA)

Supervised work experience in a sports-related service agency or business during the summer or the regular academic year. Prerequisites: Minimum 2.50 cumulative GPA; junior standing or above; current American Red Cross CPR and first aid card; permission of the instructor and department chair. 6-(F-S,Sum,Y)

6-12 Credits

PHED 47400 Coaching Seminar-Volleyball (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)

2 Credits

PHED 47500 Coaching Seminar-Gymnastics (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)

2 Credits

PHED 47700 Coaching Seminar-Softball

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)

2 Credits

PHED 48400 Coaching Seminar-Football (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

This course is repeatable up to four credits. (F-S,Y)

2 Credits

PHED 48500 Coaching Seminar - Men's Basketball (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 48800 Coaching Seminar-Baseball (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

Physical Therapy-Undergrad (PTBS)

PTBS 10100 Introduction to Physical Therapy (NLA)

An overview of the history of the physical therapy profession. Orientation to the responsibilities of a physical therapist and to the practice of physical therapy in a variety of environments, including musculoskeletal, neuromuscular, cardiovascular and pulmonary, integumentary, pediatric, and older adults will be discussed. Information regarding the representative professional association, clinical specialization, residency and fellowship will be presented. (F,S,Y)

1 Credit

PTBS 10200 Introduction to the Profession of Physical Therapy (NLA)

Orientation to the responsibilities and activities of physical therapists, the practice environments, representative professional association, and related professional literature. Experiential activities are included to enhance learning. (F or S,Y)

0.5 Credit

PTBS 20100 Introduction to the Practice of Physical Therapy (LA)

Orientation to the practice of physical therapy, including musculoskeletal, neuromuscular, cardiovascular and pulmonary, integumentary, pediatric, and older adults. Prerequisites: PTBS 10200. (F or S,Y)

0.5 Credit

PTBS 31400 Pathology for Physical Therapists (NLA)

Examines the components of general disease and injury processes and specific components of selected diseases likely to be encountered in physical therapy practice. Describes general pathology topics including cell and tissue injury, inflammation, and the healing and repair process. Focuses specifically on diseases of the musculoskeletal, cardiovascular, pulmonary, integumentary, and nerve systems. Emphasizes understanding the underlying mechanisms of structural and functional disruptions for adults, with secondary comparisons to pathology across the life span. Provides background information necessary for performing differential diagnosis and patient treatments that will be taught in future coursework. Prerequisites: PTBS 10100. (F,Y)

3 Credits

PTBS 39900-39905 Selected Topics in Physical Therapy

Clinical and professional topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. Satisfactory/D/Failure only. 0.(IRR)

0.5-3 Credits

PTBS 40000 Mobility Training (NLA)

Introduces patient/client care techniques related to mobility training including bed mobility, transfer training, gait training with a variety of assistive devices, elevation training, and wheelchair mobility. Familiarizes with the initial steps in the patient-therapist relationship including professional behaviors and oral communication. Review of cardiovascular systems is also included. Develops the skills necessary to ensure the safety of both the patient/client and the student/therapist in a clinical environment. Prerequisite: PTBS 10100. (F,Y)

1 Credit

PTBS 40100 Professional Development I (NLA)

Introduces professionalism including professional and ethical behavior, as well as our professional organization. Develops effective listening skills. Prepares to teach in a variety of settings and formats for academic, clinical, and professional purposes. Includes teaching/learning theories and styles, ability to adapt teaching for a variety of audiences, domains of learning, instructional objectives, teaching methods, instructional technology, and feedback. Prerequisites: PTBS 10100. (F)

1 Credit

PTBS 49900-49903 Independent Study (NLA)

This course, which requires a faculty sponsor, allows students to complete an in-depth study or project in an area of their interest related to physical therapy. Includes a final presentation. Prerequisites: Permission of faculty sponsor, academic adviser, department chair, and dean. May be repeated for a total of six credits. (F,S,Y)

1-6 Credits

PTBS 50000 Documentation for Physical Therapy (NLA)

Introduction to written documentation of physical therapy services using the APTA Patient/Client Management Model and the International Classification of Functioning, Disability and Health Model. Topics include written documentation of initial examinations, progress notes, and discharges; legal guidelines; medical terminology; and electronic health record. (U,Y)

1 Credit

PTBS 50100 Human Anatomy (NLA)

Human Anatomy is the study of the gross anatomical components of the human body through the use of lecture and cadaver dissection. Emphasis is placed on the musculoskeletal and neurovascular systems found in the extremities, trunk, chest, and abdominal walls, and in the head and neck. Prerequisites: PTBS 31400. (U,Y)

6 Credits

PTBS 50200 Musculoskeletal I (NLA)

Application of the patient/client management model with emphasis on examination, evaluation, and diagnosis of musculoskeletal problems of the extremities. Emphasis is placed on the following skills: patient history, joint integrity and mobility, goniometry, muscle performance testing, flexibility testing, ligament testing, special orthopedic tests, and posture as it relates to the extremities. Prerequisites: PHYS 10100, PHYS 10200, and PTBS 50100. (F,Y)

4 Credits

PTBS 50300 Soft Tissue Examination and Interventions (NLA)

This lecture and laboratory course examines various methods of soft tissue examination and intervention. It is designed to expose the student to a broad spectrum of techniques, while teaching the skills of the most commonly used methods. Some of the techniques are more scientifically evidence based than others. The course will emphasize critical assessment and foster the necessity for research-based analysis. The course is also designed to develop the student's palpation skills, including the examination and evaluation of soft tissue dysfunction.

Prerequisites: PTBS 50100. (F,Y)

2 Credits

PTBS 50400 Applied Biomechanics (LA)

Application of mechanical principles to human movement with particular attention to the effect of forces in producing normal movement. Students are required to apply their knowledge of anatomy to understanding individual joint function, as well as the integrated function of several joints during complex activities such as the normal gait. Prerequisites: PTBS 50100. (F,Y)

Prerequisites: PTBS 50100. (F,Y)

3 Credits

PTBS 50500 Professional Development II (NLA)

Introduction to the Practice Act, roles of paraprofessionals, professional and ethical behavior, and effective communication styles. Instruction in clinical education teams, models of clinical education, and assessment of clinical performance. Prerequisites: PTBS 40100. (S,Y)

Attributes: CP

1 Credit

PTBS 50600 Medical Screening I (NLA)

This course covers the principles and interpretation of diagnostic testing. Students will become competent in understanding radiologic interpretations of X-rays, Computed Tomography, MRI, Nuclear, ultrasound imaging and nerve conduction testing. Radiographic anatomy, densities, views, and structural analysis are taught using digital imaging. Patient cases will be used to compare patho-structural diagnosis with actual symptoms and clinical presentation. Prerequisites: PTBS 31400.

(F,Y)

1 Credit

PTBS 50700 Integrated Clinical Experience I (NLA)

Work with patients under the supervision of a faculty member. Apply knowledge and skills to assume appropriate responsibilities in direct patient care. (B,S,Y)

1 Credit

PTBS 50800 Evidence Based Practice I (NLA)

Explore how research literature can guide clinical decision making and form the basis for contemporary physical therapist practice. Emphasize how evidence is used to answer clinical questions that affect the examination process, evaluation procedures, and interventions commonly used by physical therapists. Examine the historical background for evidence based practice. Analyze the fundamental components of evidence based practice. Prerequisites: MATH 14400, MATH 14500, MATH 15500, MATH 21600 or PSYC 20700; and PTBS 50100. (S,Y)

3 Credits

PTBS 50900 Integrated Clinical Experience II (NLA)

This second clinical education experience provides students with an opportunity to work with patients under the supervision of a faculty member in a diverse experience. Students will apply knowledge and skills and assume appropriate responsibilities in direct patient care. Pass/Fail only. Prerequisites: PTBS 50700. (S,Y,B)

1 Credit

PTBS 51000 Joint Mobilization (NLA)

Lecture and laboratory course that provides an evidence based manual therapy approach toward evaluation and management of musculoskeletal conditions using joint mobilization. Emphasis will be on enhancing the student's clinical reasoning and manual therapy skills. Prerequisites: PTBS 50200 and PTBS 50300. (S,Y)

Prerequisites: PTBS 50200 and PTBS 50300. (S,Y)

2 Credits

PTBS 51002 Human Anatomy

Study of the gross anatomical components of the human body through the use of lecture and cadaver dissection. Emphasis is placed on the musculoskeletal and neurovascular systems found in the extremities, trunk, chest, and abdominal walls, and in the head and neck.

Prerequisites: BIOL-20600. (Sum,Y)

6 Credits

PTBS 51100 Therapeutic Exercise (NLA)

A comprehensive analysis of the scientific principles of exercise commonly used in physical therapy practice. Specific exercise programs will be discussed, as well as adaptations of tissue to activity and immobilization. Prerequisites: PTBS 50200 and PTBS 50400. (S,Y)

3 Credits

PTBS 51103 Pathology for Physical Therapists (LA)

Examination of the components of general disease and injury processes and specific components of selected diseases likely to be encountered in physical therapy practice. General pathology topics described include cell and tissue injury, inflammation, and the healing and repair process. Specific focus on diseases of the musculoskeletal, cardiovascular, pulmonary, integumentary, and nerve systems. Emphasis is placed on understanding the underlying mechanisms of structural and functional disruptions for adults, with secondary comparisons to pathology across the life span. This course provides background information necessary for performing differential diagnosis and patient treatments. Prerequisites: PTBS 51002; PTBS 31300. (S,Y)

Prerequisites: PTBS 51002; PTBS 31300. (S,Y)

3 Credits

PTBS 51200 Acute Care (NLA)

This course will provide students with the knowledge related to and skills required in the acute care setting. Students will develop competency in acute care evaluations, interventions, and discharge planning. Both didactic and laboratory activities will be used to integrate curricular content to address the complex patient and dynamic environment encountered in acute care. Prerequisites: PTBS 40000. (F,Y)

Prerequisites: PTBS 40000. (F,Y)

2 Credits

PTBS 51300 Electrotherapeutic Modalities and Physical Agents (NLA)

The study of the biophysical, physiological, and clinical principles and procedures associated with the application of electromagnetic and acoustic energy in the clinical management of pathological conditions.

Prerequisites: PHYS 10100, PHYS 10200, and PTBS 50100. (S,Y)

3 Credits

PTBS 51400 Medical Screening II (NLA)

Builds on the principles introduced in Medical Screening I allowing the students to integrate these principles into an efficient and effective patient examination. A systematic approach to evaluating a patient's history and performing a systems review allows students to identify risk factors, red flags, visceral pain patterns, and constitutional symptoms that warrant a medical referral. Decisions for recommending lab tests or imaging are based on specific medical conditions and current appropriateness criteria. Prerequisites: PTBS 50600. (S,Y)

Prerequisites: PTBS 50600. (S,Y)

2 Credits

PTBS 51500 Health Care Systems (NLA)

This course familiarizes students with the basic constructs of the U.S. health care system, with emphasis on how system components influence patient referrals, delivery of care, reimbursement, and outcomes.

Prerequisites: PTBS 40100. (S,B,Y)

1 Credit

PTBS 51600 Mobility Training (NLA)

Introduces patient/client care techniques related to mobility training including bed mobility, transfer training, gait training with a variety of assistive devices, elevation training, and wheelchair mobility. Familiarizes students with the initial steps in the patient-therapist relationship including professional behaviors and oral communication. Review of cardiovascular systems is also included. Develops the skills necessary to ensure the safety of both the patient/client and the student/therapist in a clinical environment. Prerequisites: PTBS 50100. (F,Y)

1 Credit

PTBS 51700 Professional Development I (NLA)

Introduces professionalism including professional and ethical behavior, as well as our professional organization. Develops effective listening skills. Prepares to teach in a variety of settings and formats for academic, clinical, and professional purposes. Includes teaching/learning theories and styles, ability to adapt teaching for a variety of audiences, domains of learning, instructional objectives, teaching methods, instructional technology, and feedback. Prerequisites: PTBS 50100. (F)

1 Credit

PTBS 51800 Pathology for Physical Therapists (NLA)

Examines the components of general disease and injury processes and specific components of selected diseases likely to be encountered in physical therapy practice. Describes general pathology topics including cell and tissue injury, inflammation, and the healing and repair process. Focuses specifically on diseases of the musculoskeletal, cardiovascular, pulmonary, integumentary, and nerve systems.

Emphasizes understanding the underlying mechanisms of structural and functional disruptions for adults, with secondary comparisons to pathology across the life span. Provides background information necessary for performing differential diagnosis and patient treatments that will be taught in future coursework. Prerequisites: PTBS 50100. (F,Y)

3 Credits

PTBS 52102 Musculoskeletal Examination and Evaluation (NLA)

Introduction to the patient/client management model with emphasis on examination, evaluation, and diagnosis of musculoskeletal problems of the extremities. Emphasis is placed on the following skills: patient history, range of motion, goniometry, muscle performance testing, flexibility testing, ligament testing, special orthopedic tests, and posture as it relates to the extremities. Prerequisites: PHYS 10100; PHYS 10200; PTBS 51002. (F,Y)

3 Credits

PTBS 52203 Soft Tissue Palpation and Examination (NLA)

This lecture and laboratory course examines various methods of soft tissue examination and intervention. It covers a broad spectrum of techniques while teaching the skills of the most commonly used methods. Some of the techniques are more scientifically evidence-based than others. The course emphasizes critical assessment and the need for research-based analysis. It develops palpation skills, including the examination and evaluation of soft tissue dysfunction. Prerequisite: PTBS 51002. Corequisites: PTBS 52102; PTBS 53702. (F,Y)

2 Credits

PTBS 52304 Peripheral Joint Mobilization (NLA)

Lecture and laboratory course preparing students to incorporate passive mobility testing into the patient/client examination. Students also learn to use passive joint mobilization interventions for patient/client with peripheral joint pathologies. Prerequisites: PTBS 52102; PTBS 52203. (S,Y)

1.5 Credits

PTBS 52405 Therapeutic Exercise (NLA)

A comprehensive analysis of the scientific principles of exercise commonly used in physical therapy practice. Specific exercise programs address muscle performance, endurance, mobility, and balance impairments. Adaptations of tissue on activity and immobilization are also discussed. Prerequisites: PTBS 31300; PTBS 52102; PTBS 53702 (S,Y)

3 Credits

PTBS 53101 Electrotherapeutic Modalities and Physical Agents (NLA)

The study of the biophysical, physiological, and clinical principles and procedures associated with the application of electromagnetic and acoustic energy in the prevention and treatment of pathological conditions. Prerequisites: PHYS 10100; PHYS 10200; PTBS 51002. (S,Y)

4 Credits

PTBS 53702 Applied Biomechanics (LA)

Application of mechanical principles to human movement. Particular attention to the effect of forces in producing normal movement. Students are required to apply their knowledge of anatomy to understanding individual joint function, as well as the integrated function of several joints during complex activities such as the normal gait. Prerequisites: PHYS 10100; PHYS 10200; PTBS 51002. (F,Y)

Attributes: NS

3 Credits

PTBS 54001 Professional Development I (NLA)

Description of physical therapy as a profession in the United States, including history, professional organization, roles of the physical therapist and related personnel, and scope of practice. Prerequisites: Senior standing. (F,Y)

.5 Credit

PTBS 54102 Preclinical Conference I (NLA)

Series of sessions to explain clinical education policies and procedures and choose sites for clinical affiliations. Prerequisites: Senior standing; clinical health studies major. Pass/fail only. (Su,Y)

0 Credit

PTBS 54203 Professional Development II (NLA)

Introduction to the Practice Act, Code of Ethics, roles of paraprofessionals, professional and ethical behavior, and effective communication styles. Instruction in clinical education teams, models of clinical education, and assessment of clinical performance. Corequisite: PTBS 55501. Prerequisites: PTBS 54001. (S,Y)

Attributes: CP

1 Credit

PTBS 55501 Teaching and Learning in the Clinical Setting (NLA)

Preparation to teach in a variety of settings and formats for academic, clinical, and professional purposes. Content is applicable to community presentations, group in-services, and presentations, as well as patient/family and other individualized teaching. Includes teaching/learning theories and styles, impact of age, culture, environment, and motivation, domains of learning, instructional objectives, teaching methods, and instructional technology. Evaluation, feedback, and outcome measurements are included. (S,Y)

1 Credit

PTBS 59000-59005 Selected Topics in Physical Therapy (NLA)

Clinical and professional topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Pre-requisites: As appropriate to topics. Pass/fail only .(IRR)
0-3 Credits

PTBS 59800 Honors Seminar in Physical Therapy (NLA)

For students in the honors program. Research proposals completed in PTBS 59900 are presented and critiqued. In addition, examples of good and poor published journal articles are discussed and analyzed. Prerequisites: PTBS 59900. Note: All undergraduates taking this course for graduate credit must satisfy the conditions listed under "Course Levels." (S,Y)
1 Credit

PTBS 59900 Honors Project (NLA)

For the exceptional student who wishes to pursue graduate research. Results will be summarized in a research proposal, which is a preliminary step toward a graduate thesis. Prerequisites: PTBS 41000; permission of department chair. Note: All undergraduates taking this course for graduate credit must satisfy the conditions listed under "Course Levels." (F,Y)
3 Credits

Physics (PHYS)

PHYS 10100 Introduction to Physics I (LA)

Principles and concepts of classical physics (algebra-based). Mechanics, including rotational motion and energy and momentum conservation, properties of matter. Three lectures and one recitation/laboratory per week or three two-hour lecture/recitation/laboratory sessions per week. Prerequisites: Math placement score 2 or higher, math placement assessment score of 54 or greater, or completion of MATH 10400, MATH 10800, or MATH 11000 (with a C- or better). (F,Y)
Attributes: 2A, ENRE, NS
4 Credits

PHYS 10200 Introduction to Physics II (LA)

A continuation from PHYS 10100 of the principles and concepts of classical physics (algebra-based). Standing waves and sound, physical and geometrical optics, electrostatics, magnetism, DC circuits, fluids, heat, and thermodynamics. Three lectures and one recitation/laboratory per week or three two-hour lecture/recitation/laboratory sessions per week. Prerequisite: PHYS 10100. (S,Y)
Attributes: ABSS
4 Credits

PHYS 10400 Physics of Human Movement (LA)

Introductory course in Newtonian mechanics (algebra-based) applied to movement of and within the human body. Covers fundamental principles and concepts of physics including: projectile motion, rotational motion, torque, and energy and momentum conservation. Prerequisite: Math placement in group 2 or higher, math placement assessment score of 54 or greater, or MATH 11000. (F,Y)
Attributes: 2A, SC, TIII
3 Credits

PHYS 11000 Introductory Mathematical and Computational Methods for Physics (LA)

Bridges mathematics and computational skills to physical applications and prepares students for future study in Physics and Astronomy. The aim of this course is to develop tools for quantitatively analyzing problems common to courses in the Physics and Astronomy majors; topics will include applying algebraic tools, concepts from trigonometry, and use of spreadsheets to collect and analyze data in the Physics context. Prerequisites: Math placement in group 1 or higher, math placement assessment score of 76 or greater, MATH 10800 (may be taken concurrently) OR MATH 11100 (may be taken concurrently). (F,Y)
2 Credits

PHYS 12100 Light and Special Relativity (LA)

Intended as an introductory course for physics majors and science enthusiasts. Covers algebra-based topics in the physics core curriculum: light waves, optics, quantum properties of light, and special relativity. Emphasis is placed on the mathematical analysis of concepts as well as on developing conceptual understanding through active learning. Three two-hour lecture/recitation/laboratory sessions per week. Prerequisites: Math group 2 or higher, OR PHYS 11000 (may be taken concurrently). (F,Y)
4 Credits

PHYS 12200 Momentum, Energy, and Heat (LA)

Introductory calculus-based physics for students majoring in STEM fields. Topics include vectors, kinematics in one and two dimensions, dynamics, work, energy, momentum, heat, the first and second laws of thermodynamics, and entropy. Emphasis is placed on the mathematical analysis of concepts as well as developing conceptual understanding through active learning. Three two-hour lecture/recitation/laboratory sessions per week. Prerequisites: MATH 10800 or MATH 11100. (S,Y)
4 Credits

PHYS 12300 Classical Fields: Gravity, Electricity, & Magnetism (LA)

Introductory calculus-based physics for students majoring in STEM fields. Topics include gravity and the gravitational field, static electric fields and Coulomb's law, electric potential, capacitors, Ohm's law, the magnetic field and Ampere's law, induction and Faraday's law, and an introduction to fluids. Emphasis is placed on mathematical analysis as well as developing conceptual understanding through active learning. Three two-hour lecture/recitation/laboratory sessions per week. Prerequisites: PHYS 10100 OR PHYS 12200; MATH 11200. (F,Y)
4 Credits

PHYS 14300 Power: Energy Options for a Global Society (LA)

Survey of energy. Topics include energy technologies and energy resources (fossil fuels, nuclear, solar, wind, geothermal, biomass). Students are introduced to electricity, heat production and transfer, heat engines, energy efficiency, and sustainable energy systems. Energy use sectors such as residential, commercial, and transportation are examined. The course begins with a look at energy use in the home and gradually expands to complex subjects such as the electrical grid, national energy policy, deregulation, and international fusion research. The emphasis is on energy literacy and the goal is to provide students with the basic technical principles necessary to design energy projects of their own and to evaluate their costs and benefits. (S,E)
Attributes: 2A, NS
3 Credits

PHYS 16000 Physics of Sound (LA)

Physical basis of sound, with an emphasis placed on musical instruments, the human voice, and sound recording and reproduction. Physics concepts are introduced and developed as needed to understand these areas. Open to all students. Prerequisites: Math placement score 2 or higher, math placement assessment score of 76 or greater, or completion of MATH 10400, MATH 10800, or MATH 11000 (with a C- or better). (Y)
Attributes: 2A, NS
3 Credits

PHYS 17100 Earth: Evolution of a Habitable World (LA)

Formation and evolution of planet Earth from the astronomer's perspective: creation of elements, the first rocks, development of oceans, the first atmosphere, formation of the moon, records of climate history, and how life on Earth fits into the context of life in the universe. Examination of Venus and Mars as possible analogs for Earth's evolution (past and future). Other topics include the influence of the sun on Earth's climate, the greenhouse effect, the geologic record of the development of continents, and the asteroid and comet impact hazard. Emphasis is placed on our sources of knowledge, the errors of our measurements, and the attendant model uncertainties in predicting Earth's future. Students may not receive credit for both PHYS 17100 and PHYS 17200. Prerequisites: Math placement score 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 (with a C- or better). (S,Y)
Attributes: 2A, NS
3 Credits

PHYS 17200 Earth: Evolution of a Habitable World with Lab (LA)

Formation and evolution of planet Earth from the astronomer's perspective: creation of elements, the first rocks, development of oceans, the first atmosphere, formation of the moon, records of climate history, and how life on Earth fits into the context of life in the universe. Examination of Venus and Mars as possible analogs for Earth's evolution (past and future). Other topics include the influence of the sun on Earth's climate, the greenhouse effect, the geologic record of the development of continents, and the asteroid and comet impact hazard. Emphasis is placed on our sources of knowledge, the errors of our measurements, and the attendant model uncertainties in predicting Earth's future. Students enrolled in this course attend the lecture of PHYS 17100, but also meet for an additional weekly lab. Students may not receive credit for both PHYS 17100 and PHYS 17200. Prerequisites: Math placement in group 3 or higher, math placement assessment score of 46 or greater, or completion of MATH 10000 (with a C- or better). (S,Y)
Attributes: 2A, NS
4 Credits

PHYS 17801 Professional Physics and Astronomy Seminar I (NLA)

Introduction to the physics program for all beginning physics majors or those considering the major. Discussions about career opportunities, the various physics degree paths, and strategies for being a successful and engaged physics major. Participation in the physics department seminar required. (F,Y)
1 Credit

PHYS 21000 Intermediate Mathematical and Computational Methods for Physics (LA)

Applies quantitative and analytical techniques to physical applications and supports students in their intermediate course study of Physics and Astronomy. Topics include practice applying mathematical and computational tools such as single variable integration, series, the complex plane, ordinary differential equations and computer programming to physical situations. Prerequisites: PHYS 11000; MATH 11200. (F,Y)
2 Credits

PHYS 22400 Classical and Quantum Waves (LA)

Completes a comprehensive introduction to the principles of physics necessary for advanced coursework in the field. Topics include: mechanical oscillations of one and several particles, the classical wave equation and the behavior of its solutions, one-dimensional quantum mechanics, classical angular momentum, and an introduction to quantum mechanics in three dimensions. Emphasizes analytical techniques common across both classical and quantum domains. Prerequisites: PHYS 12100; PHYS 12300; PHYS 21000; MATH 21100. (S,Y)
4 Credits

PHYS 23900 Introductory Independent Study: Physics (LA)

One-semester course in which a student may pursue a topic of interest in physics. Offered on demand only. May be repeated up to a total of six credits. Permission of instructor required. (IRR)
0.5-3 Credits

PHYS 24300 Sustainable Energy: Powering the World (LA)

Survey of energy. Topics include solar, wind, geothermal, electricity, fossil fuels, heat transfer, and the economic and environmental opportunities created by energy efficiency and sustainable energy systems. The course culminates with a final Energy Design Project. Cross-listed as ENVS 24300. Students may not earn credit for both ENVS 24300 and PHYS 24300. Prerequisite: Math placement score 2 or higher, math placement assessment score of 54 or greater, or completion of MATH 10400, MATH 10800, or MATH 11000 (with a C- or better). (S,Y)
Attributes: NS, QL, SC, TQSF
4 Credits

PHYS 25000 Intermediate Applied Physics Design Laboratory (LA)

Intermediate design laboratory course in which students conduct investigations in various areas of applied physics. Emphasis is placed on the development of good laboratory techniques, simple circuit building, computer interfacing to equipment for data-taking, data analysis, data presentation (using computer graphical interface), and formal report writing. Prerequisites: PHYS 12100; PHYS 12300; PHYS 21000 (maybe taken concurrently) or COMP 17100 (may be taken concurrently). (S,Y)
2 Credits

PHYS 26000 Intermediate Physics Laboratory (LA)

Intermediate laboratory course in which students conduct three investigations in various areas of physics. Emphasis is placed on the development of good laboratory techniques, data-taking procedures, data analysis, data presentation (using computer graphical interface), and formal report writing. Prerequisite: PHYS 12100; PHYS 12300; PHYS 21000 or COMP 17100 (may be taken concurrently). (S,Y)
2 Credits

PHYS 27800 Professional Physics and Astronomy Seminar II (NLA)

Continuation of professional preparation for careers in physics and astronomy. Covers introduction to effective communication skills, effective teamwork strategies, and includes tutorials in software commonly used in physics careers. Students will also engage in a series of discussions about undergraduate research, summer opportunities for research and internships, and careers in physics, and will draft resumes and cover letters. (F,Y)

1 Credit

PHYS 28000 Learning Assistant Practicum in Physics (NLA)

This course prepares our undergraduate Learning Assistants with the foundations of pedagogy necessary to assist our introductory physics students with their coursework. Additionally, this course provides procedural support for the Learning Assistants by strengthening students' pedagogical content knowledge. Prerequisites: B or higher in PHYS 10100, PHYS 10200, PHYS 10400, PHYS 11700, PHYS 11800, PHYS 16000, ASTR 17400, or ASTR 17500. (F,S)

1 Credit

PHYS 29400 Introductory Independent Study: Physics (LA)

One-semester course in which a student may pursue a topic of interest in physics. Offered on demand only. May be repeated up to a total of six credits. Permission of instructor required. (IRR)

0.5-3 Credits

PHYS 29900-29910 Introductory Physics Research (LA)

Original research participation with a faculty member in a specialized field. Prerequisites: Sophomore standing or above; permission of instructor. Six credit limit. (F-S,Y)

0.5-3 Credits

PHYS 30100 Advanced Mathematical and Computational Methods for Physics (LA)

Applies analytical and computational techniques to physical applications, and supports students in their advanced course study of Physics and Astronomy. Topics include practice applying mathematical tools such as multivariate calculus, fields, linear algebra, and advanced differential equations to physical situations. Applications include the use of mathematical techniques in advanced computational analysis. Prerequisites: COMP 17100; PHYS 22400. (F,Y)

Attributes: NS

4 Credits

PHYS 30500 Electromagnetism (LA)

Intermediate course in electricity and magnetism that builds on the foundation received in PHYS 12300. Topics include electric and magnetic fields, Gauss's law, electric potential, circuits, Ampere's law, Faraday's law, and Maxwell's equations. Explores electromagnetic phenomena through both analytical and computational exercises. Prerequisites: COMP 17100; PHYS 22400. (F,Y)

Attributes: NS

4 Credits

PHYS 31000 Advanced Mathematical and Computational Methods for Physics (LA)

Applies analytical and computational techniques to physical applications, and supports students in their advanced course study of Physics and Astronomy. Topics include practice applying mathematical tools such as multivariate calculus, fields, linear algebra, and advanced differential equations to physical situations. Applications include the use of mathematical techniques in advanced computational analysis. Prerequisites: COMP 17100; PHYS 22400. (F,Y)

4 Credits

PHYS 31100 Classical Mechanics (LA)

Intermediate mechanics, including statics and dynamics of particles and rigid bodies, central forces, planetary motion, and Lagrange's equations. Extensive computer analysis. Culminates in a computational simulation of a physical system based on the equations of motion. Prerequisites: Either PHYS 31000 or the combination of PHYS 22400, MATH 21400, and MATH 23100. (S,Y)

Attributes: NS

4 Credits

PHYS 31400 Professional Physics and Astronomy Seminar III (NLA)

Continuation of professional preparation for careers in physics and astronomy. Students will practice both written and oral communication skills and model effective teamwork strategies. Students will also engage in a series of discussions about careers in physics, and how to maximize opportunities in the junior and senior years to be competitive in the job market. Prerequisites: PHYS 21400. (F,Y)

1 Credit

PHYS 32000 Thermal Physics (LA)

Topics include laws of thermodynamics with applications, thermodynamic functions and potentials, kinetic theory, statistical mechanics, real and idealized systems, and intermolecular processes. Prerequisites: COMP 17100 and PHYS 22400. (F,Y)

Attributes: NS

4 Credits

PHYS 32200 Classical Mechanics (LA)

Intermediate mechanics, including statics and dynamics of particles and rigid bodies, central forces, planetary motion, and Lagrange's equations. Extensive computer analysis. Culminates in a computational simulation of a physical system based on the equations of motion. Prerequisites: Either PHYS 31000 or the combination of PHYS 22400, MATH 21400, and MATH 23100. (S,Y)

4 Credits

PHYS 32300 Electromagnetism (LA)

Intermediate course in electricity and magnetism that builds on the foundation received in PHYS 12300. Topics include electric and magnetic fields, Gauss's law, electric potential, circuits, Ampere's law, Faraday's law, and Maxwell's equations. Explores electromagnetic phenomena through both analytical and computational exercises. Prerequisites: COMP 17100; PHYS 22400. (F,Y)

4 Credits

PHYS 32400 Quantum Mechanics (LA)

Advanced theory course with emphasis on understanding the nature of quantum theory and how it differs from classical ideas. Topics include the Stern-Gerlach experiments and quantum measurements, the Schrödinger equation and solutions to various potentials, angular momentum, and the hydrogen atom. Prerequisites: Either PHYS 31000 or the combination of PHYS 22400, MATH 21400, and MATH 23100. (S,Y)

4 Credits

PHYS 32500 Thermal Physics (LA)

Topics include laws of thermodynamics with applications, thermodynamic functions and potentials, kinetic theory, statistical mechanics, real and idealized systems, and intermolecular processes. Prerequisites: COMP 17100 and PHYS 22400. (F,Y)

4 Credits

PHYS 32600 Analog Electronics (LA)

A laboratory course on electronics covering the origination, amplification, processing, and digital conversion of analog signals. Experiments involve bipolar transistors, operational amplifiers, active and passive filters, oscillators, and analog-to-digital and digital-to-analog converters. Emphasis is placed on the basic theory underlying the circuits and devices and on general lab techniques. Prerequisites: PHYS 22500. (S,E) Attributes: ENRE, NS
3 Credits

PHYS 33900 Intermediate Independent Study: Physics (LA)

One-semester course in which a student may pursue a topic of interest in physics. Offered on demand only. May be repeated for a total of six credits. Permission of instructor required. Prerequisites: PHYS 22400. (IRR)
0.5-3 Credits

PHYS 34000 Linking Science Learning to Science Teaching (LA)

This course reviews the science education literature and discusses successful approaches to helping K12 and college students learn science. The course provides an opportunity for students thinking about careers in teaching science, or serving as a science teaching assistant in graduate school, to consider research-based best practices for helping students learn science. Prerequisite: QL designated course; Junior standing or above. (F,Y) Attributes: NS
1 Credit

PHYS 35000 Advanced Applied Physics Design Laboratory (LA)

Advanced laboratory course in which students will learn how to apply the engineering design process to identify a design need, consider the associated requirements and constraints of the project, brainstorm design solutions, analyze the proposed solutions to identify the strongest option, build a prototype, and iterate through stages of testing and improvement until a viable end product is produced. Students work as part of a design team with individual responsibilities and will practice presenting their design through “pitches” and customer presentations. All students will complete post-design reflections. Prerequisites: COMP 17100; PHYS 25000; PHYS 27800. (F,Y) Attributes: QL
4 Credits

PHYS 36000 Advanced Physics Laboratory (LA)

Advanced laboratory course in which students are expected to conduct four or five investigations in areas such as mechanics, optics, thermodynamics, and electricity and magnetism. Emphasis is placed on the development of good laboratory techniques and data-taking procedures. Students are expected to become familiar with modern developments in instrumentation, formal report writing (in LaTeX), and the statistical basis for data and uncertainty analysis. Includes both independent work and work in teams. Prerequisites: COMP 17100; PHYS 22400; PHYS 26000; PHYS 27800. (S,Y) Attributes: ENRE, NS, QL
4 Credits

PHYS 36100 Advanced Applied Physics Design Laboratory (LA)

Advanced laboratory course in which students will learn how to apply the engineering design process to identify a design need, consider the associated requirements and constraints of the project, brainstorm design solutions, analyze the proposed solutions to identify the strongest option, build a prototype, and iterate through stages of testing and improvement until a viable end product is produced. Students work as part of a design team with individual responsibilities and will practice presenting their design through “pitches” and customer presentations. All students will complete post-design reflections. Prerequisite: COMP 17100; PHYS 25000; PHYS 27800. (F,Y) Attributes: QL
4 Credits

PHYS 39400 Intermediate Independent Study: Physics (LA)

One-semester course in which a student may pursue a topic of interest in physics. Offered on demand only. May be repeated for a total of six credits. Permission of instructor required. Prerequisites: PHYS 22400. (IRR)
0.5-3 Credits

PHYS 39800 Senior Thesis Proposal (LA)

Provides opportunity for physics majors to prepare a written proposal in preparation for senior thesis research. Emphasis placed on describing the problem, methodology, equipment, and data analysis needed to successfully complete the research project. Completed proposals are submitted to each student's research advisor for review and approval. Corequisites: PHYS 49900. (IRR)
1 Credit

PHYS 39900-39910 Intermediate Physics Research (LA)

Original research participation with a faculty member in a specialized field. Intended for students with prior experience from PHYS 29900-29910. Prerequisites: Permission of instructor. Six credit limit. (F-S,Y)
0.5-3 Credits

PHYS 41400 Professional Physics and Astronomy Seminar Capstone (LA)

Provides opportunities for students to explore connections between the integrative core curriculum, the physics major, other learning experiences while at Ithaca College or abroad, and future goals. Students will develop a written reflection and engage in career preparation activities. (F,Y) Attributes: CP, NS
1 Credit

PHYS 42100 Quantum Mechanics (LA)

Advanced theory course with emphasis on understanding the nature of quantum theory and how it differs from classical ideas. Topics include the Stern-Gerlach experiments and quantum measurements, the Schrödinger equation and solutions to various potentials, angular momentum, and the hydrogen atom. Prerequisites: Either PHYS 31000 or the combination of PHYS 22400, MATH 21400, and MATH 23100. (S,Y) Attributes: NS
4 Credits

PHYS 42300 Electrodynamics (LA)

Building on the foundation gained in PHYS 32300, this course completes the mathematical treatment of electromagnetic fields, including: electric and magnetic fields in matter, energy and momentum of EM fields, EM waves, EM potential theory, EM radiation, and special relativity. Prerequisites: PHYS 31000; PHYS 32300. (IRR)
4 Credits

PHYS 43000 Selected Topics in Advanced Physics (LA)

Advanced course in which students apply their physics skills to advanced topics. Current topics will be chosen based on faculty and student interests and may include environmental science, geophysics, and physics topics such as atomic, condensed matter, nuclear, and optical physics. This course may be repeated for credit for selected topics on different subjects. Prerequisites: PHYS 22400. (Y)

2-4 Credits

PHYS 44000 Inquiry and the Nature of Science for the Science Teacher (LA)

Considers issues pertaining to the nature and practice of science, especially as they relate to science education. Explores aspects that distinguish scientific inquiry from other forms of inquiry. Examines safety issues of teaching science in a classroom, and teaching science in the context of the community. Cross-listed with CHEM 44000 and PHYS 44000. Students can receive credit for only one of: BIOL 44000, PHYS 44000, CHEM 44000. Prerequisites: EDUC 34000 and junior standing. (IRR)

Attributes: NS

3 Credits

PHYS 45500 Electrodynamics (LA)

Building on the foundation gained in PHYS 32300, this course completes the mathematical treatment of electromagnetic fields, including: electric and magnetic fields in matter, energy and momentum of EM fields, EM waves, EM potential theory, EM radiation, and special relativity.

Prerequisites: PHYS 31000; PHYS 32300. (IRR)

Attributes: NS

4 Credits

PHYS 47000-47001 Selected Topics in Advanced Physics (LA)

Advanced course in which students apply their physics skills to advanced topics. Current topics will be chosen based on faculty and student interests and may include environmental science, geophysics, and physics topics such as atomic, condensed matter, nuclear, and optical physics. This course may be repeated for credit for selected topics on different subjects. Prerequisites: PHYS 22400. (Y)

Attributes: NS

2-4 Credits

PHYS 47900 Internship in Physics (NLA)

Designed to offer applications of physics concepts in a setting appropriate to students' interest and training. Internships are arranged individually at the student's request with an instructor and a sponsoring agency and with departmental approval. Students must follow the guidelines of the School of Humanities and Sciences and complete the H&S internship application. Permission of instructor required. (IRR)

1-12 Credits

PHYS 48900 Review of Undergraduate Physics (LA)

Review of all the major topics in the physics curriculum, both at the introductory and advanced level. Instruction and practice in taking standardized multiple choice exams, including the Physics GRE. Course culminates in a comprehensive examination. Prerequisites: PHYS 21800; senior standing; Physics majors only. (S,Y)

1 Credit

PHYS 49000 Professional Physics and Astronomy Seminar Capstone (LA)

Provides opportunities for students to explore connections between the integrative core curriculum, the physics major, other learning experiences while at Ithaca College or abroad, and future goals. Students will develop a written reflection and engage in career preparation activities. (F,Y)

Attributes: CP

1 Credit

PHYS 49300 Senior Project Proposal (LA)

First half of the capstone experience in which students design, conduct, and report on a senior project. The final project can be a research paper, theory project, computational project, engineering project, or experimental project. Emphasis placed on independent work. Culminates in a formal written proposal. Prerequisites: PHYS 36000, PHYS 32600 or PHYS 35000 (any of which may be taken concurrently); WRTG 10600 or equivalent. (IRR)

Attributes: WI

1 Credit

PHYS 49301 Senior Design Team I (LA)

First half of the capstone experience in which students create and begin to implement a solution to a design challenge. Students will pitch a design solution (both orally and in writing) then work in teams to further develop and begin implementing their proposed solution. Students will learn about project management and resources available to organize tasks. Progress reports will provide students with opportunity for reflection and writing practice. The course will culminate in a team demonstration of the in-process design prototype. Prerequisites:

PHYS 31400; PHYS 36100. (F,Y)

2 Credits

PHYS 49500 Senior Project (LA)

Second half of the capstone experience in which students complete a senior project, culminating in a formal written project report. Emphasis placed on independent work. Prerequisite: PHYS 49300; WRTG 10600 or equivalent. (IRR)

Attributes: WI

2 Credits

PHYS 49501 Senior Design Team II (LA)

Second half of the capstone experience in which students complete and present their solution to a design challenge. Students will reinforce project management, communication, and teamwork skills. Progress reports will provide students with opportunities for reflection and writing practice. Students will complete a design report describing their iterative design process and ultimate solution to their design challenge.

The course will culminate in a team demonstration of the final design solution. Prerequisites: PHYS 49301. (S,Y)

2 Credits

PHYS 49600 Internship in Physics (NLA)

Designed to offer applications of physics concepts in a setting appropriate to students' interest and training. Internships are arranged individually at the student's request with an instructor and a sponsoring agency and with departmental approval. Students must follow the guidelines of the School of Humanities and Sciences and complete the H&S internship application. Permission of instructor required. (IRR)

1-12 Credits

PHYS 49700 Senior Thesis I (LA)

Capstone experience in which seniors prepare, summarize, present and defend their own basic or applied research in physics in a formal written thesis. Emphasis on development of the first draft of the senior thesis. Prerequisite: WRTG 10600 or ICSM 10800 or ICSM 11800; concurrent enrollment in PHYS 49900-PHYS 49910. (IRR)

Attributes: WI

1 Credit

PHYS 49800 Senior Thesis II (LA)

Capstone experience in which seniors prepare, summarize, and present, their own basic or applied research in physics in a formal written thesis. Completion of final draft of the senior thesis, and presentation of thesis research required. Corequisites: PHYS 49900. Prerequisites: PHYS 49700. (IRR)

Attributes: WI

2 Credits

PHYS 49900-49910 Advanced Physics Research (LA)

Original research participation with a faculty member in a specialized field. Intended for students with prior experience from PHYS 39900-39910. Prerequisites: Permission of instructor. Six credit limit. (F-S,Y)

0.5-3 Credits

Politics (POLT)

POLT 10100 U.S. Politics and Public Policy (LA)

Explores the development of the U.S. governmental system, the values the system is rooted in, how the institutions within the system work, how politics, economics, and policy intersect within the system, and the system's impact upon individuals and groups alike. Focuses on the historical and present power struggles concerning national identity, class status, moral and ethical decision-making, civic culture, political affiliation, the role of media, and the process of policy development within the context of a representative and neo-liberal democratic capitalist system. This course is required of all Politics majors. (F,S,Y)

Attributes: H, HM, LMSP, LSCO, SO, SS, TPJ, TWOS

4 Credits

POLT 10200 Media and Politics (LA)

The complex and subtle relationships between major political institutions and major communication media. Reporting of significant information about politics, both in the United States and in Europe, and efforts of governments to channel or control media; the American case of the Pentagon Papers and the French ORTF; and the Federal Communications Commission as a focal point in the continuing conflict between government and electronic media. (S,Y)

Attributes: MAP, SCE, SS

3 Credits

POLT 10300 The United States and the World (LA)

Examines the history of U.S. foreign policy, as well as the ideological roots of various foreign policy stances, with a view to understanding the roots of contemporary relations between the U.S. and the rest of the world. (IRR)

Attributes: 1, SS

4 Credits

POLT 12200 Politics and Society (LA)

Explores the impact of social forces and societal dynamics on the politics of diverse countries, as well as the influence of politics and the state on society. Examines how and to what extent political institutions, individual and collective political action, and historical circumstances are capable of shaping political and social developments in different countries and regions of the world. Counts as a Comparative & International Studies course for politics majors and international politics minors. (F,S,Y)

Attributes: LAEL, LAGC, LMSP, LSCO, SO, TPJ, TQSF

4 Credits

POLT 12300 Political Justice (LA)

The definition and analysis of political trials in various cultural and historical contexts as an index of the modern state's expanding claims on individuals and groups. Different perspectives of defense, prosecution, and judgment; media impact; extrajudicial means of repression. Counts as a Comparative & International Studies course for politics majors and international politics minors. (F,Y)

Attributes: 1, G, NAPL, NASE, SS

3 Credits

POLT 12800 Introduction to International Relations (LA)

Provides students with an understanding of competing theoretical perspectives on the international system from a social science perspective. Critically examines a range of issues in international relations, including military, economic, and cultural issues as well as issues related to the environment, health, and poverty. Uses specific case studies to illustrate these issues. Counts as a Comparative & International Studies course for politics majors and international politics minors. (F,S,Y)

Attributes: G, INBG, LMSP, LSCO, SO, SS, TPJ, TWOS

4 Credits

POLT 12900 Introduction to Global and Policy Studies (LA)

Examines global issues, including culture and identity formation, globalization, human rights, the environment, and militarism. National and international public policies are examined critically and policy alternatives are explored, as are individual responses and responsibilities. Utilizes country case studies, international simulations, literature and film and emphasizes global awareness. (F,S,Y)

Attributes: ADSE, G, HM, INBG, LMSP, LSCO, LXME, SO, SS, TIDE, TPJ

4 Credits

POLT 14100 Power: Race, Sex, and Class (LA)

Exploration of the major theoretical perspectives on power. Examines what power is, where it comes from, where it is located, and how it is distributed along the lines of class, gender, and race. The primary focus is on contemporary practices of citizenship, democracy, capitalism, violence, security, and specific issues they raise for policy making, persons, the family, and corporate power. Counts as a political theory course for politics majors. (F,S,Y)

Attributes: 1, AN3, DV, G, HM, LMSP, SO, SS, TIDE, TPJ, WGS, WGS1

4 Credits

POLT 14200 Ideas and Ideologies (LA)

Exploration of the philosophical and ideological roots of political life and political inquiry. Concepts such as authority, legitimacy, freedom, and justice are studied, as well as the ideologies of liberation, conservatism, communism, nationalism, and democracy. Analysis of the intellectual wellsprings of modern social and political sciences. Exploration of ideologies as contested terrains open to criticism and transformation. Counts as a political theory course for politics majors. (F,S,Y)

Attributes: HM, LMSP, LSCO, SO, SS, TPJ, TWOS

4 Credits

POLT 14300 Understanding Capitalism (LA)

Exploration of the role of class conflict in the making of contemporary political and social life. Application of theoretical and historical materials to assess capitalism's complex relationship to such ideals as progress, freedom, equality, individuality, and justice. Understanding the personal, regional, national, and global scope of capitalism. Counts as a political theory course for politics majors. (Y)

Attributes: 1, HM, SO, SS, TPJ, TWOS
4 Credits

POLT 14400 Global Political Thought (LA)

Explores the global dimensions of political theory. Special attention is given to analyzing how core texts and ideas in western social and political thought have traveled, been translated, understood, and reimagined across various national and geographical boundaries. Counts as a political theory course for politics majors. (F,S,Y)

Attributes: HM, HU, SO, SS, TIDE, TPJ
4 Credits

POLT 14500 Politics of Identity: Race, Ethnicity, Culture (LA)

Explores the impact of race on both individual identities and on the life opportunities afforded to different racial groups in the United States. Focuses on understanding how identity and race are socially and politically constructed in order to devise an anti-racist politics that cuts across racial and cultural differences. Cross-listed with CSCR 14500.

Counts as a political theory course for politics majors. (F,Y)

Attributes: HM, SO, SS, TIDE, TPJ
3 Credits

POLT 14600 Gender and Political Theory (LA)

This course focuses on feminist critiques of foundational texts in political theory. It explores how gender, masculinity, and heterosexism inform such core political science concepts as power, human rights, political participation, the state, human nature, political consciousness, self/other and violence. Particular attention is paid to how ideas about masculinity and femininity affect what we think of as political, and to the ways in which people resist such conceptions. Counts as a political theory course for politics majors. (Y)

Attributes: DV, WGS
4 Credits

POLT 19500 Food and Water: Challenges to Sustainability (LA)

This course focuses on several kinds of food and water policy, addressing nutrition, agricultural subsidies, health concerns, and ecological effects. Students will learn to identify the ideological values expressed in different policies. Examines the actors and obstacles involved in defining and shaping our options and choices regarding food and water, and the specific centers of decision-making in all of the branches of government.

The course serves as a general introduction to policy. (F,S,Y)

Attributes: ABSS, SO, TQSF
4 Credits

POLT 23000 The Holocaust (LA)

This course surveys the Holocaust. Topics covered include the origins and development of anti-Semitism; the rise of Nazism; the response of European Jews to persecution before and during World War II; the evolution of Nazi policy from repression to genocide; the plight of refugees; the place of the Holocaust in the Nazi plan to create a new racial order in Europe; and the roles of bystanders and rescuers.

Prerequisites: Sophomore standing. (F,Y)

Attributes: G, H, LMEL, LSCO, SS
3 Credits

POLT 29900 Field Study: Politics (NLA)

Opportunity for students to explore and experience facets of political life through work experience and/or field research. Academic credit contingent on completion of study design with departmental faculty member. (Course may not be used to satisfy level-1 distribution requirements.) Prerequisites: POLT 10100; one other course in the social sciences; permission of instructor. (Y)

1-6 Credits

POLT 30100 Legislative Behavior (LA)

Analysis of legislative bodies, with an emphasis placed on the U.S. Congress. State and municipal legislatures, parliamentary legislatures, and other collegial bodies; legislative structures and roles, representation, and apportionment; executive-legislative relations; oversight and investigation; and legislative reform. Counts as a US Politics course for politics majors. Prerequisites: Sophomore standing. (IRR)

Attributes: LMSP, SS
3 Credits

POLT 30300 Constitutional Law: Civil Rights and Liberties (LA)

An introduction to constitutional law as it develops in the context of the U.S. political process. Emphasis is placed on civil rights and liberties (freedom of speech, press, and thought; equal protection; rights of the accused; etc.). Court decisions in these areas are related to attitudes and behaviors in the political and social system. Counts as a US Politics course for politics majors. (S,Y)

Attributes: H, LMEL, LSCO, NAPP, NASE, SS
4 Credits

POLT 30400 U.S. Party Politics (LA)

Examines the role of political parties in the U.S., with an emphasis on the two-party system. Exploration of party organization, power, and leadership; the role of parties in Congress; the election process; party campaign strategies and techniques; the role of money in party politics; media, public opinion, and political party-interest group dynamics. Counts as a US Politics course for politics majors/minors. (Y,IRR)

Attributes: LMSP, SS
4 Credits

POLT 30500 Urban Politics (LA)

Exploration of the complexities of urban politics. Examines the politics and governance of U.S. cities, including the distribution of political & economic power in the city. Explores how governing structures, leadership, urban regimes, partisanship, political coalitions, citizen participation, the role of the business community, and federalism, impact electoral politics, decision-making processes, and policy outcomes. Consideration of various topics that help shape U.S. urban political life in the domestic and global context: poverty, gentrification, public education, policing, city bureaucracies, housing, mass transit, land use and planning, demographic changes, social movements, and racial/ethnic dynamics.

Counts as a US Politics course for politics majors. (Y,IRR)

Attributes: ABSS
4 Credits

POLT 30600 U.S. Foreign Policy (LA)

Political and bureaucratic processes central to the formulation of U.S. foreign policy. Readings on the policy-making process; the role of bureaucratic organizations in policy making; and the role of the president, Congress, and Departments of State and Defense. These topics are examined in the context of specific cases such as U.S.-Soviet relations, Sino-American relations, and the Vietnam War. Counts as a US Politics course for politics majors. (F,Y)

Attributes: INBG, LMEL, LMSP, LSCO, SS
4 Credits

POLT 30900 Personality and Politics (LA)

Linkages between political life and the development of individual personality. Problems of political thinking and consciousness are analyzed for individual citizens, small groups, and political leaders. Consideration of political biographies and public opinion materials. Counts as a US Politics course for politics majors. Prerequisites: Sophomore standing. (IRR)

Attributes: SS
3 Credits

POLT 31000 Supreme Court in U.S. Politics (LA)

Summarizes, surveys, and analyzes Supreme Court decision making in terms of an explicit theoretical framework concerning the court's essential functions within the U.S. political system. Provides students with a nontechnical explanation of the activities of the Supreme Court – what the court does, why it does what it does, and what effects the court's activities have had on U.S. society. Counts as a US Politics course for politics majors. Prerequisites: Sophomore standing. (Y)

Attributes: LMEL, LSCO, SS
3 Credits

POLT 31900-31901 Selected Topics in U.S. Politics (LA)

Matters of special contemporary interest to students and faculty may be developed under this course heading. May be repeated for up to for selected topics on different subjects. Counts as a US Politics course for politics majors. (IRR)

Attributes: SS
4 Credits

POLT 32100 Contemporary British Politics (LA)

Introduction to the British political system. Functioning of governmental institutions, the class base of politics, political parties, elections, interest groups in policy process, and current issues confronting the British polity. Comparisons with U.S. political institutions and processes. Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. Prerequisites: Sophomore standing. Offered only through the London Center. (F-S,Y)

Attributes: INBG, SS
3 Credits

POLT 32200 British Foreign Policy (LA)

Examination of Britain's historical role in world affairs as a great power and imperialist state, and of the forces leading to decline. Emphasis also is placed on the British position in East-West relations, relations with Europe and the EC, the role of the Commonwealth today, the foreign policy-making processes, partisan differences among political parties, and current issues such as the nuclear arms debate and relations with South Africa. Counts as a Comparative & International Studies course for politics majors and international politics minors. Prerequisites: Sophomore standing. Offered only through the London Center. (F,Y)

Attributes: SS
3 Credits

POLT 32300 Race and Colonialism (LA)

This course engages colonialism as a set of racial and material practices that shaped the identities of the colonizers and the colonized as much as it did the global political economy. Three themes in particular will guide our engagement: the racial overtones and undertones of the colonial encounter, especially as embodied in the ideas of discovery, barbarism, and progress; the psychological dynamics of the relationship between the colonizers and the colonized; and the politics of oppression and liberation. Counts as a Comparative & International Studies course for politics majors and international politics minors. (Y)

Attributes: AACI, AASE, ADCI, ADSE, LSCI, LXME, NACI, NASE, SS
4 Credits

POLT 32410 Human Rights & Genocide (LA)

The course examines some of the key debates within the field of human rights, including debates between universalism and cultural relativity, and between individual and collective rights. It also looks at some of the main critiques of human rights: Does it matter if there is an international human rights regime if human rights are not enforced? In what ways can human rights be considered a colonialist enterprise? The course focuses in particular on the crime of genocide and attempts by individuals and groups to recover or seek justice in the wake of genocidal-type violence. Course is cross-listed with LGST 32410; students cannot earn credit for LGST 32410. Prerequisites: One 100-level LGST or POLT course. (S,Y)

4 Credits

POLT 32500 Chinese Politics (LA)

Revolutionary change in modern China: historical survey of China from 1911 to 1949, with attention to development of the Chinese Communist party; rise of Mao Tse-tung and evolution of Maoist thought; the process of reform from 1979 onward, with focus on political and social transformation of Chinese society. Also covers shifts in China's foreign policy, especially since the rise of Xi Jinping. Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. (O)

Attributes: AASE, INBG, SS
4 Credits

POLT 32600 Russian Politics (LA)

Examines the internal conflicts and external forces that shape the Russian experience since independence in 1991, as well as continuities with the Soviet system. Considers the effect of Russian culture and nationalism on politics. Draws on the Russian experience in order to cast light on questions such as what is democracy, what are the tensions between democracy and capitalism, what is the difference between socialism and capitalism, and what leads to the erosion of liberal democracy. Examines trends in Russian foreign policy, including shifts over time and the relationship to domestic events. Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. (Y)

Attributes: INBG, SS
4 Credits

POLT 32700 The Politics of Development (LA)

Focuses on the struggle of third-world peoples to improve their economic position and political power in the international system. Covers a range of development approaches aimed at reducing poverty and inequality, with emphasis on the ways in which governments, non-governmental organizations, international aid agencies, and social movements and communities envision and implement development programs. Special attention is given to problems of development in Latin America, Asia and Africa and to the role played by industrial societies in the development process. Counts as a Comparative & International Studies course for politics majors and international politics minors. (S,O)

Attributes: ABSS, AN3, ENSS, ESPE, ESSS, INBG, LAEL, LAGC
4 Credits

POLT 32800 International Conflict (LA)

Study of nationalism, conflict among nations, the role of force and violence, cold wars and arms competitions, ideological conflicts, similarities and differences between national conflict and international conflict, and techniques of conflict resolution. Counts as a Comparative & International Studies course for politics majors and international politics minors. Prerequisites: Sophomore standing. (F,Y)

Attributes: LMEL, LMSP, LSCO, SS
3 Credits

POLT 32900 Comparative Politics of the Global South (LA)

Critically examines the impact of the emergence of a capitalist world economy on Asian, African, and Latin American societies, and explores Global South internationalism, 'subaltern' knowledge production, and emerging forms of political struggle against colonialism, local and global inequalities, racism, gender, labor discriminations, and ecological devastation. Objectives are to specify the common features, particularities, and challenges of Global South countries, international relations and solidarities, and to examine efforts to shift geopolitical power relations and solidify political projects towards a fairer and equal world. The methodology is comparative and historical. Counts as a Comparative & International Studies course for politics majors and international politics minors. (IRR)

Attributes: DV, ESE, INBG, LAGC, SS
4 Credits

POLT 33000 European Politics (LA)

Focuses on changes and continuities in European identity and democracy, and other trends and issues that Europe is facing at the start of the 21st century. Looks at institutions and parties of major European states as well as of the European Union, and at the transition to liberal political and economic systems in Eastern Europe. Also considers issues of citizenship, immigration, racism, and nationalism in all parts of Europe. Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. (F,S,Y)

Attributes: INBG, SS
4 Credits

POLT 33100 Latin American Politics (LA)

Introduces issues in contemporary Latin American Politics. Undertakes a comparative political analysis of nations in the region called Latin America – Central and South America and the Caribbean. Includes a systemic analysis of intraregional relations, especially Latin America-U.S., and interregional relations between Latin America and countries in other regions. Examines the historical events, internal political, socio-economic, and racial/ethnic structures and power relations, and behaviors of national and international actors influencing Latin American countries' politics and societies. Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. (F,E)

Attributes: INBG, LSCI, LXME, SS
4 Credits

POLT 33200 Africa through Film: Representation and Reality (LA)

Interrogates popular Western representations of the African continent and their foundations. Emphasizes the need for media literacy and exposure to counter-narratives in the study of African countries. Explores African and African Diaspora histories, politics and contemporary issues through extensive readings and a comparative analysis of diverse films from radical African filmmakers, popular African cinema and even Hollywood. Students apply sociopolitical analysis to the subject matter, uncovering for instance, apartheid ideology behind the portrayal of Africans in the film "The Gods Must Be Crazy." Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. (F,Y)

Attributes: 1, ADCI, ADSE, G, H, INBG, MAP, SCE, SS
4 Credits

POLT 33300 Understanding Islam (LA)

This course aims to facilitate an understanding of Islam within two overlapping contexts: one is the political, historical, and ideological encounter between Islam and the West that has shaped Western attitudes toward the religion. The other is how Muslims experience Islam as both a system of beliefs about the divine (religion and theology) and as lived reality (history and politics). Topics range from scriptural conceptions of God, human creation, sex and gender relationships, and war and violence to mysticism, from the encounters of early medieval Europeans with Islam to post 9/11 debates on Islam and terrorism. Counts as a Comparative & International Studies course for politics majors and international politics minors. Prerequisites: Three courses in the social sciences. (S,Y)

Attributes: INBG, SS
3 Credits

POLT 33400 Human Rights and the Politics of Culture (LA)

Investigates the philosophical and legal debates pertaining to questions that address the universality of human rights. Explores the contradictory ways in which religious, social, and cultural forces, gender and class struggles, and structural global inequalities generate diverse concepts of moral rights, justice, freedoms, and protections. Uses case studies and critical questions such as that posed by Mahmood Mamdani: "Can a culture of individual rights coexist with the right of every individual to practice one's culture?" Provides comparative studies of the United States, Latin America, Asia, and the Middle East but focuses primarily on African countries and their contributions to human rights discourses and practice. Counts as a Comparative & International Studies course for politics majors and international politics minors. (S,O)

Attributes: INBG, LMEL, LMSP, LSCO, SS
4 Credits

POLT 33500 Crossing Borders/Global Migration (LA)

The movement of people across borders – as refugees and as workers – is a central political issue throughout the world, at times even becoming the focus of violence. The course focuses on the causes of these movements, as well as on questions migration raises about the meaning of borders and the link between identity, culture, and politics. This course uses a range of texts – journalistic accounts, academic writings, fiction, films, and the words of migrants themselves. We examine migrations at the global level, including the United States, as well as at the local level, including migrant workers in western New York. Counts as a Comparative & International Studies course for politics majors and international politics minors. (O)

Attributes: ABSS, AN3, ESE
4 Credits

POLT 33600 Whiteness and Multiculturalism (LA)

This course interrogates the concept of whiteness and relates it to conceptualizations of multiculturalism, tackling these issues at both theoretical and empirical levels, drawing on cases from the United States as well as from other societies. The goal of the course is to foreground the category "white" and to recognize the meanings of this category, the effect it has on white and non-white individuals, and the direct relationship of whiteness to power. It also seeks to bring about a critical rethinking of the concept of multiculturalism by linking the study of whiteness to policies of multiculturalism. Counts as a Comparative & International Studies course for politics majors and international politics minors. Prerequisite: Sophomore standing. (E)

Attributes: ADCI, ADSE, AN3, LMEL, LSCO, SS
3 Credits

POLT 33700 Politics of Memory and Transitional Justice (LA)

Exploration of the political and social dilemmas surrounding concepts such as collective memory, truth, justice, confession, forgiveness, healing, and reconciliation in sociopolitical spaces. How, for instance, will the political suppression or mobilization of memory vie for space with efforts to address the systematization of unconscionable crimes against humanity and create a just peace? What lessons do the experiences of South Africa, the United States, Chile, and Rwanda offer other polarized societies? Students engage memory theory and the narratives of victims and perpetrators in examining Czech writer Milan Kundera's suggestion that "the struggle of man against power is the struggle of memory against forgetting." Counts as a Comparative & International Studies course for politics majors and international politics minors. (IRR)

Attributes: NASE, SS
4 Credits

POLT 33800 Terrorism and Insurgencies (LA)

The course explores why people resort to violence that is defined as terrorism, as well as how they respond to violence. It looks at these questions both theoretically and through case studies from around the world. The course also explores the phenomenon of insurgency, including its relationship to terrorism, and analyzes policies of counterterrorism and counterinsurgency. Counts as a Comparative & International Studies course for politics majors and international politics minors. (Y)

4 Credits

POLT 33900 Political Economy of the Middle East (LA)

Analyzes the political economy of the Middle East from a historical and theoretical perspective. Explains the nature of socioeconomic change through analysis of the relationships among state, class, and economic development. Topics include the nature and role of the economy and the state, the processes of class formation, the role of women, the Arab-Israeli conflict, and U.S. interests in the region. Counts as a Comparative & International Studies course for politics majors and international politics minors, and as a "place" course for the concentration in international studies and for international politics minors. Prerequisites: Sophomore standing. (F)

Attributes: INBG, SS
3 Credits

POLT 34000-34054 Selected Topics in Comparative-International Studies (LA)

Matters of special contemporary interest to students and faculty may be developed under this course heading. This arrangement permits departmental offerings to be responsive to evolving faculty and student interests. This course may be repeated for credit when topics change. Counts as a Comparative & International Studies course for politics majors and international politics minors.

Attributes: SS
4 Credits

POLT 34100 U.S. Political Thought (LA)

Explores the writings and ideas of political thinkers and activists who have shaped U.S. politics, institutions, and policy development from the Puritans to the present. Examines questions surrounding freedom and equality, individual rights, the role of community, power and justice, national identity, religion, the relationship between citizens and the state, the nature of change, and the place of labor in the United States. Counts as a political theory and U.S. politics course for majors. (IRR)

Attributes: SS
4 Credits

POLT 34200 Liberalism and Marxism (LA)

Treats several important political ideas and questions from a feminist, as well as a Marxist, perspective through historical political theory. The first part of the course addresses the division of labor in society and its relationship to private property and alienable labor; the second deals with the treatment of the sexual division of labor. Some of the key issues are conceptions of human nature: What is natural or innate? What is social? What necessitates government? The course also looks at issues of reform or revolution. In essence, students examine classical liberalism as the ideology supporting the capitalist system. Primary readings from historical theorists (Locke, Hobbes, Rousseau, Hegel, Mill, Marx, Goldman, and Luxemburg). Counts as a political theory course for politics majors. (FS,Y)

Attributes: LMEL, LMSP, LSCO, SS
4 Credits

POLT 34300 Feminist Theory (LA)

This course discusses theories pertaining to the subjugation of women and members of the LGBTQ community, historical and contemporary. In this sense it is a study of feminist ideology as it has been developed by Mary Wollstonecraft, the early American feminists, Emma Goldman, J. S. Mill, socialist literature, radical feminism, Black feminist thought, and post-colonial feminism. Key questions to be discussed throughout are the issues of the sexual division of labor; the acceptance or rejection of the issues of the sexual division of labor; the acceptance or rejection of the connection between sexual and class oppression, and other key historical and contemporary feminist debates. We develop a synthesis of much of the literature in order to assess and compare the contemporary women's movement with historical forms of women's struggle. Counts as a political theory course for politics majors. (IRR)

Attributes: SS, WGS, WGS3

4 Credits

POLT 34400 Contemporary British Political Theory (LA)

Particular emphasis is placed on the controversy concerning the responsibility of the state for economic and social equality. Attention is given to the concepts of freedom and equality and the ideas of market system liberalism, social democracy, socialism, Marxism, conservatism, and neoconservatism. Counts as a political theory course for politics majors. Prerequisites: Sophomore standing. Offered only through the London Center. (S,Y)

Attributes: SS

3 Credits

POLT 35000-35009 Selected Topics in Political Theory (LA)

Focus on particular areas of political theory that are not covered in other 300-level theory courses. This arrangement permits departmental offerings to be responsive to evolving faculty and student interests. Counts as a political theory course for politics majors. (IRR)

Attributes: SS

4 Credits

POLT 36200 Theory and Politics of Public Policy (LA)

Selected public policy issues; development, formulation, execution, and evaluation. Theories of the policymaking process, such as rationalism, incrementalism, and systems analysis, with a view toward understanding their analytical and explanatory power. Counts as a public policy course for politics majors. Prerequisites: ECON 12100; two additional courses in social sciences or equivalent. (F,Y)

Attributes: SS

3 Credits

POLT 36300 Politics of Equality (LA)

Examines equality and inequality from a variety of perspectives, including philosophical, socioeconomic, and public policy analysis, as well as problems entailed in defining and justifying equality as a political and socioeconomic goal. Explores interpretations of the human consequences of inequality. Analyzes equality as a political problem in capitalist and socialist societies. Counts as a public policy course for politics majors. Prerequisites: Sophomore standing. (S,Y)

Attributes: SS

3 Credits

POLT 36400 Law and Public Policy (LA)

Gives a sense of the important place of public law in the policy-making process and examines how legal education shapes legal thinking. Considers the role of courts in forming policies related to housing, school desegregation, mental health care, prison reform, AIDS, and the environment. Contract theory is analyzed as it relates to issues like surrogate motherhood. Covers selected criminal law issues, such as those related to rape. Students evaluate the strengths and limitations of using legal approaches to the formulation of policy options. Counts as a public policy course for politics majors. Prerequisites: Two politics courses; one course in sociology, history, philosophy, economics, or introduction to law. (S,Y)

Attributes: SS

3 Credits

POLT 36500 The Politics of Health (LA)

Introduction to issues in health policy as they relate to the general organization of political life in the United States. Methods for the allocation of scarce medical resources, such as markets, political devices, and lotteries, are analyzed and compared. AIDS is examined as a major public health problem. We consider genetic and procreative issues, including the politics of in vitro fertilization, surrogate motherhood contracts, abortion, and genetic engineering. Counts as a public policy course for politics majors. Prerequisites: Two politics courses; one course in sociology, history, philosophy, or economics. (F,Y)

Attributes: SS

3 Credits

POLT 36600 Environmental Politics (LA)

Examines environmental protection (and destruction) from numerous political perspectives and in relation to various political ideologies. Looks at policy-making aspects of environmental protection. Traces the development of national and international environmental movements. Considers environmental issues in terms of race, gender, and class politics. Cross-listed with ENVS 36600; students cannot receive credit for ENVS 36600. (Y)

Attributes: ABSS, LMEL, LSCO

4 Credits

POLT 36700 International Organizations (LA)

Studies international organizations that have emerged over time to pursue solutions to cross-national problems, and to help develop rules and structures to manage inter-state and other kinds of global interactions. Addresses different types of issues, such as problems of war and peace, the definitions and management of economic development, and questions of environmental protection. Explores key concepts (sovereignty, cooperation, norms, order) and theoretical approaches to and criticisms of international organizations including the United Nations, treaty organizations (like NATO), regional organizations (such as the EU or the African Union), economic organizations (e.g., ILO, IMF) and international non-governmental organizations such as the International Red Cross and Amnesty International. Students learn not just how these institutions are organized and make decisions, but also how to explain and evaluate the outcomes of their work. (F,Y)

4 Credits

POLT 37000 Selected Topics in Public Policy (LA)

Matters of special contemporary interest to students and faculty may be developed under this course heading. This course may be repeated for up to for selected topics on different subjects. Counts as a public policy course for politics majors. (IRR)

Attributes: SS

4 Credits

POLT 38000-38001 Internship: Politics (NLA)

Permits students to explore politics through a variety of governmental and nongovernmental work experiences. Students are expected to perform full-time work for academic credit and to submit, as part of their course obligations, a thorough written evaluative report based on their experiences. Internships may be taken at national, state, and local levels, in London under the auspices of the Ithaca College London Center, as well as in other international locations. Students must complete the H&S internship application process. Permission of instructor required. (F,Y,S)
1-12 Credits

POLT 38100-38101 Internship: International Studies (NLA)

Permits students to explore politics through a variety of governmental and nongovernmental work experiences. Students are expected to perform full-time work for academic credit and to submit, as part of their course obligations, a thorough written evaluative report based on their experiences. Internships may be taken at national, state, and local levels, in London under the auspices of the Ithaca College London Center, as well as in other international locations. Students must complete the H&S internship application process. Permission of instructor required. (F,S,Y)
1-12 Credits

POLT 39800 Practicum in International Governance (NLA)

Students prepare for and participate in simulated international negotiations at Model United Nations or Model European Union events. Students adopt the roles of representatives of our assigned countries, and work with other delegates to write resolutions that propose answers to the questions facing their committees. Participation in the conferences is required. Students may incur some additional costs as a result of domestic off-campus travel. International conferences will require additional fees and costs. Students must be members of the Model UN or Model EU team to be permitted to enroll. Course may be repeated for up to three credits. Prerequisites: Permission of instructor. (F-S,Y)
1 Credit

POLT 40100-40114 Seminar: Comparative and International Studies (LA)

Small group settings designed to permit intensive examination of selected topics not provided elsewhere in the curriculum. Seminar topics change from year to year. This course may be repeated for credit for selected topics on different subjects. Counts as a Comparative & International Studies course for politics majors and international politics minors. Prerequisites: Junior/senior standing; one POLT course. (F-S,Y)
Attributes: SS
1-4 Credits

POLT 40200-40210 Seminar: Politics (LA)

Small group settings designed to permit intensive examination of selected topics not provided elsewhere in the curriculum. Seminar topics change from year to year. This course may be repeated for credit for selected topics on different subjects. Prerequisites: Junior/senior standing; one POLT course. (F-S,Y)
Attributes: SS
1-4 Credits

POLT 40300-40310 Tutorial: Comparative and International Studies (LA)

Individual investigation of selected topics in politics through readings, written reports, and essays under tutorial supervision. This course may be repeated for credit when topics change. Counts as a Comparative & International Studies course for politics majors and international politics minors. Prerequisites: Junior/senior standing and one POLT course. (F-S,Y)
Attributes: SS
1-4 Credits

POLT 40400-40410 Tutorial: Politics (LA)

Individual investigation of selected topics in politics through readings, written reports, and essays under tutorial supervision. This course may be repeated for credit when topics change. Prerequisites: Junior/senior standing and one POLT course. (F-S,Y)
Attributes: SS
1-4 Credits

POLT 40500-40501 Internship: Politics (NLA)

Permits students to explore politics through a variety of governmental and nongovernmental work experiences. Students are expected to perform full-time work for academic credit and to submit, as part of their course obligations, a thorough written evaluative report based on their experiences. Internships may be taken at national, state, and local levels, in London under the auspices of the Ithaca College London Center, as well as in other international locations. Students must complete the H&S internship application process. Permission of instructor required. (F,S,Y)
1-12 Credits

POLT 40550-40551 Internship: International Studies (NLA)

Permits students to explore politics through a variety of governmental and nongovernmental work experiences. Students are expected to perform full-time work for academic credit and to submit, as part of their course obligations, a thorough written evaluative report based on their experiences. Internships may be taken at national, state, and local levels, in London under the auspices of the Ithaca College London Center, as well as in other international locations. Students must complete the H&S internship application process. Permission of instructor required. (F,S,Y)
1-12 Credits

POLT 49900-49901 Directed Study: Politics (LA)

The program of study may be a reading program of materials of special interest to the student, or involve development and execution of a research project on a specific topic. Reading or research is undertaken under faculty direction. Prerequisites: Three courses in social sciences or equivalent; permission of instructor. Variable credit (1-5). (F-S,Y)
Attributes: SS
1-5 Credits

POLT 49950-49951 Directed Study: International Studies (LA)

The program of study may be a reading program of materials of special interest to the student, or involve development and execution of a research project on a specific topic. Reading or research is undertaken under faculty direction. Prerequisites: Junior/Senior standing; permission of instructor. (F-S,Y)
Attributes: SS
1-5 Credits

Psychology (PSYC)

PSYC 10000 The Psychology of Adjustment (LA)

Introduction to the psychology of human behavior; intended for non-psychology majors who want a broad overview of those aspects of psychology most relevant to problems of living. (F,S,Y)
Attributes: 1, SO, SS, TMBS
3 Credits

PSYC 10300 General Psychology (LA)

Introduction to the study of behavior, focusing on the influences of physiological, cognitive, social, and personality factors on behavior, including discussion of the major theories in psychology and related research. (F,S,Y)
Attributes: 1, SO, SS, TMBS
3 Credits

PSYC 10400 Introduction to Developmental Psychology (LA)

Introduction to the study of developmental processes, with an emphasis placed on genetic and environmental influences on the organism's physical, cognitive, social, and personality development across the life span. (F,S,Y)

Attributes: 1, ESE, SO, SS, TIDE

3 Credits

PSYC 10500 Scientific Literacy: How We Know What We Know (LA)

Explores how to apply scientific literacy and critical thinking to discover, read and share scientific information in the field of psychology, exploring myths and misconceptions about psychology and fallacies in reasoning about scientific evidence. Students will search for and compare research findings reported in academic vs. popular media and develop skills for effectively communicating scientific information. Prerequisites: PSYC 10300 (may be taken concurrently). (F,S,Y)

2 Credits

2 Credits

PSYC 11000 Media Literacy and the Psychology of Inquiry (LA)

This course serves as an introduction to the theory and practice of media literacy with an emphasis on developing skills in analysis and evaluation of media messages, as well as developing an understanding of critical thinking and the psychological processes involved in perception and media effects. Using an interdisciplinary approach that draws from many fields (including communications, psychology, and education), the course includes analyses of messages from both digital (e.g., websites) and traditional (e.g., print, TV, film) popular and educational media, and examines the effects of media messages on beliefs, attitudes, and behaviors. For psychology majors, this course counts towards the Sociocultural Competence requirement. Open to freshmen and sophomores only. (S,Y)

Attributes: CC, ESE, SO, TIII

3 Credits

PSYC 20200 Motivation (LA)

Examination of the biological, cognitive, and social aspects of psychological motivation. Covers principal theories of motivation, research methods and findings, as well as applied issues. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and WRTG 10600, or ICSM 10800 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS, WI

4 Credits

PSYC 20700 Statistics in Psychology (LA)

Introduction to the computation and interpretation, application, and communication of basic descriptive and inferential statistics used in the behavioral sciences. Emphasis is placed on analyzing data using statistical software (SPSS). Prerequisites: Math group 3 or higher, math placement assessment score of 46 or greater ; PSYC 10300 or PSYC 10400. (F,S,U,Y)

Attributes: 2B, ESTS, NS, QL

4 Credits

PSYC 20800 Positive Psychology (LA)

Exposure to important theories and concepts in the field of positive psychology, including the determinants of happiness, positive emotions, resilience, and optimism. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS

4 Credits

PSYC 20900 Research Methods in Psychology (LA)

Analysis of methodological designs used in psychological research and application of statistical methods for behavioral sciences, with special emphasis placed on the experimental method. Prerequisites: PSYC 20700. (F,S,Y)

3 Credits

PSYC 22000 Personality (LA)

An overview and critical analysis of the major perspectives (e.g. trait, biological, cross-cultural, psychodynamic, cognitive), scientific issues, applications, and research findings in the area of personality. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS

4 Credits

PSYC 23100 Health Psychology (LA)

Examines the ways in which biology, behavior, and social context influence health and illness, as well as the contributions of psychological research to the understanding, prevention, and treatment of a variety of health concerns. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS, SO, TMBS

4 Credits

PSYC 23200 Matters of the Mind: The Neuron and Beyond (LA)

Introduces the basic principles of neuroscience with a focus on the scientific exploration of neurological impairments. Examines the role of the human brain in interpreting the physical world and forming concepts of ourselves, society and 'reality'. Develops effective writing for different purposes and audiences, as well as oral and/or visual skills. Prerequisite: PSYC 10300 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS, SC, TMBS

4 Credits

PSYC 23500 Conservation Psychology: Psychology for a Sustainable World (LA)

Application of psychological science to understanding reciprocal relationships between psychological well-being, environmental sustainability, social-environmental justice, and mitigating human-caused environmental problems. For psychology majors, this course counts towards the Sociocultural Competence requirement. Prerequisites: Sophomore Standing. (S,Y)

Attributes: CC, ENSS, ENVE, ESSS, SO, SS, TQSF

3 Credits

PSYC 24700 Culture and Psychology (LA)

Introduces the perspective and methods of Cultural Psychology. Focal point is the relationship between cultural context where individuals grow and develop and the behaviors that become established in the repertoire of individuals growing up in a particular culture. This course will help students to recognize and challenge their own assumptions about "human nature," the "person," and what is "natural." The course also focuses on developing effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and WRTG 10600 or ICSM 10800 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS, CC, HN, WI

4 Credits

PSYC 25300-25301 Selected Topics: Psychology (LA)

Matters of special contemporary interest to students and faculty may be developed under this course heading. This arrangement permits departmental offerings to be responsive to evolving faculty and student interests. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. May be repeated for credit when topics change. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (IRR)

Attributes: ACS

4 Credits

PSYC 26000 Psychology of Privilege and Oppression (LA)

This course explores and analyzes the complex intersections of social group identity based on race, gender, sexuality, class, and other dimensions of difference within systems of privilege and oppression. Students also analyze the underlying mental processes associated with privileged group membership (e.g. denial, distancing, invisibility). The course aims to establish a foundation upon which to develop sociocultural competence and promote a better understanding and acceptance of ourselves and others. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: CC, CNSL, DV, ESE, LMEL, LSCO

4 Credits

PSYC 26100 Psychology of Women (LA)

In-depth examination of the psychology of women in contemporary society. Review of the research on gender differences and consideration of the theories (social learning, psychoanalytic, and biological) that have attempted to explain the differences. Focuses on some of the central experiences of women's lives (including relationships, work, mothering, sexuality, and mental health), with particular attention to the ways in which women's psychological development differs from that of men's in a patriarchal society. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. PSYC 26100 and WGST 26100 are cross-listed courses; students may not receive credit for both. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (F,Y)

Attributes: CC, CNSL, DV, ESE, WGS, WGSC

4 Credits

PSYC 27000 Social and Cultural Issues in the History of Psychology (LA)

Survey of psychology's cultural roots and the development of the discipline. Emphasis on the roles of culture, race, and ethnicity in the development and practice of psychology. For psychology majors, this course satisfies the APA Communication Skill development requirement. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and WRTG 10600, or ICSM 10800 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS, CC, ESE, LMEL, LSCO, WI

4 Credits

PSYC 30200-30215 First Semester Research Team (LA)

The first of three semesters of participation in programmatic research by teams of students under the direction of one or more faculty members. Prerequisites: PSYC 30800 (may be taken concurrently); permission of instructor. (F-S,Y)

Attributes: UND

2 Credits

PSYC 30300-30313 Second Semester Research Team (LA)

The second of three semesters of participation in programmatic research by teams of students under the direction of one or more faculty members. Prerequisites: PSYC 30200-30299. (F-S,Y)

Attributes: UND

2 Credits

PSYC 30400-30413 Third Semester Research Team (LA)

The third of three semesters of participation in programmatic research by teams of students under the direction of one or more faculty members. In consultation with the supervising faculty member this course may be repeated for up to four credits. Prerequisites: PSYC 30300-30399. (F-S,Y)

Attributes: UND

2 Credits

PSYC 30800 Research Methods in Psychology (LA)

Analysis of methodological designs used in psychological research and application of statistical methods for behavioral sciences, with special emphasis placed on the experimental method. Prerequisites: PSYC 20700. (F,S,Y)

3 Credits

PSYC 30900 Methods of Testing and Assessment (LA)

Behavioral measurement in the context of psychometrics, presented with examples and demonstrations from the areas of "intelligence," aptitude, achievement, interest, and personality assessment. The ethical and technical challenges of test selection, administration, and interpretation are discussed. Prerequisites: PSYC 20700. (F-S,Y)

Attributes: PSCL

3 Credits

PSYC 31000 Research Team in Psychology (LA)

Participation in programmatic research by teams of students under the direction of one or more faculty members. May be repeated for a total of nine credits. Permission of instructor required. Prerequisites: PSYC 20900. (F,S,Y)

3 Credits

PSYC 31100 Behavioral Neuroscience (LA)

Study of the anatomical structures and biochemical and physiological processes that affect and mediate the emotional, psychological, and behavioral states of the organism. Prerequisites: PSYC 20200, PSYC 20700, BIOL 20600, BIOL 22700, or SLPA 21200. (F,S,Y)

Attributes: 2A, NS, PSBS

3 Credits

PSYC 31600 Social Psychology (LA)

Study of the psychological determinants of social behavior and interpersonal processes, as well as the social determinants of the development of self-concept, beliefs, and attitudes. Prerequisites: One 200 level PSYC course (excluding PSYC 20700). (F-S,Y)

Attributes: 1, PSPS, SS

3 Credits

PSYC 32000 Personality (LA)

An overview and critical analysis of the major perspectives (e.g. trait, biological, cross-cultural, psychodynamic, cognitive), scientific issues, applications, and research findings in the area of personality. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (Y)

Attributes: ACS

4 Credits

PSYC 32100 Abnormal Psychology (LA)

Introduction to dynamics of abnormal behavior with special emphasis on the etiology, diagnosis, treatment and evaluation of interventions for psychiatric diagnoses and common forms of psychological distress. Prerequisites: One 200-level course from the following list: 200 level PSYC course (except PSYC 20700) SOCI 21700, OTBS 20100 or OTBS 20200; or PSYC 10400 and RLS 24300. (F-S,Y)

Attributes: PSCL, SS
3 Credits

PSYC 33000 Cognition (LA)

Topics in cognitive psychology, including perception, attention, memory, language, problem solving, decision making, and reasoning. Developmental changes, individual differences in cognitive skills, and applications of cognitive research to fields such as law, education, and business are considered. Prerequisite: One 200 level PSYC course (except PSYC 20700), or PSYC 10300 and either BIOL 11900 or BIOL 12100. (F-S,Y)

Attributes: 2A, NS, PSBS
3 Credits

PSYC 33400 Industrial and Organizational Psychology (LA)

Overview of the application of psychology to the behavior of people in workplace settings. Topics include personnel psychology, organizational behavior, workplace design, and consumer psychology. Prerequisites: One 200 level PSYC course (excluding PSYC 207000), MGMT 20600, or STCM 21000. (S,O)

Attributes: PSPS, SS
3 Credits

PSYC 33600 Forensic Psychology (LA)

Application of psychology to the civil and criminal justice systems. Emphasis on psychology's role in criminal investigation, legal decision making, assessment of competency and insanity, and understanding and predicting criminal behavior. Prerequisites: PSYC 10300 and one 200 level PSYC course (excluding PSYC 20700), or GBUS 20300. (S, E)

Attributes: CNSL, PSCL
3 Credits

PSYC 34100 Forms of Therapy (LA)

Introduction to modalities of individual psychotherapy, including cognitive-behavioral, humanistic, and psychodynamic. Goals include achieving an understanding of therapeutic modalities as well as an appreciation of issues related to pharmacological treatments and methods of evaluating the outcome of treatment interventions. For psychology majors, this course counts towards the Sociocultural Competence requirement. Prerequisites: PSYC 32100. (F,S,Y)

Attributes: CC
3 Credits

PSYC 34200 Family Therapy (LA)

Survey of current approaches to family and couples counseling. Emphasis on systemic models of family functioning and therapeutic intervention. Assessment techniques, intervention rationales and the role of the family therapist. For psychology majors, this course satisfies the APA Communication Skill development requirement. Prerequisites: PSYC 32100, or SOCI 21700/PSYC 21700. (F,Y)

Attributes: CC
3 Credits

PSYC 35100 Independent Supervised Study (LA)

In-depth study of topic of interest in psychology, chosen in consultation with supervising instructor. A student may undertake more than one independent study. Offered on demand only. Prerequisites: Consent of instructor. Variable credit (commensurate with the complexity of the study). (IRR)

Attributes: UND
1-5 Credits

PSYC 35200 Independent Supervised Research (LA)

Students conduct empirical research on a topic selected in consultation with the instructor. Students may undertake more than one independent supervised research project. Offered on demand only. Prerequisites: Consent of instructor. Variable credit (commensurate with the complexity of the project). (IRR)

Attributes: UND
1-5 Credits

PSYC 36100 Infant, Child and Adolescent Development (LA)

This course focuses on the early part of the lifespan development and will emphasize the basic theories and research methods in the field of developmental psychology. Topics include brain development, parenting, identity, moral reasoning, child psychopathology, and challenges in adolescence. For psychology majors, this course counts towards the Sociocultural Competence requirement. Prerequisites: Any 200 level PSYC course (except PSYC 20700); sophomore standing. (S,Y)

Attributes: CC, PSPS
3 Credits

PSYC 36600 Adulthood and Aging (LA)

Examination of the biological, cognitive, and socioemotional process across the adult lifespan, from emerging and early adulthood through late adulthood and death, with an emphasis on major developmental theories and methods of study. For psychology majors, this course counts towards the Sociocultural Competence requirement. Prerequisites: PSYC 10400 or any 200-level course (except PSYC 20700); sophomore standing. (F,Y)

Attributes: 1, CC, CNSL, PSPS, SL, SS
3 Credits

PSYC 39800 Psychology Professional Development (NLA)

Exploration of career opportunities and options for individuals with an undergraduate degree in psychology, including graduate school (or other professional training) and employment in a related field. Psychology majors only. (F,S,Y)

1 Credit

PSYC 40500 Forms of Therapy (LA)

Introduction to modalities of individual psychotherapy, including cognitive-behavioral, humanistic, and psychodynamic. Goals include achieving an understanding of therapeutic modalities as well as an appreciation of issues related to pharmacological treatments and methods of evaluating the outcome of treatment interventions. For psychology majors, this course counts towards the Sociocultural Competence requirement. Prerequisites: PSYC 32100. (F,S,Y)

Attributes: CC
3 Credits

PSYC 40900 Skills for the Helping Professional (NLA)

This course introduces students to theory and practice of psychotherapy and other professional helping relationships. Students learn about counseling, assessment, ethics, and helping skills. This course emphasizes basic and specialized skills necessary to function effectively in a helping relationship. Emphasis is placed upon understanding the nature of the helping process in a practical and applied way. Professional helping is explored in the context of cultural competency and a biopsychosocial viewpoint. Self-exploration and some level of self-disclosure are required inasmuch as effective counseling requires the ability to understand oneself and to articulate personal feelings. Prerequisites: SOCI 21700; PSYC 32100; and PSYC 34100 OR PSYC 34200 (courses may be taken concurrently). (F,S,Y)
4 Credits

PSYC 42000 Professional Seminar in Human Services (NLA)

An opportunity for students enrolled in internships in human services agencies to analyze and discuss individual and general problems related to their experiences. Weekly seminar meetings focus on integration of internship experiences with issues in the human services field, including structure of mental health delivery and patient-practitioner interaction. May be repeated three times for a total of three credits. Corequisites: PSYC 45000. Prerequisites: Permission of instructor. Psychology and applied psychology majors, psychology minors, and counseling minors only. (F-S,Y)
Attributes: CC
1 Credit

PSYC 45000 Internship in Psychology (NLA)

Provides students the opportunity to apply psychology under the supervision of the sponsoring agency and a psychology faculty member. Internships are arranged individually. Students must complete the H&S internship application process. May be repeated for up to twelve credits. Prerequisites: Junior standing, permission of instructor. (F-S-SU, Y)
Attributes: UND
1-12 Credits

PSYC 45100 Advanced Independent Supervised Study (LA)

Intensive study of an individually selected topic in psychology, including honors studies (generally following PSYC 35100). Offered on demand only. Prerequisites: Senior standing; consent of the department. Variable credit.
Attributes: UND
1-5 Credits

PSYC 45200 Advanced Independent Supervised Research (LA)

Intensive empirical research, including honors research (generally following PSYC 35200). Offered on demand only. Prerequisites: Senior standing; consent of the department. Variable credit.
Attributes: UND
1-5 Credits

PSYC 46700 Psychopharmacology (LA)

Examination of the effects of psychoactive drugs with a multilevel emphasis on neural effects, cognitive functioning, emotion, and behavior. Covers psychotherapeutic compounds used for the treatment of various psychopathologies, as well as drugs of abuse. Studies basic principles of psychopharmacology, mechanisms of action for major classes of psychoactive agents, and individual and sociocultural factors affecting use and abuse of drugs. Prerequisites: PSYC 31100. (IRR)
3 Credits

PSYC 49200 Senior Seminar in Psychology (LA)

Investigation of a specific area or topic in psychology at an advanced level that integrates prior learning. Explores the relationships between the various components of the integrative core curriculum (ICC), the psychology major, other learning experiences at the College, and future goals. Reflection on the role of a liberal arts education. (F,S,Y)
Attributes: CP
4 Credits

Recreation & Leisure Studies (RLS)

RLS 10100 Leisure and Society (LA)

Introduction to the dimensions of leisure and recreation services in modern society. Potential of recreation as related to human needs and development. Survey of agencies, organizations, and programs in the leisure service field. Preference given to Freshmen and Sophomores. Junior and seniors considered based on availability. (F-S,Y)
Attributes: 1, HM, SS, TIDE
3 Credits

RLS 10400 Cooperative Games Facilitation (NLA)

Basic concepts of cooperative games -- philosophy, leadership, curriculum development, and evaluation. The course includes leadership and referee techniques, safety considerations, group dynamics, and game philosophies. A variety of game strategies are presented. Other new and innovative approaches to games are also presented. (IRR)
1 Credit

RLS 10500 Fundamentals of Leadership (LA)

Basic concepts in leadership. Examination of sources required for authentic leadership: connections, identity, integrity, and personal power. Analysis of effective leadership practices and the application to collaborative environments. (F,S,Y)
Attributes: ESTS, SO, TPJ, TWOS
3 Credits

RLS 12500 Understanding Disability: Characteristics, Causes, Services (LA)

Introduction to the wide spectrum of disabilities -- including cognitive disability, mental illness, physical disability, and sensory impairment -- within home, school, community, and therapeutic settings. Course focuses on abilities, rights, characteristics, and needs of people with diverse abilities. Issues are discussed in light of societal, cultural, and historical barriers. Self-advocacy, family perspectives, technological developments, and current trends in educational and rehabilitative services are also considered. Includes an experiential swim program with children of varying abilities during class time. Preference given to Freshmen and Sophomores. (F,S,Y)
Attributes: 1, DV
3 Credits

RLS 13300 Introduction to Therapeutic Recreation (NLA)

An in-depth study of the scope of therapeutic recreation. Students study the historical and philosophical foundations of the profession. The role of therapeutic recreation professionals in the spectrum of health care and human service settings serving clients with a variety of disabilities is explored. Students participate in a 20-hour field experience and interact with professionals in the field throughout the course. (F,Y)
3 Credits

RLS 13700 Leisure Travel (NLA)

Develops an understanding of tourism and its social, economic, and environmental impact as one of the world's largest and fastest growing industries. Examines travel motivation, travel trends including ecotourism, and the distinctive conditions that attract visitors to different regions of the world. Enables students to discover interesting places to visit and prepares them to deal with logistical concerns related to climate, monetary exchanges, customs, time changes, health, and safety. The role of intermediaries to facilitate travel arrangements and provide information is also examined. (S,Y)

3 Credits

RLS 14000 Mountain Biking (NLA)

An experiential introduction to the concepts, skills, and techniques of mountain biking. Topics include riding technique, equipment and maintenance, riding for health and wellness, and environmental considerations. (B,F,S)

1 Credit

RLS 15000 Rock Climbing (NLA)

An introduction to the fundamentals of rock climbing, including safety considerations. Skills taught include the care and use of equipment, knot-tying, belaying, rappelling, and a variety of movements on rock. Pass/fail only. (IRR)

1 Credit

RLS 15100 Foundations of Outdoor Adventure Pursuits (LA)

An examination of the historical, psychological, social, and philosophical foundations of outdoor adventure pursuits. (F,S,Y)

Attributes: 1, SS

3 Credits

RLS 16000 Selected Topics in Recreation and Leisure Studies (NLA)

Exploration of a specific area of recreation and leisure studies. Topics vary based on student demand and on faculty expertise in the international faculty exchange program. (IRR)

0.5-3 Credits

RLS 17100 Introduction to Backpacking (NLA)

An experiential introduction to the concepts, skills, and techniques of backpacking. Topics include trip planning and preparation, equipment use and care, backcountry cooking techniques, navigation and safety considerations, and minimal impact practices. Course includes mandatory weekend field experience. (F-S,Y)

1 Credit

RLS 18000 Selected Topics in Adventure Skills Fundamentals (NLA)

Examines fundamental concepts and standard practices of a specific adventure skill discipline. Application of technical skills. This course involves field experiences. This course may be repeated up to six times for different selected topics. (IRR)

1 Credit

RLS 18001 Selected Topics in Wilderness Medicine (NLA)

Teaches the fundamental concepts and standard practices that are the foundation of a given skill discipline. The process is presented as the application of technical, environmental, and organizational skills. Teaches the concepts and practices that are required in various skill disciplines such as backpacking, vertical environments, mountaineering, and whitewater as well as various other disciplines. This course involves field experiences. (IRR)

1 Credit

RLS 18002 Selected Topics in Winter Environments (NLA)

Teaches the fundamental concepts and standard practices that are the foundation of a given skill discipline. The process is presented as the application of technical, environmental, and organizational skills. Teaches the concepts and practices that are required in various skill disciplines such as backpacking, vertical environments, mountaineering, and whitewater as well as various other disciplines. This course involves field experiences. (IRR)

1 Credit

RLS 18003 Selected Topics in Whitewater Environments (NLA)

Examines fundamental concepts and standard practices of a specific adventure skill discipline. Application of technical skills. This course involves field experiences. This course may be repeated up to six times for different selected topics. (Y)

1 Credit

RLS 18004 Selected Topics in Vertical Environments (NLA)

Examines fundamental concepts and standard practices of a specific adventure skill discipline. Application of technical skills. This course involves field experiences. This course may be repeated up to six times for different selected topics. (Y)

1 Credit

RLS 18005 Selected Topics in Rescue (NLA)

Examines fundamental concepts and standard practices of a specific adventure skill discipline. Application of technical skills. This course involves field experiences. This course may be repeated for up to six credits for different selected topics. (Y)

1-2 Credits

RLS 19000 Selected Topics in Adventure Skill Fieldwork (NLA)

An experiential education opportunity that applies adventure skills to real-life situations. The student works in an adventure setting and is actively involved in some aspect of program planning, delivery, and direct leadership. This course may be repeated up to three times for different selected topics. Prerequisites: 1 Course from RLS 18000-18009. (Y)

2 Credits

RLS 19001 Selected Topics in Whitewater Environments (NLA)

An experiential education opportunity that applies adventure skills to real-life situations. The student works in an adventure setting and is actively involved in some aspect of program planning, delivery, and direct leadership. This course may be repeated up to three times for different selected topics. Prerequisites: Corresponding RLS 180XX. (Y)

2 Credits

RLS 19002 Selected Topics in Vertical Environments (NLA)

An experiential education opportunity that applies adventure skills to real-life situations. The student works in an adventure setting and is actively involved in some aspect of program planning, delivery, and direct leadership. This course may be repeated up to three times for different selected topics. Prerequisites: Corresponding RLS 180XX. (Y)

2 Credits

RLS 21500 Youth at Risk (LA)

Students explore, through theoretical and experiential learning, the factors that contribute to or influence the leisure, educational, and social problems of youth at risk. Included among these factors are abuse, neglect, homelessness, recent immigration, minority group membership, having single and/or addicted parents, and various kinds of family dysfunctions. An overview of developmental, social, and psychological perspectives is presented along with innovative programs for youth at risk. Includes weekend workshop (minimal fee). Prerequisites: Sophomore standing or above. (IRR)

Attributes: 1

3 Credits

RLS 21600 Outdoor Adventure Skills (NLA)

Introduction to basic skills and concepts in a variety of outdoor adventure pursuits. Skills include trip preparation, menu planning, cooking techniques, and safety considerations in both moderate and cold-weather camping. Fundamentals in backcountry travel may include backpacking, flat-water canoeing, rock climbing, kayaking, and winter travel. Component of the Immersion Semester Program with associated fees. Pre-requisites: RLS 15100; RLS 21800; permission of instructor. (S,Y)

Attributes: ESTS

3 Credits

RLS 21800 Wilderness First Responder (NLA)

Improvised resources, varying environmental conditions, and extended care used as the framework for learning to respond to medical emergencies in remote wilderness settings. Examines necessary tools to make critical medical and evacuation decisions. Certification awarded upon successful completion. Course includes required weekend or Fall/Spring break participation. Course includes fee for materials, resources, and certification exam. Prerequisites: RLS 15100; permission of instructor. (F,Y)

Attributes: ESTS

3 Credits

RLS 22000 The Wilderness Experience (LA)

Exploration of the complexity of a wilderness experience. Focuses on wilderness values and the relationship humanity has with shaping the natural environment as well as the effects wilderness has on human relationships. This is an extended field experience. Component of the Immersion Semester Program with associated fees. Prerequisites: RLS 15100; RLS 21800; outdoor adventure leadership major or outdoor pursuits minor; permission of instructor. (S,Y)

4 Credits

RLS 22300 Wilderness Literacy (LA)

Survey of works in a variety of media that focuses on the theme of wilderness as a metaphor. Examination of the important ideas, people, cultures, and deep intellectual history of the wilderness movement. Component of the Immersion Semester Program with associated fees. Prerequisites: RLS 15100; RLS 21800; outdoor adventure leadership major or outdoor pursuits minor; permission of instructor. (S,Y)

Attributes: HU

2 Credits

RLS 23200 Program Planning (NLA)

Takes students through the process of programming, including the setting and evaluation of goals and objectives. Provides opportunities to experience the implementation of ideas in the community. This course also incorporates activity analysis, leisure education, program safety and risk management, and public relations. Prerequisites: RLS 10100 and RLS 10500. (F,Y)

3 Credits

RLS 23800 Leisure and Aging (LA)

Explores the role of leisure in the aging process. Students analyze the effects of incorporating meaningful leisure activities into the lifestyles of older individuals, based on their needs and interests. Visits to facilities and interaction with older individuals in leisure settings demonstrate the importance of leisure to a healthy lifestyle for older individuals.

Prerequisites: RLS 10100 or GERO 10100. (IRR)

3 Credits

RLS 24300 Interventions and Protocols in Therapeutic Recreation (NLA)

Explores ways in which arts and related recreation activities can aid in the rehabilitation process of individuals with disabling conditions, develop individual creativity, and enhance the quality of life. Programming areas include art, music, dance, drama, writing, literary readings, movement, reminiscence, horticulture, pet therapy, and biofeedback.

Prerequisites: RLS 12500. (F,Y)

3 Credits

RLS 24800 Service Learning in Recreation (NLA)

An experiential education opportunity that applies program planning theories and skills to real-life situations. The student works in a leisure service agency and is actively involved in some aspect of program planning and direct leadership. This course combines classroom and agency experience. Prerequisites: RLS 10100; RLS 10500; RLS 23200 (may be taken concurrently); major or minor status in department or aging studies major. (F-S,Y)

3 Credits

RLS 25000 Intermediate Rock Climbing (NLA)

This course builds upon the fundamentals of rock climbing through more advanced application of climbing skills, techniques, site management, and contemporary climbing issues. Specific topics will include sport lead climbing, top-rope anchor building, and top-rope site management considerations for an outdoor climbing environment. This course includes a mandatory field experience. There is course fee associated with this course. Prerequisites: RLS 15000. (F-S,Y)

1 Credit

RLS 25500 Outdoor Adventures for People with Differing Abilities (NLA)

Principles and practices of planning, leading, implementing, supervising, and evaluating outdoor adventure programs for people with disabilities. The focus is on the abilities, rights, characteristics, and needs of people with varying abilities – including cognitive disabilities, mental illness, learning disabilities, physical disabilities, and sensory impairments – that impact participation in outdoor adventure. Use of outdoor adventure as therapeutic intervention is also examined. Prerequisites: RLS 12500.

(IRR)

3 Credits

RLS 27700 Sustainable Tourism (LA)

Examines sustainable tourism from an international perspective. Emphasis is placed on management of the natural resources necessary in delivering a variety of sustainable tourism attractions (wildlife, plant life, scenery). Additionally, cultural resources associated with indigenous cultures are explored. A majority of the course is spent traveling to various private and public sustainable tourism ventures (e.g., whale watching, hiking, sea kayaking). Students engage in the sustainable tourism ventures, as well as meet leisure service personnel who own, operate, and direct these ventures. Includes fee for travel, food, and gear rental. (IRR)

Attributes: LAEL, SO

3 Credits

RLS 28000 Selected Topics in Adventure Skills Management (NLA)

Emphasizes core competencies required to manage clientele in a specific adventure skill environment. This course involves field experiences. This course may be repeated up to three credits for different selected topics. May have fees associated. Prerequisites: Corresponding RLS 180xx. (Y)
2 Credits

RLS 28001 Selected Topics in Wilderness Medicine (NLA)

Emphasizes core competencies required to manage clientele in a specific adventure skill environment. This course involves field experiences. This course may be repeated up to three credits for different selected topics. May have fees associated. Prerequisites: Corresponding RLS 180xx. (Y)
2 Credits

RLS 28002 Selected Topics in Winter Environments (NLA)

Emphasizes core competencies required to manage clientele in a specific adventure skill environment. This course involves field experiences. This course may be repeated up to three credits for different selected topics. May have fees associated. Prerequisites: Corresponding RLS 180xx. (Y)
2 Credits

RLS 28003 Selected Topics in Whitewater Environments (NLA)

Emphasizes core competencies required to manage clientele in a specific adventure skill environment. This course involves field experiences. This course may be repeated up to three credits for different selected topics. May have fees associated. Prerequisites: Corresponding RLS 180xx. (Y)
2 Credits

RLS 28004 Selected Topics in Vertical Environments (NLA)

Emphasizes core competencies required to manage clientele in a specific adventure skill environment. This course involves field experiences. This course may be repeated up to three credits for different selected topics. May have fees associated. Prerequisites: Corresponding RLS 180xx. (Y)
2 Credits

RLS 33100 Supervision of Recreation Personnel (NLA)

Contemporary issues and related administrative practices associated with managing human resources in leisure services. Examining concepts, principles and objectives of personnel supervision, including functions, processes, identification and application of methods and techniques. Prerequisites: RLS 33000. (S,O)
3 Credits

RLS 33200 Research Methods (LA)

Procedures and applications of social science research methods to recreational settings. Topics include research design, methods of data collection, and the presentation and interpretation of data. Prerequisites: RLS 10500; RLS 23200; WRTG 10600 or ICSM 108xx or ICSM 118xx; junior standing. (F,Y)
Attributes: QL, WI
3 Credits

RLS 33400 Leisure Education: A Therapeutic Recreation Intervention (LA)

The therapeutic recreation professional is considered a facilitator of his or her client's expanded leisure awareness. Focus is on assessing the client's leisure attitudes, skills, and options and developing individualized intervention programs to enhance independent functioning. Prerequisites: RLS 10100; junior standing. (F,Y)
Attributes: 1
3 Credits

RLS 33600 Commercial Recreation (NLA)

Study of commercial and entrepreneurial recreation as a major component of the leisure service delivery system. Analysis of the development potential of different types of recreation enterprises, including resources, location, risks, sources of financing, pricing, managerial requirements, marketing, and sources of technical assistance. Prerequisites: RLS 33000 or a level-2 business or economics course. (S,E)
3 Credits

RLS 34000 Inclusive Recreation and Diversity (LA)

Social stigmas of leisure choices based on disability, race, gender, sexual identity, and socio-economic status and the dynamic impact of inclusive leisure experiences on promoting social justice. Rationale for inclusion, historical context, and legislative initiatives are addressed. Prerequisites: RLS 12500. (S,Y)
Attributes: DV
3 Credits

RLS 34900 Advanced Fieldwork (NLA)

Practical in-depth work experience in a leisure service agency. Prerequisites: RLS 24800; permission of department chair. (F-S,Y)
2-9 Credits

RLS 35000 Therapeutic Recreation Process I: Introduction (NLA)

Introduction to the therapeutic recreation process, including the application of theory, client assessment, individualized treatment plan development, intervention planning, and documentation procedures. Focuses on the development and application of knowledge and skills necessary for meeting professional standards of practice, accreditation requirements, and third party payment criteria. Prerequisites: RLS 12500; RLS 13300; RLS 23200. (F,Y)
3 Credits

RLS 35300 Clinical Application in Therapeutic Recreation (NLA)

An interdisciplinary experiential learning lab at which students apply the knowledge they learn in RLS 35000 Therapeutic Recreation Process I and RLS 36000 Therapeutic Recreation Process II. Students are assigned a caseload and are responsible for assessment, treatment plan development, intervention planning, and documentation on assigned client(s). Participation in interdisciplinary team meetings is required. Prerequisites: RLS 13300. Corequisites: RLS 35000 (F); RLS 36000(S). (F-S,Y)
3 Credits

RLS 35400 Organization and Supervision of Outdoor Pursuits (NLA)

Application of principles and practices in planning, implementing, leading, supervising, and evaluating outdoor trips and programs. Study of outdoor program supervision using a variety of organizational models. Students design field-based experiences. Non-majors and non-minors considered based on availability. Prerequisites: RLS 21600; RLS 21800; outdoor adventure leadership major or outdoor pursuits minor. (F-S,Y)
2 Credits

RLS 35700 Therapeutic Recreation in the Schools (NLA)

Prepares students to deliver therapeutic recreation services to students with disabilities in public school systems, as mandated by the Individuals with Disabilities Education Act. Students learn to apply the therapeutic recreation process in a school setting and develop appropriate recreation goals for individualized education plans. Curricula to support therapeutic recreation in the schools are identified, as well as the roles therapeutic recreation specialists can play to advocate for and deliver leisure education in schools. Through a case study method, students apply concepts and techniques to an actual public school setting. Prerequisites: RLS 23300; junior standing. (IRR)
3 Credits

RLS 36000 Therapeutic Recreation Process II: Advanced Applications (NLA)

Advanced study of the therapeutic recreation process, including assessment, the design and implementation of agency-specific assessments, standardized interdisciplinary assessment instruments, and systems design intervention planning and evaluation. Focuses on interdisciplinary treatment plan development and intervention planning and documentation. Prerequisites: RLS 35000. (S,Y)
3 Credits

RLS 36600 Social and Cultural Aspects of Play (LA)

Explores qualities of play through interdisciplinary reading, experiential learning, and in-depth classroom discussion. Students learn about social and cultural aspects of play and rekindle their personal sense of playfulness. Prerequisites: Three courses from recreation, psychology, anthropology, history, music, philosophy, or sociology; junior standing. (IRR)
Attributes: 1
3 Credits

RLS 37000 Wilderness Land Use Ethics (LA)

Examination of the people and social forces that have influenced land use related to designated wilderness. Focus on philosophical and historical basis for wilderness management. Emphasizes development and promotion of a personal land-use ethic. Includes an extended field experience. Component of the Immersion Semester Program with associated fees. Prerequisites: RLS 21600; RLS 21800; outdoor adventure leadership major or outdoor pursuits minor; permission of instructor. (S,Y)

Attributes: ESTS
3 Credits

RLS 39900-39903 Selected Topics in Recreation (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)
1-3 Credits

RLS 42100 Wilderness Expedition Leadership (NLA)

Integrates human understanding, outdoor techniques, and teaching ability in expedition leadership. Emphasis on sound judgment and decision making with groups in wilderness settings. This is an extended field experience. Component of the Immersion Semester Program with associated fee. Prerequisites: RLS 15100; RLS 21800; RLS 35400; outdoor adventure leadership major or outdoor pursuits minor; permission of instructor. (S,Y)
4 Credits

RLS 43000 Adventure Education (LA)

Modern educational theory, experiential education, and adventure education theories are examined. Ethics of adventure education leadership are explored. Prerequisites: Senior standing. Outdoor adventure leadership major or Outdoor pursuits minor. (F,Y)
3 Credits

RLS 43300 Advancement and Administration of Therapeutic Recreation (NLA)

Provides an awareness and working knowledge of the skills needed to administer a therapeutic recreation department. Topics to be discussed include standards of practice, accreditation standards, third-party reimbursements, alternate funding sources, team involvement and intervention, marketing and advancement of the profession, clinical supervision, and continuous quality management as it relates to the therapeutic recreation process. Prerequisites: RLS 35000. (S,Y)
3 Credits

RLS 43500 Risk Management in Outdoor Adventure Programming (NLA)

A focused exploration of organizational, administrative, and instructor level risk management and legal liabilities. Topics include risk management and safety considerations for programs, staff, equipment, and transportation; legal issues; and crisis management. Prerequisites: RLS 21600; RLS 42100. (Y)
3 Credits

RLS 44100 Internship in Recreation and Leisure Studies (NLA)

Supervised, full-time work experience during the summer or regular academic school year in a leisure service agency. Prerequisites: Minimum cumulative GPA of 2.00; minimum GPA in RLS courses of 2.50; minimum grade of 3.00 in RLS 24800; completion of at least twenty-four credits of required recreation courses (RLS); approval of department chair. (F-S-Sum,Y)
8-12 Credits

RLS 45000-45003 Independent Study: Recreation and Leisure Studies (LA)

Individual pursuit of the solution to a problem of interest to the student and consultant faculty member. Prerequisites: RLS 33200; permission of department chair. (F-S-Sum,Y)
1-3 Credits

RLS 45300 Seminar: Professional Development (NLA)

Capstone course to develop skills necessary for professional involvement after graduation. Topics include an in-depth study of the national certification processes, professional organizations and committee involvement, and legislative and consumer advocacy skills. Students also learn to develop proposals for presentations at professional conferences and to develop professional presentation and multimedia skills. Professional publications and publication requirements are discussed. Prerequisites: Senior standing. (F,S,Y)
Attributes: CP
3 Credits

Religious Studies (RLST)

RLST 10100 Religion Matters (LA)

What is religion? Why is it important for understanding our rapidly changing world? This course investigates what religion is all about, drawing illustrations from various traditions around the globe. Students cultivate skills used in the academic study of religion, while exploring issues of belief, atheism, mysticism, morality, sex, and more. (F)
Attributes: HM, TIII
3 Credits

RLST 10300 Hebrew Scriptures (LA)

This course treats the books of the Bible critically as literature, as religious and moral texts, and as a source of sociological knowledge. It surveys the biblical literature, acquaints students with critical methods for the study of the Bible, situates the Bible within the literature and culture of the ancient Near East, and discusses the religion of ancient Israel. The course will deal with questions of history and archaeology and with questions of meaning: what the biblical text meant to its ancient readers and what meanings it has today. Cross-listed as JWST 10300.

(F,Y)

Attributes: H, HM, INBG, TIDE, TMBS

3 Credits

RLST 10400 Introduction to the New Testament (LA)

A survey of the life and teaching of Jesus, and major themes in the Pauline Epistles and the Book of Revelation. (IRR)

Attributes: HM, INBG, TIDE, TIII

3 Credits

RLST 10500 Religion in Global Contexts (LA)

Introduces students to the academic study of religious traditions prevalent in the Americas, Africa, and Asia. Specific topics vary, but may include Native American shamanism, Islam in China, African witchcraft, the politics of Tibetan Buddhism, celebrity Hindu gurus, and Brazilian megachurches. The course considers what it means to label these phenomena 'religious' as well as how traditional religious practices have adapted to the challenges of a modern, globalized world. (F,Y)

Attributes: AN3, G, H, HM, INBG, NACI, NASE, TMBS

3 Credits

RLST 10600 A History of God (LA)

Explores historical developments and living practices within Jewish, Christian, and Muslim traditions as they encounter other peoples and traditions around the world. Engages with historical events, politics, and changing cultural contexts of the three traditions. Issues covered may include ways of thinking about God in monotheistic traditions; sacred texts and rituals; understandings of gender and sexuality; fundamentalism; science; and encounters with polytheistic, feminine, and/or pagan views of the divine. (S,Y)

Attributes: AN3, G, H, HM, INBG, TIDE, TMBS

3 Credits

RLST 15600 What Is Belief? (LA)

Designed to familiarize students with the field of Religious Studies, this course provides a rigorous but accessible introduction to the phenomenon of religious belief, a phenomenon that is currently debated by scholars of religion and is of significant interest to the wider public. We will consider the relationship between belief and knowledge, doubt, and practice; the possibility of multiple forms of religious belief; and the problem of belief's utility as a tool of comparative analysis. (F)

1 Credit

RLST 17500-17510 Selected Topics in Religion (LA)

Topics to be determined according to teacher and student interest. (IRR)

Attributes: HU

3 Credits

RLST 20100 Religion and Culture (LA)

Study of the mutual relations between religion and culture. The course explores the religious dimension of art, music, and other contemporary media, and considers the way religious symbols influence cultural and social movements. Students study both Western and non-Western examples, of the intersection between religion and culture in art, music, literature, ritual, film, and games. Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (Y)

Attributes: AN3, HM, INBG, SCE, TIII

3 Credits

RLST 20300 Living Judaism (LA)

Introduces Judaism as a lived tradition, with a focus on ethical, ritual, and cultural practices and beliefs from a wide variety of Jewish communities. Readings include texts from the biblical, rabbinic, medieval, and modern periods. Theological and ethical issues addressed include God, good and evil, covenant, death and afterlife, justice, and social responsibility, as lived out through practices associated with birth and death; marriage and commitment; sexuality; and the life of study, prayer, and devotion. Course cross-listed with JWST 20300; students may not receive credit for both courses. Prerequisites: One three credit Liberal Arts course. (S,Y)

Attributes: G, HM, INBG, TIDE, TMBS

3 Credits

RLST 20400 Christianity: Contexts and Conflicts (LA)

Explores some of the varieties of Christianity in its two thousand year history, with special attention to the women who have played a critical role in shaping its tradition. Surveys the features Christianity shares with other religious traditions, as well as how Christianity has been transformed in global contexts. Examines how Christianity has both defended the vulnerable (e.g., liberation theology) and harmed others (e.g., colonial missionary activity). Also considers the ways that Christianity figures into contemporary politics in America in volatile discussions about issues like abortion, race, gender and sexuality. No previous knowledge of Christianity necessary. Prerequisites: One three credit liberal arts course. (O)

Attributes: ESE, INBG

3 Credits

RLST 20500 Engaging Islam (LA)

Introduces the origins and historical development of Islamic religious traditions, while exploring the wide spectrum of beliefs, practices, and interpretations of Muslims. Particular attention is given to historical and contemporary Muslim engagements with mysticism, empire, nationalism, race, and notions of sexuality and gender. Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (F,Y)

Attributes: DV, ESE, G, H, HM, INBG, TIDE, TMBS

3 Credits

RLST 20700 Death, Dying, and Immortality (LA)

What is death? What, if anything, lies beyond it? This course investigates how different religious traditions from around the world imagine death, dying, and the afterlife. Topics may include reincarnation, end-of-life care, funerary rites, and suicide. Students are invited to explore their relationship with mortality in light of other traditions' perspectives.

Prerequisites: One three credit course in the liberal arts. (Y)

Attributes: 1, AN3, H, HM, HU, TMBS

3 Credits

RLST 21000 Religion, Race, and Social Justice (LA)

Explores the intersection of race and religion in the context of historical and contemporary movements in North America and globally. Challenges students to think about how religion is implicated in the construction of racial identities and theories, and how particular racialized communities utilize religion to resist racial oppression. Case studies may include religion and #BLM, Black Liberation Theology, the Nation of Islam, and Rastafarianism. Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (O)

Attributes: DV, ESE, HM, TPJ

3 Credits

RLST 21100 Religion, Gender, and Sexuality (LA)

Where do attitudes about gender roles and sexual orientations come from? How do religious traditions reflect, reinforce, or subvert those attitudes? This course explores issues of gender and sexuality in the context of different religious traditions, past and present. Special attention is given to religion's role in current debates surrounding, for example, gender politics, sexual ethics, masculinity, feminist and queer theory, etc. Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (O)

Attributes: ESE, WGS, WGSJ

3 Credits

RLST 23500 The Nature of Nature (LA)

Investigates why different religious traditions view our planet so differently. To what extent do these traditions shape peoples' perceptions of and interactions with the natural environment? Also explores how religious communities around the globe are responding to deforestation, biodiversity loss, and climate change. Makes use of a wide range of materials, including religious texts, documentaries, ethnographic studies, and science fiction. Prerequisites: One three-credit course in the liberal arts. (E)

Attributes: ABSS, AN3, ENVE, HM, TMBS, TQSF

3 Credits

RLST 24000 Writing about Religion: Heaven and Hell (LA)

An interdisciplinary introduction to how portrayals of heaven and hell have been transformed over time, with a focus on learning how to write about religion from a secularly minded but religiously-informed perspective. The course explores two thousand years of the history of heaven and hell with a focus on human meaning-making in religious practice, poetry, art, and digital media. Includes significant attention to the development of research and writing skills in the humanities.

Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (IRR)

Attributes: WI

4 Credits

RLST 25200 Introduction to Mysticism (LA)

Focuses on mystical journeys and ecstatic experiences from around the world. Draws from a variety of disciplines to analyze mystical paths in different cultural contexts, including philosophy, anthropology, ethnobotany, neurophysiology, psychology, and religious studies. Topics include voices and visions, the use of psychotropic substances, bridal mysticism, meditation, and the occult. Prerequisites: One three credit course in the liberal arts. (E)

Attributes: HU

3 Credits

RLST 25500 Religions in America (LA)

A sociohistorical survey of the varieties of religions in North America, including Christianity, Judaism, Islam, new religious movements, and religions of various ethnic groups, such as Native American religions and African American religions. Emphasizes the role religion plays in the political and ethical spheres of American life. Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (IRR)

Attributes: HU

3 Credits

RLST 27500-27510 Selected Topics in Religion (LA)

Topics to be determined according to teacher and student interest.

Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (IRR)

Attributes: HU

3 Credits

RLST 28100 Hindu Worlds (LA)

Introduces students to the richly diverse yet interrelated traditions of practice and thought that have contributed to what is today called "Hinduism". Emphasizes how these traditions have evolved from ancient times to the present, as well as the persistent tension between their textual and performative dimensions. Students examine Hindu religious literature and philosophy, temples and pilgrimage, iconography and mythology, in addition to issues pertaining to gender, colonialism, and the diaspora. Prerequisites: One liberal arts course in any of the following departments: ANTH, ARTH, CMST, CLTC, CSCR, ECON, EDUC, ENGL, GERO, HIST, JWST, LGST, PHIL, POLT, PSYC, RLST, SOCI, WGST, WRTG. (O)

Attributes: DV, G, HM, INBG, TMBS

3 Credits

RLST 28300 Seeking the Buddha (LA)

Engages the historical evolution and lived experience of Buddhist religious traditions by exploring how people have variously attempted to search for, discover, imagine, understand, become, and even kill the Buddha. Considers how the Buddha and his teachings have been interpreted through stories, philosophies, rituals, images, and objects across Asia and beyond. Special attention is paid to the transmission and modernization of Buddhist traditions in the contemporary western world.

Prerequisites: One three credit liberal arts course. (E)

Attributes: DV, G, H, HU, INBG

3 Credits

RLST 31000 Epic Adventures: Readings in Hindu Mythology (LA)

Explores the rich narrative traditions of India's twin epics, the Mahabharata and the Ramayana, which have constituted the core of Hindu mythology for over two millennia and profoundly shaped the cultures of South and Southeast Asia. Examines these myths in their diverse literary, philosophical, and performative dimensions and addresses broad thematic issues raised in the texts, including the nature of war, deception, gender, fate, friendship, duty, and divinity. No previous knowledge of Hinduism is presumed. Prerequisites: One 200-level RLST course; WRTG 10600 (or equivalent). (E,S)

Attributes: WI

3 Credits

RLST 31100 Philosophy of Religion (LA)

Study and discussion of a broad range of issues in the philosophy of religion, such as religious epistemology, the ontological argument, the cosmological argument, the teleological argument, religion and science, and the problem of evil. Primary source readings. Prerequisites: One 20000-level PHIL course. (IRR)

Attributes: HU
3 Credits

RLST 32300 Gender and Sexuality in Judaism (LA)

Exploration of what it means to be a Jewish man or woman. The course addresses how Jewish gender roles have changed throughout history, as well as how contemporary Jews deal with changes in women's roles and demands for gender equality. Topics covered include what is "gender" and how to study it; traditional roles of men and women in Judaism; the gendered Jewish body; family and sexuality; homosexuality; Jewish feminism; the gender of God; and changing women's religious roles.

Cross-listed with JWST 32300. (Y)

Attributes: 1, DV, HU
3 Credits

RLST 33300 Jewish Mysticism (LA)

This course traces the history of Jewish mysticism. After a brief overview of early Jewish mysticism from the biblical and rabbinic periods, students will concentrate on the medieval flowering of Kabbalah, and its further development in the 16th-century Kabbalah of Safed and Israel and 18th-century Eastern European Hasidism. The emphasis will be placed on understanding both the theoretical and experiential aspects of Jewish mysticism and on examining some of the key texts of Jewish mysticism.

Cross-listed with JWST 33300. (Y)

Attributes: HU
3 Credits

RLST 35600 Religion and Literature (LA)

This course explores the ways in which religious ideas and practices appear in contemporary novels associated with various cultures and religious traditions. We consider how authors utilize religious themes to negotiate challenges and questions posed by modernity, as well as how they engage questions of religious identity through the medium of modern literary forms. We read these works against the background of contemporary changes in the relationship between the religious and the secular. Cross-listed with ENGL 35600; students may not receive credit for both. Prerequisites: One course in RLST or ENGL; WRTG 10600, ICSM 10800, ICSM 11800, or equivalent. (IRR)

Attributes: WI
3 Credits

RLST 37500-37513 Selected Topics in Religion (LA)

Topics to be determined according to teacher and student interest.

Prerequisites: One 20000-level RLST course. (IRR)

Attributes: HU
3 Credits

RLST 39100 Independent Study: Religion (LA)

Study or research project(s) of the student's own devising carried out in consultation with faculty sponsor; final project(s) evaluated by faculty sponsor. Offered on demand. May be repeated for credit for different projects. Prerequisites: One 20000-level RLST course and permission of instructor. (IRR)

Attributes: UND
0.5-3 Credits

RLST 39300 Tutorial in Religion (LA)

Work by student and teacher together on a problem or project of interest to both. May be repeated for credit. Prerequisites: One 20000-level RLST course and permission of instructor. (IRR)

Attributes: UND
1-4 Credits

RLST 39800 Internship: Religious Studies (NLA)

Enables students to participate in an internship opportunity with the collaboration of a faculty sponsor in Religious Studies. In addition to internship-based activities, assignments include related readings and a final paper. Completion of H&S dean's office internship form is required. Can be repeated to a maximum of Prerequisites: Three RLST courses; permission of instructor. (IRR)

0.5-3 Credits

RLST 41000 Religious Studies Capstone (LA)

Serves as the capstone for religious studies majors and minors. Engages students in organizing interdisciplinary community discussions about contemporary issues in global religious practice. Facilitates reflection on studies in the major/minor and the Integrative Core Curriculum, and how these connect to the student's personal intellectual formation at Ithaca College. Prerequisites: At least three courses in religious studies, with at least one RLST course at the 300 level. (S,Y)

Attributes: CP, HU, WI
1 Credit

Sociology (SOCL)

SOCL 10100 Introduction to Sociology (LA)

Basic scientific concepts related to social systems, recurring social processes, cultural factors, and social factors in the development of personality. Also offered through the London Center. (F,S,Y)

Attributes: SO, TPJ
4 Credits

SOCL 20200 Women in Britain (LA)

Examination of the various social, historical, political, and economic factors that affect the position of women in contemporary Britain. Comparisons are drawn with specific issues in other Western countries. Prerequisites: One liberal arts course in any of the following departments: ANTH, CMST, CSCR, ECON, EDUC, GERO, HIST, PHIL, POLT, PSYC, SOCI, WGST. Offered only through the London Center. (F,S,Y)

Attributes: 1, DV, INBG, SO2, SS, WGS
3 Credits

SOCL 20300 Juvenile Delinquency (LA)

Analysis of juvenile delinquency and its social reality. Systematic examination of issues in defining and measuring delinquency, theories of cause, gang behavior, the juvenile justice system, and issues and alternatives in response and treatment. Prerequisites: One liberal arts course. (Y)

Attributes: ADSE, CNSL, DV, ESE, LXME, RPRE, SO, SO2, TPJ
4 Credits

SOCL 20700 Race and Ethnicity (LA)

Critical analysis of race and ethnic relations in the United States from assimilationist, pluralist, and Marxist perspectives. Comparative analysis of black, Latino, and white racial/ethnic experiences. Examinations of race and ethnicity as dimensions of social stratification and control. Specific concepts include prejudice, discrimination, institutional racism, internal colonialism, and ethnic identification. Prerequisites: One liberal arts course. (Y)

Attributes: ADSE, CNSL, DV, ESE, LXME, NASE, SO, SO2, TPJ
4 Credits

SOCI 20800 Social Change (LA)

Analysis of evolutionary and revolutionary social change from the perspective of critical sociology. Topics include the types of groups that mobilize for change, recruitment of new members, ideologies of groups, and leadership styles. Particular U.S. social change movements examined include labor, civil rights, antiwar, welfare rights, women's movement, and the new right. Prerequisites: One liberal arts course. (Y)
Attributes: CNSL, ENSS, ESSS, LAEL, LAGC, SO, SO1, TPJ
4 Credits

SOCI 20900 Sociology of Education (LA)

This course examines the role of education and the structure of educational institutions (including colleges and universities) in American society and studies the process by which skills, cultural norms, and cultural views are transmitted. It also explores the distribution of educational opportunity. These issues are dealt with at the level of the classroom, the school, and the community. The latter part of the course focuses on possibilities for change in the educational system. Prerequisites: One course in the liberal arts. (IRR)
Attributes: DV
4 Credits

SOCI 21200 Changing Contours of Work (LA)

Consideration of the changing composition and organization of work and the impact workplace practices have on individuals and the larger social order. Examination of gender, race, class as intersecting with jobs and careers. Students research their own intended professions and consider how job demands in the new economy may affect their lives and those of others. Prerequisites: One liberal arts course. (Y)
Attributes: DV, SO, SO3, TPJ, WGS, WGSC
4 Credits

SOCI 21300 Sociology of Sexualities (LA)

Examination of how sexuality is defined in our society, stressing that it is cultural as well as biological and often defined in oppressive ways. Students investigate how the intersection of gender with capitalism, race, ethnicity, and sexual orientation has a strong impact on the definition of sexuality. Prerequisites: One liberal arts course. (Y)
Attributes: CNSL, DV, SO, SO4, TIDE, WGS, WGS1
4 Credits

SOCI 21400 Definitions of Normality (LA)

Critical, analytical study of what it means to be outside the limits of society and of the processes that define normality in particular historical moments. Study of exclusion and normality focuses on those defined as "bad" (criminals, delinquents, sexual outsiders, addicts), "mad" (mental patients), "sad" (blind, deaf, physically different), and "awe-ful" (freaks). Prerequisites: One liberal arts course. (Y)
Attributes: DV, SO4
4 Credits

SOCI 21700 Mental Health in Historical and Social Contexts (LA)

Explores the historical and contemporary contexts of mental health and distress from both sociological and psychological perspectives. Examination of the social construction of mental health through time, and consideration of how social and cultural factors such as race, class, and gender intersect with diagnostic paradigms and clinical treatment models employed by practitioners. Prerequisites: One liberal arts course. (F,S,Y)
Attributes: CC, DV, SO1
4 Credits

SOCI 22000 Sociology of Aging (LA)

This course presents the prominent sociological theories and research about aging and the ways in which the experience of aging is socially constructed. Cross-listed with GERO 22000. Students may not receive credit for both SOCI 22000 and GERO 22000. Prerequisites: One liberal arts course in any of the following departments: ANTH, CMST, CSCR, ECON, EDUC, GERO, HIST, PHIL, POLT, PSYC, SOCI, WGST. (F,Y)
Attributes: CNSL, DV, SO3, SS
3 Credits

SOCI 22300 Rich and Poor in the U.S. (LA)

Examination of the causes and consequences of class inequality in the U.S. today. Explores how class is defined, how it functions, and how it is sustained across generations in a purportedly democratic and meritocratic society. Applies a sociological perspective to this exploration, with a focus on the growing gap between rich and poor and the impacts of inequality on daily lives. Prerequisites: One course in the liberal arts. (Y)
Attributes: CNSL, SO
4 Credits

SOCI 22800 Men's Lives (LA)

Sociological analysis of manhood. Consideration of the dynamics of race, class, historical moment, fatherhood, and sexuality in defining and structuring men's lives. Sociological concepts such as the social construction of gender, ideology, patriarchy, power, roles, and socialization are employed in developing an analysis of men and masculinity. Prerequisites: One liberal arts course. (Y)
Attributes: SO4, WGS, WGSC
4 Credits

SOCI 24200 Research Design (LA)

This course prepares students for more advanced coursework by focusing on the research methods used by sociologists. Topics covered include the scientific method and its application to the social world (including theory building and hypothesis testing); quantitative and qualitative research methods (including their differences and appropriate uses); the relationship between empirical questions and research methods; conducting systematic observations and recording data (including sampling); causality; and research ethics. Students will engage in hands-on practice via several small research projects to practice research methodologies introduced in the course. Prerequisites: 2 courses in SOCI. (F,Y)
4 Credits

SOCI 25000 Gender, The Environment and Global Change (LA)

Explores interconnections between gender and the environment. Studies patriarchy, colonialism, capitalist development, globalization, and environmental crises. Special focus on case studies of social movements that challenge gender hierarchies and environmental degradation, including feminist, indigenous, and environmental justice movements. Prerequisites: One liberal arts course. (Y)
Attributes: ABSS, DV, ENSS, ENVE, ESSS, LAEL, LAGC, LMEL, LSCO, SO, SO1, TPJ, TQSF, WGS
4 Credits

SOCI 25300 Sociology of Health and Illness (LA)

Examines health and illness from a sociological perspective. Includes understanding how health and illness are socially distributed, how the meanings of health and illness vary by culture, and how people experience health and illness similarly and differently at the intersection of their race, class, and gender locations. Prerequisite: One liberal arts course. (Y)
Attributes: DV, LMEL, LSCO, SO2
4 Credits

SOCI 30500 Practicum in Social Change: Urban Mentorship Initiative (NLA)

An academic mentorship program that offers students the opportunity to participate in interdisciplinary coursework and field-based service-learning aimed at supporting underserved youth in their pursuit of higher education. Course includes required participation in a two-day trip (Friday to Saturday) to a partner school. This course is a cross-listed course; students cannot receive credit for both SOCI 30500 and CSCR 30500. (F,Y)

Attributes: AAPP, ADPP, ADSE, LSPP, LXME, NAPP, NASE, SL, SO1
3 Credits

SOCI 31100 Sociological Theory (LA)

Analysis and evaluation of some theories of society. Development of a critical framework within which to generate hypotheses of social structure and social change. Emphasis is placed on the historical and contextual nature of theory. Prerequisites: Two courses in SOCI. (F,Y)

Attributes: SS
4 Credits

SOCI 31700 Sexuality and Health (LA)

This course explores the intersections of sexuality and health and focuses on both as social concepts. We will investigate the manner in which sexuality and health are shaped by individual, social and cultural factors and how ideas about our bodies and our sexuality are related to ideas about our health. Prerequisites: Two courses in Sociology. (F,Y)

Attributes: SS
4 Credits

SOCI 32100 Punishment in Public Schools (LA)

Examines the social, historical, and political underpinnings of the mass enforcement of zero-tolerance school policies in the U.S., and the resulting creation of punitive schooling regimes. Explores the political and economic contexts of 20th-century punitive school disciplinary policies through a critical framework grounded in contemporary social theories of discipline, power, and academic distinctions. Special attention is paid to issues of race, class, and gender inequality and the administration of discipline across social groups and geographic locales, as well as to alternatives to punitive school policies. Prerequisites: Two SOCI courses. (IRR)

Attributes: CNSL, LXME, SO2, SS
4 Credits

SOCI 32500 Race, Class, Gender and Sexuality (LA)

This course is taught from the perspective that race, class, gender, and sexuality intersect to form a matrix of domination. The course is designed to help students develop the analytical tools needed to understand this perspective and apply it to specific situations, case studies, or fictional characters. Students will also be encouraged to focus on both privilege and oppression and how they interact with each other. Prerequisites: 2 courses in SOCI. (Y)

Attributes: SO2, SS, WGS, WGS3, WGS1
4 Credits

SOCI 32600 Social Movements (LA)

This course examines the emergence, achievements, failures, and possibilities of social movements in the United States and other countries. Through cases studies, historical documents, and ethnographies, students learn about peoples' struggles in the context of global capitalism, including liberation movements of people of color, workers, women, and indigenous people; they also learn about the lessons these movements offer for social change efforts today. Prerequisites: 2 courses in SOCI. (Y)

Attributes: ADSE, CNSL, DV, ENSS, ESE, ESSS, RPRE, SO1, SS, WGSC
4 Credits

SOCI 32700 Work and Family (LA)

Analysis of the impact of work on family dynamics and the impact of family factors on work orientation. Topics include the roles and socialization of provider and homemaker, typologies of work and of family experience, and work and family in various historical periods and classes. Focus on dual-career families and policies regarding work and family.

Prerequisites: 2 courses in SOCI. (Y)
Attributes: DV, SO3, SS, WGSC
4 Credits

SOCI 32900 Health and the Family (LA)

Examines the meaning of health and illness in the family context and against a shifting backdrop of family policies, healthcare values and goals, and intersecting inequalities. Investigates how we define family and health, how marital status affects health, how health is negotiated among family and community members, and how inequalities shape health opportunities. Includes in-depth interviewing to apply course concepts to one's own health status and family dynamics. Prerequisites: 2 SOCI courses. (IRR)

Attributes: CNSL, SS, WGSC
4 Credits

SOCI 34100 Minorities in the United Kingdom (LA)

A study of ethnic groups in the U.K. (including Indian, black, Cypriot, Irish, and Jewish). The course examines patterns of immigration, integration, and conflict. Comparisons are drawn with minorities in other countries. Prerequisites: One course in SOCI and one liberal arts course in any of the following departments: ANTH, CMST, CSCR, ECON, EDUC, GERO, HIST, PHIL, POLT, PSYC, SOCI, WGST. Offered only through the London Center. (F,S,Y)

Attributes: DV, H, INBG, SS
3 Credits

SOCI 34200 Data Analysis (LA)

Data Analysis introduces students to how sociologists use quantitative and qualitative data to study social phenomena. Quantitative topics include: data management, variable structures, numeric and graphic displays of data, univariate analysis, and bivariate analysis. Qualitative topics include: data management, reading interview transcripts and fieldnotes, positionality; open and focused coding, content analysis data rubrics, analytic memos, applying sociological concepts/theory to analyze qualitative data, and report writing. Prerequisites: SOCI 24200. (S,Y)

Attributes: QL, SS
4 Credits

SOCI 36200 Not For Sale? The Moral Limits of Markets (LA)

This course foregrounds the intersections of markets and moral norms in the context of contemporary capitalism in the United States. Explores how markets mediate ordinary actions in everyday life, from how people feed and dress themselves to where they live and work, and even to how they travel, play, and care for each other. Examines the moral limits of markets by exploring whether there are cultural boundaries beyond which buying and selling become taboo. Prerequisites: Two SOCI courses. (IRR)

Attributes: SS
4 Credits

SOCI 36300 Mass Incarceration in The U.S. (LA)

Examination of the phenomenon of mass incarceration in the United States through a sociological lens, with focus on underlying social, political and economic causes. Explores the prison as a physical site of confinement and punishment, disproportionate impacts of the criminal justice system on low income, African American and Latinx communities, and the enduring consequences of incarceration on individuals, families, and communities, from limited labor market options to felony disenfranchisement. Prerequisites: Two SOCl courses. (Y)

Attributes: SO3, SS

4 Credits

SOCI 40100 Community Organizing (LA)

Designed to teach students about a range of approaches to community organizing. Exposes students to theories of organizing and requires practical fieldwork with a community or campus organization in which classroom instruction, information, and insights are tested and improved.

Prerequisites: Three courses in SOCl. (IRR)

Attributes: CNSL, SS

4 Credits

SOCI 40300 Inquiry and Action for Social Change (LA)

Experiential learning opportunity to engage in community-based research to address community needs and issues, such as poverty, hunger, or racism. Working in project-based research teams, students collaborate with representatives of community organizations to design and carry out projects, applying quantitative and qualitative skills as well as theoretical concepts drawn from participatory action research, feminist research, popular education, and reflective inquiry. Skills developed include team building, data analysis, and assessment in the context of cross-cutting concerns of power, inclusion, cross-cultural competency and ethics.

Prerequisites: 3 courses in SOCl. (Y)

4 Credits

SOCI 40500 Surveillance and Society (LA)

Examines the complex ways in which surveillance technologies and societies (both past and present) interact to produce security, fear, power, and social control. Applying a variety of theories of surveillance, the course investigates surveillance technologies across multiple spheres, including state-building, the workplace, the domestic sphere, and online. With a particular focus on the impact of surveillance on class, gender, and racial formations, students analyze diverse media, including film, reality TV, and social media, to understand perceptions of safety, danger, and the normalization of surveillance technologies in day-to-day lives.

Prerequisites: 3 courses in SOCl. (IRR)

Attributes: ADPP, ADSE, LSP, LXME, NAPP, NASE, RPRE, SO2, SS

4 Credits

SOCI 40600 Sociology of Money (LA)

Explores how to think sociologically about money, value, and capital by examining the social nature of money, its relationship to power and social order, the source of its value, and how it becomes capital. Topics include the difference between tips, gifts, and bribes, and between allowances and salaries, and the larger question of the seemingly magical power of money, whether viewed as a harbinger of freedom or the root of all evil.

Prerequisites: Three courses in SOCl. (IRR)

Attributes: SS

4 Credits

SOCI 40900 Skills for the Helping Professional (NLA)

This course introduces students to theory and practice of psychotherapy and other professional helping relationships. Students learn about counseling, assessment, ethics, and helping skills. This course emphasizes basic and specialized skills necessary to function effectively in a helping relationship. Emphasis is placed upon understanding the nature of the helping process in a practical and applied way.

Professional helping is explored in the context of cultural competency and a biopsychosocial viewpoint. Self-exploration and some level of self-disclosure are required inasmuch as effective counseling requires the ability to understand oneself and to articulate personal feelings. Prerequisites: SOCI 21700; PSYC 32100; and PSYC 34100 OR PSYC 34200 (courses may be taken concurrently). (F,S,Y)

4 Credits

SOCI 41000 Feminism, Food, and Health (LA)

Investigates how food consumption and health experiences are shaped by multiple and intersecting inequalities, highlighting the potential of a feminist lens to help us to identify root causes and future solutions to major social problems surrounding food and health. Draws upon an intersectional theory, exploring ways in which gendered experiences intersect with other systems of oppression. Prerequisites: 3 courses in Sociology, or one 300-level course with either a WGS or a WGS1 attribute. (IRR)

Attributes: SS, WGS, WGS1

4 Credits

SOCI 41200 Seminar: The National Health System (LA)

A study of the history, development, and function of the national health system in the context of the welfare state, education, housing, class structure, income, and politics in Great Britain. Comparison of the American and British health care schemes. Prerequisites: Three courses in Sociology. Offered only through the London Center. (F-S,Y)

Attributes: SS

3 Credits

SOCI 42400 Global Sociology (LA)

This course focuses on how people shape global change. The course examines social processes such as colonialism, development, and globalization by studying their institutions, manifestations, and the resistances they provoke. Throughout the course we examine the dynamic relationships between structural processes and resistance, agency and human initiatives.

Prerequisites: Three courses in SOCl. (IRR)

Attributes: INBG, LAEL, LAGC, SO1, WGS, WGS3, WGS1

4 Credits

SOCI 44500 Tutorial in Sociology (LA)

Intensive study of a specific topic with a small group of students.

Prerequisites: Three courses in SOCl. (IRR)

Attributes: SO1, SO2, SO3, SO4, WI

4 Credits

SOCI 47600-47601 Independent Study in Sociology (LA)

An independent study in sociology is arranged individually between student and instructor. Students are expected to do a sophisticated exploration and analysis of an appropriate topic. A proposal for the topic and specific plans must be approved by the dean's office of the School of Humanities and Sciences. May be repeated for up to twelve credits total.

Prerequisites: Three courses in social sciences; permission of instructor. (F-S,Y)

Attributes: SS, WI

1-4 Credits

SOCI 48000 Seminar on the Sociology of Pedagogy (LA)

Designed to supplement the practicum on teaching assistance and is required for teaching assistants in sociology courses. It presents the theoretical approach to teaching generally shared by sociology department faculty. A variety of pedagogical theories, including that of Paulo Freire, are examined using an ongoing analysis of the relationship between educational theories and larger social forces and historical conditions. The seminar meets as four half-day workshops during the semester. The seminar is team-taught by the instructors of courses that use teaching assistants. The format includes didactic presentation of theoretical material and discussion, along with focused papers on the reading. The required reading must be completed before the seminar workshop. In the workshop at the end of the semester, the text material is reviewed with analysis of its application in the teaching assistance experience. Prerequisites: One 100-level sociology course; three upper-level sociology courses; permission of instructor. Corequisites: SOCI 4810(F-S,Y)

Attributes: SS, WGS, WGS3

1 Credit

SOCI 48100 Practicum in Teaching Assistance (NLA)

Leadership skills for leading educational discussion groups. Open to students who are acting as teaching assistants in sociology courses. Prerequisites: One 100-level sociology course; three upper-level sociology courses; permission of instructor. Corequisites: SOCI 48000. (F-S,Y)

2 Credits

SOCI 48400 Quantitative Capstone (LA)

A capstone experience in which students define and execute a research project that involves identification or collection and analysis of quantitative data. Students write a full thesis paper. Students also reflect on the relevance of sociology with respect to charting future pathways through their own life course. Satisfies ICC Capstone and Writing Intensive requirements. Prerequisites: SOCI 31100 and SOCI 34200. (Y)

Attributes: CP, WI

4 Credits

SOCI 48500 Qualitative Capstone (LA)

A capstone experience in which students define and execute a research project that involves collection and analysis of qualitative data. Students write a full research paper. Students also reflect on the relevance of sociology with respect to charting future pathways through their own life course. Satisfies ICC Capstone. Prerequisites: SOCI 31100 and SOCI 34200. (Y)

Attributes: CP, WI

4 Credits

SOCI 49800-49801 Internship in Sociology (NLA)

Internships arranged individually at the student's request with an instructor and a sponsoring agency, and with departmental approval. Also offered through the London Center by special permission. Prerequisites: Sociology majors, sociology minors or counseling minors; senior standing; permission of instructor. (F-S)

1-12 Credits

Spanish (SPAN)

SPAN 10100 Elementary Spanish I (LA)

Beginning course. Practice in understanding, speaking, reading, and writing simple idiomatic Spanish with special attention to Spanish culture. Emphasizes participation and self-expression. Open to students with no previous Spanish, or by placement examination. (F,S,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

SPAN 10200 Elementary Spanish II (LA)

Continuation of SPAN 10100. Limited to students who have successfully completed SPAN 10100 with a grade of C- or better, or by placement examination. Prerequisites: SPAN 10100 or equivalent. (F,S,Y)

Attributes: 3A, G, HM, HU, TIDE

4 Credits

SPAN 10400 Intensive Elementary Spanish (LA)

An accelerated introductory-level course for students who have previously studied Spanish. The course prepares students for SPAN 20100 by reviewing material covered in SPAN 10100 and presenting SPAN 10200 content. Students may not receive credit for both SPAN 10400 and SPAN 10100 or SPAN 10200. By placement only. (F-S,Y)

Attributes: 3A, G, HU

3 Credits

SPAN 20000 Intermediate Spanish (LA)

Develops intermediate-level proficiency in Spanish with a focus on culture. Includes grammar review and expansion, with practice in all skill areas and a particular emphasis on spoken communication. Prerequisites: SPAN 10200 with a grade of C- or better, or by placement examination. (Y)

Attributes: HM, TIDE

4 Credits

SPAN 20300 Spanish Intermediate Conversation (LA)

An optional conversation course for students enrolled in SPAN 20100-20200 who want to maximize their conversational skills. May be repeated for a total of two credits. Does not count towards major or minor. Corequisites: SPAN 20100 or SPAN 20200. (F-S,Y)

Attributes: HU

1 Credit

SPAN 26100 Holocaust Literature and Film: From Auschwitz to the Americas (LA)

Taught in English, this course examines holocaust representation in literature and film, and the Jewish diaspora in Latin America. Class preparation and discussion will explore the power of narration to express the human capacity for resistance and resilience. This course does not satisfy language proficiency requirements in majors. Prerequisites: One course in the Liberal Arts. (IRR)

Attributes: CTE, HM, JWST, LAEL, TIDE, WGS

4 Credits

SPAN 26600 Spanish/Latin American Literature in Translation (LA)

A study of one or more principal works of major Spanish and/or Latin American writers. Taught in English. This course does not count towards language proficiency requirements in majors. (IRR)

Attributes: CTE, HU, WGS

4 Credits

SPAN 27900 Introduction to Latino/a/x Literature (LA)

Examines canonical literary texts produced by and about Latino groups in the United States. Class discussion and preparation will explore the historically changing ways in which, from the 19th century onward, various Latino communities have imagined their identities both within and across the national borders of the United States and Latin America. Taught in English. This course does not count towards language proficiency requirements in majors. Prerequisites: One course in the liberal arts. (IRR)

Attributes: LAEL, LXME

4 Credits

SPAN 29900 Independent Study: Spanish (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: Permission of instructor and chairperson. (IRR)

Attributes: UND
1-3 Credits

SPAN 30100 Teaching Spanish Language to Children through Arts and Recreation (SALTAR) (NLA)

Service learning opportunity to teach Spanish language through cultural content to children in local elementary schools. May be repeated two times for a total of three credits. Prerequisites: Intermediate proficiency in Spanish assessed either via placement exam or successful completion of Spanish 20200. (Y)

Attributes: SL
1 Credit

SPAN 30200 Teatro: Performance and Production (LA)

Production of select dramatic work(s) from Spanish, Latin, American, and US Latino traditions performed in Spanish. This course may be repeated for a total of three credits. Prerequisites: One SPAN course at the 30000-level (excluding SPAN 38000), or by placement exam. (IRR)

Attributes: LAEL
1 Credit

SPAN 31800 Imagining Spain: Representations of Spain in Film, TV, and Graphic Media (LA)

Explores images of Spain as portrayed in film and other media including television and graphic novels. Focuses on culture and society and how cinematic and other media function to narrate elements of history as well as political and social values. Students gain practice in skill areas of reading, writing, speaking, and comprehension of Spanish language. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)

Attributes: SCE
4 Credits

SPAN 31900 Spanish Civilization and Culture (LA)

Cultural exploration of Spain from its prehistory to the present. Topics include people, geography, politics, economy, literature, sciences, music, visual arts, gastronomy, and patterns of daily life. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)

Attributes: DV, INBG, RPRE
4 Credits

SPAN 32100 Advanced Spanish Grammar and Composition (LA)

Development of complex grammatical, semantic, and syntactical skills through writing and correction, and through examining different examples of written and spoken Spanish (both literary and nonliterary). Students will develop a sense of the writing process as an interaction between writer and reader, purpose and message. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (F,S,Y)

Attributes: CCCS, HU
4 Credits

SPAN 32300 Conversation: Contemporary Issues (LA)

Focuses on contemporary issues to develop students' speaking skills. Readings-based discussions, both literary and nonliterary, include ethical and moral issues, politics, youth culture, and technology and society. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (F,S,Y)

Attributes: 3A, CCCS, G, HU, LAEL
4 Credits

SPAN 32400 Conversation: The Spanish-Speaking World (LA)

Focuses on issues specific to the Spanish-speaking world to improve students' speaking skills. Readings-based topics, both literary and nonliterary, include Hispanic presence in the United States, bilingual education, and language and cultural influences. Prerequisites: SPAN 20200. (F,S,Y)

Attributes: 3A, CCCS, G, HU, LAEL
3 Credits

SPAN 32500 Experiencing Hispanic Literature (LA)

The course provides students with essential vocabulary for critical literary analysis, and introduces them to four literary genres (poetry, drama, fiction, and essay) through representative readings from both Spanish and Latin American literatures. The course teaches students to read literature and write about it from an analytical perspective.

Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (F,S,Y)

Attributes: LAEL, LSCH, LXME, RPRE, WGSJ
4 Credits

SPAN 33200 Advanced Business/Professional Spanish (LA)

Practice in speaking, reading, and writing Spanish, with an emphasis placed on business-oriented concepts and materials. Prerequisites: SPAN 32100 or SPAN 32300 or SPAN 32400. (S,O)

Attributes: CCCS, HU
3 Credits

SPAN 33300 Latin American Civilization and Culture (LA)

An exploration of the people and cultures of the Caribbean, Central America, and South America. Traces the development of these regions from indigenous pre-conquest cultures to contemporary issues of globalization, while addressing ethnicity, gender, religion, class, and the arts. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (F,Y)

Attributes: G, H, HU, INBG, LXME, RPRE
4 Credits

SPAN 33400 Teatro: From the Page to the Stage (LA)

Survey of select dramatic works from Spanish, Latin American, and US Latino traditions. Students read, analyze, adapt and perform select dramatic works. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)

Attributes: DV, LAEL, LXME, RPRE
4 Credits

SPAN 33500 Spanish Civilization and Culture (LA)

Cultural exploration of Spain from its prehistory to the present. Topics include people, geography, politics, economy, literature, sciences, music, visual arts, gastronomy, and patterns of daily life. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)

Attributes: DV, G, H, HU, INBG, RPRE
4 Credits

SPAN 33700 Introduction to Spanish Literature (LA)

A historical and thematic overview of Spanish literature. Special attention will be given to literary movements and recurrent themes. Required for Spanish majors. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)

Attributes: 3A, DV, G, HU, RPRE
4 Credits

SPAN 33800 Introduction to Latin American Literature (LA)

An overview of Latin American literature from the colonial period to the present. Special attention will be given to literary movements and recurrent themes. Prerequisites: One SPAN course at the 300-level (excluding SPAN 39200), or by placement examination. (F,S,Y)
Attributes: 3A, DV, G, HU, LXME, RPPE
4 Credits

SPAN 34000 Latin Lovers: Sexuality and Gender in Literature, Film, and Pop Culture (LA)

Taught entirely in Spanish, this course examines the burgeoning new theoretical interventions around the concepts of sexuality and gender identity in Latin American cultural production, paying particular attention to the definition of "queer." This is an interdisciplinary course that complements coursework from a variety of majors and minors. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)
Attributes: LAEL, WGS
4 Credits

SPAN 35500 Spanish Translation in Practice (LA)

Further study of the Spanish language through the art of translation. Students develop skills in English/Spanish and Spanish/English translation using a variety of texts (letters, literary selections, journalism, advertisements, and "how to" material). A close reading of the material translated helps the student focus on the nuances of each language and cultural differences. Prerequisites: SPAN 20000 or above taught in Spanish with a grade of C- or better, or by placement examination. (IRR)
Attributes: LAEL, WI
4 Credits

SPAN 37600 Latin American Fiction (LA)

This course traces the development, movement, and themes in Latin American fiction. The literary selections will be analyzed from a historical and cultural context. Students will read short stories and novels written by representative authors. Readings may include works by Azuela, Borges, Fuentes, Cortázar, García Márquez, Allende Ferré, Pacheco, and Piñero. Prerequisites: One SPAN course at the 300-level (excluding SPAN 38800 and SPAN 39200) or by placement examination. (IRR)
Attributes: LAGC
4 Credits

SPAN 37900 Selected Topics in Spanish and/or Latin American Literature and Culture (LA)

Explores themes pertinent to Spanish and/or Latin American literature and culture. May be repeated for a total of eight credits when topics vary. Prerequisites: One Spanish course at the 300-level, excluding SPAN 39200. (IRR)
Attributes: LAEL, LXME, RPPE
4 Credits

SPAN 39200 Latino/a/x Literatures: Narratives of Displacement and Belonging (LA)

This course delves deeply into questions of travel, migration, exile, displacement and belonging in Latino/a/x literature and features expressions of the intersectionalities of Latino/a/x identities in the United States. The texts chosen for this class will grapple with these overarching themes, while traversing the interstices of Latino/a/x identities that confront such issues as racism, colorism, sexuality, and gender. Taught in English. This course does not count towards language proficiency requirements in majors. Prerequisites: Three courses in the liberal arts. (IRR)
Attributes: CTE, DV, LAEL, LSCH, LXME, RPPE, WGS3, WGS1
4 Credits

SPAN 39900-39901 Independent Study: Spanish (LA)

Individual research, study, and/or writing on particular topics, supervised by a member of the department. Offered on demand only. Prerequisites: SPAN 32500 or SPAN 32300, or equivalent; permission of instructor and chairperson. (IRR)
Attributes: UND
1-3 Credits

SPAN 43700 Contemporary Spanish Culture through Film (LA)

Film is used as a tool through which students will learn about the cultural movements and historic events that have shaped, and continue to shape, contemporary Spanish national identity. Of particular interest will be the Surrealist movement, depictions of the Spanish Civil War, the years of Franco's dictatorship, the Movida, and (re)current polemic issues. Prerequisites: SPAN 33500 and SPAN 33700. (IRR)
Attributes: HU, INBG, SCE
3 Credits

SPAN 45400 Cervantes (LA)

A study of "Don Quijote" and a selected group of "novelas ejemplares" (short stories) and plays, with particular reference to Cervantes's unique contribution to the modern novel and world literature. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: HU
3 Credits

SPAN 45500 Golden Age Drama (LA)

The drama of Spain's golden age - the Renaissance and the baroque period - is one of the greatest achievements of world literature. We examine Spain's national drama, its precepts, and its literary tradition created by Lope de Vega and continued for more than 100 years, from 1580 to 1700, by other playwrights such as Calderón, Tirso de Molina, and Alarcón. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: HU
3 Credits

SPAN 45600 Golden Age Poetry (LA)

The poetry of Spain's golden age - the Renaissance and baroque periods - is one of the greatest achievements of world literature. We examine the Italianate poetry of Garcilaso de la Vega, and his followers, and the development of lyrical poetry by other poets of the periods such as Fray Luis de León, Lope de Vega, Francisco de Quevedo, and San Juan de la Cruz. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: HU
3 Credits

SPAN 45700 Golden Age Prose (LA)

The prose of Spain's golden age - the Renaissance and the baroque period - is one of the greatest achievements of world literature. We examine the origin and development of the picaresque novel, the pastoral novel, and short stories. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: HU
3 Credits

SPAN 46100 Medieval Spanish Literature (LA)

Study of representative texts of medieval Spain such as Poema de Mio Cid, Libro de Buen Amor, and La Celestina. Examines the coexistence of Christians, Jews, and Muslims, and their contributions to the development of Western civilization. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: HU
3 Credits

SPAN 46300 Nineteenth-Century Spanish Literature (LA)

Study of representative works of naturalism, realism, and romanticism. Typical authors include Pardo Bazán, Galdos, and Rosalía de Castro. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: 3A, G, HU
3 Credits

SPAN 46400 Contemporary Spanish Literature (LA)

A study of contemporary Spanish fiction, poetry, drama, and essays connecting literature to history, culture, politics, and art forms of the period through linguistic and textual analysis. Readings include texts from the Generación del '98 to the present. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: 3A, G, HU
3 Credits

SPAN 47100 Latin American Fiction (LA)

Traces the development of a particularly Latin American voice through the readings of representative contemporary short stories and novels. Readings may include works by Martí, Azuela, Borges, Fuentes, Cortázar, García Márquez, Allende, and Ferré. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: 3A, G, HU
3 Credits

SPAN 47200 Latin American Poetry and Drama (LA)

Familiarizes the student with the writings of major Latin American poets from the colonial period to the present and with the works of contemporary Latin American dramatists. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: 3A, G, HU
3 Credits

SPAN 47300 Modernismo (LA)

Analysis of the poetical and prose work of "modernismo" (1888-1910), Latin America's first authentic literary movement. Emphasis is given to the study of the new aesthetics and to the desire of Latin America's writers to affirm a new cultural identity. Readings include selections from Martí, Casals, Darío, Silva, Lugones, Rodó, and others. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: HU, LSPL, LXME
3 Credits

SPAN 47400 Topics in Spanish and/or Latin American Literature and Culture (LA)

Studies themes pertinent within Spanish and/or Latin American literature and culture. May be repeated for a total of nine credits when topics vary. Prerequisites: SPAN 33700 or SPAN 33800. (IRR)
Attributes: 3A, G, HU
3 Credits

SPAN 49100 Seminar (LA)

Study of selected topics in Spanish and/or Latin American literature and/or culture. Prerequisites: A minimum of two Spanish literature courses numbered SPAN 33700 or above. May be repeated for a total of six credits when topics vary. (F,S,Y)
Attributes: LAEL, WGS3
3 Credits

SPAN 49900 Honors Research (LA)

Individual research, study, and writing on particular topics, supervised by a member of the department and presented before a departmental committee. For students who meet the honors criteria as described in the undergraduate catalog. (IRR)
Attributes: UND
3 Credits

Speech Lang, Path & Audio (SLPA)

SLPA 10901 American Sign Language I (LA)

Introduction to the linguistic features and core vocabulary needed to develop basic communicative competence in ASL. Students learn basic ASL grammar and apply this knowledge when using ASL to ask and answer questions, introduce themselves, exchange personal information, talk about family and friends, talk about surroundings, provide descriptions, and discuss activities. Discussion of deaf culture is infused throughout the course. Practicing conversations and active participation in and out of class are required. (F-S,Y)
3 Credits

SLPA 11010 Phonetics (NLA)

An introduction to the study of speech sounds used in the production of American English. Emphasis is placed on (1) sound to symbol transcription using the International Phonetic Alphabet, as well as (2) development of transcription speed and accuracy. Anatomy and physiology of the speech mechanism are introduced for the purpose of describing speech sound production. (F-S,Y)
3 Credits

SLPA 12000 Information Research Strategies for Speech Language Pathology and Audiology (NLA)

Develop information literacy and evidence-based practice research skills within the context of the Speech Language Pathology and Audiology. Apply research skills that include studying and time management strategies, search strategies, critical evaluation of information, information management, documentation, communication, and use of information from a variety of sources and formats in an effective and ethical manner. (S,Y)
2 Credits

SLPA 15000 Introduction to Communication Disorders (LA)

An introduction to speech, language, and hearing disorders. A variety of disorders in both children and adults is surveyed, including articulation and language disorders, stuttering, learning disability, cleft palate, cerebral palsy, voice disorders, and hearing losses. The study of these disorders includes incidence/prevalence, characteristics, causes, cultural and linguistic variations, and the impact of the disorder on the individual and society. The course is designed for and open to all students. (F-S,Y)
Attributes: 1, SS
3 Credits

SLPA 20800 Perspectives on Deafness (LA)

Examination of disability perspectives and alternatives to disability perspectives on deafness in the US. Discussion of issues related to child development (e.g., development of speech, language, and literacy) from an educational perspective. Discussion of intervention from an audiological perspective. Discussion of controversies inside and outside the deaf community related to educational and clinical interventions. Prerequisite: SLPA 10901 with a grade of C- or better. (F,Y)
3 Credits

SLPA 20901 American Sign Language II (LA)

Students learn additional linguistic features, cultural protocols, and core vocabulary. Students practice using ASL grammar for giving directions, describing others, making requests, attributing qualities to others, and talking about family, occupations, and routines. Discussion of Deaf culture is infused throughout the course. Practicing conversations and videotaping use of ASL in and out of class are required. Prerequisites: SLPA 10901 with a grade of C- or better. (F-S,Y)

Attributes: HU

3 Credits

SLPA 21200 Anatomy and Physiology of the Speech and Hearing Mechanisms (LA)

Anatomy and physiology of the speech and hearing mechanisms; respiration, phonation, resonance, articulation, and basic neurological concepts underlying the communication process. Prerequisites: Second-semester freshman status. (F,Y)

Attributes: NS

3 Credits

SLPA 21600 Child Language and Literacy Development (LA)

Introduces the student to the study of language and literacy development in children. Topics include prelinguistic development, components of language, theoretical models of language acquisition, individual differences, relationships between oral and written language, and cultural and linguistic variations in language development. (F,Y)

Attributes: SS

3 Credits

SLPA 23500 Language and Speech Sound Disorders in Children (NLA)

Exploration of developmental speech and language disorders, including comparison of typical and disordered development. Identify, critically evaluate, and apply evidence-based practices in speech and language assessment and intervention, using clinical case studies. Prerequisites: SLPA 11010 and SLPA 21600 with a grade of C- or better. (S)

4 Credits

SLPA 24000 Basic Audiology (NLA)

Study of anatomy and physiology of the hearing mechanism, acoustics, auditory pathologies, classification of hearing disorders, and the profession of audiology. Additional topics covered include pure-tone and speech audiometry, immittance measures, and material of current interest. Prerequisites: Sophomore standing. (F,Y)

3 Credits

SLPA 24200 Aural Rehabilitation (NLA)

Study of the perceptual, psychological, and educational implications of hearing loss. The course will focus on areas significant to the (re)habilitation of individuals with hearing loss, such as identification, evaluation, remediation, and counseling. Prerequisites: SLPA 24000 with a grade of C- or better. (S,Y)

3 Credits

SLPA 30901 American Sign Language III (LA)

Emphasis is placed on development of communicative competencies in ASL conversations beyond the basic level including telling life events, describing events in time, asking for clarification, correcting, conforming, elaboration on information, agreeing and disagreeing, resolving conflicts, and giving directions. Classroom and outside activities include practicing dialogues, short stories, narratives, and short conversation. Discussion of Deaf culture is infused throughout the course. Practicing conversations and videotaping use of ASL in and out of class are required. Prerequisites: SLPA 20901 with a grade of C- or better. This course is only open to Deaf Studies minors. (F,Y)

3 Credits

SLPA 31000 Deaf Culture (LA)

Examination of deaf heritage including contributions and perspectives of leaders in the Deaf community. Examination of deafness as portrayed in literature and movies. Examination of artistic expression within the Deaf community including contemporary visual artists and the National Theatre for the Deaf. A guided project is required, and travel to a theatrical production may be required. (S,Y)

3 Credits

SLPA 32500 Voice and Swallowing Disorders (NLA)

Examine and understand the nature, etiology, and physiology of normal and abnormal voice and swallowing patterns. Learn about the variety of clinical procedures involved in voice and swallowing evaluations. Gain knowledge in the available instrumental procedures used in the study of voice and swallowing disorders. Explore a variety of intervention strategies for voice and swallowing disorders. Prerequisite: SLPA 21200. (S,Y)

3 Credits

SLPA 33000 Advanced Clinical Audiology (NLA)

An in-depth exploration of clinical audiology with hands on experiential learning. Topics include but are not limited to diagnostic procedures, hearing technology, special populations, and patient-centered practice. Students engage in active learning through integrating lecture materials, hands-on activities, lab work, and group projects. Prerequisites: SLPA 24000 with a grade of B or higher; SLPA 24200 with a grade of B or higher. (F,Y)

3 Credits

SLPA 35900 Communication Disorders in the Aging Population (LA)

Introduces the communication disorders common to older persons. Speech and language disorders, hearing disorders, and the role of allied health professionals are examined. Prerequisites: Any 10000-level GERO course or BIOL 20500 or SLPA 21200, at least one of which must be completed with a grade of C- or better. (S,Y)

Attributes: SS

3 Credits

SLPA 36000 Brain Science (LA)

Addresses the basic structure and function of the brain with a special focus on the neuroscience of communication. Relationships between different lesion sites in the brain and the communication breakdowns that they produce will be introduced. Prerequisites: SLPA 21200 with a grade of C- or better. (F,Y)

3 Credits

SLPA 36500 Basic Speech Science (LA)

Introduces the undergraduate student in speech-language pathology to topics in speech science. Areas covered include an overview of the acoustics of sound, the glottal spectrum, acoustics of consonant and vowel production and perception, suprasegmentals, and instrumentation. Prerequisites: SLPA 21200 with a grade of C- or better. (S,Y)

Attributes: NS

3 Credits

SLPA 37000 Clinical Observation (NLA)

Provides an intensive clinical observation experience in conjunction with classroom instruction focusing on designing individualized intervention programs, writing behavioral objectives, and general case management strategies. This course is only open to students in the Speech-Language Pathology major. Prerequisites: SLPA 23500 with a grade of C- or better. (F,S,Y)

3 Credits

SLPA 39900-39904 Selected Topics in Speech-Language Pathology and Audiology

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

1-3 Credits

SLPA 42900 Tutorial in Speech-Language Pathology (NLA)

Intensive study in speech-language pathology for advanced students. The student presents a written proposal to an instructor who is chosen by the student to direct the tutorial. After the instructor agrees to direct the tutorial, copies of the proposal are forwarded to the student's adviser and chairperson for final approval. This procedure must be completed prior to registration. Prerequisites: Junior standing; permission of adviser and department chair. (F-S,Y)

1-3 Credits

SLPA 44900 Tutorial in Audiology (NLA)

Intensive study in audiology for advanced students. The student presents a written proposal to an instructor who is chosen by the student to direct the tutorial. After the instructor agrees to direct the tutorial, copies of the proposal are forwarded to the student's adviser and chairperson for final approval. This procedure must be completed prior to registration. Prerequisites: Junior standing; permission of adviser and department chair. (F-S,Y)

1-3 Credits

SLPA 45900 Communication Disorders in Culturally Diverse Populations (NLA)

Cultural pluralism as it relates to communication disorders in the United States; its impact on the professions of speech-language pathology and audiology; and sociolinguistic issues of dialect, communication style, and attitudes toward them. Discussion includes cultural factors that may influence the acquisition of speech and language; incidence and variation of specific speech and language disorders among diverse populations; assessment and treatment procedures that accommodate cultural differences; goal selection strategies; selection of unlisted materials; educational implications; and specific intervention cases.

Prerequisites: Senior standing or permission of instructor; only open to Speech-Language Pathology majors. (S,Y)

3 Credits

SLPA 47200 Clinical Methods (NLA)

This capstone course provides in-depth discussion of the clinical process with emphasis on assessment and intervention strategies, therapy approaches, and principles. This course is open only to Speech-Language Pathology majors. Prerequisites: SLPA 37000 with a grade of C- or better; senior standing. Corequisites: SLPA 47300. (F,S,Y)

Attributes: CP

3 Credits

SLPA 47300 Clinical Practicum (NLA)

Applied, supervised clinical practicum experience in speech-language pathology that provides the opportunity to interact with clients. Involves developing and implementing a program of therapy, preparing lesson plans, and writing progress reports. Prerequisites: SLPA 37000 with a grade of C- or better. Corequisites: SLPA 47200. This course is only open to Speech-Language Pathology majors. (F-S, Y)

1 Credit

SLPA 49900-49902 Independent Study in Speech-Language Pathology/Audiology (NLA)

Individual investigations (in-depth study, research, reading) related to Speech-Language Pathology or Audiology that are not fully covered by regular coursework. Arranged individually between the student and faculty sponsor according to the guidelines set forth by the school of HSHP. Prerequisites: Approval of the faculty sponsor, advisor, department chair, and dean. (F-S,IRR)

1-3 Credits

Sport Management (SMGT)

SMGT 11000 Introduction to Sport Management (NLA)

Overview of the sport industry, including managerial, legal, social and economic forces that shape organizational decision-making. Theories, trends and best practices in the management of sport organizations are analyzed, with emphasis placed on how the managerial process is related to sport organizations and their products. (F-S,Y)

3 Credits

SMGT 21000 International Sport (LA)

This course provides an analysis of sport in an international context and uses sport as a way to examine the impact of colonization and the influence of western culture on the global community. The economics, history, and culture of each region are explored to understand the different ways that sport impacts individuals and societies around the globe. Students will be introduced to problems/issues faced by international sport managers by analyzing and discussing international sport case studies. Prerequisites: Sophomore standing. (IRR,U,W)

Attributes: DV, LAGC, SO, TIDE

3 Credits

SMGT 21500 College Sport (LA)

An exploration for the historical development, various challenges, and current debates surrounding the often-conflicted relationship between athletic departments and the university community. Special emphasis is given to social and culture impact of college sport on athletes, students, fans, families, communities and society. Prerequisites: Sophomore standing. (IRR)

3 Credits

SMGT 22000 Current Issues in Professional Sport (LA)

Exploration of the various elements of the professional sports industry. Students will examine aspects that span the entire industry, as well as study the development and current challenges of the most significant and relevant leagues. Special emphasis is given to social and culture impact of professional sport on athletes, fans, families, communities and society. Prerequisites: Sophomore Standing. (IRR)

Attributes: SO, TPJ, TWOS

3 Credits

SMGT 23000 The Business of Sport Agency (NLA)

This course explores the business of sport agency/agent. Topics covered include background, negotiation, ethics, NCAA eligibility rules, FIBA agent procedures, and legal principles as they relate to sport agency/agent. Students will get a first-hand experience dealing with everyday negotiations that sport agents deal with throughout the realm of sport through mock negotiations as well as in-depth case studies. Students will be tasked of presenting projects that focus on representing current players in professional sports, which will include salary negotiations, arbitration, endorsements, and contract clauses. (IRR)

3 Credits

SMGT 26500 Policy and Governance in Sport Organization (NLA)

Analysis of governance structures and operational activities of professional team-sport leagues, intercollegiate athletics, the Olympic movement, and international sports association. An examination of policy development in various areas of the sport enterprise. Case studies of current sport issues and problems are utilized. Prerequisites: SMGT 11000. (F-S, Y)

3 Credits

SMGT 29200-29202 Selected Topics in Sport Management (NLA)

A series of short courses in specialized areas of sport management. Visiting lecturers and faculty of the school participate in areas of their expertise. Analyses of actual case studies focusing on sport management problems and issues confronted by sport managers helps students in further developing their critical thinking and problem-solving skills. Students conduct independent research in which they analyze a particular management problem/issue (case study), and develop and write strategies to effectively address the management problem/issue. May be repeated for different topics. Prerequisites: SMGT 11000 (IRR)

3 Credits

SMGT 30300 Sport Law I (NLA)

In-depth analysis of the legal issues facing the management of the sports industry, including how law is applied to amateur and professional sports organizations. Topics covered include intentional torts and negligence; gender equity and other forms of discrimination, risk management, and selected current legal issues impacting sport organizations. Emphasis is on management perspectives. Prerequisites: SMGT 11000; GBUS 20300; junior standing. (F-S)

3 Credits

SMGT 31000 Labor Relations in Sport (NLA)

Examination of the development, history, and legal aspects of the labor movement in sport. Discussion of collective bargaining process in sport and the impact that court cases, antitrust law, and arbitration decisions have had on professional sports. Analysis of resolutions to specific labor problems through simulated negotiations. Prerequisites: SMGT 11000 or SMGT 20700; junior standing. (F or S,Y)

3 Credits

SMGT 32600 Sport Marketing and Sales (LA)

Examination of the concepts and principles of promotion as applied to the unique aspects of sport. Analysis of the relationship between sport promotions and public relations strategies that are employed by the sport manager. Students develop promotional strategies and activities that can be applied in real-life sport organizations to enhance the relations efforts of the organization. Prerequisites: SMGT 11000; MKTG 31200; WRTG 10600, ICSM 10800, ICSM 11800, or equivalent. (F,S)

Attributes: WI

3 Credits

SMGT 33500 Sport Event and Facility Management (NLA)

Develops a student's understanding of the competencies necessary to plan, manage and operate sport, recreation, fitness, and public assembly facilities. Specific topics covered: scheduling; security and supervision; safety and risk management; purchasing and maintenance; marketing and sales; funding of new facilities; sustainability; economic feasibility and revenue sources related to sport facilities. In addition, the conceptual and technical aspects related to the development, operation, and marketing of sport-related events will be addressed in depth to include planning and implementing actual events. Prerequisites: SMGT 11000. (F,S)

3 Credits

SMGT 36500 Sport Economics (LA)

Application of economic theory to the markets of professional and amateur sports. This course applies economic principles to analyze a wide range of issues within the realm of professional sports and intercollegiate athletics. Included are the analysis of labor markets and labor relations, public finance of sports facilities, and the organization of sports institutions. Prerequisites: SMGT 11000; ECON 12100; ECON 12200; junior standing. (F,Y)

3 Credits

SMGT 38500 Advanced Sport Marketing (NLA)

This class provides an intensive analysis of consumer habits and trends, linked with strategies for sport organizations to deliver products and experiences in the marketplace. Students build on previous knowledge of marketing to apply sales techniques to maximize revenue generation.

Prerequisites: SMGT 11000; SMGT 32600; junior standing. (IRR)

3 Credits

SMGT 39000 Digital Marketing in Sport (NLA)

This course is designed to develop a student's understanding of how to manage a cross-section of digital channels to market in the sport industry. This course will include the following topics: the utilization of the websites, eCommerce, social, and mobile platforms in sport marketing; the importance of data analysis in digital marketing; the development of a sport organization's multi-dimensional digital presence; interactivity of the branded experience; online customer relations management; and evaluating various digital marketing deliverables. Prerequisites: SMGT 11000; MKTG 31200; SMGT 32600 and junior standing. (IRR)

3 Credits

SMGT 39500 Sponsorship and Promotions in Sport (NLA)

This course focuses on the process of developing, activating, and managing sport sponsorships and related sales promotions. Students will investigate, analyze and apply various strategies to attract and design sponsorship and promotional plans for sport organizations. Evaluation of sponsorship fulfillment, use of e-commerce promotional tools, risk management in promotions delivery, and revenue generation through the sale of sport merchandise, licensing and broadcasting rights will be addressed.

3 Credits

SMGT 39700-39701 Selected Topics in Sport Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Prerequisites: Junior standing, and as appropriate to topics. (IRR)

1-3 Credits

SMGT 41000 Contemporary Issues in Sport Management (LA)

This is the capstone course for the sport management concentration, which is an analysis of current issues across the sport industry. This course provides an in-depth look at how sports, sport organizations, and leaders in the sport industry serve power centers in society, and contribute/challenge race, class, age, sexuality, disability, and gender logic in US culture. This course integrates aspects of sport economics, marketing, law, sociology, leadership, and ethics to provide context for future leaders of sport organizations. Special emphasis is given to the implications of ethical managerial decision-making. Prerequisites: SMGT 26500; SMGT 30300. (F,S,Y)

Attributes: CP, DV

3 Credits

SMGT 41500 Strategic Management in Sport (NLA)

Integrates the various disciplines studied in sports management to develop strategic management plans. Examines strategic positions taken by leaders of actual sport organizations. Provides students opportunities to develop managerial decision-making and leadership skills. Prerequisites: SMGT 11000; SMGT 31500; SMGT 32600; senior standing; sport management concentration. (F,S,Y)

Attributes: CP

3 Credits

SMGT 49800 Internship with Academic Enhancement: Sport Management (NLA)

Supervised work experience in amateur or professional sport agencies and community sport organizations. Student assumes a leadership role in various job-related activities and performs administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Prerequisites: Junior standing; completion of appropriate principles course; minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application; and permission of instructor. Pass/Fail only. (F,S,Sum, W)

1-6 Credits

Sports Media (SPME)

SPME 11100 Introduction to Sports Media (NLA)

An introductory course that investigates global sport media landscape, including areas of print, broadcast, Internet and evolving social media platforms. Functions of media delivery, skills, and attributes required of industry professionals are discussed. Students become acquainted with career opportunities in the sport media field. (F,S,Y)

3 Credits

SPME 20700 History of Sport (LA)

Focuses on the role of sport in past and contemporary societies. Consideration of sport as a microcosm of society, a mirror of American life. Political, economic, military, and societal issues of sports participation are carefully examined – how sport has shaped culture and has, in turn, been influenced by it. (F,S,Y)

3 Credits

SPME 22500 Sports Media Relations (NLA)

Deals with the workings and process behind executing the proper techniques of media relations in all facets of the sport industry. The media relations offices of college/university athletic departments or professional franchises act as liaisons between the school/team and the media. To better understand how both sides work to form this symbiotic relationship, sport organizations will be analyzed in terms of their organization and execution of promotion and marketing strategies. Prerequisites: Sophomore standing; and Sports Media majors or other Park School majors with instructor permission. (F,Y)

3 Credits

SPME 24200 Sports Video Production (NLA)

Students apply their introductory knowledge of preproduction planning, camera work, scriptwriting, editing, and interview techniques to create video packages dealing with local sport events. Students will complete their packages in a collaborative manner through all phases of fieldwork production. The emphasis is on improving the proper fundamentals and techniques needed for shooting sporting events while creating an interesting audio and visual perspective. Prerequisites: TVR 11500; SPME 11100; sophomore standing. (Y)

3 Credits

SPME 29200-29300 Minicourse in Sports Media (NLA)

A series of short courses in specialized areas of sports media. Visiting lecturers and faculty of the school participate in areas of their expertise.

Analyses of actual case studies focusing on sports media problems and issues confronted by sport managers helps students in further developing their critical thinking and problem-solving skills. Students conduct independent research in which they analyze a particular management problem/issue (case study), and develop and write strategies to effectively address the management problem/issue. May be repeated. Additional fee for course materials (see course schedule). Prerequisites: At least one SPME course; refer to "Undergraduate Course Offerings" each semester. Pass/fail only. (IRR)

1-3 Credits

SPME 29500 Social Aspects of Sport (LA)

An investigation of the social significance of sport and the utilization of the sociological perspective for understanding the nature of sport. (F,S,Y)

3 Credits

SPME 29700 Sport: Philosophical Perspectives (LA)

An introduction to several philosophical perspectives on the meaning of sport as a human activity. An examination of selected philosophical issues or topics as they occur in sport. Prerequisites: SPST 20700 or SPST 29500. (F,S,Y)

3 Credits

SPME 29900 The Evolution of Sport Media (LA)

An analysis of the changing landscape of the sport media from the Industrial Revolution of the mid-19th century to its current configuration. Students examine relevant periods and events throughout American history and investigate the role the sport media played on the political, social, and technological climate of that time. The course will also try to debunk the myth that what goes on in today's sport media is dramatically different from bygone eras. (S,Y)

Attributes: MAP

3 Credits

SPME 32400 Youth Sport in America (LA)

Investigation of the social and cultural significance of the ways contemporary American society employs sport to foster moral development in children and adolescents. Focus is on historical antecedents of organized sport for children both in and outside the school setting. Significant attention is devoted to Little League baseball and to high school football and basketball. Prerequisites: SPME 20700, SPME 29500. (IRR)

3 Credits

SPME 33900 Sports Publications (NLA)

Examines the operations and procedures behind the various arms of the print media. Students will learn about newspapers, magazines, and web publications by first analyzing their historical evolution and basic business models. The primary goal is to understand how these media outlets define their target audience, satisfy commercial obligations, and then create relevant and appealing material. Students will analyze the style and tone of the various media outlets by reading different publications and critiquing the presentation along with the substance of the words on the page. After the analytical work is completed, the second half of the semester will be based on students writing copy for newspapers, magazines, and web publications. The final goal is to produce a publication created solely by all the students in the class.

Prerequisites: JOUR 11100; SPME 11100; junior standing. (S,Y)

3 Credits

SPME 39000 Gaming in Sports Media (LA)

The intersection of gaming, gambling and fantasy sports in sports media is explored. Gaming's embrace of disruptive technology, analytics, legal decisions and changing mores mean once frowned-upon activities are now mainstream leisure and economic pursuits. (F,S)
3 Credits

SPME 39700 The Olympic Games (LA)

Investigation of the historical, cultural, and sociopolitical significance of the Olympic Games, both ancient and modern. These perspectives further a deeper understanding of the nature of sport. Prerequisites: SPME 20700, SPME 29500, or SPME 29700. (IRR)
3 Credits

SPME 39800 Narratives in Sports Documentaries (LA)

Investigates sporting narratives through the examination of contemporary documentaries. Emphasis on sporting influence on individualistic and societal levels through story, setting and various themes, including forgiveness, regret, pursuit of happiness and structured, calculated rebellion. Prerequisites: Three courses in Sport Media or Sport Studies; Junior or senior standing. (F,S,Y)
Attributes: DV
3 Credits

SPME 39900-39902 Selected Topics: Sports Media (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)
1-3 Credits

SPME 39903 Special Topics: Athletes in the Media: Critical Discourse Surrounding Sports Figures (LA)

The class will discuss the intersection of sport and media during seminal moments in American history and will offer critical perspectives of how media shaped the narrative surrounding primary actors. It is as much an examination of the people as it is the situations they were set in. Prerequisites: JOUR 11100. (Y)
Attributes: CCCS
3 Credits

SPME 44000 Senior Workshop in Sports Media (NLA)

Integrates the various disciplines studies in sports media to develop communications-related plans. Allows students opportunities to create artifacts pertaining to video production, strategic communications, sports journalism, and/or emerging sports media. Prerequisites: Sports Media majors; SPME 11100; SPME 22500; SPME 33900 and senior standing (F-S)
3 Credits

SPME 45000-45100 Independent Study in Sports Media (LA)

Individual study program for the investigation of special issues or topics in the field of sport media that have such breadth of cultural material or psychological material, such rigor and depth of theoretical structure, or such play of broad intellectual and aesthetic themes as to be classified liberal arts. Arranged individually between student and faculty sponsor according to guidelines available from the department. Prerequisites: Sports Media major; permission of the program director. (F-S,Y)
1-3 Credits

SPME 46000 Internship in Sports Media (NLA)

Supervised work experience in amateur or professional sport agencies and community sport organizations. Student assumes a leadership role in various job-related activities and performs administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Prerequisites: Sports Media major; permission of program director; completion of the Park School internship procedures. This course may be repeated for a total of twelve credits. (F-S,Y)
1-12 Credits

Strategic Communication (STCM)

STCM 10300 Introduction to Strategic Communication (LA)

Introduction to the fundamental theories, concepts, and applications of strategic communication to meet a variety of organizational goals. Provides an overview of practices in communication management, learning, and design, and integrated marketing communications. Describes how these elements can be combined to create seamless programs that affect the various publics of businesses and not-for-profit organizations, and how such programs increase organizational value and effectiveness. Students investigate issues that challenge contemporary organizations by analyzing case studies, conducting research, and designing possible solutions from multiple perspectives. (F,S)
3 Credits

STCM 10800 Communication in Organizations (LA)

An introductory examination of human communication in organizations, with an opportunity to develop the skills necessary to approach organizational communication situations. Includes the use of mediated communication for skill development and evaluation. (F-S)
Attributes: SS
3 Credits

STCM 11100 Presentation & Graphic Design (NLA)

Introduction to the planning, design, production, and delivery of presentations, posters, graphics, and websites. Emphasis on design and production, critical application of graphic design principles to instructional, informational, and motivational messages. Projects focus on creative use of graphic design practices for strategic communication. Students gain practical experience in graphic design, layout, composition, image manipulation, website design, and presenting. (F-S)
Attributes: CCCS
3 Credits

STCM 12300 Systemic Design (LA)

An introduction to the perspectives and approaches of systems science and design, particularly emphasizing the usefulness of their combination in planned change in organizations. Sample topics include: thinking across and beyond disciplines; systems types and views; complexity; rational and creative (out-of-control) processes; and the consequences of innovation. Most assignments and projects are set in the context of organizational communication and learning, but their relevance and value extend well beyond. (F,S)
Attributes: CA, SO, TIII, TWOS
3 Credits

STCM 13300 Live Events: Spectacles, Festivals, Celebrations, and Society (NLA)

Introduces students to the field of live events. Through case studies, guest presentations, and class projects, students will explore the evolution of events over time and examine the intersectionality of events with society, identity, community, economy, brand, pop culture and more. Students will research and analyze the strategies and outcomes of specific events, providing them with a foundation for understanding how to conceptualize events that are ethical and achieve the desired outcomes. (Y)

3 Credits

STCM 20200 Career Pursuit (NLA)

The course focuses on the development of professional competencies and professional identity, specifically tailored for students in strategic communication fields. Focus on methods of reflective practice and transferring classroom learning into professional practice. An overview of projected developments and trends, especially increasing integration, in various fields of strategic communication is provided. Readings and activities represent various communication occupations, industries, and professional organizations. Enrollment limited to communication management and design majors and minors. This is a block course.

Prerequisite: STCM 10300. (F-S)

1 Credit

STCM 20400 Virtual Teams (NLA)

An exploration of the communication and collaboration challenges faced by hybrid and virtual work teams. A focus on teams as emergent sociotechnical systems is provided. Students develop an understanding of team attributes, dynamics, and processes as well as a practical set of basic facilitation and assessment skills to enhance team effectiveness across remote workspaces. Prerequisites: STCM 10300, STCM 10800, CMST 11500, or permission of the instructor; Sophomore standing. (IRR)

3 Credits

STCM 20600 Web Design (NLA)

An intermediate level course in designing web sites for organizations. Emphasis is placed on web design (languages and tools), site content, navigation, and aesthetics. The course combines lectures, discussions, classroom exercises, and projects. Prerequisites: STCM 11100. (F-S)

Attributes: CCCS

3 Credits

STCM 21000 Instructional Design (NLA)

An introduction to theories, processes, and practices associated with workplace learning and performance. Major topics include learning theory, designing training, organizational learning, employee development, and performance improvement. Prerequisites:

STCM 10300. (F)

Attributes: ESE

3 Credits

STCM 21100 Corporate Communication: Strategy and Design (NLA)

This course is intended to give students a strong foundation in the strategy and design of corporate communication programs for internal and external communication. Students will use theories, principles, and practices of corporate communication to assess contemporary strategies and communication efforts and will gain experience in strategic design for both internal communication (e.g., employee communication, change communication, knowledge management) and external communication (e.g., communication with investors and the community, interorganizational communication, crisis communication, customer and government relations). Prerequisites: STCM 10300. (F,S)

3 Credits

STCM 21200 Experience Design (NLA)

Experience design is the practice of designing interactive processes, media services, exhibitions and events for both entertainment and instruction. The focus is placed on design for an audience rather than an individual user, with an emphasis on finding solutions for client needs. It draws from many other disciplines including psychology, theatrical production, communication, and marketing. The course will provide students with a broad overview of the practice and principles that drives the creation of experience in various forms. Student projects will be delivered via professional presentations, but require design and development of elements using 3D printing and virtual reality.

Prerequisites: STCM 11100. (S)

3 Credits

STCM 22000 Interactive Media (NLA)

Provides hands-on experience in designing and creating interactive multimedia projects. An examination of the theoretical bases and applications of interactive media will inform projects involving interactive data visualization, augmented reality design, and design for mobile technologies. Student projects focus on instructional, promotional, and informational applications of these web-based technologies.

Prerequisites: COMP 10500 or STCM 11100. (F,S)

Attributes: CCCS

3 Credits

STCM 23000 Meeting and Event Management (NLA)

Provides theoretical grounding and practical skills in meeting and event management. Students learn to design, manage, lead, and critique events that support strategic organizational goals, including meetings and trainings, conferences, online events, and special events. Student groups practice facilitation, decision-making, and event-planning skills through class exercises, tours and guest speaker presentations. Prerequisites:

STCM 10300 or STCM 10800 or STCM 13300. (F,S)

3 Credits

STCM 23200 Public Relations (LA)

Defines public relations functions and processes. Examines public relations history, ethics, theories, tactics, specializations, and career opportunities. Prerequisites: Sophomore standing. (F-S)

Attributes: UND

3 Credits

STCM 23400 Promotional and Instructional Video (NLA)

Introduction to the theory and practice of video design and production in corporate and other organizational settings. Emphasis is placed on the nature of corporate, industrial, instructional, and not-for-profit video; program formats; and beginning field production and postproduction using digital video tools. Prerequisites: STCM 10300 or TVR 12400. (F)

Attributes: CCCS

3 Credits

STCM 24100 Advertising (LA)

A survey of the history, organization, operation, and regulation of the advertising industry. Emphasis is placed on the economics of advertising, including rate structures, media analysis, and demographics, and on the creation and evaluation of advertising. Prerequisites: Sophomore standing. (F,S)

3 Credits

STCM 25100 Organizational Culture and Conflict (LA)

Examination of the role communication practice plays as both the foundation of organizational culture and the means by which organizational conflict is expressed and negotiated. Focus is on the role of communication in framing and sustaining organizational culture, as well as how modes of communicating and mediating conflict are manifestations of an organization's culture. Review of the value-based, symbolic, and ritualistic foundations of conflict as it occurs between members of organizations, as well as between organizations and the public. Includes the use of appropriate case studies to amplify communication issues. Prerequisites: STCM 10800 or sophomore standing. (S)

Attributes: SS

3 Credits

STCM 28800 Research and Statistics for Strategic Communication (LA)

Basic research methods (including qualitative, quantitative and mixed methods approaches) examined in diverse organizational, corporate, and marketing communications settings. Emphasis on theoretical bases, procedures, and ethical considerations. Skills developed in application of techniques and in interpretation and criticism of studies of external and internal communications serving organizational, corporate, and marketing functions. Focus on methods used to identify, describe, and evaluate stakeholders, determine message effectiveness, establish communication objectives, plan communication strategies and tactics, and evaluate their impact on stakeholders and organizational goals.

Prerequisites: STCM 10300. (FS)

Attributes: CCRM, QL

3 Credits

STCM 29200-29202 Minicourses in Communications (NLA)

A series of short courses in specialized areas of communications that do not meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. These courses do not count toward required strategic communication electives. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR) 1 Credit

STCM 29203-29205 Minicourse in Communications (NLA)

A series of short courses in specialized areas of communications that do not meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. These courses do not count toward required strategic communication electives. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR) 1 Credit

STCM 29300 Minicourses in Communications (LA)

A series of short courses in specialized areas of communications that meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. These courses do not count toward required strategic communication electives. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR) 1 Credit

STCM 29600 Audience Research and Media Planning (NLA)

Survey of the major forms of audience research in television and radio, with particular emphasis placed on the Nielson and Arbitron ratings reports. Covers principles of sample surveys; interpretation of audience data; and application to programming, promotion, and sales. Prerequisites: TVR 12100; TVR 26000 or PSYC 20700. (F-S)

3 Credits

STCM 30000 Crisis Communication (NLA)

Emphasizes the process by which individuals and organizations strategically manage various types of social, political, environmental, and organizational disasters or emergencies. The course explores multiple layers and levels of a crisis and the communication issues that develop, especially in terms of rebuilding the community. These communication issues are then applied to a current crisis. Prerequisites: STCM 21100 or STCM 23200. (F)

3 Credits

STCM 30100 Social Media Strategy (NLA)

Explores social media use in marketing and corporate communication. Topics addressed include social media ethics, branding and content strategy, best practices in content creation and management, and social collaboration in the workplace. Enables students to apply social media tools in the design of marketing, advertising and employee communication. Students will analyze and develop social media campaigns and develop plans for leveraging social media for a strategic purpose. Prerequisites: STCM 21100. (S)

Attributes: CCCS

3 Credits

STCM 30300 Games for Marketing & Training (NLA)

Examines the design of and methods for creating games for marketing and training. Emphasis is on applying game design techniques utilizing theories of persuasion, motivation, and learning. Students will also learn about the two different contexts of designing games for marketing and training. Students will create examples and prototypes of their designs. Prerequisites: STCM-22000. (S)

3 Credits

STCM 30600 Advanced Web Design (NLA)

Building on Web Design, an advanced course in website design that provides a hands-on approach to designing dynamic, database driven websites by incorporating a user-based approach in the design and implementation. Core concepts explored include: visual design for the dynamic web, coding and development platforms, relational databases, and content management systems. Prerequisites: STCM 20600. (S)

3 Credits

STCM 30900 Media Planning (NLA)

Advanced application of the qualitative and quantitative study of media audiences, including broadcast, print, out-of-home, online, mobile, and social media, with particular emphasis placed on measures of audience composition, coverage, and engagement, and the interpretation and application of audience data to media planning for integrated marketing communication campaigns. Prerequisites: STCM 24100. (FS)

3 Credits

STCM 31000 Organizational Speech Writing and Interviewing (LA)

The role of the organizational communication specialist includes many functions, two of which are addressed in this course. The organizational interviewing function focuses on dyadic and group situations where information is gathered, evaluated, and sometimes shared, such as selection, appraisal, and focus group interviews. The organizational speech-writing function focuses also on the production and dissemination of information and includes audience analysis and manuscript writing. Students prepare and conduct interviews, write speeches, and critique both the execution and underlying dynamics of each. Prerequisites: STCM 10800, SPCM 11000, or SPCM 11500; two courses in communications, speech communication, or culture and communication. (IRR)

Attributes: CCCS, H, UND

3 Credits

STCM 31100 Communicating with Stakeholders (NLA)

Explores the strategies and tactics employed by communication professionals in engaging and influencing internal and external organizational stakeholders including employees, customers, donors, stockholders, lawmakers and regulators, community neighbors, the press, and business partners. Students will learn and apply legal reporting requirements, current practices, communication and collaboration tools and methods, and ethical considerations related to the various ways that organizations of all types interact with key constituencies. Prerequisites: STCM 21100 or STCM 23200 or any 200-level course in FINA, SMGT, MGMT, or ACCT. (E,Y)
3 Credits

STCM 31200 Information Design (NLA)

Information design is the skill and practice of preparing information for use by the target audience. Topics include examining information graphics, data visualization, wayward signage, and information architecture. Emphasis is on translating data into visual representations in order to improve communication. Prerequisites: STCM 22000. (S,E)
3 Credits

STCM 32000 Leadership Communication (LA)

Examines the theories and practices of participatory leadership in organizational settings. Specific attention is given to communication skills, media applications, and problem-solving and decision-making formats. Prerequisites: Three courses in communications; junior standing. (F)
Attributes: SS
3 Credits

STCM 33000 Advertising Copywriting and Art Direction (NLA)

Focuses on building a strategy to meet marketing communication goals with effective advertising across a variety of media. Students will learn, think, and communicate through both copy and visuals as they gain experience in conceptualizing, designing, and writing messages for media. Students will learn how to create and present such messages, as well as how to analyze and evaluate their persuasiveness. Prerequisites: STCM 24100, STCM 11100. (F-S)
Attributes: CCCS
3 Credits

STCM 33200 Writing for Public Relations (LA)

Fundamentals of writing for public relations. Emphasis is placed on format requirements of materials submitted to the media; writing for a client; persuasion in writing; and clarity, flow, and other elements of proper public relations writing style. Provides applications using news release, feature, article, editorial, and financial report formats. Prerequisites: STCM 23200; WRTG 10600 or ICSM 10800 or ICSM 11800. (F,S)
Attributes: CCCS, WI
3 Credits

STCM 33300 Applied Event Management (NLA)

The application of communication and project management principles to complex organizational events such as training seminars, product launches, fund-raising events, and conferences, providing students an opportunity to work on and critique the planning and execution of an actual event. Each student is assigned an event and conducts structured observations of meetings and activities of the event team, reflecting on current issues and trends from readings and lectures. The student is also assigned specific duties in the planning, execution, and/or evaluation stages of the event, and produces a professional portfolio and project notebook that documents and reflects on the competencies they developed. Prerequisites: STCM 23000. (S)
3 Credits

STCM 36500 Communication in International Organizations (LA)

This course explores the relationship between organizational communication and culture in the context of international organizations. In particular, it focuses on communication process and structure, emphasizing the creation and interpretation of messages aimed at persuasion and influence, as well as learning, training, and performance. Prerequisites: Three courses in communications; junior standing. (IRR)
Attributes: SS
3 Credits

STCM 36600 Global, Intercultural, and Multicultural Public Relations (NLA)

This course focuses on international, intercultural, and multicultural perspectives of public relations facing public relations firms and in-house communication departments today. It will provide students with an understanding of real-world public relations techniques, as well as viewpoints from scholars, vital to developing effective and ethical communication campaigns targeted to international publics and multicultural publics in the U.S. It also examines the impact of worldwide technological innovations, as well as social, economic, and political changes. Prerequisites: STCM 23200; junior standing. (S)
Attributes: DV
3 Credits

STCM 38000 eLearning (NLA)

The theory and practice of designing online learning. Concepts of interactivity, feedback, perception, and learning are studied. Students integrate knowledge of instructional design with development skills in designing, developing, and evaluating an online learning project. Prerequisites: STCM 21000. (S,O)
3 Credits

STCM 39000-39010 Selected Topics in Strategic Communication (LA)

Exploration and analysis of a specific area of communication. Topics vary based on student demand and on faculty expertise and research interest. Course content and pedagogical methods meet the College guidelines for liberal arts designation. May be repeated once. Not a production course. Total number of credits in any combination of STCM 39000, STCM 39010, 22x-41200, and 22x-41210 may not exceed 6. Prerequisites: Junior standing; others vary depending on the topic. Refer to Undergraduate Course Offerings each semester. (IRR)
3 Credits

STCM 40400 Communication Design Lab (NLA)

An advanced course dedicated to the design of a fully functional media-based solution for a client or targeted crowdfunding campaign. Students will navigate the entire design process; including ideation, planning, design creation and testing, implementation, and evaluation. This project may touch on aspects of visual, web, social media, interactive media, information, instructional, and game design. Senior standing or permission of instructor. Prerequisites: STCM 20600 and STCM 22000. (F)
3 Credits

STCM 41200 Workshop in Strategic Communication (NLA)

Individual assignments designed to provide advanced applied experiences based on students' program and career goals. Specific projects may involve production or communication analysis and design; projects are determined jointly by the student and a faculty adviser and must have departmental approval. Students may take a second semester of this course with approval of the instructor. Total for STCM 41200 and STCM 49900 may not exceed Prerequisites: Junior standing. (F,S)
1-6 Credits

STCM 42000 Integrated Marketing Communications Lab (LA)

A capstone course that applies key components of integrated marketing communications including advertising, public relations, brand positioning, and sales promotion. Students complete a client project that requires research and development of integrated strategies to achieve specific marketing objectives. Students will also analyze relevant cases and apply principles and best practices to their client engagement. Prerequisites: TVR 12100; STCM 23200; STCM 24100; MKTG 31200; integrated marketing communications major or minor. (S)

3 Credits

STCM 43000 Brand Design and Communication (NLA)

An advanced course that focuses on the communication process of redesigning a corporate brand for an existing corporation or organization. After defining a company's essence, character, and purpose, students design and execute a corporate image across various forms of internal and external communications. Requires conceptual thinking and creative execution, and culminates in a comprehensive branding campaign for a specific company suitable for inclusion in a creative portfolio. Students need to have prior hands-on experience using graphic design software to create visual images. Prerequisites: Integrated marketing communications major or minor; junior standing; STCM 33000. (F)

3 Credits

STCM 43400 Communication Management Lab (NLA)

Capstone course examining management principles and practices for communication and workplace learning professionals. Topics include developing department operations budgets, strategic planning and organizational alignment, identifying client needs, requests for proposals, senior management relations, communicating value, developing policies and procedures, assessing employee performance, project management, and change management practices. Students carry out a project for a client to investigate a communications/learning problem and design an intervention. Enrollment limited to CMD and IMC majors and minors. Prerequisites: Senior standing. (S)

3 Credits

STCM 44000 Public Relations Lab (NLA)

An advanced workshop dedicated to the planning of an actual public relations case study, including analysis of the publics involved and the media options for the practitioner; planning, budgeting, and scheduling; and development of problem-solving messages, actions, and/or events.

For advanced students in business or communications or for those planning a career in public relations. Prerequisites: STCM 23200; STCM 33200, STCM 33000, WRTG 31100, or STCM 34000. (F,Y)

Attributes: SL

3 Credits

STCM 44100 Ad Lab (NLA)

The essentials of advertising campaign planning, including media strategy, positioning, and ad design, culminating in a comprehensive plan for a specific product. For advanced students in marketing or communications or for those planning a career in advertising.

Prerequisites: STCM 24100; STCM 28800; STCM 30900; STCM 33000; acceptance of portfolio. (S)

Attributes: UND

3 Credits

STCM 45000 Critical Issues (LA)

Explores new and emerging issues that impact organizations and society, and how professionals in communication and learning can contribute to understanding and resolving them. Students conduct design inquiries into an issue of their choice. They engage in research to understand the multiple dimensions and perspectives of the issue, and in designing to propose potential resolutions. Enrollment limited to Communication Management and Design, Integrated Marketing Communications, and Culture and Communication majors and minors. Prerequisites: Senior standing, STCM 12300; STCM 28800 or, for Culture & Communication majors, with instructor approval. (F)

3 Credits

STCM 49000 Internship (NLA)

Jointly supervised work experience with a cooperating institution or organization in the field of communications, intended to motivate the intern toward professional growth through observation and participation, to provide an opportunity to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Total may not exceed including London and Los Angeles internships. Enrollment limited to strategic communication majors or minors. Prerequisites: Completion of the Park School internship procedures. (F,S,U,W)

1-12 Credits

STCM 49300 Internship: Live Event Design and Management (NLA)

Jointly supervised work experience with a cooperating institution or organization in the field of live events, intended to motivate the intern toward professional growth through observation and participation, to provide an opportunity to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Total may not exceed Enrollment limited to students enrolled in the Live Event Design and Management minor. Prerequisites: STCM 23000; completion of the Park School internship procedures. (F,S,U,W)

1-12 Credits

STCM 49800 London Communications Internship (NLA)

A limited number of internships with cooperating institutions or organizations are available to communications majors. The jointly supervised work experience offers the opportunity to learn through observation and participation in a professional setting. Prerequisites: Junior or senior standing; completion of Park School internship procedures; approval of the dean in the semester preceding the London registration. Pass/fail only. (F,S)

Attributes: UND

3-6 Credits

STCM 49900 Independent Study (LA)

Intensive study under the supervision of a faculty adviser. Possible topics include instructional design and evaluation, organizational communication analysis and evaluation, and the adoption and evaluation of new technologies such as multimedia or teleconferencing. Comprehensive research paper (not a project) is required. May be repeated for a total of no more than six credits; total of CMD 49900 and CMD 41200 may not exceed six credits. Enrollment limited to strategic communication majors. Prerequisites: Junior standing. (F,S)

1-6 Credits

Television & Digital Media Production (TVR)

TVR 10100 Introduction to Media Production (NLA)

An applied, practical introduction to the fundamentals of audio and video electronic media production. Covers theory, terminology, and techniques, with an emphasis placed on the function and operation of various analog and digital equipment. The basic technical and aesthetic skills of both radio production and television studio production are covered. Open to sport media majors in the spring semester. (IRR)

Attributes: CCCS

4 Credits

TVR 10500 Introduction to Audio (NLA)

An applied practical introduction to the fundamentals of audio. Covers theory, terminology, and technique, with emphasis on the function and operation of various analog and digital used for audio acquisition, mixing and output. The basic technical and aesthetic audio skills for radio, television, cinema, and new media production and post-production are covered. Prerequisites: Majors in television-radio; emerging media, - media design and production concentration or minors in audio production. (F-S)

Attributes: CCCS

3 Credits

TVR 10700 Introduction to Television Studio Production (NLA)

Introductory course that explores the techniques and purpose of various television studio productions through direct hands-on experience.

Offers students the opportunity to engage in the many facets of television studio production through a variety of projects and exercises.

Prerequisites: Television-radio majors only. (F-S)

Attributes: CCCS

4 Credits

TVR 11500 Introduction to Video Production (NLA)

Introduction to video production techniques, including portable video camera operation, video editing, lighting, scripting, media aesthetics, and logistics. Students will develop both their creative and technical skills through a combination of production exercises, projects, readings, and critiques. (F,S)

Attributes: CCCS

4 Credits

TVR 12100 Introduction to Mass Media (LA)

Survey of American mass media with emphasis placed on the historical development, structure, organization, function, and effects of mass media in society. Discussion includes issues such as ethnic, racial, age, and sex-role stereotyping; violence; children and the media; and economic control and the role of governmental regulation. (IRR)

Attributes: SCE, SS

3 Credits

TVR 12200 Introduction to Media Aesthetics and Analysis (LA)

Teaches techniques and criteria for analysis of media productions. Examines the basic production techniques used to communicate with visual images and sound. Topics such as light, composition, motion, sound, editing, and time may be covered. Aesthetics in the production, consumption, and critique of media are surveyed. (F-S)

Attributes: UND

3 Credits

TVR 12300 Introduction to Law and the Media (LA)

An introduction to law, lawyers, juries, and the legal system as portrayed in dramatic, news, and documentary television programming as well as in popular films. This course will study how the media and the legal system influence each other. Ethical issues concerning how the media portrays the legal system to the audience will be analyzed. Concepts including double jeopardy, jury tampering, hung juries, new trials, judicial misconduct, appeals processes, and judicial corruption will be discussed as they relate to the various contemporary television programming and films to be viewed in class. When possible, local judges or lawyers will appear on a discussion panel. (S)

3 Credits

TVR 12400 Introduction to Media Industries (LA)

Introduction to digital and electronic media industries, both traditional and emerging. Focus on ethical, legal technological, economic, and creative shifts resulting from new media platforms and cross-platform distribution. Discussion, research, writing, and group collaborative work focused on emerging challenges and opportunities in the new media environment. (F,S)

Attributes: SCE

4 Credits

TVR 13100 Media Writing (LA)

Exposure to a diverse selection of writing styles and formats used in the mass media. It will introduce critical, analytical, and applicable writing skills in areas such as audio, visual, and interactive media. (F,S)

Attributes: CCCS, MC

3 Credits

TVR 20600 British Media and the Global Context (LA)

Studies key aspects of British media in historical and cultural contexts. Students will research specific case studies of British media's global spread, influence, and links with global economy and culture. This course is offered only through the Ithaca College London Center. Prerequisites: Sophomore standing; acceptance into the Ithaca College London program. (Y)

3 Credits

TVR 21100 New Media Business and Economics (LA)

Investigates the range of business and economic models applicable to new and emerging media industries. Critiques business models that drive traditional media industries and reviews the economic and social viability of alternative business models for emerging media. Emerging media and television-radio majors. Prerequisites: TVR 12400. (Y)

Attributes: SS

4 Credits

TVR 21400 Design of New Media: Theory, Function and Analysis (LA)

Fundamental principles of design, function, and usability of new media technology, including games, mobile applications, web-based media, and other digital media platforms. Assessment of examples of new media designs for strengths, limitations, and usability; exploration of rules, techniques, and problem-solving strategies that go into the creation of new media applications and platforms. Open to majors in emerging media and television-radio. Prerequisites: TVR 12400. (Y)

4 Credits

TVR 21500 Television Series Production (NLA)

Previously learned skills will be amplified, enhanced, and refined through a combination of in-class exercises and outside projects with equal attention to form and content. Emphasis will be placed on the development of ideas, storytelling, and greater sophistication in all areas of television series production. Prerequisites: TVR 11500 or CNPH 11100. (F,S)

4 Credits

TVR 22000 Global Flow of Information (LA)

A critical review and analysis of theories, policies, and issues in international and intercultural communication, as well as the flow of information among nations of the world through traditional and contemporary communication channels. Includes interpersonal communications, the mass media, satellite communications, diplomacy and international conventions. Readings and discussions of research studies demonstrate the interconnections of communication and international relations. Emphasis is placed on the impact of the flow of information on political, economic, cultural, legal, and social aspects of various countries and regions. Prerequisites: One course in the social sciences. (F)

Attributes: SCE, WGS, WGSJ

3 Credits

TVR 22500 Television Production and Direction (NLA)

This intermediate studio television production course builds upon basic production techniques. Video aesthetic theories will be applied in creative studio productions. Prerequisites: TVR 10700 and TVR 11500. (F-S)

4 Credits

TVR 23500 Editing (NLA)

You will be editing a variety of video materials in differing genres with the goal of gaining better fluency with fundamental aspects of story design, organizational strategies, software techniques, and workflow processes related to the genre in question. This course will be taught with Adobe Premiere Pro editing software and will include effective workflow processes between it and other software, including After Effects, Audition, ProTools and DaVinci Resolve. Prerequisites: TVR 11500 or CNPH 11100. (F,S)

4 Credits

TVR 25100 Critical Thinking and Mass Communication (LA)

An applied introduction to critical thinking skills, relevant to many disciplines. Presents practical techniques for evaluating information and identifying propaganda. Useful to journalists and media professionals, and also for media consumers who rely on print, broadcast, and online sources for information. Students who take CLTC 11000 are not permitted to take this course. Prerequisites: Sophomore standing. (F,S)

3 Credits

TVR 26000 Quantitative Mass Media Research Methods (LA)

A basic introduction to quantitative research methods in mass communications, including sampling, survey, experimental, and content analysis. Review of literature, identification of basic concepts, problems, responsibilities, and research ethics; procedures and basic techniques of computer data analysis. A research project is required. Prerequisites: TVR 12100 or TVR 12400. (IRR)

3 Credits

TVR 26200 Qualitative Mass Media Research Methods (LA)

A basic introduction to theories and research skills used in qualitative research as applied to mass communication. Major topics include cultural studies theories, ethnography, historical research, depth interviews, qualitative content analysis, and focus groups. Review of literature, identification of basic concepts, problems, and responsibilities. A research project is required. Prerequisites: TVR 12100 or TVR 12400. (IRR)

Attributes: CCRM

3 Credits

TVR 26300 Mass Media Research Methods (LA)

A basic introduction to quantitative and qualitative research in mass communications, including sampling, survey, experiment, systematic content analysis, in-depth interviews, focus groups, and qualitative content analysis. Review of literature, identification of basic concepts, problems, responsibilities, and research ethics; procedures and basic techniques of computer data analysis; hypothesis testing and statistical interpretation and analysis. A research project is required. Prerequisites: TVR 12100 or TVR 12400. (F,S)

Attributes: QL

4 Credits

TVR 27100 Audio Production (NLA)

Examines the theory and practice of audio production and highlights the unique properties of the medium. The concept of sound design is examined as applied to programming intended for persuasion, information, and entertainment. In addition to providing hands-on experience through production exercises and projects, the course places considerable emphasis on aesthetic analysis of audio products through a series of "critical listening" exercises. Prerequisites: TVR 10100 or TVR 10500 (or MUMC 14500 for students in sound recording technology major only). (F-S)

4 Credits

TVR 28000 Making the Video Essay (NLA)

The video essay is an open cinematic form that is used to explore ideas and often includes voice-over narration. As a form, the cinematic essay has been around for decades, but only in its most recent form "the video essay" has it become a dominant form of self-expression online. It is within this current cultural landscape that we will examine and analyze modern forms of the video essay, and that each student will produce their own original work. Prerequisites: TVR 11500 or CNPH 11100. (IRR)

Attributes: MC

2 Credits

TVR 28400 A Brief History of Television Comedy (LA)

This course studies key aspects of television comedy in historical and cultural contexts. Students will research specific comedians and their influence on the development of television programming and distribution through written and an oral presentation. Students will attend presentations, museum exhibitions and examine archive materials at the National Center for Comedy. (S)

1 Credit

TVR 29200-29309 Minicourses in Communications (NLA)

A series of short courses in specialized areas of communication that do not meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May not receive credit for both GCOM 29219 and TVR 29201. Prerequisites: Vary depending on the topic; refer to the class schedule on HomerConnect each semester. Pass/fail. (IRR)

1-2 Credits

TVR 29800 Exploring the Documentary (LA)

An exploration of the documentary with an emphasis on history and appreciation, useful to consumers and producers who would like to learn more about the form. Topics include documentary "truth," subgenres, production styles, and evolution of documentary from cinema to television and the World Wide Web. Prerequisites: CNPH 10100 or TVR 12200. (F,S)

3 Credits

TVR 29900 Nonfiction Production (NLA)

An intermediate-level documentary production course that emphasizes the production skills, the storytelling concepts, and the legal and ethical framework for successful documentary productions. Also covered are different stylistic approaches to the genre, concepts related to the documentary maker's "voice" within his or her work, subgenres within the documentary format, and distribution, fund-raising, and research strategies. Prerequisites: TVR 11500 or CNPH 11100. (Y)

4 Credits

TVR 30400 Advanced Studio Production (NLA)

An advanced studio television course expanding on established production skills acquired in previous courses while introducing additional concepts and techniques required for complex multicamera productions. Through producing, writing, and directing a variety of programs, students will apply production theories and concepts within a digital production environment. Prerequisites: TVR 11500; TVR 22500. (F-S)

4 Credits

TVR 30900 Motion Graphics and Animation (NLA)

This course will introduce motion graphics and animation techniques using traditional and computer forms. Theoretical and conceptual approaches to motion graphics design and techniques will be explored using international examples. Students will complete several animation projects with increasing complexity during the semester. Prerequisites: TVR 11500 or CNPH 11100; television-radio or emerging media major or cinema and photography or film, photography and visual arts; sophomore standing. (Y)

4 Credits

TVR 31000 Experimental Media: Production and Criticism (NLA)

Examines the history and theory of experimental video, electronic, and digital media as a cross-disciplinary visual and aural art form that emerged from several art disciplines and the associated developing technologies. An active hands-on exploration of the wide variety of aesthetic strategies used in the conceptualization, creation, presentation, and exhibition of electronic media. By designing individual and collaborative projects, students gain a broader awareness of the field and the technical and creative innovations that have shaped the contemporary art culture and the media arts industries. Prerequisites: TVR 11500 or CNPH 11100; television-radio, emerging media, cinema and photography, or film, photography, and visual arts major; sophomore standing. (Y)

Attributes: UND

4 Credits

TVR 31200 Media Law (LA)

This course examines the legal boundaries to freedoms of speech and press, both historically and present-day. Students learn practical applications of First Amendment rights concerning mass communication, while also investigating fundamental theories of free speech and specific issues impacting contemporary society. Course topics include government regulation of media; intellectual property (copyright and trademark); commercial speech; defamation; privacy; access to places and information; political speech; media and the judiciary; corporate speech; and reporter/source confidentiality. This course offers a combination of discussion, lecture and exercises. The incorporation of current free speech issues help to guide and inform class discussions. Prerequisites: Any TVR course at level-100, or JOUR course at level-100, or STCM course at level-100, or LGST course at level-100. (F,S)

Attributes: LMAL, LMEL, LSCO

4 Credits

TVR 31300-31305 Topics in Media Law and Policy (LA)

Overview of First Amendment theory, legal precedent, copyright, libel, and privacy, followed by an in-depth investigation of specific media law and policy issues determined by faculty expertise and student interest. Prerequisites: TVR 12100, TVR 12400, JOUR 11100, STCM 10300, or any LGST course. (F,S)

Attributes: LMAL, LMEL, LSCO

4 Credits

TVR 31500 Television Series Directing (NLA)

This course has two primary agendas, one aesthetic and one technical. The aesthetic focus is on directing, creative authorship, personal vision, and the exploration of strategies and methods for transforming vision into reality. The technical focus is on increasing sophistication and skill within specific areas of television series production: directing, camera work, lighting, production design, production planning, and video editing. Prerequisites: TVR 21500 or CNPH 22400. (Y)

4 Credits

TVR 32000 Topics in Media Technology (LA)

Analysis of theoretical, social, economic, political, technological, and cultural perspectives that impact and are impacted by new and emerging media technologies. Theoretical framework or technological focus defined by faculty expertise and student interest. Prerequisites: WRTG 10600 or ICSM 108xx or ICSM 118xx; TVR 12100 or TVR 12400; junior standing; television-radio or emerging media majors. (Y)

Attributes: DV, WI

4 Credits

TVR 32200 New Telecommunications Technologies (LA)

Examines the development of new technologies and communication networks. The structure of the marketplace, government policy, and the social impacts of new technologies are discussed. Issues such as globalization, computer security, privacy, and changes in regulations may be covered. Prerequisites: TVR 12100 or TVR 12400; two level-2 courses in one or more of the following fields: television-radio, psychology, sociology; junior standing. (F-S)

3 Credits

TVR 32400 European Mass Media (LA)

A comparative study of Western and Eastern European mass media, with emphasis placed on their historical development, structure, organization, function, and effects in society. Issues discussed include privatization, satellite broadcasting, East-West media relations, and contemporary political use of the mass media. Prerequisites: Three courses in social sciences; junior standing. (F)

Attributes: SS

3 Credits

TVR 32500 Seminar in Development Communications (LA)

A forum for discussion and analysis of various issues involved in the use of mass media in the development effort of third world countries. Examples in a number of African and Asian nations are used to illustrate the use of media support in the development process, successfully or otherwise. External and internal forces that affect media implementation are analyzed. The issue of a communications workforce, its lack in third world countries, and its impact on the present state of affairs are discussed. Prerequisites: Three courses in social sciences; junior standing. (IRR)
Attributes: UND
3 Credits

TVR 32700 Program Development for Entertainment Media (NLA)

Exploration and application of the creative process for developing program content for entertainment media industry. Students will work with true events or novels for features, television movies, series and Internet distribution. Analysis of creative properties and case studies will exemplify the most effective means for producers, writers, directors, and programmers to develop concepts for the theatrical and television marketplace. Prerequisites: CNPH 10100 OR TVR 12400. (Y)
4 Credits

TVR 33100 Production Management for Film, Television and New Media (NLA)

Provides a working knowledge of the role of the executive and line producer in pre-production through post-production on a film, television or new media project. Topics covered include: production planning, budgeting, scheduling, business considerations, and post-production management. Prerequisites: TVR 11500, CNPH 11100, or permission of instructor. (Y)
4 Credits

TVR 33500 Electronic Media Criticism (LA)

Critical exploration of the complex role television programming plays in the cultural representation and construction of marginalized social groups and the medium's treatment of issues related to gender, race, class, and sexuality. The course analyzes from a historical, industrial, economic, and social perspective how classical and contemporary television shows both perpetuate and challenge negative stereotyping and false social myths related to sexism, racism, transphobia, and homophobia. Prerequisites: TVR 12100 or TVR 12400; CNPH 10100; WRTG 10600 or ICSM 10800/11800. (FS)
Attributes: DV, SCE, WGS, WGS3, WI
3 Credits

TVR 35200 British Media and Society (LA)

A study of the role and function of media in modern societies, the effects and impact of the mass media, and the media as agents of democracy. An analysis of the relationship of British media to British society in the postwar period through examination of a wide range of material – news, current affairs, documentary, drama, situation comedy. Prerequisites: Junior standing or above. (F)
Attributes: SS
3 Credits

TVR 37100 Advanced Audio Production (NLA)

The study and application of the creative capabilities of advanced audio equipment. Students learn the theory and techniques of sophisticated audio production, including analog and digital multi-track recording, mixing, signal processing, live remote recording, digital editing, creative sound production, and sound design for other media. Prerequisites: TVR 27100. (F)
4 Credits

TVR 38500 Emerging Media Project (NLA)

Hands-on introduction to project design, development, implementation, and testing, with emphasis on the knowledge and skills required to successfully complete the production cycle, including team dynamics, market analysis, project management, documentation, and testing. Students work in teams on projects assigned by the instructor. Cross-listed with COMP 38500; students cannot receive credit for both COMP 38500 and TVR 38500. Open only to Emerging Media majors. Prerequisites: COMP 20200; Junior Standing. (S, Y)
4 Credits

TVR 40000-40004 Topics in Media Production (NLA)

Exploration of a specific area of advanced media production through focused study and application. Topics will vary. Offerings may include, but not be limited to advanced remote multi-camera production; broadcast performance, advanced techniques in directing and producing; advanced studio and location lighting; advanced animation; 3-D modeling and special effects. Prerequisites: Junior standing, television-radio, cinema and photography, film, photography and visual arts, or emerging media major; permission of instructor. (Y)
1-4 Credits

TVR 41200 Selected Topics (LA)

Exploration and analysis of a specific area of communication. Topics vary based both on student demand and on faculty expertise and research interest. Course content and pedagogical methods meet the College guidelines for liberal arts designation. May be repeated once. Not a production course. Total number of credits in any combination of TVR 41200, TVR 41210, GCOM 41200, GCOM 41210, OCLD 39000, and OCLD 39010 may not exceed 6. Prerequisites: Junior standing; others vary depending on the topic. Refer to Undergraduate Course Offerings each semester. (IRR)
Attributes: UND
3 Credits

TVR 43100 Advanced Writing for Television and Radio (NLA)

Practice and guidance for advanced students in writing television scripts, with special attention in conference to individual writing problems. Prerequisites are either option A: TVR 13400, TVR 33300, WRTG 10600, or WRTG 10700; or option B: CNPH 10100, CNPH 23300, CNPH 33300. (S)
3 Credits

TVR 46000 Senior Seminar (LA)

Informed by social, cultural, critical, economic, and/or legal theories, these seminars offer in-depth explorations and analyses of the complex relationship among the mass media, individuals, social institutions, industries, and/or culture. Topics vary based on faculty expertise and research interest. Prerequisites: Senior television-radio major, culture and communication major, or emerging media majors; and TVR 31200. (F-S)
Attributes: UND
3 Credits

TVR 46200 Seminar in Geomedia (LA)

This advanced seminar is concerned with the analysis of conglomeration and globalization processes as they affect print and broadcast media today. While the main focus is on international news and information, some attention is also given to other media industries. The course also examines citizens' and nongovernmental organizations' responses to globalization locally, nationally, and internationally. The course covers readings and analytical frameworks in several disciplines, including traditional market economics, Marxist analysis, feminist analysis, postcolonial analysis, and world system theory. Students take major responsibility for leading discussions and have an opportunity to research an issue of personal interest within the context of the seminar. Prerequisites: Three courses in social sciences. (S)

Attributes: WGSC

3 Credits

TVR 47100 Audio Workshop (NLA)

The course refines the student's abilities related to audio theory, professional digital audio equipment, critical listening, and the aesthetic analysis of audio products. Students record and edit an extensive audio project outside class. Students may take a second semester of this course with permission of instructor. Total may not exceed Prerequisites: TVR 37100. (S)

4 Credits

TVR 48500 Emerging Media Capstone (NLA)

Working as part of a team, the student designs, develops, and documents a significant emerging digital media project under the guidance of one or more faculty members. Cross-listed with COMP 48500; students cannot receive credit for both COMP 48500 and TVR 48500. Prerequisites: COMP 38500 or TVR 38500 with a minimum grade of C-. (S, Y)

4 Credits

TVR 49000-49001 Internship (NLA)

Jointly supervised work experience with a cooperating institution or corporation in the field of communications, intended to motivate the student toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skill and academic knowledge are put into practice. May be repeated. Total credits may not exceed 12, including London and Los Angeles internships. Pass/fail only. Prerequisites: Junior television-radio, journalism, or media studies major or minor; completion of Park School internship procedures. (FS)

Attributes: UND

1-8 Credits

TVR 49100 Senior Media Thesis (NLA)

Advanced work and special projects in writing, producing, and directing on an individual or small-group basis. Programs may be developed for broadcast on ICTV or produced for the professional production unit. Prerequisites: television-radio, documentary studies and production, cinema and photography, or film, photography and visual arts major; senior standing; or permission of instructor. (Y)

4 Credits

TVR 49300 Live Event Production (NLA)

This is an advanced television production course focusing on live event broadcasting. Emphasis will be placed on the planning and the implementation of on-location productions. This course builds on previously acquired video and studio production knowledge while introducing on-location production concepts and theories. Production management, engineering, multimedia design and web-based broadcasting will be explored. Prerequisites: TVR22500 or TVR33100. (FY)

Attributes: MC

4 Credits

TVR 49600 Documentary Workshop (NLA)

A challenging workshop and lecture course in which students carry out research, planning, production, and postproduction for a video documentary and formal program proposal. Major topics include documentary genres and techniques, criteria for selecting subject matter, primary and secondary sources of information. Only open to School of Communications majors. Prerequisites: TVR 29900 or TVR 21500 or CNPH 22400 or JOUR 21200; senior standing; or permission of instructor. (Y)

4 Credits

TVR 49700 Independent Project (NLA)

An independent project under the supervision of a faculty adviser, with the approval of the department chair. Possible projects include video/audio projects, script projects, and projects in journalism, advertising, or public relations. The outcome should be a completed work suitable for inclusion in a professional portfolio. May be repeated, but the total credits earned from all independent projects may not exceed 6. Prerequisites: Television-radio or integrated marketing communications major; junior or senior standing; permission of the department. (F-S)

3 Credits

TVR 49800 London Communications Internship (NLA)

A limited number of internships with cooperating institutions or organizations are available to communications majors. The jointly supervised work experience offers the opportunity to learn through observation and participation in a professional setting. Prerequisites: Junior or senior standing; completion of Park School internship procedures; approval of the dean in the semester preceding the London registration. Pass/fail only. (F-S) See "London Center."

3-6 Credits

TVR 49900 Independent Study (LA)

Intensive study under the supervision of a faculty adviser and the approval of the department chair. Possible topics include quantitative or qualitative research in an area relating to media production, consumption, regulation, or criticism. Comprehensive research paper (not project) is required. May be repeated, but the total credits earned from all independent study taken may not exceed 6. Prerequisites: Television-radio or integrated marketing communications major; junior standing; permission of department. (F-S)

1-6 Credits

Theatre Arts (THEA)

THEA 10000 Introduction to the Theatre (LA)

Survey of theatre practices and principles in the various aspects of theatrical production. Examination of how plays are constructed, using examples from different eras of the world theatre. Occasional guest speakers. Required attendance at selected productions. (F,S,Y)

Attributes: 3B, CA, FA, TIDE

4 Credits

THEA 10200 Technical Theatre Practicum (NLA)

Introductory participation in technical production activities for the department. May be repeated for a total of eight credits. (F,S,Y)
1 Credit

THEA 10400 Introduction to Theatrical Design (LA)

Introduction to the theories and methodologies of theatrical design, including the areas of scenic, costume, lighting, and sound design. Focuses on the analysis, interpretation, visualization and auralization of dramatic work. Combines lecture with studio work. (S,Y)
Attributes: 3B, CA, FA, TIDE
4 Credits

THEA 10500 Introduction to Professional Theatre (NLA)

Survey of theatre spaces, organizational structures and personnel involved in the making of professional theatre. (F,Y)
2 Credits

THEA 10600 Race and Theatre in the United States (LA)

This course encourages students to think critically about the formation of racialized thinking and racism in the United States and how this impacts theatre making – both historically and today. Students learn about the intersection of race and theatre in the United States through class discussions, readings, lectures, videos, exams and in-class group work.##(F,S,Y)
2 Credits

THEA 10700 The Actor's Process (NLA)

A summary overview of the art of acting, with introductory emphasis on core principles of the craft an actor might employ when preparing for and executing a role in a production. Students will regularly engage in exercises that reinforce the techniques employed in the craft of acting. (F,S,Y)
2 Credits

THEA 10900 Introduction to Musical Theatre Performance (NLA)

Introduction, exploration, and integration of basic musical and theatre performance skills, through the selection, analysis, rehearsal, and presentation of scenes from musicals. Not open to B.F.A. musical theatre majors; admission by audition. Prerequisite: permission of instructor. (S,Y)
3 Credits

THEA 11000 Theatre Production I (NLA)

Introductory participation in technical production activities relating to the mounting of productions. Prepares students for crew, supervision. May be repeated once. (F,S,Y)
2 Credits

THEA 11100 Studio Foundations for Theatrical Design (NLA)

Introductory studio course in the tools used in the designing and presentation of scenic, costume, lighting, and sound design. Prerequisites: THEA 12000. (S,Y)
2 Credits

THEA 11200 Scenic Technology (NLA)

Introduction to and practical experience in general theatre scenery construction, including: machinery, tools, shop and safety procedures. Prerequisites: THEA 11800. (F,Y)
2 Credits

THEA 11300 Costume Technology (NLA)

Introduction to practical experience in general costume technology and construction including sewing, patterning, and fabrics. Prepares students for costume project management. Prerequisites: THEA 11800. (F,Y)
2 Credits

THEA 11400 Lighting Technology (NLA)

Introduction to and practical experience in theatre lighting technology, including: basic electrical principles, installation and use of theatre equipment, and the responsibilities and duties of a theatrical master electrician. Prerequisites: THEA 11800. (S,Y)
2 Credits

THEA 11500 Sound Technology (NLA)

Introduction to and practical experience in theatre sound technology, including: basic acoustic principles, installation and use of theatre equipment, and the responsibilities and duties of a theatrical sound engineer. Prerequisites: THEA 11800. (S,Y)
2 Credits

THEA 11600 Theatrical Properties (NLA)

Introduction to and practical experience in theatre properties including: production, materials and techniques. Prerequisites: THEA 11800. (F,Y)
2 Credits

THEA 11700 Scenic Art (NLA)

Introduction to and practical experience in scenic painting, including: production, materials and techniques. Prerequisites: THEA 11800. (S,Y)
2 Credits

THEA 11800 Theatrical Production Foundations (NLA)

An in-depth foundational introduction to the technical production focusing on processes, staffing, performance spaces, and professional standards used in producing live theatre. (F,Y)
2 Credits

THEA 12000 Theatrical Design Foundations (LA)

An in-depth foundational introduction to the art of theatrical design, focusing on the theories, methodologies used by professional scenic, costume, lighting and sound designers. Focus on the analysis, interpretation, visualization and auralization of dramatic work. (F,Y)
Attributes: FA
2 Credits

THEA 13100 Acting I (LA)

Introduction to the art of acting, with an emphasis placed on acting technique and study of scenes and/or monologues. (F,S,Y)
Attributes: 3B, CA, FA, TIDE, TMBS
3 Credits

THEA 13200 Acting II (LA)

Continued exploration of acting technique and study of scenes and/or monologues. Prerequisites: THEA 13100. (F,S,Y,IRR)
Attributes: 3B, FA
3 Credits

THEA 13300 Scene Study I (LA)

Study of fundamental theories, vocabularies, and methodologies of acting techniques. Class discussion, readings, analysis of dramatic texts and active learning assignments prepare the student for the rehearsal and performance of scenes. Corequisite: THEA 13500. (F,Y)
Attributes: FA
3 Credits

THEA 13400 Scene Study II (LA)

Continuation of THEA 13300. Further study of fundamental theories, vocabularies, and methodologies of acting techniques to prepare for rehearsal and performance of scenes. Emphasis placed on more complex analysis of scenes and characters. Prerequisites: B.F.A. acting or musical theatre majors only; THEA 13300. Corequisites: THEA 13600. (S,Y)
Attributes: FA
3 Credits

THEA 13500 Voice and Movement for the Stage I (NLA)

Laboratory in concentration and self-awareness through physical awareness, control, and flexibility - the dynamics necessary for the creation of a strong voice and stage presence. Corequisite: THEA 13300. (F,Y)
3 Credits

THEA 13600 Voice and Movement for the Stage II (NLA)

Continuation of laboratory in concentration and self-awareness for the creation of a strong voice and stage presence. Prerequisite: THEA 13500. Corequisite: THEA 13400. (S,Y)
3 Credits

THEA 13700 Stage Combat (NLA)

Training in hand-to-hand stage combat techniques and choreography. Offered through the Ithaca College London Center. (F,S,Y)
1 Credit

THEA 13900-13915 Rehearsal and Performance (NLA)

Laboratory participation in rehearsal and performance of a major departmental production. Students receive credit for assignments in acting or musical performance. Music students must enroll in MUMC 14000. Evaluated by the faculty member in charge of the designated areas of specialization. Evaluation is based on degree of professional attitude and quality of performance. May be repeated for a total of eight credits. Prerequisites: Appropriate academic and performance courses relative to the student's activity and/or successful audition for assignment to the major production. (F,S,Y)
0-2 Credits

THEA 13920 The Performance Workshop and Rasaboxes (NLA)

The Performance Workshop and Rasaboxes is an immersive program in the training and application of a suite of performance exercises devised by Richard Schechner and developed by Paula Murray Cole and others. Rigorous daily training includes yoga, extensive breath, voice and movement work, in group exercises, and performance composition. (IRR)
2 Credits

THEA 13990 Alexander Technique Explorations (NLA)

This course will engage the primary principles and practices of the Alexander Technique, a movement education modality that explores and facilitates one's own discovery of thinking, moving and interacting with others within any environment or activity with ease, presence and connectedness. The work will be accomplished through group exercises, readings and reflective writing/creative assignments, observation and activities, as well as optional individual lessons. (B,S,F,Y)
1 Credit

THEA 15000 Theatre Administration Practicum I (NLA)

Introduction to theatre administration practicum through a series of rotations in front-of-house, marketing, and events. Must be taken for two consecutive semesters in fall and spring. (F,S,Y)
2 Credits

THEA 15100 Theatre Studies Foundations (LA)

This course is the foundation to the academic and professional field of Theatre Studies. Students consider scripts and performances from a variety of dramaturgical and cultural perspectives and through different lenses. Course content explores major components, historical moments and conventions of theatre; current professional options for Theatre Studies majors; race and gender theory and their influence on theatre. The course culminates in a student-created performance. (F,Y)
4 Credits

THEA 15200 Theatre Administration Foundations (NLA)

Introduction to the field of theatre administration through the lens of each professional area using the Center for Theatre and Dance's Dillingham Center as your laboratory. (F,Y)
2 Credits

THEA 16000 Stage Management Practicum I (NLA)

Introductory observation of stage management for department productions. Prepares students for supporting roles in stage management. May be taken twice for one credit. (F,S,Y)
2 Credits

THEA 16100 Stage Management Foundations (NLA)

An in-depth foundational introduction to the art and practice of stage management, focusing on the organizational and communication procedures applied in collaborative theatre production and the methodologies and techniques used by professional stage managers. (F,Y)
2 Credits

THEA 19100 Theatre for Social Change (LA)

Explores the research and practice of socially engaged performance, focusing on the ways in which theatre can function to call attention to invisible power structures and encourage the dismantling of oppressive practices. Reviews diverse philosophies and practices of applied theatre and performance, and examines how these practices are applied in clinical, educational, and community settings. Includes opportunities for self-reflection, examination of current issues affecting communities both locally and globally, and consideration of theatre as part of the call to action work supporting societal change. (F,S,Y)

Attributes: CA, TIDE

3 Credits

THEA 19800 The Others: Global Theatre in Performance (LA)

Provides a broad introduction to theatre and performance studies, examining issues of class, race and gender, while questioning and unpacking the concept of "the others." Explores connections between play analysis, performance theory, and theatre history while discussing dramatic texts and performances, and encouraging an on-going debate about the role of college students as citizen-artists in the global society. (IRR)

Attributes: WGS

4 Credits

THEA 21000 Theatre Production II (NLA)

Technical supervision or design assignment in production for the department. May be repeated twice for a maximum of six credits. Prerequisites: THEA 11000. (F,S,Y)
3 Credits

THEA 22000 Vectorworks for the Theatre (NLA)

Instruction in computer applications involving the digital manipulation of lines, drawings, images and symbols in both 2D and 3D to convey visual ideas for design presentation using Vectorworks. Emphasis placed on the aesthetic application of the computer as a design tool for theatre. Prerequisites: THEA 11100. (S,Y)
2 Credits

THEA 22200 Scenic Design (LA)

Analysis and interpretation of dramatic works in the discipline of scenic design. Script analysis, visual research, conceptualization, and how scenery is used as a design medium to convey story. Combines lecture with studio practice. Prerequisites: THEA 12000 or THEA 10400. (F,Y)
Attributes: FA
2 Credits

THEA 22201 Theatrical Model Building (NLA)

Introduction to the tools and techniques used to model theatrical scenery prior to installation and the tools and standards used to document theatrical scenic design such as drafting. Prerequisites: THEA 11100.

Corequisite: THEA 22200. (F,Y)

2 Credits

THEA 22300 Costume Design (LA)

Analysis and interpretation of dramatic works in the discipline of costume design. Script analysis, character analysis, research, composition, and how costumes are used as a design medium to convey story. Combines lecture with studio practice. Prerequisites: THEA 12000 or THEA 10400. (F,Y)

Attributes: FA

2 Credits

THEA 22301 Costume Rendering (NLA)

Introduction to the tools and standards used to model theatrical costumes for collaboration and construction for theatrical costume design. Prerequisites: THEA 11100. Corequisite: THEA 22300. (F,Y)

2 Credits

THEA 22400 Lighting Design (LA)

Analysis and interpretation of dramatic works in the discipline of lighting design. Script analysis, visual research, conceptualization, and how light is used as a design medium to convey story. Combines lecture with studio practice. Prerequisites: THEA 12000 or THEA 10400. (F,Y)

Attributes: FA

2 Credits

THEA 22401 Theatrical Lighting Visualization & Documentation (NLA)

Introduction to the tools used to model theatrical lighting prior to installation and the tools and standards used to document theatrical lighting design. Corequisite: THEA 22400. Prerequisites: THEA 11100; THEA 11400; THEA 22000. (F,Y)

2 Credits

THEA 22500 Sound Design (LA)

Analysis and interpretation of dramatic works in the discipline of sound design. Script analysis, research, conceptualization, aural storytelling and basic studio techniques, etc., are used to develop and present design ideas. Combines lecture with studio practice. Prerequisites: THEA 12000, THEA 10400, TVR 27100. (F,Y)

Attributes: FA

2 Credits

THEA 22501 Theatrical Sound Creation and Editing (NLA)

The focus of the course is to introduce techniques and skills that are necessary for dramatic sound design. Corequisite: THEA 22500.

Prerequisites: THEA 11000 and THEA 11500. (F,Y)

2 Credits

THEA 23100 Acting III (LA)

Intensive examination of the practical aspects of acting. Application of techniques of personalization, plot objectives, and characterization; presentation of monologues and duet scenes. Prerequisites: Grade of B or better in THEA 13200. (IRR)

Attributes: FA

3 Credits

THEA 23200 Acting IV (LA)

Continued intensive examination of the practical aspects of acting. Application of techniques of personalization, plot objectives, and characterization; presentation of monologues and duet scenes.

Prerequisites: Grade of B or better in THEA 23100. (IRR)

Attributes: FA

3 Credits

THEA 23300 Scene Study III (LA)

Intermediate study of theories, vocabularies, and methodologies of acting techniques to prepare for rehearsal and performance of scenes.

Emphasis is placed on textual analysis and the transformation of actor into character. B.F.A. acting or musical theatre majors only.

Prerequisites: THEA 13400 and THEA 13600. Corequisites: THEA 23500

and THEA 23700. (F,Y)

Attributes: FA

3 Credits

THEA 23400 Scene Study IV (LA)

Continuation of THEA 23300. Further intermediate study of theories, vocabularies, and methodologies of acting techniques to prepare for rehearsal and performance of scenes and monologues. Emphasis is placed on the integration of cumulative research, analysis, and performance skills in the development of fully realized characterizations.

Prerequisites: B.F.A. acting and musical theatre majors only; THEA 23300.

Corequisites: THEA 23600 and THEA 23800. (S,Y)

Attributes: FA

3 Credits

THEA 23500 Voice and Speech for the Stage I (NLA)

Study and exercise in the techniques of effective stage speech. Organic awareness used to attain lively, flexible, and natural vocal abilities.

B.F.A. acting or musical theatre majors only. Prerequisites: THEA 13600.

Corequisites: THEA 23300 and THEA 23700. (F,Y)

1.5 Credits

THEA 23600 Voice and Speech for the Stage II (NLA)

Continuation of study and exercise in the techniques of effective stage speech. Organic awareness used to attain lively, flexible, and natural vocal abilities. Prerequisites: B.F.A. acting or musical theatre major and THEA 23500. Corequisites: THEA 23400 and THEA 23800. (S,Y)

1.5 Credits

THEA 23700 Movement for the Stage I (NLA)

Study and exercise in techniques of effective stage movement, utilizing organic awareness, flexibility, and imagination to develop stage presence and characterization skills. Prerequisites: B.F.A. acting or musical theatre major and THEA 13600. Corequisites: THEA 23300 and THEA 23500. (F,Y)

1.5 Credits

THEA 23800 Movement for the Stage II (NLA)

Continued study and exercise in techniques of effective stage movement and characterization skills. Prerequisites: B.F.A. acting or musical theatre major and THEA 23700. Corequisites: THEA 23400 and THEA 23600. (S,Y)

1.5 Credits

1.5 Credits

THEA 23900 The Alexander Technique (NLA)

The Alexander technique is a mind-body learning process developed by F. M. Alexander, an Australian actor. Through discussion, self-awareness activities, selected readings, and gentle, hands-on teaching, this course explores his ideas for increasing kinesthetic awareness as a skill for improving ease and freedom of movement for the performer and non-performer alike. Prerequisites: Sophomore standing. (IRR)

2 Credits

THEA 23990 Intimacy Choreography (NLA)

Introductory course in approaches and techniques of staging theatrical intimacy. Prerequisites: THEA 10700, THEA 13100, or THEA 13200.

(B,IRR,Y)

1 Credit

THEA 24100 History of Theatre (LA)

Evolution of global theatre from the origins of performance through the early modern era. Students analyze and evaluate the various systemic influences on global performance including – but not limited to – cultural, political, and economic influences. (F,S,Y)

Attributes: 3B, CSA, DV, G, H, HU

4 Credits

THEA 24300 Cultural Context for Theatre Design I (LA)

This course is an intensive survey of the history of significant cultural expression in aural and visual style from 3000 BCE to the 18th century intended to give each student a base knowledge to draw from and expand upon in future projects and productions. Students examine the evolution of style by studying various types of art and literature and the many socio-economic, political, and religious factors that influenced them. The class will focus on not only the absorption of information, but the process of critical thought and interpretation. (F,Y)

Attributes: CA, TIDE

2 Credits

THEA 24400 Cultural Context for Theatre Design II (LA)

This course is an intensive survey of the history of significant cultural expression in dress and architecture from the 19th century to present day. It is intended to give each student a base knowledge to draw from and expand upon in future projects and productions. Students will examine the development of visual and aural style by studying various types of art, music, and literature and the many socio-economic, political, and religious factors that influenced them. The class will focus on not only the absorption of information, but the process of critical thought and interpretation. (F,Y)

Attributes: CA, TIDE

2 Credits

THEA 25000 Marketing the Arts (NLA)

Examine integrated marketing and publicity strategies, concepts, designs, and implementation plans used by not-for-profit and for-profit organizations to attract and maintain loyal patron base. Participate in professional practice through simulated and real life application.

Prerequisites: THEA 25100 or THEA 25101. (F,Y)

4 Credits

THEA 25100 Theatre Administration I (NLA)

Survey of arts administration in the United States from the perspective of the arts organization or company. The course integrates real world scenarios through the study of the case method, lectures, and projects. (F,S,Y)

2 Credits

THEA 25101 Theatre Arts Administration II (NLA)

Overview of theatre arts administration in the United States from the perspective of the individual arts practitioner. The course integrates guest artists/professionals, hands-on projects, and career preparation activities to understand the interrelationship between arts practitioners and administration. (F,S,Y)

2 Credits

THEA 25400 Theatre Administration Practicum II (NLA)

Continuation of intermediate skills development in theatre administration practicum through a semester-long assignment in publicity, promotions, analytics, audience segmentation, and social media marketing.

Prerequisites: THEA 15000. (F,S,Y)

4 Credits

THEA 25500 Playwriting I (LA)

This course introduces students to the fundamental elements of play construction: plot, character, dialogue, conflict, language, rhythm, dramatic structure/journey. Through progressive writing assignments and specific feedback students are guided to complete and revise a 10-minute play, which is presented script-in-hand at the end of the semester in PlayFEST. Prerequisites: Any 100-level THEA course. (F,S,Y)

4 Credits

THEA 25600 Directing I (LA)

An introduction to the fundamental tools of stage direction. Prerequisites: THEA 10700, THEA 13100, or THEA 13300. (F,S,Y)

4 Credits

THEA 25700 Dramaturgy I (LA)

This course provides a comprehensive overview of the various functions and practices of the discipline of dramaturgy. Starting with the history of dramaturgy, the course explores core practices such as production dramaturgy, new play development, literary management, season planning, and the role of the dramaturg in adaptation. Students develop skills in critical reading, production research, audience outreach, collaboration with directors and playwrights, and the application of dramaturgical perspectives towards creative endeavors. Prerequisites: THEA 24100. (F,Y)

4 Credits

THEA 26000 Stage Management Practicum II (NLA)

Practical experience serving in a supporting role on a stage management team for the department's productions. May be taken twice for credit.

Prerequisites: THEA 16000 and THEA 16100. (F,S,Y)

2 Credits

THEA 26100 Stage Management (NLA)

Exploration of the management skills, operational techniques, and practices of stage management, from pre-rehearsal through postproduction. (F)

4 Credits

THEA 27800-27809 Special Liberal Arts Topics: Theatre (LA)

Topics of special interest in theatre, such as focused study of genre, playwrights, eras, or contemporary developments in theatre. These topics are liberal arts in nature. Students may take more than one special topics course for credit. (IRR)

Attributes: UND

1-3 Credits

THEA 27900-27901 Special Topics: Applied Theatre (NLA)

Topics of current interest in applied theatre, such as special problems in theatre, production, guest artist workshop, or contemporary developments in arts management. These topics are non liberal arts in nature. Students may take more than one special topics course for credit. (IRR)

1-3 Credits

THEA 31000 Theatre Production III (NLA)

Advanced technical supervision or design assignment in production for the department. May be repeated for a maximum of eight credits.

Prerequisites: THEA 21000. (F,S,Y)

4 Credits

THEA 31100 Advanced Costume Crafts (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical costume crafts, including: advanced sewing and patterning techniques, millinery, dyeing and painting fabric, and thermoplastics. Prerequisites: THEA 10300 or THEA 11300. (IRR)
4 Credits

THEA 31200 Advanced Scenic Technology (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical scenery technology, including: complex construction techniques, theatrical metal working, rigging for the theatre and moving scenery systems. Prerequisites: THEA 11200; THEA 21000. (S,Y)
4 Credits

THEA 31300 Advanced Costume Construction (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical costume construction, including: patterning, draping, pattern drafting, and tailoring/sewing skills. Prerequisites: THEA 11300. (S,Y)
4 Credits

THEA 31400 Advanced Lighting Technology (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical lighting technology, including: advanced console programming, moving light technology and projections. Prerequisites: THEA 11400 and THEA 21000. (F,Y)
4 Credits

THEA 31500 Advanced Sound Technology (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical sound technology, including: examination of the acoustic and electrical basis of sound and audio, the structure of audio systems, and the practical use of audio equipment. Prerequisites: MSRT 14300, or TVR 27100, or both THEA 11500 and THEA 21000 (may be taken concurrently). (F,Y)
4 Credits

THEA 31600 Advanced Theatrical Properties (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical properties technology, including: furniture construction, upholstery and mold making techniques. Prerequisites: THEA 11600; THEA 21000. (S,Y)
4 Credits

THEA 31700 Advanced Scenic Art (NLA)

Advanced study and practical experience in the tools and techniques used in theatrical scenic painting, including: faux finishes, translucencies, trompe l'oeil, and large scale projects. Prerequisites: THEA 11600 and THEA 21000 (can be taken concurrently). (F,Y)
4 Credits

THEA 32200 Advanced Scenic Design (LA)

Advanced study of the art of scenic design, examining complex and varied forms of dramatic works and the nature of collaboration inherent within theatrical design. Prerequisites: THEA 22200. (S,Y)
Attributes: FA
2 Credits

THEA 32201 Advanced Drafting and Model Building (LA)

Advanced tools and techniques used to model theatrical scenery prior to installation and the tools and standards used to document theatrical scenic design such as drafting. Prerequisites: THEA 22201. (S,Y)
2 Credits

THEA 32300 Advanced Costume Design (LA)

Advanced study of the art of costume design, examining complex and varied forms of dramatic works and the nature of collaboration inherent within theatrical design. Prerequisites: THEA 22300. (S,Y)
Attributes: FA
2 Credits

THEA 32301 Advanced Costume Rendering (NLA)

Advanced topics and application in the the rendering and design documentation tools used in theatrical costume design. Prerequisites: THEA 22301. (S,Y)
2 Credits

THEA 32400 Advanced Lighting Design (LA)

Advanced study of the art of lighting design, examining complex and varied forms of dramatic works and the nature of collaboration inherent within theatrical design. Additionally students will investigate varied professions within lighting design. Prerequisites: THEA 22400. (S,Y)
Attributes: FA
2 Credits

THEA 32401 Advanced Lighting Visualization and Documentation (NLA)

Advanced topics and application in the the pre-visualization and design documentation tools used in theatrical lighting design. Prerequisites: THEA 22401. (S,Y)
2 Credits

THEA 32500 Advanced Sound Design (LA)

Advanced study of the art of sound design, examining complex and varied forms of dramatic works. Prerequisites: THEA 22500 and THEA 31500. (S,Y)
Attributes: FA
2 Credits

THEA 32501 Theatrical Mixing (NLA)

Advanced topics and tools used in live theatrical audio mixing. Prerequisites: THEA 22501. (S,Y)
2 Credits

THEA 33100 Styles of Acting: The Greeks and Shakespeare (NLA)

Study and practice of acting technique appropriate to performing Greek tragedy and Shakespeare. Prerequisites: THEA 23400. (F,S,Y)
Attributes: CSA
3 Credits

THEA 33200 Styles of Acting: Farce and High Comedy (NLA)

Study and practice of acting technique appropriate to performing farce and comedy of manners. Prerequisites: B.F.A acting or musical theatre major and THEA 23300. Also offered through the London Center. (IRR)
3 Credits

THEA 33300 Musical Theatre Workshop I (LA)

A team-taught, interdisciplinary, performance-oriented course focusing on the examination and performance of the musical theatre song and the integration of music and theatre skills. Prerequisites: THEA 23300. (S,Y)
Attributes: FA
2 Credits

THEA 33400 Musical Theatre Workshop II (LA)

A team-taught, interdisciplinary, performance-oriented course focusing on audition techniques and advanced skills for the musical theatre performer. Prerequisites: THEA 33300. (F,Y)
2 Credits

THEA 33500 Advanced Voice, Speech, and Dialects for the Stage (NLA)

Advanced and specialized studies in voice production, speech sounds, dialects, and articulation. Open to BFA musical theatre majors on a space available basis, by permission of instructor. Prerequisites: THEA 23600. (F,Y)

3 Credits

THEA 33700 Voice-Over Acting (NLA)

The study of the techniques of voice-over acting and their application the wide variety of voice-over genre. Prerequisites: THEA 23500 and THEA 23600. (IRR)

3 Credits

THEA 34300 History of Costume and Decor I (LA)

Analyzes the aesthetics of various cultures and institutions as reflected in the apparel and objects of daily life. Also examines the cultural influences (religious, political, economic, etc.) on those aesthetics.

Prerequisites: Sophomore standing; B.F.A. theatre production & design majors only, or permission of instructor. (F,Y)

Attributes: 3B, FA, G, H

3 Credits

THEA 34400 History of Costume and Decor II (LA)

Analyzes the aesthetics of various cultures and institutions as reflected in the apparel and objects of daily life. Also examines the cultural influences (religious, political, economic, etc.) on those aesthetics. B.F.A. theatre production & design majors only. Prerequisites: THEA 34300. (S,Y)

Attributes: 3B, FA, G, H

3 Credits

THEA 34500 London Theatre and Culture – Walking Tour (LA)

Weekly guided on-site tours of historic and cultural areas of London, and visits to museums and exhibitions that play a significant role in London theatre. Offered only through the London Center. Lab fee applies. Pass/Fail only. (F,S,Y)

2 Credits

THEA 34700 London Theatre Immersion (LA)

Analyzes the role of theatre in contemporary society through the study of dramatic literature and live performance. Offered only through the London Center. Additional course fees for performances. (F,S,Y)

Attributes: 3B, DLIT, G, WI

4 Credits

THEA 34800 Drama and the London Theatre (LA)

Study of drama and performance involving current productions on the London stage. Critical analysis of the texts prior to performance. Offered only through the London Center. Additional course fees apply. This course is intended as a general education course; Theatre Arts students may not enroll in this course. (F,S,Y)

Attributes: 3B, DLIT, FA, G, H

3 Credits

THEA 35000 Theatre Administration Practicum III (NLA)

Advancing skills in theatre administration practicum through a semester-long assignment in a leadership role in front-of-house, marketing, or events on the Ithaca College campus, off-campus regionally or abroad, or remotely. Prerequisites: THEA 25400. (F,S,Y)

4 Credits

THEA 35100 Financing the Arts (NLA)

Examines the historic foundation and current trends of philanthropy and commercial investing to secure funding for arts and culture productions and events. Students participate in professional practice through real-life and simulated application. Prerequisites: THEA 25100 or THEA 25101. (S,Y)

4 Credits

THEA 35400 Playwriting I (LA)

This course introduces students to the fundamental elements of play construction: plot, character, dialogue, conflict, language, rhythm, dramatic structure/journey. Through progressive writing assignments and specific feedback students are guided to complete and revise a 10-minute play, which is presented script-in-hand at the end of the semester in PlayFEST. Prerequisites: Any 100-level THEA course. (F,S,Y)

Attributes: FA

4 Credits

THEA 35600 Directing II (LA)

The application of fundamental directing tools in a laboratory environment, culminating in the rehearsal and performance of a short scene. Permission of instructor required. Prerequisites: THEA 25500 with a grade of B or above. (S,Y)

Attributes: FA

4 Credits

THEA 35700 Dramaturgy I (LA)

This course provides a comprehensive overview of the various functions and practices of the discipline of dramaturgy. Starting with the history of dramaturgy, the course explores core practices such as production dramaturgy, new play development, literary management, season planning, and the role of the dramaturg in adaptation. Students develop skills in critical reading, production research, audience outreach, collaboration with directors and playwrights, and the application of dramaturgical perspectives towards creative endeavors. Prerequisites: THEA 24100. (F,Y)

Attributes: HU

4 Credits

THEA 36000 Stage Management Practicum III (NLA)

Practical experience serving in a primary role on a stage management team for the department's productions. May be taken twice for credit.

Prerequisites: THEA 26000 and THEA 26100. (F,S,Y)

4 Credits

THEA 36100 Advanced Stage Management (NLA)

Development and practical application of advanced management skills, operational techniques, and practices of stage management, from pre-rehearsal through postproduction. Prerequisites: THEA 26100. (S,Y)

4 Credits

THEA 40000 NYC Field Studies (NLA)

Week-long intensive professional preparation experience in New York City. Students network with alumni, attend theatrical productions, meet with professionals in theatre and allied industries in preparation to enter the profession. (S,Y)

0-1 Credits

THEA 41000 Theatre Production IV (NLA)

The culminating experiences for B.F.A. theatre production & design majors. Students undertake a significant and substantial assignment in production for the department. May be repeated for a maximum of eight credits. B.F.A. theatre production & design majors only. Prerequisites: THEA 31000. (F,S,Y)

4 Credits

THEA 41200 Theatre Production and Design Seminar (NLA)

Research into the expectations of the industry in the student's theatrical discipline leading to the creation of an effective resume, physical portfolio, and website portfolio for the profession or advanced study. Students will reflect upon their coursework within their major and across Ithaca College. (F,Y)

Attributes: CP

2 Credits

THEA 43000 Audition Techniques (NLA)

Training and practice in selecting, preparing, and presenting audition material. Open to BFA musical theatre majors on a space available basis only, by permission of instructor. Prerequisites: THEA 33100 or THEA 33200 (may be taken concurrently). (F,Y)

1.5 Credits

THEA 43100 Acting for the Camera (NLA)

Stage-oriented performers learn and practice acting techniques appropriate to video performance in collaboration with student and faculty directors. Open to B.F.A. musical theatre majors on a space available basis, with permission of instructor. Prerequisites: B.F.A acting majors; THEA 33200. (F,S,Y)

3 Credits

THEA 43300 Musical Theatre Workshop III (LA)

A team-taught, interdisciplinary, performance-oriented course focusing on the integration of dance, acting and musical skills, complex ensemble singing, and exposure to the process of rehearsing new works.

Prerequisites: THEA 33400. (F,Y)

Attributes: FA

2 Credits

THEA 43400 Musical Theatre Workshop IV (LA)

A team-taught, interdisciplinary, performance-oriented course focusing on building repertoire and the application of musical theatre skills in small and large ensemble work. Prerequisites: THEA 43300. (S,Y)

Attributes: FA

2 Credits

THEA 43500 Advanced Scene Study (NLA)

Advanced study and application of theories, vocabularies, and methodologies of acting techniques for rehearsal and performance of scenes and monologues. Prerequisites: THEA 33100; THEA 33200; or instructor permission. (IRR,Y)

3 Credits

THEA 43600 Theatre Showcase (NLA)

Preparation of audition materials for BFA Musical Theatre and BFA Acting students culminating in a theatre industry showcase with invited professionals. Prerequisites: Permission of instructor. (S,Y)

Attributes: CP

0-1 Credits

THEA 43700 The Business of Acting (NLA)

Introduction to the business and self-entrepreneur side of acting and the entertainment industry. Prerequisites: THEA 33100 (can be taken concurrently). (F,Y)

1.5 Credits

THEA 43800 Acting for Film & Media (NLA)

Introduction to acting techniques that are specific for working in film and media such as media vocabulary, film terminology, narrative languages of film and media, on-camera auditions, and voiceover skills. Prerequisites:

THEA 33100. (IRR)

3 Credits

THEA 44100 Contemporary Developments in Theatre (LA)

This course offers a path of exploration of contemporary developments in drama, theatre, and performance, with a focus on both US and global cutting-edge plays and performances. Students explore a variety of dramatic styles and performative methods, developing expanded tools of inquiry and analysis that contribute to their academic and professional careers. Prerequisites: THEA 24100. (F,S,Y)

Attributes: HU

4 Credits

THEA 44400 Senior Seminar (LA)

A selected topics seminar course combining theatre and performance history, critical theory, and adaptation. Students engage in advanced study and original research under the guidance of a faculty member and meet regularly to exchange information and hold discussions. The course culminates in a research project. Prerequisites: THEA 24100 and any dramatic literature course with a DLIT designation. (IRR)

Attributes: HU

4 Credits

THEA 44500 Theatre Studies Capstone (LA)

The culminating course for Theatre Studies majors. Students will consider through class discussion and assignments how their major coursework has prepared them for the theatre profession and the course additionally prepares students for reflecting upon the entirety of their Ithaca College experience. Prerequisites: Senior standing. (S,Y)

Attributes: CP, UND

1 Credit

THEA 44600 Theories of Performance (LA)

This course is designed to provide students with an overview of the theoretical framework that accompanies performance in its broad definitions. Theories examined include "critical theories" including semiotics, phenomenology, post-structuralism and deconstruction, postmodern theory, and post-colonial theory, along with other contemporary theoretical discourses. Students critically analyze core theories of performance and apply them in reading, critiquing, and creating a group performance. Prerequisites: THEA 24100. (S,Y)

Attributes: HU

4 Credits

THEA 44700 Theatre Studies Ensemble (NLA)

Collaborative ensemble course that encourages students to apply skills from their area(s) of focus to the development and performance of a new piece of theatre. Prerequisites: Two of the following: THEA 35400, THEA 35500, or THEA 35700. (S,Y)

3 Credits

THEA 45100 Theatre Administration Seminar (NLA)

The culminating course for Theatre Administration majors. Through case method and reflective assignments, students consider how their major coursework has prepared them for the theatre profession, while reflecting upon the entirety of their Ithaca College experience. (S,Y)

Attributes: CP

2 Credits

THEA 45400 Playwriting II (LA)

Writing of a full-length play. Class discussion and analysis of student writing, supplemented by individual conferences with the instructor and rehearsals/workshops with an Ensemble of Actors. Prerequisites: THEA 25500. (S,Y)

Attributes: FA

4 Credits

THEA 45600 Directing II (LA)

The application of fundamental directing tools in a laboratory environment, culminating in the rehearsal and performance of a short scene. Permission of instructor required. Prerequisites: THEA 25500 with a grade of B or above. (S,Y)
4 Credits

THEA 45700 Dramaturgy II (LA)

This course deepens the study of dramaturgy as students refine their skills in production research, gain insight into international and non-conventional practices of dramaturgy, and apply dramaturgical practices in devised theatre and new play development. The course includes experiential assignments in production dramaturgy and theatre criticism. Prerequisites: THEA 25700. (S,Y)
4 Credits

THEA 46000 Stage Management Practicum IV (NLA)

Practical experience leading a stage management team for the department's productions. May be taken twice for credit. Prerequisites: THEA 36000 and THEA 36100. (F,S,Y)
4 Credits

THEA 46100 Stage Management Seminar (NLA)

The culminating course for Stage Management majors. Students will consider through class discussion and assignments how their major coursework has prepared them for the theatre profession and the course additionally prepares students for reflecting upon the entirety of their Ithaca College experience. Co-requisites: THEA 46000. (F,Y)
Attributes: CP
2 Credits

THEA 47800-47801 Special Topics: Theatre (LA)

Topics of special interest in theatre, such as focused study of genre, playwrights, eras or contemporary developments in theatre. These topics are liberal arts in nature. Students may take more than one special topics course for credit. (IRR)
Attributes: UND
1-3 Credits

THEA 47900-47901 Special Topics: Applied Theatre (NLA)

Topics of current interest in applied theatre, such as special problems in theatre production, guest artist workshop, or contemporary developments in arts management. These topics are non liberal arts in nature. Students may take more than one special topics course for credit. (IRR)
1-3 Credits

THEA 49000-49001 Theatre Projects (NLA)

Independent pursuit of applied production projects. May be repeated for a total of six credits. Prerequisites: Junior or senior standing; by special permission of departmental curriculum committee. (F,S,Y)
1-4 Credits

THEA 49100-49105 Professional Internship Theatre (NLA)

A one-semester internship with a professional performing arts organization. Student's work is monitored and evaluated by faculty adviser. Also offered through the London Center. Prerequisites: Junior standing; departmental permission. Maximum of (F,S,Y)
1-12 Credits

THEA 49900-49901 Independent Study: Theatre (LA)

Special reading and research under the supervision of the department. Also offered through the London Center. May be repeated for a total of six credits. Prerequisites: Junior or senior standing; special permission of departmental curriculum committee. (F,S,Y)
1-4 Credits

Women's, Gender, and Sexuality Studies (WGST)

WGST 10000 Introduction to Women's, Gender, and Sexuality Studies (LA)

Provides a critical perspective that examines the world through the lens of gender and sexuality and encourages new ways of seeing and thinking about people and institutions. Interdisciplinary introduction to the questions, findings, methods, and theories of women's, gender, and sexuality studies scholarship. Examines how multiple forms of feminisms have shaped the practice of women's, gender, and sexuality studies and enabled the field to increasingly recognize differences among women. Applies theory on gender and sexuality in order to analyze diverse conditions and experiences in the United States and across the world. This class is open to all interested students and is a requirement for the WGSS major and minor. (F,S,Y)
Attributes: DV, ESE
4 Credits

WGST 22000 Introduction to Queer Studies (LA)

Examines contemporary LGBTQ (also known as queer) studies, primarily from feminist/queer/trans theoretical perspectives and utilizing a social constructionist standpoint. Includes interdisciplinary and historical explorations of LGBTQ lives and practices, with a focus on intersectionality. (F,S,Y)
Attributes: CNSL, DV, ESE, HM, SO, TIDE, TPJ, WGS
4 Credits

WGST 26100 Psychology of Women (LA)

In-depth examination of the psychology of women in contemporary society. Review of the research on gender differences and consideration of the theories (social learning, psychoanalytic, and biological) that have attempted to explain the differences. Focuses on some of the central experiences of women's lives (including relationships, work, mothering, sexuality, and mental health), with particular attention to the ways in which women's psychological development differs from that of men's in a patriarchal society. Develops effective writing for different purposes and audiences, as well as oral and/or visual presentation skills. PSYC 26100 and WGST 26100 are cross-listed courses; students may not receive credit for both. Prerequisites: PSYC 10300 and PSYC 10500 (may be taken concurrently). (F,Y)
Attributes: ACS, CC, CNSL, DV, ESE, WGS, WGSC
4 Credits

WGST 28800-41000 Selected Topics: Women's, Gender, and Sexuality Studies (LA)

Topics of current interest in women's, gender, and sexuality studies that focus on women and gender as crucial categories of analysis, and explore their intersections with race, class, sexuality, and nation (among other social categories). Can be repeated once for a total of eight credits, when topics vary. (IRR)
Attributes: ESE, WGS, WGS1
3-4 Credits

WGST 42000 Independent Study: Women's, Gender, and Sexuality Studies (LA)

Independent study projects are arranged individually between student and instructor. A proposal for the topic and specific plans must be approved by the coordinator of Women's, Gender, and Sexuality Studies. Permission of instructor required. Prerequisites: WGST 10000. (F,S,Y)
Attributes: WGS, WGS3, WGSC, WGS1
1-4 Credits

WGST 43000 Internship: Women's, Gender, and Sexuality Studies (NLA)

Internships are arranged individually at the student's request with individual instructors and a sponsoring agency. A learning contract for an internship must be approved by the coordinator of the Women's, Gender, and Sexuality Studies program and by the School of Humanities and Sciences dean's office. May be repeated once. Permission of instructor required. Prerequisite: WGST 10000. (F,S,Y)

Attributes: WGS, WGSC, WGSJ

1-12 Credits

Writing (WRTG)

WRTG 10600 Academic Writing I (LA)

This introductory writing course teaches academic writing as a craft that includes multiple genres and technologies. Students locate, evaluate, and integrate information into projects that see them forming and supporting their own arguments and positions. Academic writing as a craft is anchored in rhetorical situations of audience, context, purpose, language, and image. It is also an ethical practice that grapples with questions of diversity, equity, and inclusion. The course therefore enables students to enter academic, civic, and professional conversations with rhetorical awareness. (F,S,Y)

Attributes: 3A, HU

4 Credits

WRTG 16400 Writing for Professional Success (LA)

Introduces students to the rhetorical awareness, social conventions, and writing habits necessary to succeed in complex and diverse academic, professional, and media settings. Engages with the foundational elements of communication, preparedness, cultural competency, personal organization, and resiliency. Course materials will provide students the tools and opportunity to discover new professional interests and to turn their interests into actionable goals. (F,S,Y)

4 Credits

WRTG 16600 Introduction to Literacy, Rhetoric, and Culture (LA)

Introduces students to the ways literacies, languages, and cultures are intertwined. Studies how writerly traditions are formed across systems of identity, ideology, and power. Explores a range of rhetorical traditions, including activism and knowledge production outside of higher education. (F,S,Y)

4 Credits

WRTG 17500 Introduction to Creative Writing (LA)

This class offers a hands-on exploration of what creative writing is and why we write it. Students experiment with genres of fiction, creative nonfiction, and poetry while also challenging the boundaries of genre. Students analyze strategies used by other writers from a diverse range of cultural experiences and reflect on how creative writing engages identity in intentional ways that unveil systems of power. (F,S,Y)

Attributes: 3A, CA, FA, HM, MC, TIDE, TIII

4 Credits

WRTG 20100 Argument: Rhetoric and Ethics (LA)

This course teaches students to map arguments across positions, communities, and contexts, and to build skills in logic, research, cultural competency, and audience engagement. Through use of rhetorical theories, students develop projects that seek to transform conversations in social justice, current events, and scholarly inquiry. Prerequisites: ICSM 10800, ICSM 11800, or WRTG 10600. (F,S,Y)

Attributes: HU, LSCO, MC, WRPW, WRRC

4 Credits

WRTG 20500 Personal Essay (LA)

Introduction to writing essays in which students explore their own memories, experiences, observations, perspectives, and identities. Emphasis is placed on self-interrogation and inquiry, as well as craft techniques such as narration, description, reflection, and analysis. Course material will provide examples of the personal essay form and help students examine the insights and limitations of personal experience as they consider the self within the context of the larger world. Prerequisites: ICSM 10800, ICSM 11800, or WRTG 10600. (F,S,Y)

Attributes: 3A, CA, HM, HU, TIDE, WRCW, WRRC

4 Credits

WRTG 21100 Writing for the Workplace (LA)

Basic on-the-job writing necessary to join, manage, and promote any organization, whether profit or nonprofit. Focus is primarily on short forms: résumés, memos, business letters, summaries, brochures, newsletters, press releases, informal proposals, and reports. Course also explores how various social, economic, and ethical issues affect workplace writing. Prerequisites: ICSM 10800, ICSM 11800, or WRTG 10600. (F,S,Y)

Attributes: ESTS, HU, WI, WRPW

4 Credits

WRTG 21300 Technical Writing (LA)

Fundamentals for communicating technical, medical, and scientific information to general and specialized audiences. Class emphasizes the foundations of technical writing, their formats and applications, context-specific writing strategies, basic visual design, and ethics. Some reading in and discussion of the history of technology and its influence on human society and culture. Prerequisites: ICSM 10800, ICSM 11800, or WRTG 10600. (F,E)

Attributes: ESTS, HU, WI, WRPW

4 Credits

WRTG 21700 Inquiry, Research, and Writing Across the Curriculum (LA)

Prepares students across the disciplines to engage in inquiry-based research, examining questions relevant to their fields and interests and producing substantial formal writing in a range of research genres. Emphasizes writing and research as recursive processes. Focuses on development of effective research practices, including identifying, locating, evaluating, and integrating sources ethically and effectively. Prerequisites: ICSM 10800, ICSM 11800, or WRTG 10600. (F,S,Y)

Attributes: HM, TIII, WI, WRRC

4 Credits

WRTG 21900 Communication Studies Practicum (NLA)

Practical experience in speech on campus, at the intercollegiate level, and in the community at large; debate and legislative assemblies; discussion, oratory, impromptu, and extemporaneous speaking; oral interpretation and readers' theater. The instructor will designate the minimum activities required to receive credit. May be repeated for a total of Pass/fail only. Permission of instructor. (F,S,Y)

1 Credit

WRTG 22500 Grammars and Usages (LA)

Studies grammar as a constantly changing communal negotiation of how our many Englishes work. Examines grammar as it manifests in history, linguistics, literature, and education. Through both creative and technical assignments, students will develop their skills as writers, editors, copyeditors, speakers, and listeners. Prerequisites: ICSM 10800, ICSM 11800, or WRTG 10600. (F,S,Y)

Attributes: HU, WRRC

4 Credits

WRTG 23200 Creative Nonfiction (LA)

Advanced creative nonfiction course that blends the study of genre theory with writing practice, attention to writing process, and an introduction to nonfiction publishing in diverse venues. Focuses on writing works of various lengths that fit within, and perhaps test the boundaries of, the creative nonfiction genre. Prerequisites: at the 200-level in WRTG. (F,S,Y)

Attributes: ESTS, HU, WRCW
4 Credits

WRTG 23600 Fiction Writing I (LA)

Students study and practice strategies of writing fiction, developing skills of process including conception, planning, drafting, reflection, and revision. Students analyze and discuss fiction from a diverse range of cultural experiences. Prerequisites: WRTG 17500. (F,S,Y)

Attributes: 3A, FA, WRCW
4 Credits

WRTG 23800 Poetry Writing I (LA)

A combination reading and practice course in which students will develop poetic strategies, encounter diverse contemporary lyric writing, and practice writing poetry to reflect a range of forms and modes within the genre. Attention will also be focused on how the choices we make as writers of poetry might shape what the reader experiences. Analysis of published models of poetry and student writing will lead to work in revision and culminate in a portfolio of revised pieces. Prerequisites: WRTG 17500. (F,S,Y)

Attributes: 3A, FA, WRCW
4 Credits

WRTG 24500 Translation and Self-Discovery (LA)

Theory and practice of translation as a form of writing that leads to discovery and self-discovery. Students read texts related to the role of translation in disparate areas of knowledge and select and translate short texts into English and from English into a second language with the goal of experiencing the field of translation, deepening their relationship to their own language, and finding their voice (or a new voice) in another language. This course is intended for students with an intermediate-level reading and writing proficiency in a language other than English. Cross-listed with LNGS 24500; students may not receive credit for both courses. Prerequisites: WRTG 10600, ICSM 10800, or ICSM 11800. (IRR)

Attributes: HM, TIDE, TIII, WI
4 Credits

WRTG 25200 Sophomore Internship (NLA)

Work and study project designed by the student early in undergraduate career, in consultation with a faculty sponsor and a practicing professional. The H&S internship proposal includes learning objectives, a detailed work plan, and a description of the student's plans for reports to the faculty sponsor. May be repeated up to 3 or total. Offered on demand only. Prerequisites: Two WRTG courses. (F,S,U,Y)

1-3 Credits

WRTG 30100 Memoir (LA)

Advanced memoir course that blends the study of genre theory with writing practice and attention to writing process. Focuses on writing works of various lengths that fit within, and perhaps test the boundaries of, the memoir genre. Prerequisites: WRTG 20500 or WRTG 23600. (F,S,Y)

Attributes: 3A, FA, WRCW, WRRC
4 Credits

WRTG 30500 Writing Science Fiction and Fantasy (LA)

Advanced creative writing course in science fiction and fantasy that emphasizes the importance of character and thematic development. Assignments also focus on the selection of subject, setting, and narrative techniques. Readings in science fiction and fantasy serve as models for approaches to these two genres. Students interrogate the complex relationship between form and content, analyze fiction from a diverse range of cultural experiences, and position their own writing in the world with intentionality. Prerequisites: WRTG 23600. (S,Y)

Attributes: FA, WRCW
4 Credits

WRTG 31000 Women and Writing (LA)

Introduction to and exploration of gender and women's experience, both historical and contemporary, through different literary forms. Students will become familiar with and apply feminist theory to a variety of creative forms. Writing assignments may include nonfiction, fiction, poetry, and/or dramatic writing. Readings by women writers past and present. Prerequisites: WRTG 20500, WRTG 23600, or WRTG 23800. (F,S,Y)

Attributes: 3A, FA, WGS, WGS3, WGSC, WRCW, WRRC
4 Credits

WRTG 31100 Writing for the Professions (LA)

Advanced, thematically centered workplace writing focusing on more complex forms: policy statements, position papers, dossiers, legal documentation, and long reports. Course themes vary and encourage dialogue on major issues among different professions in business, government, law, and medicine. All sections are grounded in argument, ethics, and the humanities. Class readings may include casebooks, theoretical essays, or historical documents. Prerequisites: One 200-level course in Liberal Arts and WRTG 10600 or ICSM 10800. (S,O)

Attributes: ESTS, WI, WRPW
4 Credits

WRTG 31400 Science Writing (LA)

Advanced expository course on journalistic and literary scientific writing. Students learn to communicate scientific facts and theories to professional and sophisticated lay readers through description, analogy, narrative, and argument. Some discussion of the technical and scholarly conventions of formal scientific writing. Class readings include major humanistic essays from the history of science and articles and features from contemporary popular and scientific publications. Prerequisites: One 200-level course in Liberal Arts and WRTG 10600 or ICSM 10800. (E,S)

Attributes: ESTS, WI, WRPW
4 Credits

WRTG 31700 Proposal and Grant Writing (LA)

Advanced workplace writing concentrating on proposals and grants. Students address problems in the local community while studying the interplay among business, education, government, and nonprofits. Attentive to civic responsibility in the marketplace, this course teaches research and assessment, project management, editing, and document design. Group work emphasizes social networks and service learning. Prerequisites: One 200-level course in Liberal Arts and WRTG 10600 or ICSM 10800. (F,Y)

Attributes: ESTS, SL, WI, WRPW
4 Credits

WRTG 31800 Writing from Cultural Experience (LA)

Advanced essay course in which students explore the significance of their own ethnic and cultural identity, background, and experience. Writing assignments encourage students to employ a variety of essay styles and structures – from personal to public and from narrative to analytical. Appropriate for any students who recognize their life experience as distinct by virtue of their nationality, race, religion, region, gender, sexual preference, or culture. Prerequisites: WRTG 20100, WRTG 20500, or WRTG 23200. (IRR)

Attributes: 3A, DV, HU, WRCW, WRRC
3 Credits

WRTG 31900 Writing as a Naturalist (LA)

Advanced expository essay course focusing on human interactions with the rest of the natural world. Readings are selected from the writing of naturalists, environmentalists, scientists, legislators, artists, poets, and philosophers. Writing assignments include field observation, description, analysis, and argument. Prerequisites: Two ENVS courses level 2 or above; WRTG 20100, WRTG 20500, or WRTG 23200. (IRR)

Attributes: 3A, ESTS, HU
3 Credits

WRTG 32000 Public Rhetorics and Writing (LA)

Explores how public writing opens windows onto social, environmental, cultural, or political realities for particular readers in specific places and times. Studies rhetorical situations—in which purpose, audience, medium, and context determine the form, including style, structure, content, and length. Through the writing they both analyze and produce, this advanced expository course invites students to bring their own values, perspectives, insights, and voice to bear on matters of public concern. Prerequisites: WRTG 20100, WRTG 20500, or WRTG 23200. (F,S,Y)

Attributes: ESTS, HU, LSCO, WRRC
4 Credits

WRTG 32500 Writing Children's and Young Adult Literature (LA)

Writing literature for children and young adults. In addition to studying stylistic approaches and techniques, the course addresses issues such as appropriate subject matter, writing for specific age groups, and the writer's ethical responsibility. Reading assignments may include classic and contemporary works, fairy tales and myths, and critical and historical essays. Prerequisites: WRTG 23600. (FY)

Attributes: ESE, FA, WRCW
4 Credits

WRTG 33000 Style and Syntax (LA)

Advanced expository course applying grammatical knowledge to the study of prose style. Close analysis of sentence structures and rhetorical devices used by exemplary writers, along with exercises and practice in revision of students' own prose. Prerequisites: Junior standing; WRTG 22500. (IRR)

Attributes: HU, WRRC
3 Credits

WRTG 33100 Feature Writing (LA)

Advanced expository course in developing the skills necessary to write informative, accurate, and interesting feature articles suitable for print or online publications. Students learn interviewing and reporting skills, as well as feature genres, style, and structure. Prerequisites: WRTG 20100, WRTG 20500, or WRTG 23200. (F)

Attributes: HU, MC
3 Credits

WRTG 33200 Creative Nonfiction (LA)

Advanced creative nonfiction course that blends the study of genre theory with writing practice, attention to writing process, and an introduction to nonfiction publishing in diverse venues. Focuses on writing works of various lengths that fit within, and perhaps test the boundaries of, the creative nonfiction genre. Prerequisites: at the 200-level in WRTG. (F,S,Y)

Attributes: ESTS, WRCW
4 Credits

WRTG 33300 Writing for Popular Media (LA)

Covers the writing of feature articles, reviews, essay or op-ed columns, and other forms of nonfiction with attention to publication strategy. Coursework intends to prepare students for the process of publication in the professional world. Emphasis is placed on developing story ideas and writing in appropriate journalistic style, as well as researching, reporting, organizing, and pitching content suitable for publication. Prerequisites: at 200-level in WRTG or in JOUR. (F,Y)

Attributes: WRPW
4 Credits

WRTG 33400 Humorous Writing (LA)

Writing humorously in the comedic or satiric mode. Introduces a variety of humorous forms, such as monologue, parody, caricature, and irony. Readings from past and present works contribute to a study of the historical, philosophical, psychological, and cultural dimensions of humor. Major emphasis is placed on creative writing. Prerequisites: WRTG 20500 or WRTG 23600. (S,Y)

Attributes: FA, WRCW
3 Credits

WRTG 33600 Fiction Writing II (LA)

Students build on the practice and strategies of Fiction Writing I to draft and revise more advanced works of fiction. Students interrogate the complex relationship between form and content, analyze fiction from a diverse range of cultural experiences, and position their own writing in the world with intentionality. Prerequisites: WRTG 23600. (F,S,Y)

Attributes: FA, WRCW
4 Credits

WRTG 33800 Poetry Writing II (LA)

An advanced workshop for students with a serious commitment to the art of writing poetry. Students build on the study begun in WRTG 23800, striving for a greater understanding of issues and techniques in poetry. Rigorous analysis of poetry, including how poems function to reflect and/or critique their social contexts, is required. Prerequisites: WRTG 23800. (S,Y)

Attributes: FA, WRCW
4 Credits

WRTG 34000 Magazine Writing (LA)

Experience in researching, writing, and marketing magazine articles, with an emphasis on features. Students study the various types of articles and analyze magazines for their content, audience, and editorial policy and slant, using this understanding to write for particular magazines of their choice. Students learn reporting and research techniques, as well as how to query editors. Prerequisites: WRTG 20100 or WRTG 20500; JOUR 11100 or WRTG 33100. (S,Y)

Attributes: HU
3 Credits

WRTG 34100 Travel Writing (LA)

Combines analysis of issues related to travel writing and writing within the genre. Explores goals, audiences, and forms of travel writing. Taught online and available only to students away from the Ithaca campus.

Students are requested to discuss travel locations with professor prior to registration. Prerequisites: WRTG 20100, 20500, or 23200; permission of instructor. (F-S,Y)

Attributes: HU, WRPW

3 Credits

WRTG 34200 Writing about Sports (LA)

Advanced expository course in writing essays about sports for a variety of audiences, and developing and articulating standards for that writing.

Readings selected from past masters and contemporary practitioners to provide a context for class discussion and for descriptive, analytical, and argumentative writing. Emphasizes establishing an authentic voice.

Prerequisites: WRTG 20100, WRTG 20500, or WRTG 23200. (IRR)

Attributes: HU

3 Credits

WRTG 34500 Writing as a Critic (LA)

Advanced expository course on the essentials of writing arts reviews and criticism for newspapers, magazines, and trade journals, both print and online. Subjects for review include film, theater, music, dance, performance media, literature, painting, printmaking, sculpture, photography, television, radio, videos, games, and digital media. Also addresses the social and aesthetic functions of arts criticism, the development of criteria for judgment, and the role and responsibility of the critic. Reading assignments include critical models as well as essays on the theory and practice of criticism. Prerequisites: WRTG 20100, WRTG 20500, or WRTG 23200; any two courses beyond level 1 in art, art history, literature, theater, music, dance, photography, television-radio, video, or film. (S)

Attributes: HU

3 Credits

WRTG 35000 Selected Topics in Expository Writing (LA)

Advanced expository writing course, offered at irregular intervals on topics chosen by faculty members. May be repeated for credit when topics vary. For writing minors, the course may be an elective or fulfill a level-3 minor requirement. Prerequisites: Junior standing; one writing course at level 2 or above (specified by name and number at time of offering). (IRR)

Attributes: HU, WGS3

3 Credits

WRTG 35400 Selected Topics in Creative Writing (LA)

Advanced creative writing course, offered at irregular intervals on topics chosen by faculty members. May be repeated for credit when topics vary. For writing minors, the course may be an elective or fulfill a level-3 minor requirement. Prerequisites: Junior standing; WRTG 20500 or one creative writing course at level 2 or above (specified by name and number at time of offering). (IRR)

Attributes: FA

3 Credits

WRTG 36000 Language, Literacy, and Writing Studies (LA)

Explores theoretical and practical connections among language, literacy, and writing, focusing on research and theory that inform the field of Writing Studies. Explores questions such as: How are authority and identity achieved in writing? How are language and literacy part of systems of power and privilege? What types of writing or discourse are privileged in higher education? How has assessment excluded certain voices in the academy? How does technology and multimodality impact how we think, read, write, learn and share cultural resources?

Applies theoretical knowledge and skills to professional contexts and communities of practice. Prerequisites: WRTG 20100; WRTG 20500.

(F,S,Y)

Attributes: ESE, HU, WRRC

4 Credits

WRTG 36500 Poetics (LA)

Introduction to Western theories of creative writing as a means of investigating the relationships between writer, text, and world. Addresses cultural/political, psychological, philosophical, and aesthetic concerns.

In addition to rigorous analysis of historical and contemporary texts, students will examine their own creative work and process. Prerequisites: WRTG 23600 or WRTG 23800. (F,S,Y)

Attributes: HU, WRCW

4 Credits

WRTG 38000 Visiting Writers' Workshop (LA)

An advanced writing workshop offered each semester to coincide with the Department of Writing Distinguished Visiting Writers series. Requires 15 contact hours in meetings, conferences, and classes with both the visiting writer and the writing faculty coordinator. Students produce a 15-page revised manuscript of new work in the relevant genre over the course of the semester. May be repeated up to three times for credit.

Prerequisites: Junior standing; permission of instructor. (F-S,Y)

Attributes: UND

1 Credit

WRTG 41000 Senior Project (LA)

Advanced independent project designed by writing majors no later than their second junior semester and relating to their particular concentration or area of interest. The project, is usually undertaken in the second semester of the student's senior year. Work in the final portfolio is evaluated by the faculty mentor. Students are encouraged but not required to give a public presentation or reading of their work during their senior year. Writing majors only. Prerequisites: Senior standing; WRTG 31100, WRTG 32000, WRTG 33600, or WRTG 33800; WRTG 36000 or WRTG 36500; permission of instructor. (F,S,Y)

3 Credits

WRTG 41500 Senior Seminar (LA)

Small group setting for students to undertake focused, intensive exploration and research of ideas and issues in writing within selected advanced topics not provided elsewhere in the curriculum. Provides opportunity for advanced coursework that nurtures serious investigation of specific issues within their discipline, and fosters intellectual dialogue about writing among students. Seminar topics vary each semester. Satisfies the ICC Capstone requirement. Permission of instructor required. Prerequisites: Two WRTG courses, at least one of which must be at 300-level. (F,S,Y)

Attributes: WI

4 Credits

WRTG 42000 Apprenticeship (NLA)

Service as a teacher's apprentice in a 100-level writing course, correcting and commenting on student papers, tutoring, leading class exercises or discussions, and participating in conferences. To be eligible, students must have completed two writing courses above level 1, with at least one B and one A- as final grades; should have successfully completed the course to which they are apprenticing; and should have a desire to work with students enrolled in Academic Writing I or II, Personal Essay, or Argument. Prerequisites: Senior standing and permission of instructor. (F-S,Y)

3 Credits

WRTG 43600 Writing the Novella (LA)

This advanced fiction-writing seminar offers students the opportunity to develop a novella. The course extends previously learned narrative elements, such as characterization, plot, setting, point of view, tone, and voice, and applies them to a broader, more complex literary canvas. Students will create narratives that allow for multiple characters who interact within an expanded social context or that permit the extended exploration of a single character in considered detail. Prerequisites:

WRTG 33600. (F,Y)

Attributes: FA, WRCW

4 Credits

WRTG 45000-45001 Internship: Writing (NLA)

Work and study project designed by the student, in consultation with a faculty sponsor and a practicing professional. The proposal includes learning objectives, a detailed work plan, and a description of the student's plans for reports to the faculty sponsor. Prerequisites: Junior standing; three writing courses above level 1. Offered on demand only. May be repeated up to twelve credits. (F-S,Y)

1-6 Credits

WRTG 49800 Independent Study: Exposition (LA)

Student-initiated expository writing project focusing on a specialized area. For the qualified, advanced student, by agreement with a faculty member. Approval of the writing department chair must be obtained one semester in advance of the proposed project. Prerequisites: Senior standing; three writing courses above level 1; additional prerequisites depending on topic. (F-S,Y)

Attributes: HU

1-3 Credits

WRTG 49801 Independent Study: (Exposition) (LA)

Student-initiated expository writing project focusing on a specialized area. For the qualified, advanced student, by agreement with a faculty member. Approval of the writing department chair must be obtained one semester in advance of the proposed project. Prerequisites: Senior standing; three writing courses above level 1; additional prerequisites depending on topic. (F-S,Y)

Attributes: HU

1-4 Credits

WRTG 49900 Independent Study: Creative Writing (LA)

Student-initiated creative writing project focusing on a specialized area. For the qualified, advanced student, by agreement with a faculty member. Offered on demand only. Approval of the writing department chair must be obtained one semester in advance of the proposed project. Prerequisites: Senior standing; three writing courses above level 1; additional prerequisites depending on topic. (F-S,Y)

Attributes: FA

School of Business

Michael Johnson-Cramer, Dean
Dawn Kline, Associate Dean

Introduction

The Ithaca College School of Business offers a bachelor of science degree program in accounting; a bachelor of science degree program in business administration, with concentrations in corporate accounting, finance, international business, management, marketing, sport marketing, and sport management; and two graduate degree programs, all of which are accredited by the Association to Advance Collegiate Schools of Business (AACSB) International. Our undergraduate programs are designed to prepare students for careers in business and industry, for graduate school, or for the CPA/CMA examinations. Students are encouraged to seek additional information about these programs in this catalog or from the dean's office.

Strong academic advising is available from the School of Business faculty and the staff and student services team in the dean's office to help students make the choices necessary to be successful at Ithaca College and in the future.

Vision

To be recognized for excellence, innovation and a student focus in teaching, research, and service.

Mission

Deliver an innovative and inclusive student-centered business education, steeped in the liberal arts and experiential learning, to develop graduates who make a positive impact on business and society.

Guiding Principles and Values

- Commitment to diversity and inclusive excellence
- Student engagement and empowerment
- Outcome-based measures of student learning
- Application of theory to real world national and international problems
- Strong partnerships with students, alumni, and industry
- Sense of community
- Support for innovation and creativity
- Environment of collegiality and collaboration
- Entrepreneurial thinking and activity
- Living and learning in ways to foster sustainability and social responsibility

AACSB Accreditation

Accreditation by the Association to Advance Collegiate Schools of Business (AACSB) is the hallmark of excellence in business education and has been earned by less than five percent of the world's business programs. Founded in 1916, AACSB International is the longest serving global accrediting body for business schools. Ithaca College School of Business has maintained accreditation for its business degree programs at the undergraduate and masters levels since 2005.

The Professions Program

The Professions Program is a professional development curriculum required for all students majoring in Business Administration or Accounting. It is a four-year program that allows students to develop progressive skills and gain experiences that will prepare them for competitive internships and careers. Additional information may be found on the Professions Program website (<https://www.ithaca.edu/academics/school-business/professional-development/students/professions-program-requirements/>).

Students in the School of Business are encouraged to complete at least one internship prior to graduation. Students are not required to complete an internship for academic credit, but have the option to do so. For more information, please visit the School of Business's internships website (<http://ithaca.edu/business/internships/>).

Majors

- Accounting Major – B.S. (p. 251)
- Business Administration Major – B.S. (p. 262)

Minors

- Accounting Minor (p. 251)
- Business Minor (p. 265)
- Business Analytics Minor (p. 265)
- Entrepreneurship & Innovation Minor (p. 265)
- Finance Minor (p. 265)
- International Business Studies Minor (p. 265)
- Marketing Minor (p. 266)
- Pre-MBA Minor (p. 266)

Certificates

- Certificate in International Business (p. 266)

Academic Policies

High School Preparation for Accounting and Business Administration Majors

We strongly recommend that, in addition to the college preparatory courses necessary for admission to Ithaca College, students take at least three years of mathematics in high school. Algebra should be taken at the highest level possible. The more preparation obtained at the high school level, the more readily students can adapt to the quantitative aspects of the business education of today and the business world of tomorrow.

Satisfactory/D/Fail Option

Typically, no ACCT, BINT, FINA, GBUS, INTB, MGMT, MKTG, or SMGT course may be taken on an S/D/F basis by accounting and business majors or minors. (Business courses taken as open electives above and beyond required courses may be taken S/D/F with approval of the Dean.) Moreover, neither STCM 24100 (<http://catalog.ithaca.edu/search/?P=STCM%2024100>) nor STCM 23200 (<http://catalog.ithaca.edu/search/?P=STCM%2023200>) may be taken S/D/F by business majors or minors because these courses are considered business electives for business students. Non-business courses required for a major or minor cannot be taken on an S/D/F basis.

The following categories of courses may be taken S/D/F by accounting and business majors:

- ICC Themes & Perspectives and Diversity courses;
- open non-business liberal arts electives;
- approved international liberal arts electives (by accounting majors, international business certificate students, and international business concentrators); open electives that are not business courses;
- and internships (which are offered pass/fail only).

All other courses must be taken for a letter grade.

Students enrolled in the international business certificate program should note the S/D/F stipulations for that program. The foreign language and international business/economics courses may not be taken on an S/D/F basis. A maximum of two courses in the area studies/international relations track may be taken on an S/D/F basis.

Application of Courses to More than One Concentration or Minor

Business Administration majors may use a course to satisfy degree requirements in more than one business concentration or minor as long as they complete 12 unique credits in each concentration/minor. Similarly, if a program of study outside the School of Business requires a business course, students majoring in that subject may also apply the business course toward a business major, concentration, or minor.

Academic Advising

Faculty Advising

Facilitating student growth and learning is a priority for business school faculty and staff. Each student who is a business school major is assigned a faculty adviser to assist with progress toward completing their major requirements and to serve as a resource for exploring interests and career goals. It is strongly recommended that business school majors meet with their advisers at least twice each semester, once at the beginning of the semester and again during the advising period before online registration for the following semester. Students who are business school minors are assigned to a faculty adviser in the School of Business in addition to their major adviser.

Professional and Peer Advising

Student Services Team & Academic Services Coordinator

The Student Services desk is staffed by team of highly-trained students and overseen by the Academic Services Coordinator. The Student Services Team (SST) is available on a drop-in basis to help students with HomerConnect, academic forms, curriculum and prerequisites, mapping

out a plan to graduation, and the Professions Program requirements. The Academic Services Coordinator oversees student records and degree progress for students in the School of Business, offers prescriptive advising to students, and serves as a resource to faculty advisors on degree requirements and program planning.

Peer Advising Program

Peer advisers are students trained in academic policies and procedures and in skills to help first-year students in matters relating to academic programs. Each year a selection process is conducted for interested and competent students. The availability of this service encourages students to view advising as an ongoing process that involves more than just registering for a course.

Dean's List

In order to earn a place on the dean's list in the School of Business, students must satisfy all of the following criteria:

1. a minimum semester grade point average of 3.50;
2. completion of a minimum of 15 credits, of which at least 12 are graded (not pass/fail or Satisfactory/D/F option); and
3. no final grades of D, F, or I.

Internships for Credit

For business administration and accounting students, there are two types of internships for credit. Students can choose to do an internship for credit only. Credits earned can be counted towards a 300-level general business requirement or open elective. The second type of internship is designed to allow students to synthesize the academic theory they have learned with real-world experiences. Credits earned in an internship with academic enhancement may be counted towards a 400-level major or concentration-specific elective.

Students wishing to complete an internship for credit should meet with the associate dean to discuss the application process. Internships are available during the fall, spring, summer semester, and winter breaks. An internship may not be repeated for credit with the same employer. A maximum of 12 credits may be earned in any combination of internships.

For internships with academic enhancement, students must be seniors and they must have attained a minimum cumulative GPA of 2.70 and completed the appropriate principles course in their respective major or concentration. London Center internships are for 3 credits per semester only. Internships in the School of Business are graded on a pass/fail basis only. To qualify for internships for credit, students must be juniors and in good academic standing.

For more information, please visit the School of Business internships website (<http://ithaca.edu/business/internships/>).

Study Abroad

The London Program

School of Business majors are encouraged to participate in the London Center study-abroad program during their sophomore or junior year. We recommend that discussion and planning begin in the student's first year. Students can obtain descriptive literature from the Office of International Programs. Course planning should be worked out with the faculty advisor and the Office of International Programs (<http://www.ithaca.edu/oip/>).

For more information, please visit the Office of International Programs website (<http://www.ithaca.edu/oip/>).

Other Study-Abroad Opportunities

School of Business majors are encouraged to study abroad during their sophomore or junior year. Both affiliated and non-affiliated programs offer opportunities for students to learn about other cultures, improve their foreign language skills, and, in some cases, fulfill business course requirements. Course planning can be worked out with the faculty adviser. More information about study-abroad options is available on the Office of International Programs website (<http://www.ithaca.edu/oip/>).

Independent Study

Students may pursue an independent study with the guidance of a faculty member. The purpose of independent study is to enable students to pursue personal academic interests in an area not covered in or beyond the scope of existing courses. Independent-study projects normally involve research into a topic, with a written report as the final product, but variations are accepted when appropriate. A variable amount of credit may be earned toward the degree. To qualify, a student must have a minimum cumulative GPA of 3.00 and must have completed at least 6 credits in the subject matter. Guidelines are available at the School of Business office. Please note carefully the application deadlines for each term, which usually occur at the end of the add/drop period.

Honors

Dean's Award

Each year the dean, in consultation with the school's faculty, selects one or more graduating seniors for the Dean's Award. The award is given in recognition of superior scholastic achievement and extracurricular service to the College, school, and student body.

Dean's Leadership and Distinguished Service Award

Each year the dean, in consultation with the school's faculty, selects one or more graduating seniors for the Dean's Leadership and Distinguished Service Award. The award is given in recognition of distinguished leadership activities and service to the College, school, and student body.

Accounting

Three students are selected by the accounting faculty to receive awards for excellence by the Southern Tier chapter of the New York State Society of Certified Public Accountants in the areas of auditing, taxation, and accounting. Each year the top senior finance major is selected by the finance faculty to receive the Wall Street Journal Student Achievement Award.

Beta Alpha Psi

Beta Alpha Psi is an honorary organization for finance and accounting students and professionals. The primary objective of Beta Alpha Psi is to encourage and give recognition to scholastic and professional excellence in the field of business information. Ithaca College's Mu Alpha chapter invites undergraduate students in good student conduct standing with a declared major in accounting or a concentration in finance or corporate accounting who have completed at least 30 credit hours and attained a minimum cumulative GPA of 3.30 to join as candidates for initiation. Upon completion of participatory and community service requirements, at least 60 credit hours, a minimum cumulative GPA of 3.30, and at least a 3.30 cumulative GPA in upper-level accounting and finance courses at Ithaca College, candidates may be initiated as student members into the Mu Alpha chapter of Beta Alpha Psi. Degree-seeking graduate students focusing on accounting or finance also shall be eligible for membership.

Beta Gamma Sigma

Lifetime membership in Beta Gamma Sigma is the highest recognition a business student anywhere in the world can receive in a business program accredited by AACSB International. Founded in 1913, the mission of Beta Gamma Sigma is to encourage and honor academic achievement in the study of business and to foster personal and professional excellence in the practice of business. Undergraduate 2nd semester sophomores in Accounting or Business Administration who have completed 30 credits at Ithaca College, 18 credits in Business and Economics, and who rank in the top 7.5% of their class will be invited to membership. Juniors and seniors who rank in the top 10% percent of their class who have completed 30 credits in the School of Business will also be invited. Master's candidates must rank in the upper 20 percent of their graduating class in order to be eligible for induction. Candidates must also be of good moral character.

Minors

A minor is a course of study that introduces a field and provides modest depth into its subject matter. Students should take care to satisfy all prerequisites and to note other information in the catalog pertaining to sequences of courses, class standing, and regulations of other schools.

MINORS FOR SCHOOL OF BUSINESS MAJORS

The School of Business has designed its degree programs to provide substantial flexibility. Open and liberal arts electives allow students to pursue breadth and depth in other units of the College, or with the business analytics or entrepreneurship minor. Students are strongly encouraged to develop a plan of study with their academic advisers early in their college careers to accomplish academic and professional goals. Students interested in a minor should contact the department of interest to determine the application process. Accounting and business administration majors may not minor in accounting, business, finance, international business, management, or marketing, but business administration majors may elect to have more than one concentration.

MINORS FOR NON-BUSINESS MAJORS

Undergraduate students who are neither accounting nor business administration majors may choose from the minors offered by the school of business. In cases where there are overlapping courses between a student's major and minor, the student must complete a minimum of 12 unique credits to satisfy the requirements of the minor. In a few cases of significant overlap, a student may be prohibited from declaring a minor. See specific minors for more information.

Accounting

The accounting curriculum prepares students for a range of careers in accounting and serves as an excellent background for graduate studies and law school. Students develop strong communication, interpersonal, and problem-solving capabilities while learning to apply theoretical concepts and use accounting data, along with other analytical measurements, for decision making. Many challenging positions are available for students with accounting backgrounds.

Majors & Minors

- Accounting Major — B.S. (p. 251)
- Accounting Minor (p. 251)

Subjects on this page include: Accounting (ACCT) (p. 243), Business - Interdisciplinary Studies (BINT) (p. 244), Finance (FINA) (p. 245),

General Business (GBUS) (p. 247), Management (MGMT) (p. 247), and Marketing (MKTG) (p. 250).

Accounting (ACCT)

ACCT 22400 Accounting for the Real World (NLA)

Theory and procedures used to gather financial information and to present formal financial statements of a business enterprise. Emphasis on analyzing decision-making situations and the use of quantitative techniques used in financial and managerial accounting. Enrollment limited to non-business and non-accounting majors. (Y)
3 Credits

ACCT 22500 Financial Accounting (NLA)

Introduction to the basic measurement and reporting concepts underlying the accounting system for communicating financial information to users external to the organization and to internal managers. Topics include information processing, review of financial statements, the role of ethics in accounting decisions, and valuation and reporting issues for assets, liabilities, stockholders' equity, revenues, and expenses. Sophomores who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: One course in Business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT). (F,S,Y)
2 Credits

ACCT 22600 Management Accounting (NLA)

Study of the uses of accounting information in managerial decision making, planning, and control within the firm. Areas examined are cost estimation; budgets; short-, intermediate-, and long-term planning; product costing; and special reports for managerial use. Emphasizes the uses of accounting outputs in the decision-making process rather than the concepts and methodology of accumulating accounting information. Projects include the use of basic computerized spreadsheets. (F,S,Y)
2 Credits

ACCT 30700 Commercial Law (NLA)

Introduction to commercial law concepts. Topics include common law contracts and sales contracts under the UCC, business entity selection, formation, operation, and termination, and the rights and obligations of owners and management; determining employee versus independent contractor status, and why it matters; agency law; creditor-debtor law (including secured transactions, mortgages, and bankruptcy); and anti-bribery laws. Emphasis on the application of legal concepts to solve problems. (Y)
4 Credits

ACCT 31500 Cost Analysis and Decision Making (NLA)

A study of various cost systems, theories, and models of cost and revenue behavior. The course focuses on cost management, cost analysis, and both structured and unstructured decision making with cost information. Product costing and the interface with the financial reporting system will also be covered. Prerequisites: ACCT 22600; junior standing. (S,Y)
3 Credits

ACCT 32000 Accounting Information Systems (NLA)

Acquaints students with the functions, design, implementation, and documentation of information systems. The general topic of information systems, focusing on accounting applications (both financial and managerial), is covered. Extended coverage of transaction processing, internal controls, and computer security. Prerequisites: COMP 11000 or COMP 17100; ACCT 22600; junior standing. (IRR)
3 Credits

ACCT 34500 Intermediate Accounting I (NLA)

This course covers essential topics related to balance sheet valuation and income measurement. Includes an overview of generally accepted accounting principles, financial statements, cash, accounts receivable, inventories, operating assets, current and long-term liabilities, cash flows, and revenue recognition. Prerequisites: ACCT 22500; sophomore standing. (F,Y)
3 Credits

ACCT 34600 Intermediate Accounting II (NLA)

This course is a continuation of ACCT 34500 Intermediate Accounting I. It covers complex topics related to balance sheet valuation and income measurement and includes both topical coverage and reporting considerations. Students are expected to deal with detailed pronouncements and the advanced concepts in Intermediate Accounting, such as accounting for pensions, income taxes, earnings per share, and accounting changes. Reporting issues and requirements are also covered. Prerequisite: ACCT 34500 and sophomore standing. (S,Y)
3 Credits

ACCT 39700 Selected Topics in Accounting (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

ACCT 40200 Advanced Accounting (NLA)

In-depth analytical study of special problems in financial accounting. Continuous emphasis is placed on the relationship between theory and practice to reflect the latest professional pronouncements. Highly technical topics related to corporation, partnership, government, and not-for-profit organizations, including consolidation, branch and consignment, reorganization and liquidation, foreign transactions, and essentials of accounting for governmental and not-for-profit organizations. Prerequisites: ACCT 34600. (IRR)
Attributes: UND
3 Credits

ACCT 40600 Auditing (NLA)

Theory of independent examinations of financial statements. Discussion of relationships with clients; working papers; audit procedures, including evaluations of internal control; accounting principles; preparation of reports; accountant's liability; and professional ethics. Prerequisites: ACCT 34500; junior standing. (F,Y)
3 Credits

ACCT 49300 Tax Accounting (NLA)

Introductory course in taxation covering structure of present tax law; bases for income tax computations; and concepts of gross income, adjusted gross income, deductions, exemptions, and credits. Emphasis is on tax questions and problems relating to individuals. A student may not receive credit for both this course and ACCT 31100. Prerequisites: ACCT 22500; junior standing. (F,Y)
3 Credits

ACCT 49400 Advanced Tax Accounting (NLA)

Advanced study of income tax provisions relating to individuals, corporations, and partnerships. Sophisticated tax provisions, such as corporate liquidations, capital charges, stock options, and pension plans. Solutions to complex tax problems through use of a tax service; practical experience in locating applicable code sections, regulations, IRS rulings, and court decisions; class presentations. Prerequisites: ACCT 49300; junior standing. (IRR)
Attributes: UND
3 Credits

ACCT 49600 Practicum in Tax Accounting (NLA)

Supervised work experience in tax return preparation and tax advocacy that mirrors tax practice in accounting firms. Students undertake an intensive course preparing tax forms for individuals and must successfully pass the IRS VITA volunteer tax preparer exam. Students then are responsible for maintaining the professional requirements of the established tax practice. Tax returns are computerized and electronically filed. Students and faculty utilizing collaborative learning strategies provide tax advocacy and disseminate information to taxpayers who have English as a second language. Professional skills are emphasized. Prerequisites: ACCT 49300 or junior standing with instructor permission. (S,Y)
Attributes: SL
3 Credits

ACCT 49700 Selected Topics: Accounting (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

ACCT 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)
1-6 Credits

ACCT 49900 Independent Study: Accounting (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,IRR,U,Y)
1-3 Credits

Business - Interdisciplinary Studies (BINT)

BINT 10000 First-Year Seminar in Business (NLA)

Links the challenges faced by first-year college students with similar demands in business settings. Students learn that many of the issues they face individually in transition from high school to college have parallels to those faced in business organizations. Topics covered include time management, goal setting, learning styles, communication skills, and resource utilization, among others. Open to first-year business students only. (F,Y)
1 Credit

BINT 10100 World of Business (NLA)

Surveys the functional areas of business, namely management, finance, accounting, operations, marketing, entrepreneurship, and sustainability. Links the challenges faced by first-year college students with similar demands on management in business settings. (F,Y)
4 Credits

BINT 10400 Informational Interview (NLA)

This program allows students to explore a career path of interest by conducting an interview with a professional. The student is expected to contact an individual within their selected profession and conduct and interview based on questions provided by the Business-Link Professions Program. Upon completion of the interview, students will write up a reflection and submit it to the Business-Link Professions Program office for review and grading. Open to first and second year business students only. This course is offered in block I and II. Prerequisites: Business-Link Professions Workshop 1, completion of School of Business Informational Interview application and Permission of Instructor. Pass/fail only. (F,S, SUM, W)
0 Credit

BINT 19800 Internship for Credit (NLA)

Off-campus experience involving varied, non-routine work designed to allow students to learn about realworld operations of an organization. Pass/fail only. (F, S, SUM, W)
1-6 Credits

BINT 19900 Washington, D.C. Practicum (NLA)

Off-campus experience in Washington, D.C., involving varied nonroutine work projects that allow students to synthesize classroom learning with on-the-job learning acquired by working in an organization. The program puts primary responsibility on the student to carry out program requirements in conjunction with a faculty sponsor. Prerequisites: BINT 10100; sophomore standing; minimum of 2.50 cumulative grade point average at Ithaca College. Credits may only be used as open elective credits and may not be used as business elective credit or to replace other business coursework. Pass/fail only. (F-S,Y)
3-6 Credits

BINT 20400 Career Exploration (NLA)

This off-campus experience gives students more insight into their desired profession through a 30 hour job shadowing experience by providing them an opportunity to observe daily functions of the organization and to interview staff in order to learn various aspects of the organization. Upon conclusion, a reflection must be submitted to the Business-Link Professions Program Office for review and grading. Open to first and second year business students only. This course is offered in block I and II. Prerequisites: Business-Link Professions Workshop 2; BINT 10400; completion of School of Business Career Exploration application and permission of instructor. Pass/fail only. (F,S,U,W)
0 Credit

BINT 21000 Boom, Bust and the American Economic Cycle (LA)

This introductory survey course will look at the historical developments in the U.S. economy with special focus on the role of capital markets and financial services industry, from the 1930s to the present. We will critically examine such crucial events as stock markets collapses, major legislations governing the operations of financial markets & institutions, and milestones like the Great Recession and the Subprime Lending Crisis. The common thread throughout the course is to identify and analyze the interrelationship of myriad political, regulatory, economic, technological, global, and socio-psychological forces that have shaped the boom and bust cycles in the US economy. Various viewpoints focusing on the practical aspects of enforcement, social welfare through consumer protection, political roadblocks, and campaign finance reform will be evaluated. Prerequisite: Sophomore Standing. (F,S)

Attributes: SO, TWOS

3 Credits

BINT 39800 Internship for Credit (NLA)

Off-campus experience involving varied, non-routine work designed to allow students to learn about realworld operations of an organization.

Prerequisites: Junior Standing; good academic standing; completion of Business-Link Professions Workshops 1,2,3; School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

BINT 40400 Business Link Professions Program (NLA)

The Business-Link Professions Program integrates the professional development activities required of Accounting and Business Administration majors. The program enables business students to develop professional skills that are needed for successful careers.

Throughout their time as majors, students complete a series of four theme-based workshops conducted by business school staff, faculty, alumni and/or employers, and one leadership certificate program, either leading-others or leadership-in-a-diverse-world. Successful completion of this course indicates the BLPP graduation requirement has been met.

Pre-requisite: Senior standing. Accounting and Business Administration majors only. (P/F only). (F, S, SU)

0 Credit

Economics (ECON) Finance(FINA)

FINA 10301 Fun with Investments (NLA)

Mini-course covering the fundamentals of investing, particularly in equities and fixed-income securities. Basic concepts and principles of investing, security pricing, and risk vs return. (B,F,S,Y)

1.5 Credits

FINA 10302 Minicourses in Finance (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

FINA 10400-10402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed FINA 32100. (Y)

1.5 Credits

FINA 12500 Introduction to Personal Finance (NLA)

A basic personal finance course, dealing with various aspects of individual financial decision making. Introduces financial investments, including stocks, bonds, and mutual funds and an overview of the individual income tax system. The fundamentals of personal financial statements, financing home and auto purchases, retirement planning, estate management, and insurance are also covered. Enrollment limited to non-business students. (Y)

3 Credits

FINA 20300 Financial Markets and Institutions (NLA)

A broad introduction to the structure and operation of the U.S. financial system through examination of the major financial institutions, markets, and instruments that compose it. Emphasis is on the functions and interrelationships of these elements and on identifying various government institutions and regulations overseeing the system.

Prerequisites: ECON 12100. (F,S,Y)

3 Credits

FINA 20400-20402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed FINA 32100. (IRR)

1.5 Credits

FINA 21000 Personal Financial Planning and Wealth Management (NLA)

The main goal of this course is to provide students with a foundation needed to make important decisions that affect their short- and long-term financial well-being as well as introduce students to concepts relevant to the Wealth Management profession. Students will learn the basic concepts and their applications through several delivery methods, which may include: self-analysis, case studies, and interactive web-based tools.

Prerequisites: BINT 10100. (F,S,Y)

3 Credits

FINA 30400-30401 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 30402 Mini-courses in Finance- Intro to Derivatives (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 31100 Business Finance (NLA)

An in-depth examination of the principle of time value of money with its applications in various areas of financial decision making in organizations to include stock and bond valuation, capital budgeting, and capital structure within the risk-return framework. Decisions about dividend policies, operating and financial leverage, and sources of short-term financing are also addressed. Prerequisites: ECON 12000 and ACCT 22500. (F,S,Y)

4 Credits

FINA 31500 Real Estate Finance (NLA)

Financing of residential properties (types of loans, underwriting, appraisal, and closing; analysis of income-producing properties), cash-flow identification, tax implications, leverage, and valuation, real estate investment performance, sources of real-estate funding, secondary mortgage markets, and the role of government policies. Prerequisites:

FINA 31100; junior standing. (IRR)

3 Credits

FINA 31700 Insurance and Risk Management (NLA)

Study of risk and the risk management process with a major focus on insurance as a risk management tool. Legal principles, institutional aspects, and international issues. Business and personal risk management and government insurance. Corequisites: FINA 31100; junior standing. (IRR)
3 Credits

FINA 32100 Security Analysis and Portfolio Management (NLA)

In-depth study of the techniques used to analyze securities and portfolios. Risk and return trade-off; asset allocation; portfolio selection; diversification; capital asset pricing model; efficient market hypothesis; fixed income securities and equity valuation models; duration; derivative assets. Prerequisites: FINA 31100. (F,S,Y)
3 Credits

FINA 37000 International Finance (NLA)

Study of the conceptual and practical aspects of international finance through in-depth analysis of international financial markets, exchange rate determination, and exchange rate risk exposure and management. Concentration on working capital management and international capital budgeting strategy. Students develop an understanding of the dynamic relationship between exchange rates and fundamental economic variables. Prerequisites: FINA 31100; junior standing. (S,Y)
3 Credits

FINA 37500 Fixed Income Analysis and Portfolio Management (NLA)

The primary purpose of this course is to introduce the basic concepts of fixed income investing as well as various fixed income instruments. Topics covered include: Bond math, the yield curve, fixed income risk management, as well as the role of the economy and interest rates. Students will also work in teams and identify securities to invest in as part of the Fixed Income Portfolio. Prerequisites: FINA 31100. (S,Y)
3 Credits

FINA 38000 Equity Portfolio Management (NLA)

Equity Portfolio Management aims to provide students with the fundamental groundwork needed to manage equity investments in a portfolio setting. Students will learn the necessary skill set through a mixture of managing an actual equity portfolio combined with a focus on business cycles, sector analysis, estimating expected risk and return metrics, and finally equity evaluation. Prerequisites: FINA 32100. (F-S, Y)
3 Credits

FINA 39700 Selected Topics: Finance (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

FINA 40400-40402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics. (IRR)
1.5 Credits

FINA 40500 Wealth Management (NLA)

The study of wealth management draws on course work from various disciplines. Topics may include fiduciary responsibility, investments, risk and insurance, taxation, and business and property law. Wealth management involves customized and sophisticated solutions dependent on the net-worth and financial objectives of the investor household. Students learn to formulate and implement appropriate plans for the accumulation, conservation and transfer of a client's personal wealth, dependent on specific client situations. Prerequisites: FINA 21000; FINA 32100. (F,Y)
3 Credits

FINA 41900 Speculative Markets (NLA)

In-depth analysis of options and option markets. Review of put and call options, option pricing formulas, and option strategies. Discussion of new developments such as interest rate options and options on future contracts. Second half focuses on the futures market, pricing the commodity futures and financial futures, and optimal hedging strategies based on futures. Prerequisites: FINA 31100; FINA 32100; junior standing. (IRR)
3 Credits

FINA 42000 Alternative Asset Management (NLA)

Teaches advanced finance students about the Alternative Investment Industry as well as the products and investments used in this area of investment. In depth analysis will be performed to fully evaluate such vehicles as hedge funds, private equity, commodities, and real estate. Prerequisites: FINA 32100. (F,Y)
3 Credits

FINA 47000 Financial Analysis and Forecasting (NLA)

An advanced finance elective that examines applied financial research and analysis in great depth. Topics covered include advanced financial analysis including ratio analysis, valuation methods, discount rates, as well as econometric techniques applied to financial research and forecasting. TSP, an econometric software, is used in some homeworks and project. Prerequisites: FINA 32100; senior standing. (IRR)
3 Credits

FINA 48000 Advanced Business Finance (NLA)

A capstone course in finance that combines theories of financial management with practical application through case analysis. Financial theories with respect to risks and returns, capital structure and cost of capital, optimal capital budget, short- and long-term financing decisions, and other topics concerning multinational financial management. Students may be required to write and present analyses of cases in the class. Prerequisites: FINA 32100. (F,Y)
3 Credits

FINA 49700-49702 Selected Topics in Finance (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
Attributes: UND
1-3 Credits

FINA 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

FINA 49900 Independent Study: Finance (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,IRR,U,Y)

1-3 Credits

General Business (GBUS)**GBUS 20300 Business Law I (NLA)**

Introduction to contracts law under both the common law and the Uniform Commercial Code. Topics include contract formation (offers, counteroffers, consideration, and acceptance), enforcement, breach, and damages. Emphasis is placed on the application of legal concepts to solve problems. (Y)

2 Credits

GBUS 20400 Legal Environment of Business II (NLA)

Continuation of GBUS 20300 Legal Environment of Business. This course focuses on business organizations and the regulation of business. Topics covered include agency and issues in employment law, forms of business organizations, partnerships, corporations, securities regulation, environmental law, antitrust law, corporate social responsibility, the Uniform Commercial Code, debtor-creditor relations, and selected current topics in law. Emphasis is on case analysis, including the social, ethical, political, and economic considerations of the impact of law on business and society. Emphasis is also placed on the application of legal concepts to solve problems. Prerequisites: GBUS 20300; sophomore standing. A student cannot receive credit for both GBUS 20400 and GBUS 30700. (S,Y)

3 Credits

GBUS 30700 Commercial Law (NLA)

In-depth analysis of the commercial law. Topics include Uniform Commercial Code (UCC) Article 2: sales contracts and risk of loss issues; Article 3: negotiable instruments and the holder-in-due-course doctrine; Article 6: bulk transfers; Article 9: secured transactions; bankruptcy; creditor and debtor rules; mortgages; liens; principals and agents; antitrust legislation; special corporation topics, such as LBOs and insider trading; liability of corporate officers and directors; and ethical considerations. Prerequisites: GBUS 20300; junior standing. Previously titled Business Law II (Accounting). A student may not receive credit for both GBUS 30700 and GBUS 20400. (S,Y)

3 Credits

GBUS 31000 International Business Law (NLA)

An analysis of commercial law in an international context. Topics covered include major national and international trade regulations; international sales, credits, and commercial transactions; resolution processes for international disputes; U.S. trade law; import and export laws; GATT; and the regulation of the international marketplace. Emphasis is on the application of legal concepts to solve problems. Prerequisites:

GBUS 20300; junior standing. (S,Y)

Attributes: LMAL

3 Credits

Management (MGMT)**MGMT 10300 Minicourses in Management (NLA)**

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10301 Minicourses in Mgmt (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10302 Minicourses in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10303 Minicourses in Mgmt (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MGMT 10304 Management Minicourse: Women in Business (NLA)

This course includes lectures, readings and guest speakers, which will help us to explore present-day findings of women in corporate and entrepreneurial settings. Topics will include current research of women in business, leadership development, family/life balance, mentorship, network influence and ultimately gender differences in the workplace. Open only to Business Administration majors. (IRR)

Attributes: WGS

1.5 Credits

MGMT 10305 Minicourse in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MGMT 11100 Introduction to Business (NLA)

Overview of the world of business, its management, and its economic, political, and social environment. Particular note is taken of the areas of finance, accounting, personnel, production/operations, marketing/sales, and their interdependence. Not available to declared business majors. (Y)
3 Credits

MGMT 20600 Organizational Behavior and Ethics (LA)

Exposes students to two major areas of inquiry: 1) how to successfully manage life at work, and 2) how to apply ethical concepts/tools related to the management of organizations. In doing so, it investigates ethical theories and their application in the workplace, as well as topics on how individuals and groups act within the organizations where they work including: employee attitude development, personality, motivation, group structure and dynamics, leadership, decision-making, and job design. Sophomores who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: Two courses in business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT), or ECON. (F,S,Y)
4 Credits

MGMT 21300 Hidden Entrepreneurs (NLA)

Hidden Entrepreneurs is the study of unique and unexpected entrepreneurs and how their entrepreneurial spirit helps drive American business at so many levels. Unwinding the general public's modern-day conception of "entrepreneurs", this course focuses on a variety of businesses and business people that embody the concept of entrepreneurship in different ways and forms. Some entrepreneurs are groups within larger companies, while some are in government agencies. Some are unexpected and each one is unique - yet all bonded together by a common passion. (S,Y)
3 Credits

MGMT 21400 Startup Tactics: From Accounting to Zoning, Tactical Considerations When Starting a New Company (NLA)

Study the tactics for running a new business venture's day to day activities in an interactive, hands-on way. Learn how to incorporate a business, raise money, hire a lawyer, run a board meeting, do a marketing campaign, negotiate a contract, hire and fire employees, and many more skills. Understand how to execute on the actions necessary for a well-run startup to set and achieve its goals. (S,Y)
3 Credits

MGMT 22500 Business Models and the Art of Profitability (NLA)

Learn the design and economic drivers for over 30 unique business models, and how to identify them when you learn about a new company. Develop the capability to understand what business model a company is currently using, and how to assess whether they should modify their business model. Discuss and debate business model similarities and difference in an interactive classroom environment. (F,Y)
3 Credits

MGMT 23000 Entrepreneurial Innovation (NLA)

Learn how to generate ideas for a new business venture. Once that list of great business ideas is created, analyze and validate which idea is most worthy of pursuing. Succinctly communicate this validated business idea in order to attract customers, investors, partners, and employees. The class is hands-on and real world focused. As has happened in past semesters, students will go on to launch real companies. (F,Y)
3 Credits

MGMT 23500 Ideas into Action: Launching your Business Idea (NLA)

Launch your own entrepreneurial business by applying the best practices in starting new companies to your business idea. Learn the methodology of how to do quality Customer Discovery to best understand your customer's needs, and then design a business model for how to best succeed. Plan and communicate your business model in a business pitch to experienced and successful alumni and community entrepreneurs. Prerequisites: MGMT 23000. (S,Y)
3 Credits

MGMT 26000 Business Analytics and Technology I (NLA)

Concepts and principles of business data analytics and the role analytics plays in business management. The focus is on business data analytics techniques. Students will use up-to-date data analytic tools and must demonstrate proficiency in the use of these tools as part of the course requirement. Prerequisites: MATH 14400 or MATH 14500 or PSYC 20700. (F,S,Y)
2 Credits

MGMT 29800 ITHACON: Promoting and Managing Conventions (NLA)

The course will use the creation, implementation, and assessment of the long-running, annual pop culture ITHACON event to help students learn about trade shows and conventions. Students will be exposed to event studies theory and techniques and be provided with a unique hands-on experience. The course will also focus on analysis and advance planning for the next iteration. Students will also learn about the entrepreneurial world of entertainment, publishing, and pop culture. (S,Y)
3 Credits

MGMT 30500 Data-Driven Management Decisions (NLA)

Managers are frequently given business advice whose validity is seldom questioned. This course sheds light on this process by helping students develop solid analytic practices using data from surveys and interviews. The goal is to improve students' ability in assessing the quality of knowledge derived from management research. Students evaluate the validity of managerial reports, learn to exercise caution in accepting research conclusions, get experience with basic analytic techniques, and craft stories based on data they have analyzed. Prerequisites: MGMT 20600; MATH 14400, MATH 14500, or PSYC 20700. (S)
3 Credits

MGMT 31200 Leadership and Collaboration (LA)

This course focuses on the nature of leadership and power dynamics in modern organizations. This course develops students' abilities to create and use sources of power and to create a climate for leadership and change. In addition, the course provides a survey of methods to sustain and develop both personal and organizational power, including the network-building and conflict-handling skills needed to manage the increasingly pluralistic interests found in organizations. This course develops students' abilities to motivate human resources, facilitate team building, and guide organizational change. Prerequisites: MGMT 20600 or both PSYC 31600 and PSYC 33400. (F,Y)
3 Credits

MGMT 34000 Human Resource Management (NLA)

This survey course provides an overview of human resource policies and procedures within the context of managerial decision making in organizations. Primary topics include human resource planning and analysis, equal employment opportunity, staffing, human resource development, compensation and benefits, health and safety, and labor-management relations. Prerequisites: Three courses in business or social sciences; junior standing. (Y)

3 Credits

MGMT 34500 Operations Management (NLA)

An introduction to operations management for managing the resources (including people, facilities, inventories, processes, and systems) that create value (in the form of a product or a service) for an organization.

Prerequisites: MATH 10400, MATH 10800, or MATH 11100 and MATH 14400, MATH 14500, or PSYC 20700. (F,S,Y)

2 Credits

MGMT 36500 Intermediate Business Analytics (NLA)

Provides the background and skills necessary to analyze data, including big data, in support of decision making in the business environment. The following topics will be covered: foundations of business analytics, descriptive analytics, predictive analytics, and prescriptive analytics.

Computer-based tools will be incorporated throughout the course and selected for their applicability to business applications, but the analytical foundation will be the spreadsheet and, to a lesser extent, the database. Students will develop expertise in database technology to the point at which forms and reports can be created and generated, and advanced spreadsheet technologies to include use of dashboards. Prerequisites: MGMT 26000. (S, Y)

3 Credits

MGMT 39100 Managing for Sustainability (NLA)

Examines the challenge of maintaining sustainable business strategies while meeting the needs of various stakeholders. Will investigate various models of business sustainability and how to integrate sustainability concerns into managerial functions. Prerequisites: MGMT 20600. (IRR)

3 Credits

MGMT 39700-39705 Selected Topics in Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

Attributes: UND

1-3 Credits

MGMT 39706 ST: Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MGMT 42100 Strategic Management (NLA)

Deals with upper-level management skills and attitudes as they encompass all basic business fields. Stresses the integration of the various disciplines studied and the opportunity to develop managerial decision-making abilities. Students will utilize professional communication and teamwork skills. Open only to students in the School of Business. Prerequisites: ACCT 22600; MGMT 20600; FINA 31100; MKTG 31200; MGMT 34500. (F,S,Y)

Attributes: CP

3 Credits

MGMT 45100 Small Business Seminar I (NLA)

Introduction to the concepts and principles of small business management. Case study analysis will lead to practical understanding and application of management concepts. Prerequisites: Upper-level standing, permission of instructor. (F,IRR)

3 Credits

MGMT 46000 Leading Organizational Change (NLA)

Capstone course for the management concentration. In-depth examination of the nature, strategies, models, and intervention activities associated with planned change efforts for organizational improvement. Students build on previous knowledge of organizational structure and processes through independent readings and research, culminating in a challenging team-consulting experience in an ongoing organization.

Prerequisites: MGMT 31000 or MGMT 31200, management elective from approved list; senior standing. (S,Y)

3 Credits

MGMT 48100 Advanced Decision Making with Analytics (NLA)

Course provides a multidisciplinary perspective on analytics, applying a wide range of techniques in diverse settings. Students will employ basic statistical tools (tabulation, hypothesis testing, correlation) in a variety of new applications as well as some new tools used for prediction (decision trees, neural networks, logistic regression) and clustering. All content and exercises will be based on large data sets ("big data") and use appropriate state-of-the-art software for data analysis. Emphasis will also be placed on visualization and reporting results. Prerequisites: MATH 24600; MGMT 36500. (S,Y)

3 Credits

MGMT 49600 Negotiations (NLA)

Negotiation is the science of securing agreements between two or more interdependent parties. The central issues of this course deal with understanding the behavior and relationships of managers, departments/units, and organizations in a business setting. The course is designed to build a negotiation skill-set that can be applied to a broad set of situations in organizations. In this light, a range of cooperative and competitive situations will be examined. A basic premise of the course is that while you need analytic skills to discover optimal solutions to problems, a broad array of skills are needed for these solutions to be accepted and implemented. The course will allow participants the opportunity to develop these skills experientially and to understand useful analytic frameworks. Considerable emphasis will be placed on simulations, role plays, and cases. Prerequisites: Junior standing. (S,Y)

3 Credits

MGMT 49700-49704 Selected Topics in Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MGMT 49714 ST: Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MGMT 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

MGMT 49900 Independent Study: Management (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y)

1-3 Credits

Marketing (MKTG)

MKTG 10300-10303 Minicourses in Marketing (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: as appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

MKTG 31000 Quantitative Methods in Business (NLA)

A study of quantitative tools used in solving business problems. Statistical quality control and decision models, regression methods, linear programming, and CPM- and PERT-type models. Using computers to solve problems is an important aspect. Prerequisites: MATH 14400 or PSYC 20700; junior standing. (IRR)

3 Credits

MKTG 31200 Principles of Marketing (NLA)

Study of concepts, activities, and decisions related to the exchange process, management of the marketing mix, and development of marketing strategy for profit and not-for-profit organizations. Addresses the sociocultural, legal and regulatory, technological, economic, ethical, political, and social responsibility dimensions to marketing in the global environment. Juniors who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: Three courses in business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT) or STCM, with at least one course at the 200-level. (F,S,Y)

3 Credits

MKTG 32300 Consumer Behavior (NLA)

Study of consumer behavior variables and their impact on marketing. Includes consumer behavior models, motivation, perception, attitudes, and the influences of family, society, and culture. Prerequisites: MKTG 31200. (F,S,Y)

3 Credits

MKTG 32500 Sales and Sales Promotion (NLA)

Examines the roles of personal selling and sales promotion in an organization's integrated marketing communications (IMC) mix. Students will learn how sales and sales promotion work together and with other IMC tools (advertising, publicity) to accomplish marketing strategies. Students will gain knowledge of traditional and cutting-edge consumer and trade promotions, as well as personal selling tactics and techniques. Prerequisites: MKTG 31200; junior standing. (Y)

3 Credits

MKTG 38000 International Marketing (NLA)

Focus on marketing management problems, techniques, and strategies necessary to incorporate the marketing concept into the world marketplace. A multidisciplinary approach creates a broad understanding of the subject matter. Concepts from economics, political science, anthropology, sociology, management, and marketing are integrated. Readings include text plus journal and magazine articles. Prerequisites: MKTG 31200; junior standing. (F-S,Y)

3 Credits

MKTG 39700 Selected Topics: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

MKTG 41100 Marketing Analytics (NLA)

Introduction to analysis of data related to marketing decisions, including program data in marketing information systems and project data collected through primary research. Includes both analysis of existing databases and the most common and practical problems associated with collecting and analyzing new data. Emphasis is on both qualitative methods and quantitative methods. Computer assignments require students to apply latest software packages. Prerequisites MATH 14400 or MATH 14500 or PSYC 20700 or TVR 26300 or STCM 28800; MKTG 31200; junior standing. (F-S,Y)

3 Credits

MKTG 44400 Services Marketing (NLA)

This course will introduce students to the issues and problems unique to the marketing of services. Topics include relationship marketing, the seven P's of service delivery, complaint management and recovery, service guarantees, measures of customer satisfaction, managing the moment of truth, servicescapes, employee empowerment, blueprinting services, and managing overall service strategy. Prerequisite: MKTG 31200. (IRR)

3 Credits

MKTG 48600 Senior Seminar in Marketing (NLA)

A capstone course for marketing majors, challenging them to identify and apply appropriate marketing concepts gained through earlier coursework. Specifically, the student is required to analyze actual and hypothetical marketing situations and react to or solve marketing problems by demonstrating an understanding of the marketing concept, mix, and strategy, as well as a strategic perspective. Prerequisites: MKTG 31200; MKTG 32300; MKTG 41100; senior standing. (S,Y)

3 Credits

MKTG 49100 Digital Marketing (NLA)

This course provides a thorough overview of marketing concepts and strategies for the digital age. Students will gain an understanding of the paradigm changes in marketing and the impact of digital communication technologies. By combining theory and practice, students will learn strategies and develop skills in using new media tools to achieve marketing objectives. Prerequisites: MKTG 31200; junior standing. (F,S,Y) 3 Credits

MKTG 49700 ST: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: MKTG 31200; junior standing. (IRR) 1-3 Credits

MKTG 49708 Selected Topics: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: MKTG 31200; junior standing. (IRR) 1-3 Credits

MKTG 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W) 1-6 Credits

MKTG 49900 Independent Study: Marketing (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y) 1-3 Credits

Accounting Major – B.S.

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

For students interested in pursuing careers as certified public accountants, the School of Business also offers an M.S. in accounting. Students may receive a B.S. in accounting after four years of study and an M.S. in accounting after their fifth year of study. Admission to the M.S. in accounting is separate from admission to the B.S. in accounting. The B.S. in accounting degree is not a registered licensure qualifying program in New York state. The M.S. in accounting degree, however, is registered with the New York State Education Department as a licensure qualifying program.

Accounting Minor

The accounting minor provides an opportunity for non-business undergraduates considering Ithaca College's M.S. in accounting to fulfill many of the prerequisites for that program while exploring their interest in the accounting profession. It also provides future business owners with the necessary background to manage the financial aspects of their

business. This minor is not available to students pursuing a B.S. in business administration or accounting.

ACCT 49300	Tax Accounting	
ACCT 34600	Intermediate Accounting II	
ACCT 40600	Auditing	
Total Credits		18

Business Administration

The bachelor of science program in business administration provides significantly more flexibility than traditional programs for business majors. A strong liberal arts and business education prepares students for business careers and graduate study, while allowing a substantial amount of elective freedom for individual interests.

Requirements for the bachelor of science degree in business administration include completion of a core business curriculum, liberal arts courses, open electives, and at least one area of concentration: corporate accounting, finance, international business, management, marketing, sport management, or sport marketing.

Minors for School of Business Majors

The School of Business has designed its degree programs to provide substantial flexibility. Open and liberal arts electives allow students to pursue breadth and depth in other units of the College. Students are strongly encouraged to develop a plan of study with their academic advisers early in their college careers to accomplish academic and professional goals. Students interested in a minor should contact the department of interest to determine the application process. Accounting and business administration majors may not minor in accounting, business, finance, international business, management, or marketing, but business administration majors may elect to have more than one concentration.

Majors, Minors, & Certificates

- Business Administration Major – B.S. (p. 262)
- Business Minor (p. 265)
- Business Analytics Minor (p. 265)
- Entrepreneurship & Innovation Minor (p. 265)
- Finance Minor (p. 265)
- International Business Studies Minor (p. 265)
- Marketing Minor (p. 266)
- Pre-MBA Minor (p. 266)
- Certificate in International Business (p. 266)

Subjects on this page include: Accounting (ACCT) (p. 252), Business - Interdisciplinary Studies (BINT) (p. 254), Finance (FINA) (p. 254), General Business (GBUS) (p. 256), Management (MGMT) (p. 257), Marketing (MKTG) (p. 259), and

Sport Management (SMGT).

Accounting (ACCT)

ACCT 22400 Accounting for the Real World (NLA)

Theory and procedures used to gather financial information and to present formal financial statements of a business enterprise. Emphasis on analyzing decision-making situations and the use of quantitative techniques used in financial and managerial accounting. Enrollment limited to non-business and non-accounting majors. (Y) 3 Credits

ACCT 22500 Financial Accounting (NLA)

Introduction to the basic measurement and reporting concepts underlying the accounting system for communicating financial information to users external to the organization and to internal managers. Topics include information processing, review of financial statements, the role of ethics in accounting decisions, and valuation and reporting issues for assets, liabilities, stockholders' equity, revenues, and expenses. Sophomores who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: One course in Business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT). (F,S,Y) 2 Credits

ACCT 22600 Management Accounting (NLA)

Study of the uses of accounting information in managerial decision making, planning, and control within the firm. Areas examined are cost estimation; budgets; short-, intermediate-, and long-term planning; product costing; and special reports for managerial use. Emphasizes the uses of accounting outputs in the decision-making process rather than the concepts and methodology of accumulating accounting information. Projects include the use of basic computerized spreadsheets. (F,S,Y) 2 Credits

ACCT 30700 Commercial Law (NLA)

Introduction to commercial law concepts. Topics include common law contracts and sales contracts under the UCC, business entity selection, formation, operation, and termination, and the rights and obligations of owners and management; determining employee versus independent contractor status, and why it matters; agency law; creditor-debtor law (including secured transactions, mortgages, and bankruptcy); and anti-bribery laws. Emphasis on the application of legal concepts to solve problems. (Y) 4 Credits

ACCT 31500 Cost Analysis and Decision Making (NLA)

A study of various cost systems, theories, and models of cost and revenue behavior. The course focuses on cost management, cost analysis, and both structured and unstructured decision making with cost information. Product costing and the interface with the financial reporting system will also be covered. Prerequisites: ACCT 22600; junior standing. (S,Y) 3 Credits

ACCT 32000 Accounting Information Systems (NLA)

Acquaints students with the functions, design, implementation, and documentation of information systems. The general topic of information systems, focusing on accounting applications (both financial and managerial), is covered. Extended coverage of transaction processing, internal controls, and computer security. Prerequisites: COMP 11000 or COMP 17100; ACCT 22600; junior standing. (IRR) 3 Credits

ACCT 34500 Intermediate Accounting I (NLA)

This course covers essential topics related to balance sheet valuation and income measurement. Includes an overview of generally accepted accounting principles, financial statements, cash, accounts receivable, inventories, operating assets, current and long-term liabilities, cash flows, and revenue recognition. Prerequisites: ACCT 22500; sophomore standing. (F,Y)

3 Credits

ACCT 34600 Intermediate Accounting II (NLA)

This course is a continuation of ACCT 34500 Intermediate Accounting I. It covers complex topics related to balance sheet valuation and income measurement and includes both topical coverage and reporting considerations. Students are expected to deal with detailed pronouncements and the advanced concepts in Intermediate Accounting, such as accounting for pensions, income taxes, earnings per share, and accounting changes. Reporting issues and requirements are also covered. Prerequisite: ACCT 34500 and sophomore standing. (S,Y)

3 Credits

ACCT 39700 Selected Topics in Accounting (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

ACCT 40200 Advanced Accounting (NLA)

In-depth analytical study of special problems in financial accounting. Continuous emphasis is placed on the relationship between theory and practice to reflect the latest professional pronouncements. Highly technical topics related to corporation, partnership, government, and not-for-profit organizations, including consolidation, branch and consignment, reorganization and liquidation, foreign transactions, and essentials of accounting for governmental and not-for-profit organizations. Prerequisites: ACCT 34600. (IRR)

Attributes: UND

3 Credits

ACCT 40600 Auditing (NLA)

Theory of independent examinations of financial statements. Discussion of relationships with clients; working papers; audit procedures, including evaluations of internal control; accounting principles; preparation of reports; accountant's liability; and professional ethics. Prerequisites: ACCT 34500; junior standing. (F,Y)

3 Credits

ACCT 49300 Tax Accounting (NLA)

Introductory course in taxation covering structure of present tax law; bases for income tax computations; and concepts of gross income, adjusted gross income, deductions, exemptions, and credits. Emphasis is on tax questions and problems relating to individuals. A student may not receive credit for both this course and ACCT 31100. Prerequisites: ACCT 22500; junior standing. (F,Y)

3 Credits

ACCT 49400 Advanced Tax Accounting (NLA)

Advanced study of income tax provisions relating to individuals, corporations, and partnerships. Sophisticated tax provisions, such as corporate liquidations, capital charges, stock options, and pension plans. Solutions to complex tax problems through use of a tax service; practical experience in locating applicable code sections, regulations, IRS rulings, and court decisions; class presentations. Prerequisites: ACCT 49300; junior standing. (IRR)

Attributes: UND

3 Credits

ACCT 49600 Practicum in Tax Accounting (NLA)

Supervised work experience in tax return preparation and tax advocacy that mirrors tax practice in accounting firms. Students undertake an intensive course preparing tax forms for individuals and must successfully pass the IRS VITA volunteer tax preparer exam. Students then are responsible for maintaining the professional requirements of the established tax practice. Tax returns are computerized and electronically filed. Students and faculty utilizing collaborative learning strategies provide tax advocacy and disseminate information to taxpayers who have English as a second language. Professional skills are emphasized. Prerequisites: ACCT 49300 or junior standing with instructor permission. (S,Y)

Attributes: SL

3 Credits

ACCT 49700 Selected Topics: Accounting (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

ACCT 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

ACCT 49900 Independent Study: Accounting (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,IRR,U,Y)

1-3 Credits

Business - Interdisciplinary Studies (BINT)

BINT 10000 First-Year Seminar in Business (NLA)

Links the challenges faced by first-year college students with similar demands in business settings. Students learn that many of the issues they face individually in transition from high school to college have parallels to those faced in business organizations. Topics covered include time management, goal setting, learning styles, communication skills, and resource utilization, among others. Open to first-year business students only. (F,Y)

1 Credit

BINT 10100 World of Business (NLA)

Surveys the functional areas of business, namely management, finance, accounting, operations, marketing, entrepreneurship, and sustainability. Links the challenges faced by first-year college students with similar demands on management in business settings. (F,Y)

4 Credits

BINT 10400 Informational Interview (NLA)

This program allows students to explore a career path of interest by conducting an interview with a professional. The student is expected to contact an individual within their selected profession and conduct an interview based on questions provided by the Business-Link Professions Program. Upon completion of the interview, students will write up a reflection and submit it to the Business-Link Professions Program office for review and grading. Open to first and second year business students only. This course is offered in block I and II. Prerequisites: Business-Link Professions Workshop 1, completion of School of Business Informational Interview application and Permission of Instructor. Pass/fail only. (F,S, SUM, W)

0 Credit

BINT 19800 Internship for Credit (NLA)

Off-campus experience involving varied, non-routine work designed to allow students to learn about realworld operations of an organization. Pass/fail only. (F, S, SUM, W)

1-6 Credits

BINT 19900 Washington, D.C. Practicum (NLA)

Off-campus experience in Washington, D.C., involving varied nonroutine work projects that allow students to synthesize classroom learning with on-the-job learning acquired by working in an organization. The program puts primary responsibility on the student to carry out program requirements in conjunction with a faculty sponsor. Prerequisites: BINT 10100; sophomore standing; minimum of 2.50 cumulative grade point average at Ithaca College. Credits may only be used as open elective credits and may not be used as business elective credit or to replace other business coursework. Pass/fail only. (F-S,Y)

3-6 Credits

BINT 20400 Career Exploration (NLA)

This off-campus experience gives students more insight into their desired profession through a 30 hour job shadowing experience by providing them an opportunity to observe daily functions of the organization and to interview staff in order to learn various aspects of the organization. Upon conclusion, a reflection must be submitted to the Business-Link Professions Program Office for review and grading. Open to first and second year business students only. This course is offered in block I and II. Prerequisites: Business-Link Professions Workshop 2; BINT 10400; completion of School of Business Career Exploration application and permission of instructor. Pass/fail only. (F,S,U,W)

0 Credit

BINT 21000 Boom, Bust and the American Economic Cycle (LA)

This introductory survey course will look at the historical developments in the U.S. economy with special focus on the role of capital markets and financial services industry, from the 1930s to the present. We will critically examine such crucial events as stock markets collapses, major legislations governing the operations of financial markets & institutions, and milestones like the Great Recession and the Subprime Lending Crisis. The common thread throughout the course is to identify and analyze the interrelationship of myriad political, regulatory, economic, technological, global, and socio-psychological forces that have shaped the boom and bust cycles in the US economy. Various viewpoints focusing on the practical aspects of enforcement, social welfare through consumer protection, political roadblocks, and campaign finance reform will be evaluated. Prerequisite: Sophomore Standing. (F,S)

Attributes: SO, TWOS

3 Credits

BINT 39800 Internship for Credit (NLA)

Off-campus experience involving varied, non-routine work designed to allow students to learn about realworld operations of an organization. Prerequisites: Junior Standing; good academic standing; completion of Business-Link Professions Workshops 1,2,3; School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)

1-6 Credits

BINT 40400 Business Link Professions Program (NLA)

The Business-Link Professions Program integrates the professional development activities required of Accounting and Business Administration majors. The program enables business students to develop professional skills that are needed for successful careers. Throughout their time as majors, students complete a series of four theme-based workshops conducted by business school staff, faculty, alumni and/or employers, and one leadership certificate program, either leading-others or leadership-in-a-diverse-world. Successful completion of this course indicates the BLPP graduation requirement has been met. Pre-requisite: Senior standing. Accounting and Business Administration majors only. (P/F only). (F, S, SU)

0 Credit

Finance(FINA)

FINA 10301 Fun with Investments (NLA)

Mini-course covering the fundamentals of investing, particularly in equities and fixed-income securities. Basic concepts and principles of investing, security pricing, and risk vs return. (B,F,S,Y)

1.5 Credits

FINA 10302 Minicourses in Finance (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)

1.5 Credits

FINA 10400-10402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students. Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed FINA 32100. (Y)

1.5 Credits

FINA 12500 Introduction to Personal Finance (NLA)

A basic personal finance course, dealing with various aspects of individual financial decision making. Introduces financial investments, including stocks, bonds, and mutual funds and an overview of the individual income tax system. The fundamentals of personal financial statements, financing home and auto purchases, retirement planning, estate management, and insurance are also covered. Enrollment limited to non-business students. (Y)

3 Credits

FINA 20300 Financial Markets and Institutions (NLA)

A broad introduction to the structure and operation of the U.S. financial system through examination of the major financial institutions, markets, and instruments that compose it. Emphasis is on the functions and interrelationships of these elements and on identifying various government institutions and regulations overseeing the system.

Prerequisites: ECON 12100. (F,S,Y)

3 Credits

FINA 20400-20402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics; This course is not available to students who are currently enrolled in, or who have successfully completed FINA 32100. (IRR)

1.5 Credits

FINA 21000 Personal Financial Planning and Wealth Management (NLA)

The main goal of this course is to provide students with a foundation needed to make important decisions that affect their short- and long-term financial well-being as well as introduce students to concepts relevant to the Wealth Management profession. Students will learn the basic concepts and their applications through several delivery methods, which may include: self-analysis, case studies, and interactive web-based tools.

Prerequisites: BINT 10100. (F,S,Y)

3 Credits

FINA 30400-30401 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 30402 Mini-courses in Finance- Intro to Derivatives (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 31100 Business Finance (NLA)

An in-depth examination of the principle of time value of money with its applications in various areas of financial decision making in organizations to include stock and bond valuation, capital budgeting, and capital structure within the risk-return framework. Decisions about dividend policies, operating and financial leverage, and sources of short-term financing are also addressed. Prerequisites: ECON 12000 and ACCT 22500. (F,S,Y)

4 Credits

FINA 31500 Real Estate Finance (NLA)

Financing of residential properties (types of loans, underwriting, appraisal, and closing; analysis of income-producing properties), cash-flow identification, tax implications, leverage, and valuation, real estate investment performance, sources of real-estate funding, secondary mortgage markets, and the role of government policies. Prerequisites: FINA 31100; junior standing. (IRR)

3 Credits

FINA 31700 Insurance and Risk Management (NLA)

Study of risk and the risk management process with a major focus on insurance as a risk management tool. Legal principles, institutional aspects, and international issues. Business and personal risk management and government insurance. Corequisites: FINA 31100; junior standing. (IRR)

3 Credits

FINA 32100 Security Analysis and Portfolio Management (NLA)

In-depth study of the techniques used to analyze securities and portfolios. Risk and return trade-off; asset allocation; portfolio selection; diversification; capital asset pricing model; efficient market hypothesis; fixed income securities and equity valuation models; duration; derivative assets. Prerequisites: FINA 31100. (F,S,Y)

3 Credits

FINA 37000 International Finance (NLA)

Study of the conceptual and practical aspects of international finance through in-depth analysis of international financial markets, exchange rate determination, and exchange rate risk exposure and management. Concentration on working capital management and international capital budgeting strategy. Students develop an understanding of the dynamic relationship between exchange rates and fundamental economic variables. Prerequisites: FINA 31100; junior standing. (S,Y)

3 Credits

FINA 37500 Fixed Income Analysis and Portfolio Management (NLA)

The primary purpose of this course is to introduce the basic concepts of fixed income investing as well as various fixed income instruments. Topics covered include: Bond math, the yield curve, fixed income risk management, as well as the role of the economy and interest rates. Students will also work in teams and identify securities to invest in as part of the Fixed Income Portfolio. Prerequisites: FINA 31100. (S,Y)

3 Credits

FINA 38000 Equity Portfolio Management (NLA)

Equity Portfolio Management aims to provide students with the fundamental groundwork needed to manage equity investments in a portfolio setting. Students will learn the necessary skill set through a mixture of managing an actual equity portfolio combined with a focus on business cycles, sector analysis, estimating expected risk and return metrics, and finally equity evaluation. Prerequisites: FINA 32100. (F-S, Y)

3 Credits

FINA 39700 Selected Topics: Finance (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)

1-3 Credits

FINA 40400-40402 Mini-courses in Finance (NLA)

Block courses on current topics of interest to faculty and students.

Prerequisites: As appropriate to topics. (IRR)

1.5 Credits

FINA 40500 Wealth Management (NLA)

The study of wealth management draws on course work from various disciplines. Topics may include fiduciary responsibility, investments, risk and insurance, taxation, and business and property law. Wealth management involves customized and sophisticated solutions dependent on the net-worth and financial objectives of the investor household. Students learn to formulate and implement appropriate plans for the accumulation, conservation and transfer of a client's personal wealth, dependent on specific client situations. Prerequisites: FINA 21000; FINA 32100. (F,Y)
3 Credits

FINA 41900 Speculative Markets (NLA)

In-depth analysis of options and option markets. Review of put and call options, option pricing formulas, and option strategies. Discussion of new developments such as interest rate options and options on future contracts. Second half focuses on the futures market, pricing the commodity futures and financial futures, and optimal hedging strategies based on futures. Prerequisites: FINA 31100; FINA 32100; junior standing. (IRR)
3 Credits

FINA 42000 Alternative Asset Management (NLA)

Teaches advanced finance students about the Alternative Investment Industry as well as the products and investments used in this area of investment. In depth analysis will be performed to fully evaluate such vehicles as hedge funds, private equity, commodities, and real estate. Prerequisites: FINA 32100. (F,Y)
3 Credits

FINA 47000 Financial Analysis and Forecasting (NLA)

An advanced finance elective that examines applied financial research and analysis in great depth. Topics covered include advanced financial analysis including ratio analysis, valuation methods, discount rates, as well as econometric techniques applied to financial research and forecasting. TSP, an econometric software, is used in some homeworks and project. Prerequisites: FINA 32100; senior standing. (IRR)
3 Credits

FINA 48000 Advanced Business Finance (NLA)

A capstone course in finance that combines theories of financial management with practical application through case analysis. Financial theories with respect to risks and returns, capital structure and cost of capital, optimal capital budget, short- and long-term financing decisions, and other topics concerning multinational financial management. Students may be required to write and present analyses of cases in the class. Prerequisites: FINA 32100. (F,Y)
3 Credits

FINA 49700-49702 Selected Topics in Finance (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
Attributes: UND
1-3 Credits

FINA 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)
1-6 Credits

FINA 49900 Independent Study: Finance (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,IRR,U,Y)
1-3 Credits

General Business (GBUS)**GBUS 20300 Business Law I (NLA)**

Introduction to contracts law under both the common law and the Uniform Commercial Code. Topics include contract formation (offers, counteroffers, consideration, and acceptance), enforcement, breach, and damages. Emphasis is placed on the application of legal concepts to solve problems. (Y)
2 Credits

GBUS 20400 Legal Environment of Business II (NLA)

Continuation of GBUS 20300 Legal Environment of Business. This course focuses on business organizations and the regulation of business. Topics covered include agency and issues in employment law, forms of business organizations, partnerships, corporations, securities regulation, environmental law, antitrust law, corporate social responsibility, the Uniform Commercial Code, debtor-creditor relations, and selected current topics in law. Emphasis is on case analysis, including the social, ethical, political, and economic considerations of the impact of law on business and society. Emphasis is also placed on the application of legal concepts to solve problems. Prerequisites: GBUS 20300; sophomore standing. A student cannot receive credit for both GBUS 20400 and GBUS 30700. (S,Y)
3 Credits

GBUS 30700 Commercial Law (NLA)

In-depth analysis of the commercial law. Topics include Uniform Commercial Code (UCC) Article 2: sales contracts and risk of loss issues; Article 3: negotiable instruments and the holder-in-due-course doctrine; Article 6: bulk transfers; Article 9: secured transactions; bankruptcy; creditor and debtor rules; mortgages; liens; principals and agents; antitrust legislation; special corporation topics, such as LBOs and insider trading; liability of corporate officers and directors; and ethical considerations. Prerequisites: GBUS 20300; junior standing. Previously titled Business Law II (Accounting). A student may not receive credit for both GBUS 30700 and GBUS 20400. (S,Y)
3 Credits

GBUS 31000 International Business Law (NLA)

An analysis of commercial law in an international context. Topics covered include major national and international trade regulations; international sales, credits, and commercial transactions; resolution processes for international disputes; U.S. trade law; import and export laws; GATT; and the regulation of the international marketplace. Emphasis is on the application of legal concepts to solve problems. Prerequisites: GBUS 20300; junior standing. (S,Y)
Attributes: LMAL
3 Credits

Management (MGMT)

MGMT 10300 Minicourses in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MGMT 10301 Minicourses in Mgmt (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MGMT 10302 Minicourses in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MGMT 10303 Minicourses in Mgmt (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MGMT 10304 Management Minicourse: Women in Business (NLA)

This course includes lectures, readings and guest speakers, which will help us to explore present-day findings of women in corporate and entrepreneurial settings. Topics will include current research of women in business, leadership development, family/life balance, mentorship, network influence and ultimately gender differences in the workplace. Open only to Business Administration majors. (IRR)
Attributes: WGS
1.5 Credits

MGMT 10305 Minicourse in Management (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: As appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MGMT 11100 Introduction to Business (NLA)

Overview of the world of business, its management, and its economic, political, and social environment. Particular note is taken of the areas of finance, accounting, personnel, production/operations, marketing/sales, and their interdependence. Not available to declared business majors. (Y)
3 Credits

MGMT 20600 Organizational Behavior and Ethics (LA)

Exposes students to two major areas of inquiry: 1) how to successfully manage life at work, and 2) how to apply ethical concepts/tools related to the management of organizations. In doing so, it investigates ethical theories and their application in the workplace, as well as topics on how individuals and groups act within the organizations where they work including: employee attitude development, personality, motivation, group structure and dynamics, leadership, decision-making, and job design. Sophomores who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: Two courses in business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT), or ECON. (F,S,Y)
4 Credits

MGMT 21300 Hidden Entrepreneurs (NLA)

Hidden Entrepreneurs is the study of unique and unexpected entrepreneurs and how their entrepreneurial spirit helps drive American business at so many levels. Unwinding the general public's modern-day conception of "entrepreneurs", this course focuses on a variety of businesses and business people that embody the concept of entrepreneurship in different ways and forms. Some entrepreneurs are groups within larger companies, while some are in government agencies. Some are unexpected and each one is unique - yet all bonded together by a common passion. (S,Y)
3 Credits

MGMT 21400 Startup Tactics: From Accounting to Zoning, Tactical Considerations When Starting a New Company (NLA)

Study the tactics for running a new business venture's day to day activities in an interactive, hands-on way. Learn how to incorporate a business, raise money, hire a lawyer, run a board meeting, do a marketing campaign, negotiate a contract, hire and fire employees, and many more skills. Understand how to execute on the actions necessary for a well-run startup to set and achieve its goals. (S,Y)
3 Credits

MGMT 22500 Business Models and the Art of Profitability (NLA)

Learn the design and economic drivers for over 30 unique business models, and how to identify them when you learn about a new company. Develop the capability to understand what business model a company is currently using, and how to assess whether they should modify their business model. Discuss and debate business model similarities and difference in an interactive classroom environment. (F,Y)
3 Credits

MGMT 23000 Entrepreneurial Innovation (NLA)

Learn how to generate ideas for a new business venture. Once that list of great business ideas is created, analyze and validate which idea is most worthy of pursuing. Succinctly communicate this validated business idea in order to attract customers, investors, partners, and employees. The class is hands-on and real world focused. As has happened in past semesters, students will go on to launch real companies. (F,Y)
3 Credits

MGMT 23500 Ideas into Action: Launching your Business Idea (NLA)

Launch your own entrepreneurial business by applying the best practices in starting new companies to your business idea. Learn the methodology of how to do quality Customer Discovery to best understand your customer's needs, and then design a business model for how to best succeed. Plan and communicate your business model in a business pitch to experienced and successful alumni and community entrepreneurs. Prerequisites: MGMT 23000. (S,Y)
3 Credits

MGMT 26000 Business Analytics and Technology I (NLA)

Concepts and principles of business data analytics and the role analytics plays in business management. The focus is on business data analytics techniques. Students will use up-to-date data analytic tools and must demonstrate proficiency in the use of these tools as part of the course requirement. Prerequisites: MATH 14400 or MATH 14500 or PSYC 20700. (F,S,Y)
2 Credits

MGMT 29800 ITHACON: Promoting and Managing Conventions (NLA)

The course will use the creation, implementation, and assessment of the long-running, annual pop culture ITHACON event to help students learn about trade shows and conventions. Students will be exposed to event studies theory and techniques and be provided with a unique hands-on experience. The course will also focus on analysis and advance planning for the next iteration. Students will also learn about the entrepreneurial world of entertainment, publishing, and pop culture. (S,Y)
3 Credits

MGMT 30500 Data-Driven Management Decisions (NLA)

Managers are frequently given business advice whose validity is seldom questioned. This course sheds light on this process by helping students develop solid analytic practices using data from surveys and interviews. The goal is to improve students' ability in assessing the quality of knowledge derived from management research. Students evaluate the validity of managerial reports, learn to exercise caution in accepting research conclusions, get experience with basic analytic techniques, and craft stories based on data they have analyzed. Prerequisites: MGMT 20600; MATH 14400, MATH 14500, or PSYC 20700. (S)
3 Credits

MGMT 31200 Leadership and Collaboration (LA)

This course focuses on the nature of leadership and power dynamics in modern organizations. This course develops students' abilities to create and use sources of power and to create a climate for leadership and change. In addition, the course provides a survey of methods to sustain and develop both personal and organizational power, including the network-building and conflict-handling skills needed to manage the increasingly pluralistic interests found in organizations. This course develops students' abilities to motivate human resources, facilitate team building, and guide organizational change. Prerequisites: MGMT 20600 or both PSYC 31600 and PSYC 33400. (F,Y)
3 Credits

MGMT 34000 Human Resource Management (NLA)

This survey course provides an overview of human resource policies and procedures within the context of managerial decision making in organizations. Primary topics include human resource planning and analysis, equal employment opportunity, staffing, human resource development, compensation and benefits, health and safety, and labor-management relations. Prerequisites: Three courses in business or social sciences; junior standing. (Y)
3 Credits

MGMT 34500 Operations Management (NLA)

An introduction to operations management for managing the resources (including people, facilities, inventories, processes, and systems) that create value (in the form of a product or a service) for an organization. Prerequisites: MATH 10400, MATH 10800, or MATH 11100 and MATH 14400, MATH 14500, or PSYC 20700. (F,S,Y)
2 Credits

MGMT 36500 Intermediate Business Analytics (NLA)

Provides the background and skills necessary to analyze data, including big data, in support of decision making in the business environment. The following topics will be covered: foundations of business analytics, descriptive analytics, predictive analytics, and prescriptive analytics. Computer-based tools will be incorporated throughout the course and selected for their applicability to business applications, but the analytical foundation will be the spreadsheet and, to a lesser extent, the database. Students will develop expertise in database technology to the point at which forms and reports can be created and generated, and advanced spreadsheet technologies to include use of dashboards. Prerequisites: MGMT 26000. (S, Y)
3 Credits

MGMT 39100 Managing for Sustainability (NLA)

Examines the challenge of maintaining sustainable business strategies while meeting the needs of various stakeholders. Will investigate various models of business sustainability and how to integrate sustainability concerns into managerial functions. Prerequisites: MGMT 20600. (IRR)
3 Credits

MGMT 39700-39705 Selected Topics in Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
Attributes: UND
1-3 Credits

MGMT 39706 ST: Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

MGMT 42100 Strategic Management (NLA)

Deals with upper-level management skills and attitudes as they encompass all basic business fields. Stresses the integration of the various disciplines studied and the opportunity to develop managerial decision-making abilities. Students will utilize professional communication and teamwork skills. Open only to students in the School of Business. Prerequisites: ACCT 22600; MGMT 20600; FINA 31100; MKTG 31200; MGMT 34500. (F,S,Y)
Attributes: CP
3 Credits

MGMT 45100 Small Business Seminar I (NLA)

Introduction to the concepts and principles of small business management. Case study analysis will lead to practical understanding and application of management concepts. Prerequisites: Upper-level standing, permission of instructor. (F,IRR)
3 Credits

MGMT 46000 Leading Organizational Change (NLA)

Capstone course for the management concentration. In-depth examination of the nature, strategies, models, and intervention activities associated with planned change efforts for organizational improvement. Students build on previous knowledge of organizational structure and processes through independent readings and research, culminating in a challenging team-consulting experience in an ongoing organization. Prerequisites: MGMT 31000 or MGMT 31200, management elective from approved list; senior standing. (S,Y)
3 Credits

MGMT 48100 Advanced Decision Making with Analytics (NLA)

Course provides a multidisciplinary perspective on analytics, applying a wide range of techniques in diverse settings. Students will employ basic statistical tools (tabulation, hypothesis testing, correlation) in a variety of new applications as well as some new tools used for prediction (decision trees, neural networks, logistic regression) and clustering. All content and exercises will be based on large data sets ("big data") and use appropriate state-of-the-art software for data analysis. Emphasis will also be placed on visualization and reporting results. Prerequisites: MATH 24600; MGMT 36500. (S,Y)
3 Credits

MGMT 49600 Negotiations (NLA)

Negotiation is the science of securing agreements between two or more interdependent parties. The central issues of this course deal with understanding the behavior and relationships of managers, departments/units, and organizations in a business setting. The course is designed to build a negotiation skill-set that can be applied to a broad set of situations in organizations. In this light, a range of cooperative and competitive situations will be examined. A basic premise of the course is that while you need analytic skills to discover optimal solutions to problems, a broad array of skills are needed for these solutions to be accepted and implemented. The course will allow participants the opportunity to develop these skills experientially and to understand useful analytic frameworks. Considerable emphasis will be placed on simulations, role plays, and cases. Prerequisites: Junior standing. (S,Y)
3 Credits

MGMT 49700-49704 Selected Topics in Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

MGMT 49714 ST: Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Offered on demand only. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

MGMT 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)
1-6 Credits

MGMT 49900 Independent Study: Management (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y)
1-3 Credits

Marketing (MKTG)

MKTG 10300-10303 Minicourses in Marketing (NLA)

Block courses on topics of current interest to faculty and students. May be repeated up to a maximum of three credits with different selected topics. Prerequisites: as appropriate to topics; not open to students with junior or senior standing. (IRR)
1.5 Credits

MKTG 31000 Quantitative Methods in Business (NLA)

A study of quantitative tools used in solving business problems. Statistical quality control and decision models, regression methods, linear programming, and CPM- and PERT-type models. Using computers to solve problems is an important aspect. Prerequisites: MATH 14400 or PSYC 20700; junior standing. (IRR)
3 Credits

MKTG 31200 Principles of Marketing (NLA)

Study of concepts, activities, and decisions related to the exchange process, management of the marketing mix, and development of marketing strategy for profit and not-for-profit organizations. Addresses the sociocultural, legal and regulatory, technological, economic, ethical, political, and social responsibility dimensions to marketing in the global environment. Juniors who have not taken the prerequisites may take the course with permission of the Dean. Prerequisites: Three courses in business (SMGT, BINT, ACCT, FINA, GBUS, INTB, MKTG, or MGMT) or STCM, with at least one course at the 200-level. (F,S,Y)
3 Credits

MKTG 32300 Consumer Behavior (NLA)

Study of consumer behavior variables and their impact on marketing. Includes consumer behavior models, motivation, perception, attitudes, and the influences of family, society, and culture. Prerequisites: MKTG 31200. (F,S,Y)
3 Credits

MKTG 32500 Sales and Sales Promotion (NLA)

Examines the roles of personal selling and sales promotion in an organization's integrated marketing communications (IMC) mix. Students will learn how sales and sales promotion work together and with other IMC tools (advertising, publicity) to accomplish marketing strategies. Students will gain knowledge of traditional and cutting-edge consumer and trade promotions, as well as personal selling tactics and techniques. Prerequisites: MKTG 31200; junior standing. (Y)
3 Credits

MKTG 38000 International Marketing (NLA)

Focus on marketing management problems, techniques, and strategies necessary to incorporate the marketing concept into the world marketplace. A multidisciplinary approach creates a broad understanding of the subject matter. Concepts from economics, political science, anthropology, sociology, management, and marketing are integrated. Readings include text plus journal and magazine articles. Prerequisites: MKTG 31200; junior standing. (F-S,Y)
3 Credits

MKTG 39700 Selected Topics: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics; junior standing. (IRR)
1-3 Credits

MKTG 41100 Marketing Analytics (NLA)

Introduction to analysis of data related to marketing decisions, including program data in marketing information systems and project data collected through primary research. Includes both analysis of existing databases and the most common and practical problems associated with collecting and analyzing new data. Emphasis is on both qualitative methods and quantitative methods. Computer assignments require students to apply latest software packages. Prerequisites MATH 14400 or MATH 14500 or PSYC 20700 or TVR 26300 or STCM 28800; MKTG 31200; junior standing. (F-S,Y)
3 Credits

MKTG 44400 Services Marketing (NLA)

This course will introduce students to the issues and problems unique to the marketing of services. Topics include relationship marketing, the seven P's of service delivery, complaint management and recovery, service guarantees, measures of customer satisfaction, managing the moment of truth, servicescapes, employee empowerment, blueprinting services, and managing overall service strategy. Prerequisite: MKTG 31200. (IRR)
3 Credits

MKTG 48600 Senior Seminar in Marketing (NLA)

A capstone course for marketing majors, challenging them to identify and apply appropriate marketing concepts gained through earlier coursework. Specifically, the student is required to analyze actual and hypothetical marketing situations and react to or solve marketing problems by demonstrating an understanding of the marketing concept, mix, and strategy, as well as a strategic perspective. Prerequisites: MKTG 31200; MKTG 32300; MKTG 41100; senior standing. (S,Y)
3 Credits

MKTG 49100 Digital Marketing (NLA)

This course provides a thorough overview of marketing concepts and strategies for the digital age. Students will gain an understanding of the paradigm changes in marketing and the impact of digital communication technologies. By combining theory and practice, students will learn strategies and develop skills in using new media tools to achieve marketing objectives. Prerequisites: MKTG 31200; junior standing. (F,S,Y)
3 Credits

MKTG 49700 ST: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: MKTG 31200; junior standing. (IRR)
1-3 Credits

MKTG 49708 Selected Topics: Marketing (NLA)

Topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: MKTG 31200; junior standing. (IRR)
1-3 Credits

MKTG 49800 Internship with Academic Enhancement (NLA)

Off-campus experience involving varied, nonroutine work projects designed to allow students to synthesize academic theory with real-world operations of an organization. Primary responsibility is on the student to develop a project proposal and then carry out its requirements in conjunction with a faculty sponsor. Internship credit falls under the business elective category in the degree requirements. A maximum of may be earned in any combination of internship (ACCT/FINA/INTB/MGMT/MKTG 49800) and BINT 39800. Prerequisites: Senior standing; completion of appropriate principles course; a minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application and permission of instructor. Pass/fail only. (F, S, SUM, W)
1-6 Credits

MKTG 49900 Independent Study: Marketing (NLA)

This course allows students to work with faculty on an individual basis, focusing on a topic of interest to both the student and faculty. The content of the course, coverage, delivery format, and the method of determining grades will be mutually agreed upon and must be included in the course proposal submitted along with the independent study form for approval by the dean. Guidelines are available in the School of Business dean's office. A variable amount of credit may be earned toward the degree. Students must have a 3.00 cumulative grade point average and must have completed at least in the subject matter. Prerequisites: Dean permission. (B,F,S,IRR,U,Y)
1-3 Credits

Sport Management(SMGT)**SMGT 11000 Introduction to Sport Management (NLA)**

Overview of the sport industry, including managerial, legal, social and economic forces that shape organizational decision-making. Theories, trends and best practices in the management of sport organizations are analyzed, with emphasis placed on how the managerial process is related to sport organizations and their products. (F-S,Y)
3 Credits

SMGT 21000 International Sport (LA)

This course provides an analysis of sport in an international context and uses sport as a way to examine the impact of colonization and the influence of western culture on the global community. The economics, history, and culture of each region are explored to understand the different ways that sport impacts individuals and societies around the globe. Students will be introduced to problems/issues faced by international sport managers by analyzing and discussing international sport case studies. Prerequisites: Sophomore standing. (IRR,U,W)

Attributes: DV, LAGC, SO, TIDE

3 Credits

SMGT 21500 College Sport (LA)

An exploration for the historical development, various challenges, and current debates surrounding the often-conflicted relationship between athletic departments and the university community. Special emphasis is given to social and culture impact of college sport on athletes, students, fans, families, communities and society. Prerequisites: Sophomore standing. (IRR)

3 Credits

SMGT 22000 Current Issues in Professional Sport (LA)

Exploration of the various elements of the professional sports industry. Students will examine aspects that span the entire industry, as well as study the development and current challenges of the most significant and relevant leagues. Special emphasis is given to social and culture impact of professional sport on athletes, fans, families, communities and society. Prerequisites: Sophomore Standing. (IRR)

Attributes: SO, TPJ, TWOS

3 Credits

SMGT 23000 The Business of Sport Agency (NLA)

This course explores the business of sport agency/agent. Topics covered include background, negotiation, ethics, NCAA eligibility rules, FIBA agent procedures, and legal principles as they relate to sport agency/agent. Students will get a first-hand experience dealing with everyday negotiations that sport agents deal with throughout the realm of sport through mock negotiations as well as in-depth case studies. Students will be tasked of presenting projects that focus on representing current players in professional sports, which will include salary negotiations, arbitration, endorsements, and contract clauses. (IRR)

3 Credits

SMGT 26500 Policy and Governance in Sport Organization (NLA)

Analysis of governance structures and operational activities of professional team-sport leagues, intercollegiate athletics, the Olympic movement, and international sports association. An examination of policy development in various areas of the sport enterprise. Case studies of current sport issues and problems are utilized. Prerequisites: SMGT 11000. (F-S, Y)

3 Credits

SMGT 29200-29202 Selected Topics in Sport Management (NLA)

A series of short courses in specialized areas of sport management. Visiting lecturers and faculty of the school participate in areas of their expertise. Analyses of actual case studies focusing on sport management problems and issues confronted by sport managers helps students in further developing their critical thinking and problem-solving skills. Students conduct independent research in which they analyze a particular management problem/issue (case study), and develop and write strategies to effectively address the management problem/issue. May be repeated for different topics. Prerequisites: SMGT 11000 (IRR)

3 Credits

SMGT 30300 Sport Law I (NLA)

In-depth analysis of the legal issues facing the management of the sports industry, including how law is applied to amateur and professional sports organizations. Topics covered include intentional torts and negligence; gender equity and other forms of discrimination, risk management, and selected current legal issues impacting sport organizations. Emphasis is on management perspectives. Prerequisites: SMGT 11000; GBUS 20300; junior standing. (F-S)

3 Credits

SMGT 31000 Labor Relations in Sport (NLA)

Examination of the development, history, and legal aspects of the labor movement in sport. Discussion of collective bargaining process in sport and the impact that court cases, antitrust law, and arbitration decisions have had on professional sports. Analysis of resolutions to specific labor problems through simulated negotiations. Prerequisites: SMGT 11000 or SMGT 20700; junior standing. (F or S,Y)

3 Credits

SMGT 32600 Sport Marketing and Sales (LA)

Examination of the concepts and principles of promotion as applied to the unique aspects of sport. Analysis of the relationship between sport promotions and public relations strategies that are employed by the sport manager. Students develop promotional strategies and activities that can be applied in real-life sport organizations to enhance the relations efforts of the organization. Prerequisites: SMGT 11000; MKTG 31200; WRTG 10600, ICSM 10800, ICSM 11800, or equivalent. (F,S)

Attributes: WI

3 Credits

SMGT 33500 Sport Event and Facility Management (NLA)

Develops a student's understanding of the competencies necessary to plan, manage and operate sport, recreation, fitness, and public assembly facilities. Specific topics covered: scheduling; security and supervision; safety and risk management; purchasing and maintenance; marketing and sales; funding of new facilities; sustainability; economic feasibility and revenue sources related to sport facilities. In addition, the conceptual and technical aspects related to the development, operation, and marketing of sport-related events will be addressed in depth to include planning and implementing actual events. Prerequisites: SMGT 11000. (F,S)

3 Credits

SMGT 36500 Sport Economics (LA)

Application of economic theory to the markets of professional and amateur sports. This course applies economic principles to analyze a wide range of issues within the realm of professional sports and intercollegiate athletics. Included are the analysis of labor markets and labor relations, public finance of sports facilities, and the organization of sports institutions. Prerequisites: SMGT 11000; ECON 12100; ECON 12200; junior standing. (F,Y)

3 Credits

SMGT 38500 Advanced Sport Marketing (NLA)

This class provides an intensive analysis of consumer habits and trends, linked with strategies for sport organizations to deliver products and experiences in the marketplace. Students build on previous knowledge of marketing to apply sales techniques to maximize revenue generation. Prerequisites: SMGT 11000; SMGT 32600; junior standing. (IRR)

3 Credits

SMGT 39000 Digital Marketing in Sport (NLA)

This course is designed to develop a student's understanding of how to manage a cross-section of digital channels to market in the sport industry. This course will include the following topics: the utilization of the websites, eCommerce, social, and mobile platforms in sport marketing; the importance of data analysis in digital marketing; the development of a sport organization's multi-dimensional digital presence; interactivity of the branded experience; online customer relations management; and evaluating various digital marketing deliverables. Prerequisites: SMGT 11000; MKTG 31200; SMGT 32600 and junior standing. (IRR)
3 Credits

SMGT 39500 Sponsorship and Promotions in Sport (NLA)

This course focuses on the process of developing, activating, and managing sport sponsorships and related sales promotions. Students will investigate, analyze and apply various strategies to attract and design sponsorship and promotional plans for sport organizations. Evaluation of sponsorship fulfillment, use of e-commerce promotional tools, risk management in promotions delivery, and revenue generation through the sale of sport merchandise, licensing and broadcasting rights will be addressed.
3 Credits

SMGT 39700-39701 Selected Topics in Sport Management (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. May be repeated for credit for different selected topics. Prerequisites: Junior standing, and as appropriate to topics. (IRR)
1-3 Credits

SMGT 41000 Contemporary Issues in Sport Management (LA)

This is the capstone course for the sport management concentration, which is an analysis of current issues across the sport industry. This course provides an in-depth look at how sports, sport organizations, and leaders in the sport industry serve power centers in society, and contribute/challenge race, class, age, sexuality, disability, and gender logic in US culture. This course integrates aspects of sport economics, marketing, law, sociology, leadership, and ethics to provide context for future leaders of sport organizations. Special emphasis is given to the implications of ethical managerial decision-making. Prerequisites: SMGT 26500; SMGT 30300. (F,S,Y)

Attributes: CP, DV

3 Credits

SMGT 41500 Strategic Management in Sport (NLA)

Integrates the various disciplines studied in sports management to develop strategic management plans. Examines strategic positions taken by leaders of actual sport organizations. Provides students opportunities to develop managerial decision-making and leadership skills. Prerequisites: SMGT 11000; SMGT 31500; SMGT 32600; senior standing; sport management concentration. (F,S,Y)

Attributes: CP

3 Credits

SMGT 49800 Internship with Academic Enhancement: Sport Management (NLA)

Supervised work experience in amateur or professional sport agencies and community sport organizations. Student assumes a leadership role in various job-related activities and performs administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Prerequisites: Junior standing; completion of appropriate principles course; minimum cumulative GPA of 2.70; Business-Link Professions Workshops 1,2,3; completion of School of Business internship application; and permission of instructor. Pass/Fail only. (F,S,Sum, W)
1-6 Credits

Business Administration Major – B.S.

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

Summary

Code	Title	Credits
	Business Core and Concentration	59-60
	Integrative Core Curriculum and Electives ¹	61-60
Total Credits		120

¹ This major is not approved to fulfill a perspective course for the Integrative Core Curriculum (p. 8).

Concentration Requirements

Corporate Accounting Concentration

Note: Students interested in sitting for the certified public accountant (CPA) examination should select the five-year option, consisting of the B.S. in accounting and the MS. in accounting. The B.S. in business administration with corporate accounting concentration might not qualify the student to sit for the CPA examination. **The corporate accounting concentration is available only as a second concentration.**

Total Credits		24

Note: The above courses may have prerequisites; refer to course descriptions.

Certificate in International Business

The primary objective of the certificate program in international business is to provide interested students with the opportunity to acquire the coherent, interdisciplinary body of knowledge needed to pursue careers in international areas, especially in international business. The program is aimed at matriculating students from Ithaca College, particularly those in the School of Business (from all concentrations except international business) and the School of Humanities and Sciences (H&S). Within H&S, the program might appeal to students in economics, history, modern languages, politics, psychology, sociology, or planned studies. It is also open to extramural students at Ithaca College.

Coursework

The coursework consists of 15 courses from the following areas:

- Area studies/international relations (5 courses)
Area studies/international relations courses familiarize students with comparative politics, history, sociology, anthropology, art, and literature in the context of the world in general or particular regions and countries. These courses can focus on a specific region or subject, or diversify across disciplines and geographic locations. (Check with the School of Business dean's office for the most recent list of approved international liberal arts electives.)
- Foreign language (5 courses)
Introductory, intermediate, and advanced foreign-language courses are applicable; at least one language course has to be at the 300-level and focus on literature or culture (e.g., FREN 34300 or FREN 34400).
- International Business & Economics (5 courses)
Students receive a strong foundation of knowledge in economics, and then move on to take specific courses in their areas of interest in international business, such as marketing or management. Students take the following five courses (15 credits):
 - ECON 12000 Principles of Economics
 - INTB 26500 International Business Operations
 - One course chosen from the following list (courses may have prerequisites):
 - BINT 10100 World of Business
 - MGMT 11100 Introduction to Business
 - ACCT 22500 Financial Accounting
 - FINA 20300 Financial Markets and Institutions
 - MGMT 34000 Human Resource Management
 - MKTG 31200 Principles of Marketing
 - GBUS 20300 Business Law I
 - One course is chosen from the following list (courses may have prerequisites):
 - ECON 38500 International Economics
 - INTB 36000 International Management of Human Resources
 - INTB 48000 Export-Import Operations
 - GBUS 31000 International Business Law
 - FINA 37000 International Finance
 - MKTG 38000 International Marketing

Satisfactory/D/Fail Policy

The foreign language and international business/economics courses may not be taken on a Satisfactory/D/Fail basis. A maximum of two courses in the area studies/international relations track may be taken on an S/D/F basis.

Graduate Programs

The School of Business at Ithaca College offers two graduate programs: the master of business administration (MBA) in entertainment and media management, and the master of science in accounting. Each program requires a major or other educational background in business, but work experience is not required. Students may apply in their senior year. For more information see the Ithaca College graduate catalog (p. 729).

Roy H. Park School of Communications

Amy Falkner, Dean

Rob Gearhart, Associate Dean

Bryan Roberts, Associate Dean

Mission

In the Roy H. Park School of Communications we continue to build on our tradition of blending and balancing liberal arts and professional, theoretical, and practical studies. We explore, create, and practice communication in its many forms, educating agile, adaptable thinkers, ethical professionals, and lifelong learners.

We meet this mission by:

Offering ten degree programs and nine minors, encompassing a wide range of opportunities in the field of communications. Students are immersed in their degree requirements from their first semester, studying with excellent teaching faculty, and engaged with fellow majors. Blending major and liberal arts requirements and electives.

Providing experience both in and out of the classroom. In addition to experiential learning through classes providing opportunities for producing and writing in studios or labs, and with field equipment, our students are given access from their first semester to participate in our co-curricular organizations – our network of professionally mentored student media groups – which includes two radio stations, a television channel, a newspaper, a professional production unit, a creative athletics media team, and a promotions agency.

Creating opportunity for students through the generous funding of two endowments. These funds create grants to support student research and production projects. They also contribute to the incredible facilities and equipment of the Park School, a resource that is available to students through courses and co-curricular activities from their first semester. This opportunity prepares students for the professional environments of internships and jobs.

Introducing our students to the vast professional network of Park School alumni. With over 70 years of alumni impacting the field of communications, this network has perpetuated a pipeline of opportunities for Park School students. It begins with connecting to students in their first semester through S'Park: Igniting your Future in Communications and continues throughout their Park School experience. Park School alumni generously create many opportunities for internships and jobs for the next generation, not only in the traditional media capitals, but everywhere they apply their craft.

Co-curricular Media Organizations

Creative expression and experimentation are strongly encouraged, and students are invited to participate in the school's various student-operated media opportunities, including:

- radio stations WICB-FM and VIC;
- television cable access channel ICTV;
- the professional production unit, Park Productions;
- the campus newspaper, The Ithacan;
- The Studio, a student-led media production studio;
- Park Promotions, our student-powered promotions agency;
- and, Ithaca Athletics Creative Media, a collaboration with IC Athletics.

Professional Development

Students enrolled in the Roy H Park School of Communications (Park School) have multiple opportunities to network and meet professional mentors through coursework, events, workshops, conversational forums and multiple panel series hosted by the Park School Career Engagement Specialist and others. These opportunities help to make new connections, spark insights and build momentum within the Park School community with its allies to drive discussion around the industries and professions.

The Park School also boasts a diverse and expanding group of passionate alumni who participate as mentors, employers, and advisors to ensure every student gets an opportunity to volunteer, job-shadow, intern, freelance or engage in professional experiences during their academic career.

IC Handshake is more than just a job posting site—it's a career services management tool designed just for students and alumni. This platform is maintained by Ithaca College Center for Career Exploration and Development and provides a great set of resources for students to tap into when seeking employment or internship opportunities while enrolled at Ithaca College and after graduation as alumni.

All Park students are encouraged to join the School's professional and alumni network on LinkedIn in the private group "IC Park Careers." The group includes hundreds of Bombers who are willing to lend a helping hand, answer questions and share advice.

facilities and equipment

Our students have access to a continuously updated inventory of professional media production and post-production equipment and facilities. With over \$5 million in total assets housed in a 79 thousand square foot building, they can create and display their work using state-of-the-art television studios and sound stages with a fully equipped master control, a remote TV broadcast truck, audio, radio, and photography studios, 14 media labs and classrooms, multiple student workrooms and a 200 seat auditorium with 4K projection and a 7.1 sound system.

Managing our inventory of production equipment is the Park Portable Equipment Center. In PPECS, our students can find all levels of digital

and film cameras, lighting, audio, and grip equipment all of which are dedicated for them to use on shoots for films, documentaries, video segments, journalistic reports, and a variety of media projects.

The Park School offers the following programs:

Department of Media Arts, Sciences, and Studies (p. 271)

- Television & Digital Media Production - B.S.
- Cinema and Photography - B.S.
concentration: Cinema Production
concentration: Still Photography
- Film, Photography, and Visual Arts - B.F.A.
- Documentary Studies and Production - B.A.
- Emerging Media - B.S.
- Writing for Film, Television, and Emerging Media - B.F.A.
- Minors in:
 - Animation
 - Audio Production
 - International Communications
 - Still Photography
 - Writing for Film, Television, and Emerging Media

Department of Strategic Communications (p. 290)

- Advertising, Public Relations, and Marketing Communications - B.S.
- Communications Management and Design - B.S.
concentration: Corporate Communication
concentration: Communication Design
- Minors in:
 - Communications Management and Design
 - Advertising, Public Relations, and Marketing Communications
 - Live Event Design and Management

Department of Journalism (p. 287)

- Journalism - B.A.
- Minor in Journalism

Interdisciplinary Programs (p. 298)

- Sports Media - B.S.

PARK PATHWAYS (p. 301)

[Park Pathways provides students an alternative to applying directly into a specific Park School degree program, offering an opportunity to be admitted to the Park School and explore coursework across programs for up to three semesters before declaring their major. Students in the Park Pathways program enroll in the S'Park: Igniting Your Future in Communications course and those faculty become their Park Pathways advisors.](#)

Supplies

Because the convergent nature of the communications discipline requires that all students have consistent access to a basic set of multimedia tools, entering students are required to acquire a laptop computer for use in their classroom and production work. Specifications about the required make and model and any required software is on each degree's web page and students are required to check this information before they arrive on campus. Students enrolled in certain courses may also

be required to supply their own equipment and/or materials, including computer data storage media. In the cinema and photography program students are expected to furnish their own DSLR or mirrorless design cameras for some still photography courses. Additionally, in some courses students must purchase materials such as photographic film and paper, motion picture film, and mounting board. Because of the large number of production courses, students in the B.F.A. degree in film, photography, and visual arts incur additional costs for materials.

Academic Policies

In addition to general College guidelines for academic standing, majors in the Roy H. Park School of Communications must meet the following requirements:

- All students at Ithaca College must complete the Integrative Core Curriculum (ICC), and Park School students follow the specifics of the Roy H. Park School of Communications ICC requirements (p.).
- Majors in B.S. and B.A. programs must complete at least 60 credits outside of Park School communications courses (including the distribution requirements listed above) to satisfy their degree requirements (120 credits). B.F.A. majors must complete at least 48 credits outside of Park School communications courses to satisfy their degree requirements (120 credits). The regulations of the New York State Education Department require 60 credits in courses designated as liberal arts (LA) for the B.S., 90 credits for the B.A., and 30 credits for the B.F.A.
- Majors must take all required communications courses, and all outside courses applied to the major (including supplemental requirements) for a letter grade. The only exceptions are specially designated communications courses, which may be offered on a pass/fail basis, and internships, which are typically pass/fail. Credit for courses that a student has taken pass/fail and passed before becoming a major will be accepted. Credit for courses that a student has taken S/D/F before becoming a major will be accepted as long as the grade is Satisfactory.
- Majors are required to take a minimum of 12 credits each semester. Part-time status requires the approval of the associate dean and is usually granted only to seniors who lack fewer than the 12 credits required for graduation and to certain students of nontraditional age who are enrolled in approved majors.
- Majors are required to make up incomplete grades in communications courses by the end of the following semester, as required by the course instructor. Incompletes will not be given in production courses (a production course is any course that requires equipment to be checked out from the Park Portable Equipment Center).
- Students may be enrolled in only one major within the Roy H. Park School of Communications.
- A few courses offered in the Roy H. Park School of Communications may be taken twice with the permission of the instructor (these are specified in the course descriptions). However, even with the permission of the instructor, if there

is not enough space to permit a student's taking the class a second time, preference for registration in the course will be given to students who have not taken the course and who need it to stay on track for graduation.

- Total credit for workshop courses in the Park School may not exceed 8 credits, except for B.F.A. majors, who may not take more than 12 credits in workshop courses.
- Auditing laboratory or production courses is not permitted.
- In programs requiring concentrations, students should elect the concentration before registration for the first semester of their sophomore year. Several courses are available only to students with declared concentrations that require the course. A student may have only one concentration; the concentration most recently declared is the one in force.
- All proposed waiver-substitution forms must be submitted to the appropriate department chair or advisor before the last day of class of the semester before the student's final semester. Requests submitted after that deadline may not be honored, which may delay the student's graduation.
- Students enrolled in 1-credit minicourses are not permitted to add, drop or withdraw from the course within the three days before the course's start date.
- Plagiarism — the use of work other than one's own without proper citation or credit — is a serious offense. Penalties for plagiarism include failure on the assignment, failure in the course, and/or College academic discipline, which could mean suspension or dismissal from the College. Plagiarism can involve not only written work but also computer programs, photographs, artwork, films, videos, and sound. Students at all unsure about what constitutes plagiarism or how to give credit should see their instructor and consult the Ithaca College student handbook. For further information see also "Plagiarism" in the "Academic Affairs Information" section of this catalog.

Individual departments and programs in the Park School have additional requirements, especially regarding internal and cumulative grade point averages. Students should refer to the department and program requirements for complete information.

Failure to meet any of the academic regulations of the College, school, or individual department or program will result in placement on academic warning, program suspension, or dismissal from the Park School, or dismissal from Ithaca College.

Academic Status

To remain in good academic standing, a student must meet the minimum cumulative 2.0 gpa (grade point average) and any other academic standards for their degree program under the catalog year in which they entered the degree program, unless a student elects to move to a different catalog year that occurs after the student entered the degree program. Students who do not earn the required minimum overall cumulative GPA will be placed on academic warning or suffer program suspension, program dismissal, or dismissal from the College. In the Park School a student need not be on academic warning for one semester before being suspended or dismissed from the program or dismissed from Ithaca College. Students who drop to part-time status (fewer than 12 credit hours in a semester) without written permission from the associate dean submitted on the appropriate form will be placed on warning.

Dean's List

The dean's list in the Roy H. Park School of Communications is made up of majors in each class who meet all the following criteria during the semester:

- a minimum semester GPA of 3.70
- completion of a minimum of 15 credits, of which at least 12 are graded, not pass/fail or Satisfactory/D/F option
- no final grades of D, F, or I (incomplete)

The dean's list status, awarded each semester, is based on a student's semester GPA rather than the cumulative GPA for all semesters the student has attended Ithaca College.

Academic Advising

All students in the Park School are assigned an academic adviser on entering their academic program. Students are encouraged to meet with their advisers each semester before registration and if they are planning to study abroad or in Los Angeles. Any change in a student's academic plan, such as adding a minor or second major, should first be reviewed with that student's academic adviser. A student may request to change their adviser by filling out a form available in the dean's office.

Park students have an academic adviser assigned to them at all times, even if they are on academic warning, program suspension, or program dismissal. (Students who have been dismissed from their degree program in the Park School retain their academic adviser until they are accepted into another major at Ithaca College.) If a student's academic adviser is on sabbatical, a leave of absence, or a medical leave of absence, or if they leave employment at the College, the student is assigned a new academic adviser. To verify the name of their academic adviser, students should check their online student information on HomerConnect or Degree Works. (www.apps.ithaca.edu (<https://apps.ithaca.edu/>))

Academic Opportunities Internships

All departments and programs of the Park School make available internships in a variety of areas. Students intern in commercial, nonprofit, and government sectors. Internships are normally taken during a student's junior or senior year, but first-year and sophomore students may apply for internship credit. Most internships are pass/fail. One internship credit represents 45 or more hours at the internship over the course of a semester.

Students may enroll in fall, spring, and summer session internships. A summer session internship requires an additional tuition payment beyond the regular academic year. Students may have a total of 12 internship credits, and no one internship may be taken for more than 8 credits without special permission from the deans office.

Information on discretionary internships, including policy and application, is available on the Park School website.

The satellite programs at Los Angeles, and London, U.K., have their own application processes and are administered separately.

Independent Study/Project

An independent study/project offers the student the opportunity to pursue historical, critical, empirical, and/or creative research in communications under faculty supervision. Areas of investigation are described in the course listings for each department. One credit of independent study/project requires 45 hours of faculty-supervised work, which is performed by the student outside of the classroom setting. Therefore, a 3-credit independent study will require a minimum of 135 hours of student work during a semester. An independent study/project is not permitted to supplement the work in another course; it is appropriate to serve as a substitution for a required course that a student is unable to take due to legitimate and verifiable circumstances, and if the student has no other options for taking the required course and staying on track for graduation. All independent studies/projects must be approved by the chair of the department in which they are offered and by the dean's office.

London Program

The Park School participates in the London Center program through course offerings and selected internships. Students interested in studying at the London Center may obtain information from the Office of International Programs.

Singapore Communications Exchange

Juniors and seniors majoring or minoring in the Park School may participate in the academic program offered at Nanyang Technological University in Singapore. In the exchange agreement, up to five students from the NTU School of Communications spend a semester at Ithaca College, and an equal number of Ithaca College students may attend classes, taught in English, in Singapore. For more information about the program, contact the Office of International Programs, 214 Center for Health Sciences, 607-274-3306.

Minors

Communication plays an important role for students in a number of disciplines. To serve these students, the Park School offers several minor programs:

- The media arts, sciences, and studies department offers minors in animation; audio production; international communications; writing for film, television, and emerging media; and still photography.
- The strategic communication department offers minors in communication management and design; live event design and management; and advertising, public relations, and marketing communications
- A minor in journalism is offered in the journalism department.

Details of these programs, including enrollment restrictions, are given under the respective department listings.

The number of seats available for some minor programs may be limited. Students must apply to be accepted into a minor.

Course Duplication

A course that fulfills a requirement for a student's major and minor programs is counted toward the major. The minor discipline determines

whether the requirement is to be waived or how else it must be fulfilled. Course duplication will be considered an issue only when a required course is specified by number and title in both the major and minor.

Courses and Course Schedules

Students should consult the undergraduate course offerings (in Homer Connect) for specific information on the schedule of all courses for the semester. In addition to the courses listed in this catalog, others may be offered on an experimental basis. Descriptions of experimental courses, minicourses, selected topics courses, and other special offerings are available from the dean's or department offices the week before registration begins each semester. (<https://homerconnect.ithaca.edu/>)

Transfer Policies

Transfer Credit after Matriculation at Ithaca College

Prior approval must be obtained on a petition-for-transfer-credit form, found on IC Workflow, for all transfers of both elective courses and courses proposed to substitute for requirements. No more than 12 transfer credits will be accepted for any summer session.

Transfer within the Park School

Students may apply for a change of major within the Park School after they have earned one semester's worth of grades at Ithaca College. Students must complete the Change of Major form electronically at the Ithaca College Workflow website. After completion of the form, the applicant may receive a request for further information or to set-up an in-person interview. The internal transfer process is competitive, and students must have a minimum cumulative GPA of 2.75 and be in good academic standing in order to apply for any of the majors offered in the Park School. Having the minimum cumulative GPA to apply for any major in the Park School does not guarantee admission.

Transfer from Other Schools at Ithaca College

Each year the Park School accepts a limited number of students from other schools at Ithaca College. Students must complete the Change of Major form electronically at the Ithaca College Workflow website. After completion of the form, the applicant may receive a request for further information or to set-up an in-person interview. Applications are reviewed each semester on a rolling basis. One semester of final Ithaca College grades is required. Students must have a minimum cumulative GPA of 2.75 to apply for transfer to any degree program in the Park School. Having the minimum cumulative GPA to apply for transfer to a degree program in the Park School does not guarantee admission.

Transfer from Other Institutions

The Park School accepts a limited number of students from other accredited colleges and universities. For general information about transfer procedures and deadlines, see the "Transfer Students (p. 633)" in the Student Information section.

Credit Evaluations

If a student is considering applying to Ithaca College, the Park School Deans Office can provide an unofficial evaluation of transfer credits if the student sends copies of transcripts and course descriptions from previous coursework. Credit is granted for most college-level courses with a grade of C- or higher. Credit for internships, practicums, workshops, and independent study is generally not transferable into the Park School.

Any number of credits will be accepted, but the following requirements may mean that students will need more than 120 credits to graduate: Students must complete at least 48 credits at Ithaca College (including

the London Center or the Los Angeles program) and must complete at least 50 percent of the required major credits at Ithaca College. After matriculation, transfer students must comply with the academic policies listed here and in the degree program descriptions.

Specific information about transfer student orientation is sent automatically to all matriculating students.

Ithaca College James B. Pendleton Center in Los Angeles

Stephen Tropiano, Professor and Director

The Park School offers an internship-centered, semester-long program in Los Angeles. The junior- and senior-year program is open to all majors and minors in the Park School. Students have the opportunity to intern at a wide variety of organizations in the fields of radio, television, cinema, photography, journalism, new media, public relations, advertising, and corporate and nonprofit communications. Los Angeles internships are for 6 to 8 credits in the fall and spring semesters only, and for 3 to 5 credits in the summer.

In addition to internships, ICLA offers courses that fulfill required or elective courses in most Park School major or minor programs. All classes are held at the James B. Pendleton Center. Student housing is available through Kapi Residences, an independent company that contracts temporary, fully-furnished apartments in the immediate area. Tuition is the same as on the home campus, and housing costs are higher than on-campus housing costs in Ithaca.

The Los Angeles program allows students to experience the cultural diversity of the Los Angeles environment, gain real-world experience in the industry, and make valuable contacts with industry professionals, including many Ithaca College alumni.

Applications and additional information are available on the Los Angeles program website.

The following information is provided in compliance with California State Law:

1. "As a prospective student, you are encouraged to review this catalog prior to signing an enrollment agreement. You are also encouraged to review the School Performance Fact Sheet, which must be provided to you prior to signing an enrollment agreement."

2. "NOTICE CONCERNING TRANSFERABILITY OF CREDITS AND CREDENTIALS EARNED AT OUR INSTITUTION The transferability of credits you earn at (name of institution) is at the complete discretion of an institution to which you may seek to transfer. Acceptance of the (degree, diploma, or certificate) you earn in (name of educational program) is also at the complete discretion of the institution to which you may seek to transfer. If the (credits or degree, diploma, or certificate) that you earn at this institution are not accepted at the institution to which you seek to transfer, you may be required to repeat some or all of your coursework at that institution. For this reason you should make certain that your attendance at this institution will meet your educational goals. This may include contacting an institution to which you may seek to transfer after attending (name of institution) to determine if your (credits or degree, diploma or certificate) will transfer."

3. "You must pay the state-imposed assessment for the Student Tuition Recovery Fund (STRF) if all of the following applies to you: 1. You are a student in an educational program, who is a California resident, or are enrolled in a residency program, and prepay all or part of your tuition either by cash, guaranteed student loans, or personal loans, and

2. Your total charges are not paid by any third-party payer such as an employer, government program or other payer unless you have a separate agreement to repay the third party. You are not eligible for protection from the STRF and you are not required to pay the STRF assessment, if either of the following applies: 1. You are not a California resident, or are not enrolled in a residency program, or 2. Your total charges are paid by a third party, such as an employer, government program or other payer, and you have no separate agreement to repay the third party."

4. "The State of California created the Student Tuition Recovery Fund (STRF) to relieve or mitigate economic losses suffered by students in educational programs who are California residents, or are enrolled in a residency programs attending certain schools regulated by the Bureau for Private Postsecondary and Vocational Education. You may be eligible for STRF if you are a California resident or are enrolled in a residency program, prepaid tuition, paid the STRF assessment, and suffered an economic loss as a result of any of the following:

- The school closed before the course of instruction was completed.
- The school's failure to pay refunds or charges on behalf of a student to a third party for license fees or any other purpose, or to provide equipment or materials for which a charge was collected within 180 days before the closure of the school.
- The school's failure to pay or reimburse loan proceeds under a federally guaranteed student loan program as required by law or to pay or reimburse proceeds received by the school prior to closure in excess of tuition and other costs.
- There was a material failure to comply with the Act or this Division within 30 days before the school closed or, if the material failure began earlier than 30 days prior to closure, the period determined by the Bureau. An inability after diligent efforts to prosecute, prove, and collect on a judgment against the institution for a violation of the Act."

5. "Any questions a student may have regarding this catalog that have not been satisfactorily answered by the institution may be directed to the Bureau for Private Postsecondary Education at 2535 Capitol Oaks Drive, Suite 400, Sacramento, CA 95833 or P.O. Box 980818, West Sacramento, CA 95798-0818, www.bppe.ca.gov, (888) 370-7589 or by fax (916) 263-1897"

6. "A student or any member of the public may file a complaint about this institution with the Bureau for Private Postsecondary Education by calling (888) 370-7589 or by completing a complaint form, which can be obtained on the bureau's internet web site (www.bppe.ca.gov)."

Department of Media Arts, Sciences, and Studies

Jack Powers, Professor and Chair

The Department of Media Arts, Sciences, and Studies (MASS) administers six degree programs, as well as five minors. Choose **Majors and Minors** tab above or links below to review program requirements.

B.S. Television & Digital Media Production (p. 272)
B.S. Cinema and Photography (p. 272)
B.F.A. Film, Photography, and Visual Arts (p. 272)
B.A. Documentary Studies and Production (p. 272)
B.S. Emerging Media (p. 272)
B.F.A. Writing for Film, Television, and Emerging Media (p. 273)
Minor in Animation (p. 273)
Minor in Audio Production (p. 273)
Minor in International Communications (p. 273)
Minor in Still Photography (p. 273)
Minor in Writing for Film, Television, and Emerging Media (p. 273)

B.S. Television & Digital Media Production (p. 285) - Chrissy Guest, Associate Professor and Program Director

The bachelor of science in Television & Digital Media Production is a four-year curriculum designed to prepare students for careers in digital media communications, including producing film and series television, social media, live broadcast production, on-camera performance, radio and audio production and other related communication professions. Students in the major will take 23-27 credits in core television & digital media production courses. Additionally, in consultation with an academic adviser or the Television & Digital Media Production program director, each student will develop an area of study designed to meet the student's unique educational goals. The area of study will consist of 24 credit hours from the Park School or other approved departments. The area of study allows for flexibility in planning off-campus semesters such as Los Angeles, London or with other study abroad programs.

Entering majors must have their own external hard drive for video storage. In addition, applicants should be aware that they will incur additional expenses to produce course productions.

B.S. Cinema and Photography (p. 283) - Cathy Crane, Professor and Program Director

The bachelor of science (B.S.) program in Cinema and Photography has two concentrations – cinema production, and still photography. Majors typically choose their concentration before registering for the first semester of their sophomore year. The bachelor of science program allows students to choose a significant number of elective courses and/or minors from the broad range of offerings at the college.

Entering majors must have their own digital SLR (or mirrorless) camera. In addition, students must pay for laboratory services and purchase materials such as photographic film, printing paper, mounting board, motion picture film, and digital storage media.

[return to programs] (p. 272)

B.F.A. Film, Photography, and Visual Arts (p. 284) - Cathy Crane, Professor and Program Director

The bachelor of fine arts (B.F.A.) program in Film, Photography, and Visual Arts emphasizes an interdisciplinary focus in a production-intensive communications and fine arts program. It combines the same course requirements found in the cinema production concentration of the B.S. program with additional required coursework in still photography and required supplemental courses in video production, studio art, and art history. The B.F.A. program is more tightly structured than the B.S. program, with fewer open electives. Planning for off-campus semesters (in London, Los Angeles, New York City, or elsewhere) must be done carefully.

Entering majors must have their own digital SLR (or mirrorless) camera. In addition, students must pay for laboratory services and purchase materials such as photographic film, printing paper, mounting board,

motion picture film, and digital storage media. Because of the large number of required production courses, B.F.A. applicants should be aware that they will incur additional expenses for supplies.

[return to programs] (p. 272)

B.A. Documentary Studies and Production (<https://catalog.ithaca.edu/undergrad/schools/park-school-communications/interdisciplinary-programs/documentary-studies-production-major-ba/>) - John D. Scott, Associate Professor and Program Director

The interdisciplinary B.A. in documentary studies and production is a four-year curriculum designed to prepare students to become documentary filmmakers as well as to understand the growing and complex world of documentaries, drawing on existing courses in the television and digital media production, cinema and photography, and journalism programs. This is a broad, liberal arts-based curriculum. Requirements are divided into two areas: studies courses and production courses. Open electives enable students to tailor their own programs.

Academic Policies

Transfer students applying to the B.A. in documentary studies and production must have a minimum cumulative GPA of 2.75 or higher to have their application considered; however, this minimum does not guarantee acceptance to the degree program. This policy applies to all applicants to the degree program, including students transferring from another major in the Park School or at Ithaca College and those applying from other academic institutions.

Pre-approved Double Majors

Documentary Studies and Production has partnered with two departments in the School of Humanities and Sciences - Politics; World Languages, Literatures, and Cultures - to create pre-approved double majors. This initiative facilitates dynamic connections between these two areas of study in the humanities, and the communication and critical evaluation skills that are fostered in the Documentary Studies and Production program. Early adopters will enjoy:

- Streamlined admissions procedures for declaring the double major
- Advising support from faculty in both departments

For more information contact the chair or program director from any of the three majors.

[return to programs] (p. 272)

B.S. Emerging Media (p. 285) - Devan Rosen, Professor and Program Director

The Emerging Media degree program prepares students to understand, develop, and lead the social, political and economic role of technology in society. The confluence of the principle areas of the program incubate an intellectual balance of form and function, design and build, art and science; creating a context in which our students can explore emerging opportunities. The program combines content in media analysis, design, and production with computation-based content. As such, the EM program is truly interdisciplinary, with clear intersections between all the degrees in the Park School as well as many programs across Ithaca College in every school. The multi-disciplinary curriculum offers students the opportunity to develop an array of skills, competencies, and conceptual foundations that can be applied to a myriad of industry and intellectual areas.

The flexible curriculum accommodates student interest by allowing each student to select from a variety of electives, but also by adapting to each student's career interests as expressed by the project choice in the "Junior Project" and "Senior Capstone" classes. Additionally, the Project/Capstone experience is an innovative two-year transition from academic-style work to a more professional industry-style project based work. By acclimating the students to long arcing project based assignments, including product/project management and research, they are better prepared to enter both professional and research-based settings. The mission of this program is to engage and support students to become ethical leaders within the evolving discipline of emerging media, whether as designers and creators of media and technology, or as entrepreneurs creating media products. Because new media are inherently multidisciplinary, integrating artistic creativity with computational expertise, this program takes an integrative approach to the education of our graduates – while still maintaining a strong disciplinary focus.

[\[return to programs\] \(p. 272\)](#)

B.F.A. Writing for Film, Television, and Emerging Media (p. 286) - Jack Bryant, Associate Professor and Program Director

The B.F.A. in Writing for Film, Television, and Emerging Media is grounded in the origins and conventions of storytelling with a curriculum designed to expose students to all aspects and principles of screenwriting, as well as provide rigorous writing practice in multiple forms of narrative media, such as short and feature films, television, video games, and various other forms of emerging media. Required study and internships in our Los Angeles program will expose students to careers in the constantly evolving world of screen media.

[\[return to programs\] \(p. 272\)](#)

MEDIA ARTS, SCIENCES, AND STUDIES MINOR PROGRAMS

Minors are required to maintain an overall cumulative GPA of 2.50. Students must have a minimum cumulative GPA of 2.75 in order to apply to any minor in the media arts, sciences, and studies department, but this minimum does not guarantee acceptance.

Minor in Animation (p. 286) - Jason Harrington, Associate Professor and Minor Coordinator

The Animation minor is designed to benefit students across schools and disciplines. The growing world of animation, special effects and motion graphics influences and interacts with many other areas of study. This minor serves students who are interested in learning animation fundamentals such as production methods, industry structure, project development, software techniques and other key aspects of animation production.

Minor in Audio Production (p. 287) - Maria Mejia Yepes, Assistant Professor and Minor Coordinator

This minor provides broad-based knowledge of the theory and practice of audio production. Students learn the scientific and aesthetic aspects of sound, as well as a broad range of audio production techniques applicable to music, theater, and electronic media. Courses are drawn from the Park School, the School of Music, and the physics and theater arts departments in the School of Humanities and Sciences.

Minor in International Communications (p. 287) - Katalin Lustyik, Associate Professor and Minor Coordinator

The minor in International Communications gives students from a variety of disciplines a broad knowledge of international communication theory and practice. It also provides knowledge of the global flow of information. Students have opportunities to relate theories and practices of international communication to their own disciplines.

Television-Radio majors with a minor in international communications will have the course TVR 12400 waived as a requirement for the minor, since that course is required for the major.

Minor in Still Photography (p. 287) - Rhonda Vanover, Associate Professor and Minor Coordinator

A minor in Still Photography provides opportunities to develop a systematic knowledge of the discipline. Minors must be declared through consultation with still photography faculty and approved by the the Cinema, Photography and Media Arts program director. This minor is not open to majors in cinema and photography or in film, photography, and visual arts.

Minor in Writing for Film, Television, and Emerging Media (p. 287) - Jack Bryant, Associate Professor and Minor Coordinator

The Writing for Film, Television, and Emerging Media minor is designed to give majors in other disciplines a working knowledge and developed skill set in writing for screen media. Students may gain experience in screenwriting for short and feature films, television, video games, and various other forms of emerging media.

[\[return to programs\] \(p. 272\)](#)

Course Duplication

A course that fulfills a requirement for a student's major and minor programs is counted toward the major. The minor discipline determines whether the requirement is to be waived or how else it must be fulfilled. Course duplication will only be considered an issue when a required course is specified by number and title in both the major and minor.

Majors & Minors

- Cinema & Photography Major – B.S. (p. 283)
- Documentary Studies and Production Major - B.A. (p. 283)
- Film, Photography, & Visual Arts Major – B.F.A. (p. 284)
- Emerging Media Major – B.S. (p. 285)
- Television & Digital Media Production Major – B.S. (p. 285)
- Writing for Film, Television, & Emerging Media Major – B.F.A. (p. 286)
- Animation Minor (p. 286)
- Audio Production Minor (p. 287)
- International Communications Minor (p. 287)
- Still Photography Minor (p. 287)
- Writing for Film, Television, & Emerging Media Minor (p. 287)

Subjects in this department include: Cinema and Photography (CNPH) (p. 274), Media Arts, Sciences & Studies (MASS) (p. 277), Television & Digital Media Production (TVR) (p. 277), Emerging Media (EMED) (p. 277), and Documentary Studies and Production (DOCU) (p. 282)

Cinema and Photography (CNPH)

CNPH 10100 Introduction to Film Aesthetics and Analysis (LA)

An analysis of the cinematic techniques utilized throughout film history to create meaning, suggest mood, develop psychology of characters, and communicate ideas. Emphasis is placed on classic American and foreign films, from the silent period to the present day. (F)

Attributes: CA, DV, HM, HU

3 Credits

CNPH 11100 Cinema Production 1 (NLA)

In this intensive production experience, students learn the rudiments of creating a motion picture. Aspects of preproduction (idea conception, budgeting), production (camerawork, directing), and postproduction (sound and picture editing) are introduced as students create multiple works of cinema art. (F,S)

Attributes: CCCS

4 Credits

CNPH 14100 Introduction to Photography (LA)

Introduction to photographic processes and historical, conceptual, and aesthetic concerns. Fundamentals of the art, including camera handling, exposure, digital image control and correction, lighting, composition, and printing. (F,S)

Attributes: 3B, CA, CCCS, ESTS, MC

4 Credits

CNPH 20310 The Photograph in Exhibition (LA)

Addresses the issue of photographic exhibition – touching on considerations of context, scale, and installation – as it affects the experience and meaning of images. Students will attend a series of photographic exhibitions and will critically evaluate the content of each through written papers and oral presentations. Prerequisites: Open only to B.S. cinema and photography students in the still photography concentration. Corequisites: CNPH 24000. (S)

1 Credit

CNPH 20500 Photographic Currents (LA)

Introduces key concepts, historical frameworks and current debates in the study of contemporary photography. Readings, lectures and visits to exhibitions focus on particular genres, ideas and international practices within the contemporary media arts, specifically photography. Topics vary on faculty expertise and research interest. Only offered at the Ithaca College London, New York and Los Angeles centers. Sophomore standing. (IRR)

Attributes: SCE

3 Credits

CNPH 20700 European Cinema (LA)

Concentrates on post-Second World War European cinema up to the present day. Study of the themes and styles of the European art film, authorship, and the relation of audience to film criticism. This course is offered only through the Ithaca College London Center. Prerequisites: Acceptance into the Ithaca College London program. (IRR)

Attributes: SCE

3 Credits

CNPH 21002-21012 Special Topics in Cinema Production (NLA)

Study of the cinema production process using significant works representative of important historic and contemporary ideas and movements. Screenings and readings guide discussions and analysis geared toward providing familiarity with a broad range of production models and connecting them to larger questions of culture production and artistic expression. Students in the B.S. cinema production concentration and B.F.A. degree in film, photography and visual arts may repeat the course once. Corequisite: CNPH 20300 Cinema in Exhibition for students in B.S. Cinema & Photography - Cinema Production concentrations only. Prerequisite: One course in the humanities or fine arts. (F-S)

4 Credits

CNPH 21400 Hollywood and American Film (LA)

The focus is on the historical, economic, and social formations in the evolution of a wide range of American cinemas, including Hollywood, independent work, documentary, experimental, and hybrid forms. A survey and analysis of films of representative American directors, styles, and genres will be conducted. (S)

Attributes: CA, HM, HU, TIDE, TWOS

4 Credits

CNPH 22000 Cinematic Currents (NLA)

Study of the cinema production process using significant works representative of important historic and contemporary ideas and movements. Screenings and readings guide discussions and analysis geared toward providing familiarity with a broad range of production models and connecting them to larger questions of culture production and artistic expression. Students in the B.S. cinema production concentration and B.F.A. degree in film, photography and visual arts may repeat the course once. Prerequisites: Sophomore standing or above. (F,S)

4 Credits

CNPH 22400 Cinema Production 2 (NLA)

In this intermediate-level motion picture production course, students complete several works of cinema, continuing where Cinema Production I left off in both technical and artistic sophistication. Students will make significant progress in the areas of sound design, cinematography, directing, and editing. Prerequisites: CNPH 11100. (F-S)

Attributes: CCCS

4 Credits

CNPH 24000 History of Photography (LA)

Study of photography from its beginning to its emergence as an important means of communication and expression. Critical examination of the growth and relationship of the contribution of photography to the visual arts. The development of the medium is seen through the eyes of past and present masters who struggled to understand and perfect it. Prerequisites: Nonmajors must have at least sophomore standing. (S)

Attributes: HU, MAP

3 Credits

CNPH 24200 Intermediate Photography (NLA)

Rigorous immersion in color processes and aesthetic concerns. Further technical mastery of image making, including large-format film, digital acquisition, high-resolution scanning, color control, and digital color output. Coursework introduces different modes of working and genres in the medium of photography. Students are asked to employ the various techniques to solve a variety of conceptual and aesthetic problems in the medium. Prerequisites: CNPH 14100. (F-S)

Attributes: CCCS

4 Credits

CNPH 29200-29244 Minicourses in Cinema, Photography, and Media Arts (NLA)

A series of short courses in specialized areas of cinema, photography, and media arts that do not meet the College guidelines for liberal arts designation. Department faculty participate in their areas of expertise. Cannot repeat specific topics. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester; sophomore standing. Pass/fail. (IRR)

1 Credit

CNPH 30000 Fiction Film Theory (LA)

Close visual analysis of film, focusing on cinematographic and directorial aspects of film style. Detailed examination of specific films and various theories. Prerequisites: CNPH 10100; at least two level-2 liberal arts courses, and WRTG 10600 or equivalent. (F)

Attributes: SCE, WI

3 Credits

CNPH 30100 History and Theory of Documentary (LA)

Investigation of the social, historical, cultural, and aesthetic implications of nonfiction film through historical overview of various films. This course uses social theory, economic theory, ethnography, historiography, and documentary theory to explore the intersection of historical contexts and film movements. Prerequisites: CNPH 10100 or TVR 12200; at least two level-2 liberal arts courses, and WRTG 10600 or equivalent. (S)

Attributes: HU, SCE, WI

3 Credits

CNPH 30200-30205 Selected Topics in Cinema and Photography (LA)

Intensive exploration and analysis of a specific area of film study, allowing students to concentrate their study in an upper-level course. Depending on faculty research interests and student demand, this course may cover genres, periods, directors, and other cinematic conceptual frameworks. Prerequisites: CNPH 21400 or level-2 course with an HU designation; permission of instructor. (IRR)

Attributes: SCE

3 Credits

CNPH 30400-30417 Selected Topics in Photography (NLA)

Exploration and analysis of a specific area of photography. Topics vary based on student demand and on faculty expertise and research interest. Prerequisites: CNPH 14100, CNPH 24200, or may vary depending on topic – refer to Undergraduate Course Offerings each semester. (F-S)

4 Credits

CNPH 30418 ST: Photography (NLA)

Exploration and analysis of a specific area of photography. Topics vary based on student demand and on faculty expertise and research interest. Prerequisites: CNPH 14100, CNPH 24200, or may vary depending on topic – refer to Undergraduate Course Offerings each semester. (F-S)

4 Credits

CNPH 30500 Contemporary Film Criticism (LA)

Analysis and evaluation of contemporary films and criticism. Students trace current feature films to their artistic and cinematic roots and assess the value of the new offerings. At the same time, they evaluate national criticism (not reviews) of the new offerings. (IRR)

Attributes: SCE

3 Credits

CNPH 31000 British Comedy: Film, Television, and Radio (LA)

Exploration of the development of the cultural characteristics of British Comedy programming for cinema, television, and radio. This class traces the evolution of comedic forms, and surveys contemporary genres—sketch, broken, sitcom, satire, stand-up, improv, the impressionists, and "sit-trag." Only offered in London. Prerequisites: three courses in humanities (HU) and/or social sciences (SS), junior standing and acceptance into the Ithaca College London Program. (Y)

Attributes: SCE

3 Credits

CNPH 32100 Advanced Cinema Production: Fiction (NLA)

This intensive, advanced-level course examines cinema as a form of storytelling. Students produce their own cinema projects and critical papers to familiarize themselves with techniques of aesthetics specific to narrative cinemas. A final project of the student's design and participation in a culminating public exhibition of work from the class are required. Prerequisites: CNPH 22400. (F-S)

4 Credits

CNPH 32200 Advanced Cinema Production: Nonfiction (NLA)

This intensive, advanced-level course examines the relationship between the theory and practice of cinematic documentary. Students produce short cinema projects and critical papers to familiarize themselves with techniques and aesthetics specific to documentary modes of cinema. A final project of the student's design and participation in a culminating public exhibition of work from the class are required. Prerequisites: CNPH 22400 or TVR 29900; open only to students in the B.S. cinema and photography, B.F.A film, photography, and visual arts, or B.A. documentary studies and production programs. (S)

4 Credits

CNPH 32300 Advanced Cinema Production: Experimental (NLA)

This intensive, advanced-level course examines cinema as a visual art form akin to painting, photography, and sculpture. Readings, lectures, and screenings are used to develop a basic context for relevant critical, historical, and theoretical issues, with emphasis placed on the various formal, conceptual, structural, and post-structural ideas that characterize 20th-century modern and contemporary art. Students produce their own cinema projects and critical papers to familiarize themselves with these ideas and practices. A final project and participation in a culminating public exhibition of work from the class are required. Prerequisites:

CNPH 22400. (F)

4 Credits

CNPH 32400 Advanced Cinema Production: Animation (NLA)

Builds on animation fundamentals while giving students an opportunity to develop and create more ambitious animated projects. In the context of these projects, we will continue to discuss industry production methods, watch contemporary animators' work and examine the role changing technology plays in production. Prerequisite: MASS 20100. (Y)

4 Credits

CNPH 33001 Special Topics in Advanced Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y)

4 Credits

CNPH 33002 ST: Adv. Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y) 4 Credits

CNPH 33003-33009 Special Topics in Advanced Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y) 4 Credits

CNPH 33010 ST: Adv. Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y) 4 Credits

CNPH 33011 Special Topics in Advanced Cinema Production (NLA)

Exploration of a specific area of cinema production, designed to enhance and enrich the traditional production curriculum and provide significant professional training for an ever-changing discipline. Subjects will likely include, but are not limited to: cinematography, sound design, advanced editing, alternative special effects, and directing for the screen. Topics will vary to reflect current and future trends in cinema production, as well as student demand and faculty expertise. Prerequisites: CNPH 22400. (Y) 4 Credits

CNPH 34200 Contemporary Photographic Genres (LA)

Through lectures, discussions, and production of photographic works, the student explores a range of key genres current in the field. Class locates contemporary photographic practices within a lineage of art historical, philosophical, and creative conversations from modernism, through postmodernism, to the current cultural moment. Photographic theories, criticism, classification, and aesthetics are explored and brought to bear on the student's photographic work. Prerequisites: Junior standing, CNPH 24000 and CNPH 24200. (F) 4 Credits

CNPH 42000 Thesis Cinema Production (NLA)

Individual experience preparatory to graduate study and careers in cinema production. This course is designed to bring together ideas, processes, practices, and theories in the service of the production of a substantial work of cinema. Students will pursue an entire project from conception to completion, combining intensive preproduction, production, and post-production with in-depth instruction on lab work, distribution, and exhibition. Throughout the course, emphasis is placed on instructor, peer, and self-critique. In addition to completion of the final production, students are expected to generate an essay that situates their work within the history of the medium and contextualizes its relationship to current intellectual and creative debates. Prerequisites: MASS 13400 or JOUR 11100 and CNPH 32100 or CNPH 32200, CNPH 32300, CNPH 32400, CNPH 32500, or CNPH 33001-33099. (F,S) 4 Credits

CNPH 44300 Photo Workshop (NLA)

Individual experience preparatory to graduate study and to careers in photography. Designed to fit the individual student's background and interests. May include research projects or advanced photography. Course participants are expected to complete an artist's essay that situates their work within the history of the medium and contextualizes its relationship to current intellectual and creative debates. Students may take a second semester of this course with permission of instructor. Prerequisites: CNPH 14100; CNPH 24200; 1 course from CNPH 30400-30499; senior standing. (F-S) 4 Credits

Attributes: UND

4 Credits

CNPH 45000 Cinema Production Practicum (NLA)

Capstone-level motion picture production course in which students undertake the primary creative and professional roles in a significant project under the direct supervision of a faculty specialist. The nature of the project will vary with each offering. Prerequisites: CNPH 11100; CNPH 22400; CNPH 32100, CNPH 32200, CNPH 32300, or CNPH 32400; senior standing; faculty permission. (IRR) 4 Credits

CNPH 49000 Internship: Cinema and Photography (NLA)

Jointly supervised work experience with a cooperating institution in the field of cinema or photography, intended to motivate the intern toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Prerequisites: Junior cinema and photography or film, photography, and visual arts major or minor; completion of the Park School internship procedures. Total may not exceed including London and Los Angeles internships. (F,S,U,W) 1-8 Credits

1-8 Credits

CNPH 49800 London Communications Internship (NLA)

A limited number of internships with cooperating institutions or organizations are available to communications majors. The jointly supervised work experience offers the opportunity to learn through observation and participation in a professional setting. Prerequisites: Junior or senior standing; completion of Park School internship procedures; approval of the dean in the semester preceding the London registration. Pass/fail only. (F-S) See "London Center." 3-6 Credits

3-6 Credits

CNPH 49900 Independent Study: Cinema and Photography (LA)

Intensive study of one of the following problems under the supervision of a faculty adviser: program evaluation, scriptwriting, production, programming, film and cinema studies, contemporary issues in communications. Comprehensive research paper and/or project is required. Prerequisites: Junior cinema and photography or film, photography, and visual arts major. (F-S)

1-4 Credits

Media Arts, Sciences & Studies (MASS)**DOCU 10100 Documentary Immersion (LA)**

An introduction to the vast field of documentary with regular guest presentations about the various aspects of the theory and practice of the field drawn from across the Park School faculty. Attendance is required at a number of documentary-oriented special events both in the Park School and in other schools on campus, including screenings, guest lectures, workshops, master classes, concerts, trainings, and symposia. (F)

1 Credit

DOCU 40100 Documentary Industries (LA)

An overview of the political economies, infrastructures, and operations of documentary practices across platforms such as print, analog, digital media, and hybrid forms within both national and international contexts. It discusses budgeting, project development, technologies, research, production and team management, fundraising, co-productions, granting agencies, legal and ethical issues, marketing design, public relations, press kits, festivals, broadcast, streaming, roll-out strategies, website development, engagement campaigns, audience development for festivals and screenings, distribution, four walling, roadshowing, self-distribution, institutional and home-use sales, community-based screenings, and eventizing. (S)

Attributes: CCCS

1 Credit

DOCU 49900 Documentary Practicum (NLA)

Produce a substantive nonfiction media project with the guidance of a faculty member. Projects that partner with nonprofit, activist or educational groups outside of the Park School of Communications are encouraged. Works for hire are not eligible. Access is restricted to proposals that are approved by the Documentary Studies and Production Steering Committee before the registration period in the prior fall or spring semester. The outcome should be a completed work suitable for inclusion in a professional portfolio and that has value as a form of community engagement on substantial issues. By permission of instructor. Prerequisites: TVR 29900 or JOUR 21100. (IRR)

1-4 Credits

Television & Digital Media Production (TVR) & Emerging Media (EMED)**EMED 12000 Introduction to Emerging Media (LA)**

Introduction to emerging media and related issues, both social and technical. Focus on the history and current state of emerging media using relevant theories, areas of practice, applications, and media literacy. Discussion, research, writing, and group collaborative work focused on challenges and opportunities in the field of emerging media. (FY)

Attributes: SCE

4 Credits

EMED 21400 Design of New Media: Theory, Function and Analysis (LA)

Fundamental principles of design, function, and usability of new media technology, including games, mobile applications, web-based media, and other digital media platforms. Assessment of examples of new media designs for strengths, limitations, and usability; exploration of rules, techniques, and problem-solving strategies that go into the creation of new media applications and platforms. Open to majors in emerging media. Prerequisites: EMED 12000 or TVR 12400. (Y)

4 Credits

EMED 31300 Topics in Media Law and Policy (LA)

Overview of First Amendment theory, legal precedent, copyright, libel, and privacy as applied to existing and emerging digital media, followed by an in-depth investigation of specific new media law and policy issues determined by faculty expertise and student interest. Prerequisites: EMED 12000, TVR 12100, or TVR 12400; Emerging Media majors; junior standing. (IRR)

4 Credits

EMED 31400 Emerging Media Research Methods and Critical Inquiry (LA)

This course covers both quantitative and qualitative research methods in fields related to communication and information technologies, including sampling, survey, experiment, systematic content analysis, in-depth interviews, focus groups, and qualitative content analysis. Review of literature, identification of basic concepts, problems, responsibilities, and research ethics; procedures and basic techniques of open source computational data analysis; hypothesis testing and statistical interpretation and analysis; and critical inquiry. A research project is required. Prerequisites: EMED 12000 or TVR 12400. (Y)

Attributes: QL

4 Credits

EMED 32000 Utopias and Dystopias of Emerging Media (LA)

Analysis of theoretical, social, economic, political, technological, and cultural perspectives that impact and are impacted by new and emerging media technologies. Theoretical framework or technological focus defined by contemporary issues and student interest. Prerequisites: WRTG 10600 or ICSM 108xx or ICSM 118xx; EMED 12000 or TVR 12400. (Y)

Attributes: DV, SCE, WI

4 Credits

EMED 38500 Emerging Media Junior Project (NLA)

Hands-on introduction to project design, development, implementation, and testing, with emphasis on the knowledge and skills required to successfully complete the production cycle, including team dynamics, market analysis, project management, documentation, and testing. Students work in teams on projects assigned by the instructor. (S)

4 Credits

EMED 48500 Emerging Media Capstone (NLA)

Working as part of a team, the students design, develop, and document a significant emerging digital media project. Prerequisites: EMED 38500; Emerging Media Majors. (S)

4 Credits

TVR 10100 Introduction to Media Production (NLA)

An applied, practical introduction to the fundamentals of audio and video electronic media production. Covers theory, terminology, and techniques, with an emphasis placed on the function and operation of various analog and digital equipment. The basic technical and aesthetic skills of both radio production and television studio production are covered. Open to sport media majors in the spring semester. (IRR)

Attributes: CCCS

4 Credits

TVR 10500 Introduction to Audio (NLA)

An applied practical introduction to the fundamentals of audio. Covers theory, terminology, and technique, with emphasis on the function and operation of various analog and digital used for audio acquisition, mixing and output. The basic technical and aesthetic audio skills for radio, television, cinema, and new media production and post-production are covered. Prerequisites: Majors in television-radio; emerging media, - media design and production concentration or minors in audio production. (F-S)

Attributes: CCCS
3 Credits

TVR 10700 Introduction to Television Studio Production (NLA)

Introductory course that explores the techniques and purpose of various television studio productions through direct hands-on experience. Offers students the opportunity to engage in the many facets of television studio production through a variety of projects and exercises. Prerequisites: Television-radio majors only. (F-S)

Attributes: CCCS
4 Credits

TVR 11500 Introduction to Video Production (NLA)

Introduction to video production techniques, including portable video camera operation, video editing, lighting, scripting, media aesthetics, and logistics. Students will develop both their creative and technical skills through a combination of production exercises, projects, readings, and critiques. (F,S)

Attributes: CCCS
4 Credits

TVR 12100 Introduction to Mass Media (LA)

Survey of American mass media with emphasis placed on the historical development, structure, organization, function, and effects of mass media in society. Discussion includes issues such as ethnic, racial, age, and sex-role stereotyping; violence; children and the media; and economic control and the role of governmental regulation. (IRR)

Attributes: SCE, SS
3 Credits

TVR 12200 Introduction to Media Aesthetics and Analysis (LA)

Teaches techniques and criteria for analysis of media productions. Examines the basic production techniques used to communicate with visual images and sound. Topics such as light, composition, motion, sound, editing, and time may be covered. Aesthetics in the production, consumption, and critique of media are surveyed. (F-S)

Attributes: UND
3 Credits

TVR 12300 Introduction to Law and the Media (LA)

An introduction to law, lawyers, juries, and the legal system as portrayed in dramatic, news, and documentary television programming as well as in popular films. This course will study how the media and the legal system influence each other. Ethical issues concerning how the media portrays the legal system to the audience will be analyzed. Concepts including double jeopardy, jury tampering, hung juries, new trials, judicial misconduct, appeals processes, and judicial corruption will be discussed as they relate to the various contemporary television programming and films to be viewed in class. When possible, local judges or lawyers will appear on a discussion panel. (S)

3 Credits

TVR 12400 Introduction to Media Industries (LA)

Introduction to digital and electronic media industries, both traditional and emerging. Focus on ethical, legal technological, economic, and creative shifts resulting from new media platforms and cross-platform distribution. Discussion, research, writing, and group collaborative work focused on emerging challenges and opportunities in the new media environment. (F,S)

Attributes: SCE
4 Credits

TVR 13100 Media Writing (LA)

Exposure to a diverse selection of writing styles and formats used in the mass media. It will introduce critical, analytical, and applicable writing skills in areas such as audio, visual, and interactive media. (F,S)

Attributes: CCCS, MC
3 Credits

TVR 20600 British Media and the Global Context (LA)

Studies key aspects of British media in historical and cultural contexts. Students will research specific case studies of British media's global spread, influence, and links with global economy and culture. This course is offered only through the Ithaca College London Center. Prerequisites: Sophomore standing; acceptance into the Ithaca College London program. (Y)

3 Credits

TVR 21100 New Media Business and Economics (LA)

Investigates the range of business and economic models applicable to new and emerging media industries. Critiques business models that drive traditional media industries and reviews the economic and social viability of alternative business models for emerging media. Emerging media and television-radio majors. Prerequisites: TVR 12400. (Y)

Attributes: SS
4 Credits

TVR 21400 Design of New Media: Theory, Function and Analysis (LA)

Fundamental principles of design, function, and usability of new media technology, including games, mobile applications, web-based media, and other digital media platforms. Assessment of examples of new media designs for strengths, limitations, and usability; exploration of rules, techniques, and problem-solving strategies that go into the creation of new media applications and platforms. Open to majors in emerging media and television-radio. Prerequisites: TVR 12400. (Y)

4 Credits

TVR 21500 Television Series Production (NLA)

Previously learned skills will be amplified, enhanced, and refined through a combination of in-class exercises and outside projects with equal attention to form and content. Emphasis will be placed on the development of ideas, storytelling, and greater sophistication in all areas of television series production. Prerequisites: TVR 11500 or CNPH 11100. (F,S)

4 Credits

TVR 22000 Global Flow of Information (LA)

A critical review and analysis of theories, policies, and issues in international and intercultural communication, as well as the flow of information among nations of the world through traditional and contemporary communication channels. Includes interpersonal communications, the mass media, satellite communications, diplomacy and international conventions. Readings and discussions of research studies demonstrate the interconnections of communication and international relations. Emphasis is placed on the impact of the flow of information on political, economic, cultural, legal, and social aspects of various countries and regions. Prerequisites: One course in the social sciences. (F)

Attributes: SCE, WGS, WGSJ

3 Credits

TVR 22500 Television Production and Direction (NLA)

This intermediate studio television production course builds upon basic production techniques. Video aesthetic theories will be applied in creative studio productions. Prerequisites: TVR 10700 and TVR 11500. (F-S)

4 Credits

TVR 23500 Editing (NLA)

You will be editing a variety of video materials in differing genres with the goal of gaining better fluency with fundamental aspects of story design, organizational strategies, software techniques, and workflow processes related to the genre in question. This course will be taught with Adobe Premiere Pro editing software and will include effective workflow processes between it and other software, including After Effects, Audition, ProTools and DaVinci Resolve. Prerequisites: TVR 11500 or CNPH 11100. (F,S)

4 Credits

TVR 25100 Critical Thinking and Mass Communication (LA)

An applied introduction to critical thinking skills, relevant to many disciplines. Presents practical techniques for evaluating information and identifying propaganda. Useful to journalists and media professionals, and also for media consumers who rely on print, broadcast, and online sources for information. Students who take CLTC 11000 are not permitted to take this course. Prerequisites: Sophomore standing. (F,S)

3 Credits

TVR 26000 Quantitative Mass Media Research Methods (LA)

A basic introduction to quantitative research methods in mass communications, including sampling, survey, experimental, and content analysis. Review of literature, identification of basic concepts, problems, responsibilities, and research ethics; procedures and basic techniques of computer data analysis. A research project is required. Prerequisites: TVR 12100 or TVR 12400. (IRR)

3 Credits

TVR 26200 Qualitative Mass Media Research Methods (LA)

A basic introduction to theories and research skills used in qualitative research as applied to mass communication. Major topics include cultural studies theories, ethnography, historical research, depth interviews, qualitative content analysis, and focus groups. Review of literature, identification of basic concepts, problems, and responsibilities. A research project is required. Prerequisites: TVR 12100 or TVR 12400. (IRR)

(IRR)

Attributes: CCRM

3 Credits

TVR 26300 Mass Media Research Methods (LA)

A basic introduction to quantitative and qualitative research in mass communications, including sampling, survey, experiment, systematic content analysis, in-depth interviews, focus groups, and qualitative content analysis. Review of literature, identification of basic concepts, problems, responsibilities, and research ethics; procedures and basic techniques of computer data analysis; hypothesis testing and statistical interpretation and analysis. A research project is required. Prerequisites: TVR 12100 or TVR 12400. (F,S)

Attributes: QL

4 Credits

TVR 27100 Audio Production (NLA)

Examines the theory and practice of audio production and highlights the unique properties of the medium. The concept of sound design is examined as applied to programming intended for persuasion, information, and entertainment. In addition to providing hands-on experience through production exercises and projects, the course places considerable emphasis on aesthetic analysis of audio products through a series of "critical listening" exercises. Prerequisites: TVR 10100 or TVR 10500 (or MUMC 14500 for students in sound recording technology major only). (F-S)

4 Credits

TVR 28000 Making the Video Essay (NLA)

The video essay is an open cinematic form that is used to explore ideas and often includes voice-over narration. As a form, the cinematic essay has been around for decades, but only in its most recent form "the video essay" has it become a dominant form of self-expression online. It is within this current cultural landscape that we will examine and analyze modern forms of the video essay, and that each student will produce their own original work. Prerequisites: TVR 11500 or CNPH 11100. (IRR)

Attributes: MC

2 Credits

TVR 28400 A Brief History of Television Comedy (LA)

This course studies key aspects of television comedy in historical and cultural contexts. Students will research specific comedians and their influence on the development of television programming and distribution through written and an oral presentation. Students will attend presentations, museum exhibitions and examine archive materials at the National Center for Comedy. (S)

1 Credit

TVR 29200-29309 Minicourses in Communications (NLA)

A series of short courses in specialized areas of communication that do not meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May not receive credit for both GCOM 29219 and TVR 29201. Prerequisites: Vary depending on the topic; refer to the class schedule on HomerConnect each semester. Pass/fail. (IRR)

1-2 Credits

TVR 29800 Exploring the Documentary (LA)

An exploration of the documentary with an emphasis on history and appreciation, useful to consumers and producers who would like to learn more about the form. Topics include documentary "truth," subgenres, production styles, and evolution of documentary from cinema to television and the World Wide Web. Prerequisites: CNPH 10100 or TVR 12200. (F,S)

3 Credits

TVR 29900 Nonfiction Production (NLA)

An intermediate-level documentary production course that emphasizes the production skills, the storytelling concepts, and the legal and ethical framework for successful documentary productions. Also covered are different stylistic approaches to the genre, concepts related to the documentary maker's "voice" within his or her work, subgenres within the documentary format, and distribution, fund-raising, and research strategies. Prerequisites: TVR 11500 or CNPH 11100. (Y)
4 Credits

TVR 30400 Advanced Studio Production (NLA)

An advanced studio television course expanding on established production skills acquired in previous courses while introducing additional concepts and techniques required for complex multicamera productions. Through producing, writing, and directing a variety of programs, students will apply production theories and concepts within a digital production environment. Prerequisites: TVR 11500; TVR 22500. (F-S)
4 Credits

TVR 30900 Motion Graphics and Animation (NLA)

This course will introduce motion graphics and animation techniques using traditional and computer forms. Theoretical and conceptual approaches to motion graphics design and techniques will be explored using international examples. Students will complete several animation projects with increasing complexity during the semester. Prerequisites: TVR 11500 or CNPH 11100; television-radio or emerging media major or cinema and photography or film, photography and visual arts; sophomore standing. (Y)
4 Credits

TVR 31000 Experimental Media: Production and Criticism (NLA)

Examines the history and theory of experimental video, electronic, and digital media as a cross-disciplinary visual and aural art form that emerged from several art disciplines and the associated developing technologies. An active hands-on exploration of the wide variety of aesthetic strategies used in the conceptualization, creation, presentation, and exhibition of electronic media. By designing individual and collaborative projects, students gain a broader awareness of the field and the technical and creative innovations that have shaped the contemporary art culture and the media arts industries. Prerequisites: TVR 11500 or CNPH 11100; television-radio, emerging media, cinema and photography, or film, photography, and visual arts major; sophomore standing. (Y)
Attributes: UND
4 Credits

TVR 31200 Media Law (LA)

This course examines the legal boundaries to freedoms of speech and press, both historically and present-day. Students learn practical applications of First Amendment rights concerning mass communication, while also investigating fundamental theories of free speech and specific issues impacting contemporary society. Course topics include government regulation of media; intellectual property (copyright and trademark); commercial speech; defamation; privacy; access to places and information; political speech; media and the judiciary; corporate speech; and reporter/source confidentiality. This course offers a combination of discussion, lecture and exercises. The incorporation of current free speech issues help to guide and inform class discussions. Prerequisites: Any TVR course at level-100, or JOUR course at level-100, or STCM course at level-100, or LGST course at level-100. (F,S)
Attributes: LMAL, LMEL, LSCO
4 Credits

TVR 31300-31305 Topics in Media Law and Policy (LA)

Overview of First Amendment theory, legal precedent, copyright, libel, and privacy, followed by an in-depth investigation of specific media law and policy issues determined by faculty expertise and student interest. Prerequisites: TVR 12100, TVR 12400, JOUR 11100, STCM 10300, or any LGST course. (F,S)
Attributes: LMAL, LMEL, LSCO
4 Credits

TVR 31500 Television Series Directing (NLA)

This course has two primary agendas, one aesthetic and one technical. The aesthetic focus is on directing, creative authorship, personal vision, and the exploration of strategies and methods for transforming vision into reality. The technical focus is on increasing sophistication and skill within specific areas of television series production: directing, camera work, lighting, production design, production planning, and video editing. Prerequisites: TVR 21500 or CNPH 22400. (Y)
4 Credits

TVR 32000 Topics in Media Technology (LA)

Analysis of theoretical, social, economic, political, technological, and cultural perspectives that impact and are impacted by new and emerging media technologies. Theoretical framework or technological focus defined by faculty expertise and student interest. Prerequisites: WRTG 10600 or ICSM 108xx or ICSM 118xx; TVR 12100 or TVR 12400; junior standing; television-radio or emerging media majors. (Y)
Attributes: DV, WI
4 Credits

TVR 32200 New Telecommunications Technologies (LA)

Examines the development of new technologies and communication networks. The structure of the marketplace, government policy, and the social impacts of new technologies are discussed. Issues such as globalization, computer security, privacy, and changes in regulations may be covered. Prerequisites: TVR 12100 or TVR 12400; two level-2 courses in one or more of the following fields: television-radio, psychology, sociology; junior standing. (F-S)
3 Credits

TVR 32400 European Mass Media (LA)

A comparative study of Western and Eastern European mass media, with emphasis placed on their historical development, structure, organization, function, and effects in society. Issues discussed include privatization, satellite broadcasting, East-West media relations, and contemporary political use of the mass media. Prerequisites: Three courses in social sciences; junior standing. (F)
Attributes: SS
3 Credits

TVR 32500 Seminar in Development Communications (LA)

A forum for discussion and analysis of various issues involved in the use of mass media in the development effort of third world countries. Examples in a number of African and Asian nations are used to illustrate the use of media support in the development process, successfully or otherwise. External and internal forces that affect media implementation are analyzed. The issue of a communications workforce, its lack in third world countries, and its impact on the present state of affairs are discussed. Prerequisites: Three courses in social sciences; junior standing. (IRR)
Attributes: UND
3 Credits

TVR 32700 Program Development for Entertainment Media (NLA)

Exploration and application of the creative process for developing program content for entertainment media industry. Students will work with true events or novels for features, television movies, series and Internet distribution. Analysis of creative properties and case studies will exemplify the most effective means for producers, writers, directors, and programmers to develop concepts for the theatrical and television marketplace. Prerequisites: CNPH 10100 OR TVR 12400. (Y)
4 Credits

TVR 33100 Production Management for Film, Television and New Media (NLA)

Provides a working knowledge of the role of the executive and line producer in pre-production through post-production on a film, television or new media project. Topics covered include: production planning, budgeting, scheduling, business considerations, and post-production management. Prerequisites: TVR 11500, CNPH 11100, or permission of instructor. (Y)
4 Credits

TVR 33500 Electronic Media Criticism (LA)

Critical exploration of the complex role television programming plays in the cultural representation and construction of marginalized social groups and the medium's treatment of issues related to gender, race, class, and sexuality. The course analyzes from a historical, industrial, economic, and social perspective how classical and contemporary television shows both perpetuate and challenge negative stereotyping and false social myths related to sexism, racism, transphobia, and homophobia. Prerequisites: TVR 12100 or TVR 12400; CNPH 10100; WRTG 10600 or ICSM 10800/11800. (F,S)
Attributes: DV, SCE, WGS, WGS3, WI
3 Credits

TVR 35200 British Media and Society (LA)

A study of the role and function of media in modern societies, the effects and impact of the mass media, and the media as agents of democracy. An analysis of the relationship of British media to British society in the postwar period through examination of a wide range of material – news, current affairs, documentary, drama, situation comedy. Prerequisites: Junior standing or above. (F)
Attributes: SS
3 Credits

TVR 37100 Advanced Audio Production (NLA)

The study and application of the creative capabilities of advanced audio equipment. Students learn the theory and techniques of sophisticated audio production, including analog and digital multi-track recording, mixing, signal processing, live remote recording, digital editing, creative sound production, and sound design for other media. Prerequisites: TVR 27100. (F)
4 Credits

TVR 38500 Emerging Media Project (NLA)

Hands-on introduction to project design, development, implementation, and testing, with emphasis on the knowledge and skills required to successfully complete the production cycle, including team dynamics, market analysis, project management, documentation, and testing. Students work in teams on projects assigned by the instructor. Cross-listed with COMP 38500; students cannot receive credit for both COMP 38500 and TVR 38500. Open only to Emerging Media majors. Prerequisites: COMP 20200; Junior Standing. (S, Y)
4 Credits

TVR 40000-40004 Topics in Media Production (NLA)

Exploration of a specific area of advanced media production through focused study and application. Topics will vary. Offerings may include, but not be limited to advanced remote multi-camera production; broadcast performance, advanced techniques in directing and producing; advanced studio and location lighting; advanced animation; 3-D modeling and special effects. Prerequisites: Junior standing, television-radio, cinema and photography, film, photography and visual arts, or emerging media major; permission of instructor. (Y)
1-4 Credits

TVR 41200 Selected Topics (LA)

Exploration and analysis of a specific area of communication. Topics vary based both on student demand and on faculty expertise and research interest. Course content and pedagogical methods meet the College guidelines for liberal arts designation. May be repeated once. Not a production course. Total number of credits in any combination of TVR 41200, TVR 41210, GCOM 41200, GCOM 41210, OCLD 39000, and OCLD 39010 may not exceed 6. Prerequisites: Junior standing; others vary depending on the topic. Refer to Undergraduate Course Offerings each semester. (IRR)
Attributes: UND
3 Credits

TVR 43100 Advanced Writing for Television and Radio (NLA)

Practice and guidance for advanced students in writing television scripts, with special attention in conference to individual writing problems. Prerequisites are either option A: TVR 13400, TVR 33300, WRTG 10600, or WRTG 10700; or option B: CNPH 10100, CNPH 23300, CNPH 33300. (S)
3 Credits

TVR 46000 Senior Seminar (LA)

Informed by social, cultural, critical, economic, and/or legal theories, these seminars offer in-depth explorations and analyses of the complex relationship among the mass media, individuals, social institutions, industries, and/or culture. Topics vary based on faculty expertise and research interest. Prerequisites: Senior television-radio major, culture and communication major, or emerging media majors; and TVR 31200. (F-S)
Attributes: UND
3 Credits

TVR 46200 Seminar in Geomedia (LA)

This advanced seminar is concerned with the analysis of conglomeration and globalization processes as they affect print and broadcast media today. While the main focus is on international news and information, some attention is also given to other media industries. The course also examines citizens' and nongovernmental organizations' responses to globalization locally, nationally, and internationally. The course covers readings and analytical frameworks in several disciplines, including traditional market economics, Marxist analysis, feminist analysis, postcolonial analysis, and world system theory. Students take major responsibility for leading discussions and have an opportunity to research an issue of personal interest within the context of the seminar. Prerequisites: Three courses in social sciences. (S)
Attributes: WGSC
3 Credits

TVR 47100 Audio Workshop (NLA)

The course refines the student's abilities related to audio theory, professional digital audio equipment, critical listening, and the aesthetic analysis of audio products. Students record and edit an extensive audio project outside class. Students may take a second semester of this course with permission of instructor. Total may not exceed Prerequisites: TVR 37100. (S)
4 Credits

TVR 48500 Emerging Media Capstone (NLA)

Working as part of a team, the student designs, develops, and documents a significant emerging digital media project under the guidance of one or more faculty members. Cross-listed with COMP 48500; students cannot receive credit for both COMP 48500 and TVR 48500. Prerequisites: COMP 38500 or TVR 38500 with a minimum grade of C-. (S, Y)
4 Credits

TVR 49000-49001 Internship (NLA)

Jointly supervised work experience with a cooperating institution or corporation in the field of communications, intended to motivate the student toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skill and academic knowledge are put into practice. May be repeated. Total credits may not exceed 12, including London and Los Angeles internships. Pass/fail only. Prerequisites: Junior television-radio, journalism, or media studies major or minor; completion of Park School internship procedures. (F,S)

Attributes: UND

1-8 Credits

TVR 49100 Senior Media Thesis (NLA)

Advanced work and special projects in writing, producing, and directing on an individual or small-group basis. Programs may be developed for broadcast on ICTV or produced for the professional production unit.

Prerequisites: television-radio, documentary studies and production, cinema and photography, or film, photography and visual arts major; senior standing; or permission of instructor. (Y)

4 Credits

TVR 49300 Live Event Production (NLA)

This is an advanced television production course focusing on live event broadcasting. Emphasis will be placed on the planning and the implementation of on-location productions. This course builds on previously acquired video and studio production knowledge while introducing on-location production concepts and theories.

Production management, engineering, multimedia design and web-based broadcasting will be explored. Prerequisites: TVR22500 or TVR33100.

(F,Y)

Attributes: MC

4 Credits

TVR 49600 Documentary Workshop (NLA)

A challenging workshop and lecture course in which students carry out research, planning, production, and postproduction for a video documentary and formal program proposal. Major topics include documentary genres and techniques, criteria for selecting subject matter, primary and secondary sources of information. Only open to School of Communications majors. Prerequisites: TVR 29900 or TVR 21500 or CNPH 22400 or JOUR 21200; senior standing; or permission of instructor. (Y)

4 Credits

TVR 49700 Independent Project (NLA)

An independent project under the supervision of a faculty adviser, with the approval of the department chair. Possible projects include video/audio projects, script projects, and projects in journalism, advertising, or public relations. The outcome should be a completed work suitable for inclusion in a professional portfolio. May be repeated, but the total credits earned from all independent projects may not exceed 6. Prerequisites: Television-radio or integrated marketing communications major; junior or senior standing; permission of the department. (F-S)

3 Credits

TVR 49800 London Communications Internship (NLA)

A limited number of internships with cooperating institutions or organizations are available to communications majors. The jointly supervised work experience offers the opportunity to learn through observation and participation in a professional setting. Prerequisites: Junior or senior standing; completion of Park School internship procedures; approval of the dean in the semester preceding the London registration. Pass/fail only. (F-S) See "London Center."

3-6 Credits

TVR 49900 Independent Study (LA)

Intensive study under the supervision of a faculty adviser and the approval of the department chair. Possible topics include quantitative or qualitative research in an area relating to media production, consumption, regulation, or criticism. Comprehensive research paper (not project) is required. May be repeated, but the total credits earned from all independent study taken may not exceed 6. Prerequisites: Television-radio or integrated marketing communications major; junior standing; permission of department. (F-S)

1-6 Credits

Documentary Studies and Production (DOCU)

DOCU 10100 Documentary Immersion (LA)

An introduction to the vast field of documentary with regular guest presentations about the various aspects of the theory and practice of the field drawn from across the Park School faculty. Attendance is required at a number of documentary-oriented special events both in the Park School and in other schools on campus, including screenings, guest lectures, workshops, master classes, concerts, trainings, and symposia. (F)

1 Credit

DOCU 40100 Documentary Industries (LA)

An overview of the political economies, infrastructures, and operations of documentary practices across platforms such as print, analog, digital media, and hybrid forms within both national and international contexts. It discusses budgeting, project development, technologies, research, production and team management, fundraising, co-productions, granting agencies, legal and ethical issues, marketing design, public relations, press kits, festivals, broadcast, streaming, roll-out strategies, website development, engagement campaigns, audience development for festivals and screenings, distribution, four walling, roadshowing, self-distribution, institutional and home-use sales, community-based screenings, and eventizing. (S)

Attributes: CCCS

1 Credit

DOCU 49900 Documentary Practicum (NLA)

Produce a substantive nonfiction media project with the guidance of a faculty member. Projects that partner with nonprofit, activist or educational groups outside of the Park School of Communications are encouraged. Works for hire are not eligible. Access is restricted to proposals that are approved by the Documentary Studies and Production Steering Committee before the registration period in the prior fall or spring semester. The outcome should be a completed work suitable for inclusion in a professional portfolio and that has value as a form of community engagement on substantial issues. By permission of instructor. Prerequisites: TVR 29900 or JOUR 21100. (IRR)

1-4 Credits

Cinema and Photography Major – B.S.

Learn more at the Department Page (p. 271)

The bachelor of science (B.S.) program in cinema and photography has two concentrations: cinema production, and still photography. Majors typically choose their concentration before registering for the first semester of their sophomore year.

Summary

Code	Title	Credits
	Major Requirements	43
	Integrative Core Curriculum (ICC) Requirements and Other Electives ¹	77
	Total Credits	120

* **Total Credits** must include 60 liberal arts credits and 60 credits outside the Park School

¹ This major is approved to fulfill the Integrative Core Curriculum (p. 8) requirement for the Creative Arts perspective.

Degree Requirements

Code	Title	Credits
Major Core Requirements		
GCOM 13000	Spark: Igniting your Future in Communications	1
CNPH 10100	Introduction to Film Aesthetics and Analysis	3

Department of Journalism

Tim Mirabito, Associate Professor and Chair

The Department of Journalism offers a bachelor of arts in journalism and a journalism minor. Choose **Majors and Minors** tab above or links below to review program requirements.

B.A. Journalism (p. 289) - Tim Mirabito, Associate Professor and Chair

The bachelor of arts in Journalism offers an integrated curriculum designed to prepare students for careers in journalism, media relations, law, and other professions. Multimedia and critical, analytical thinking are key components of the curriculum. The concept of media convergence is a key component to the curriculum. Journalism students are taught practical multimedia (online, video and print) journalism, as well as First Amendment law, ethics and history in the liberal arts tradition.

Minor in Journalism (p. 290) - Tim Mirabito, Associate Professor and Minor Coordinator

The minor in Journalism offers students the opportunity to expand and enhance their college experience. It is designed to give students from a variety of disciplines a broad-based yet rigorous knowledge of journalistic theory and practice. Students work on news and public affairs coverage of issues relevant to their own major areas through a variety of lecture, seminar, and laboratory courses.

Academic Policies

Majors, including first-year students, are required to maintain an overall cumulative GPA of 2.00. All majors must complete a minimum of 60 credits outside of communications, which includes a minor of their choice, and a minimum of 75 percent of their credits (normally 90 credits) in courses designated as liberal arts (LA). Transfer students applying to the B.A. in journalism program must have a cumulative GPA of 3.25 or higher to have their application considered; however, this minimum does not guarantee acceptance to the degree program. This policy applies to all applicants to the degree program, including students transferring from another major in the Park School or at Ithaca College and those applying from other academic institutions.

The minor is not open to journalism majors. Information concerning application deadlines, admission criteria, and program requirements is available in the journalism department office. Enrollment in the minor is limited. Students must have a cumulative GPA above 3.25 in order to apply to the journalism minor, but this minimum does not guarantee acceptance.

Majors & Minors

- Journalism Major – B.A. (p. 289)
- Journalism Minor (p. 290)

JOUR 11100 Introduction to Journalism (LA)

Introduces reporting, interviewing and writing on deadline using Associate Press style; introduces inverted-pyramid and broadcast writing; and introduces such issues as current events, objectivity, ethics, libel and investigative reporting. (F,S)

Attributes: CCCS
4 Credits

JOUR 11200 Investigative Journalism (LA)

This class provides students with both theoretical and practical skills to locate story ideas, identify reliable and diverse sources, conduct research online and through interviews, and analyze and visualize data. Students use investigative techniques to research, write, and produce stories in multiple beats, including but not limited to: government, education, sports, and social issues. Students work individually and in teams to produce multimedia content focused on a specific beat and/or issues of journalistic importance within the local and wider communities.

Prerequisites: JOUR 11100. (F,S)
4 Credits

JOUR 21100 Visual Journalism (LA)

Explores the fundamental visual techniques and concepts of multimedia journalism and how verbal and visual messages work together in news reporting. Students will learn how to research, shoot, write, edit and produce content for broadcast, web, and social media platforms. Examples are critiqued to lead students toward an ethical and analytical approach to issues of journalistic visual rhetoric. Prerequisites: JOUR 11200; WRTG 10600 or ICSM 10800 or ICSM 11800. (F,S)

Attributes: CCCS, WI
4 Credits

JOUR 21300 Journalism Ethics (LA)

An introduction to ethics in journalism, designed to develop responsible, professional attitudes and practices by applying a range of analyses to issues. Examines classic and contemporary journalism cases involving a variety of ethical questions. Prerequisites: Sophomore standing. Restricted to journalism majors and minors, and documentary studies majors. (F-S)

3 Credits

JOUR 25000 Journalism History (LA)

Examines the development of the mass media in the United States, beginning with Western European antecedents and proceeding to the present era of complex new technologies. Focuses on the factors influencing the evolution of U.S. media history, emphasizing the development of the U.S. press philosophy, the interaction of industrialization and media, and the rise of mass culture. Prerequisites: Sophomore standing. (F-S)

Attributes: 3B
3 Credits

JOUR 31300 Journalism Law (LA)

This course encompasses the study of the underlying theories and philosophical principles that are used to formulate laws and policies related to freedom of speech and press in the United States. An examination of the framework of the American legal and policy making systems will enable students to understand how laws, particularly the First Amendment, address a range of issues involving freedom of speech and press, including: defamation, libel, prior restraint, and copyright. Prerequisites: Journalism majors; JOUR 21100; junior standing. (F,S)

3 Credits

JOUR 38400 Television News Producing and Editing (NLA)

This course builds on the television news skills developed in previous courses by focusing on the role of content managers in newsrooms, from writing to editing. Students will hold editorial board meetings to understand the concept of writing, editing, and crafting meaningful news segments. Students will script a newscast. Students will be tested on how to think independently in situations where important news stories are breaking. Under tight class time constraints, students will make decisions that will impact the newscast they are scripting. Students will learn one of the most important jobs of a successful news producer and editor: how to deal with people and ethical dilemmas as they happen in a newsroom setting. Prerequisites: JOUR 21100 (Y)

4 Credits

JOUR 39000-39030 Selected Topics in Journalism (LA)

The topics of this practicum will vary to allow students the opportunity to learn about a specialty area of journalism, such as sports journalism, international relations journalism, economics and business journalism, and medical journalism. Students will be required to read relevant specialty newspapers, magazines, and academic journals appropriate to the selected topic, report and write articles on the selected topic in online and print format, and write for broadcast. Prerequisites: JOUR 21100 or permission of instructor. (F-S)

3 Credits

JOUR 48000 Mobile and Social Media Journalism (NLA)

This course critically examines how journalists and news organizations are using emerging forms of social media and mobile platforms. Students gain hands-on experience by experimenting with social media and mobile devices for newsgathering, distribution, and audience engagement. Students produce a portfolio of multimedia stories and build their own professional journalistic brand. An emphasis is placed on critically assessing the credibility and authenticity of user-generated content. Students will also learn how to use analytics tools to monitor and analyze the effectiveness of their mobile and social media activity. Prerequisites: JOUR 21100; senior standing. (F,S)

4 Credits

JOUR 48200 Narrative Journalism Workshop (NLA)

Students demonstrate their ability in narrative journalism by researching and writing a major journalistic project. Projects will take the form of a long-form narrative feature report, with the goal of getting them published professionally. Critique and analysis of journalists' projects and reflections on their craft are emphasized. Prerequisites: JOUR 21100; junior standing. (F-S)

4 Credits

JOUR 48400 Mass Media Research (LA)

This course strengthens the student's skills in conducting journalism and mass communication research on real-world local, national, and international issues. Emphasis on the formulation of research topics and proposals; literature search and review; various methodologies that are applicable to the journalism profession; data collection, analysis, and interpretation; and research report writing. Prerequisite: JOUR 21100; junior standing. (IRR)

Attributes: CCRM, QL

3 Credits

JOUR 48600 Documentary Journalism Workshop (NLA)

Students produce an in-depth final project of journalistic significance in a multimedia platform appropriate to their subject matter. Students research, write, edit, and produce long-form news stories in a documentary format for multimedia. Participants also critique and analyze examples of professionally produced documentary and long-form television and web-based journalism. Prerequisites: JOUR 21100; junior standing. (F-S)

Attributes: SL

4 Credits

JOUR 48800 Issues and the News (LA)

A capstone course for seniors majoring or minoring in journalism, designed to give the students an opportunity for in-depth news examination and analysis from numerous sources. Ongoing critique of major news issues of the day. Students examine the variety of information sources available and incorporate various points of view from around the world. They present key summaries of issues they are monitoring, producing news stories and analytic pieces. Prerequisites: JOUR 21100; senior standing. (F-S)

Attributes: UND

3 Credits

JOUR 49000 Internship (NLA)

Jointly supervised work experience with a cooperating institution or corporation in the field of journalism or communications, intended to motivate the student toward professional growth through observation and participation, to provide opportunities to meet active professionals, and to stimulate career planning. Skills and academic knowledge are put into practice. May be repeated. Prerequisites: Junior standing; journalism major or minor; completion of Park School internship procedures.

The total number of internship credits a journalism major or minor is permitted to earn may not exceed (including London and Los Angeles internships). For example, if a student takes an 8-credit internship, a second internship would count for up to only, for a total of Pass/fail only. (F-S)

1-8 Credits

JOUR 49900-49901 Independent Study in Journalism (LA)

Intensive research related to journalism under the supervision of a faculty adviser and with approval of the department chair. A major research paper is required. May be repeated; total credits earned may not exceed eight credits for the two independent study courses combined. Prerequisites: Journalism major or minor; senior standing; permission of department chair. (F-S)

1-4 Credits

Journalism Major – B.A.

Learn more at the Department of Journalism page

This B.A. degree requires 90 liberal arts credits out of the 120 credits required for graduation.

Summary

Code	Title	Credits
	Major Requirements	53-60
	Integrative Core Curriculum (ICC) Requirements and Other Electives ¹	60-67
	Total Credits	120

* **Total Credits** must include 60 credits outside the Park School.

¹ This major is approved to fulfill the Integrative Core Curriculum requirement for the Humanities perspective.

Degree Requirements

Code	Title	Credits
	Major Requirements	
JOUR 11100	Introduction to Journalism	4

Additional Requirements

Minors are required to maintain a cumulative GPA of at least 2.50 in all required courses, as well as an overall cumulative GPA of 2.50.

Department of Strategic Communication

Scott R. Hamula, Professor and Chair

The Department of Strategic Communication offers two degree programs — a bachelor of science in Communication Management and Design and a bachelor of science in Advertising, Public Relations, and Marketing Communications — and minors in Communication Management and Design, Integrated Marketing Communications, and Live Event Design and Management. Choose **Majors and Minors** tab above or links below to review program requirements.

B.S. Communication Management and Design (p. 290)
B.S. Advertising, Public Relations, and Marketing Communications (p. 291)
Minor in Communication Management and Design (p. 291)
Minor in Advertising, Public Relations and Marketing Communications (p. 298)
Minor in Live Event Design and Management (p. 291)

Students interested in the major or minor in communication management and design or live event design and management should contact Dennis Charsky, director of the program. Students interested in the major or minor in integrated marketing communications should contact Scott Hamula, director of the program and chair of the Department of Strategic Communication.

B.S. Communication Management and Design (p. 297) - Dennis Charsky, Professor and Program Director

The way an organization communicates can be the key to its success or failure. Communication Management and Design is a unique major designed for students who want to lead creative and strategic communication functions for companies and organizations of various sizes. The degree provides students with the fundamental principles and skills used in the management, strategy and design of communication for organizations.

Classes teach critical thinking, problem solving, and innovating skills that are applied to key communication areas such as reputation management and branding, employee communication and training, digital design, and event planning. Students learn to connecting creative ideas with business strategy in order to design effective communication solutions, initiatives, and campaigns that help organizations succeed.

Corporate Communication Concentration

Communication professionals are responsible for enhancing communication throughout an organization and aligning their work to the organization's strategy. In this concentration, students learn the theory and practice around corporate and organizational communication and management. They apply their knowledge by creating creative campaigns, crafting crisis communication plans, designing corporate events, and developing strategies for managing relationships with the media, government agencies, and other stakeholders. The concentration covers areas such as; media relations, social media management, internal communications, corporate social responsibility, design management, event planning, and leadership. Students develop into communication professionals who have the insight and means to deal with challenging communication issues faced by modern organizations, both for-profit and not-for-profit.

Communication Design Concentration

Communication professionals are responsible for designing the messages, initiatives, and solutions in organizations. In this concentration, students learn to use their creativity purposefully to provide information that fosters effective and efficient understanding. Students learn the theory and practice around instructional design, information design, graphic design, and user experience. Students apply their learning by utilizing the right information with the right visuals to inspire, persuade, and inform. The concentration teaches the creative strategies designers utilize during the process of designing and covers areas such as; interface design, web design, interaction design, infographics, virtual reality, design thinking, and information design. Students

develop into communication professionals who have the creativity and aptitude to help organizations innovate and prosper in the emerging information economy.

Academic Policies

Courses at level 1 are open to seniors only by permission of the instructor. One-credit minicourses do not count as required communication management and design electives. All majors must complete a minimum of 60 credits outside communications, and a minimum of 60 credits in courses designated as liberal arts (LA).

[\[return to programs\] \(p. 290\)](#)

B.S. Advertising, Public Relations, and Marketing Communications (p. 296) - *Scott R. Hamula, Professor and Program Director*

Today's brands need to develop relationships with their consumers through truthful, creative, and memorable advertising and public relations messages as well as with engaging in-person and online marketing experiences. The advertising, public relations, and marketing communications program is built on the merging of specific coursework from the Roy H. Park School of Communications and the School of Business. This degree teaches students about the converged fields of advertising, public relations, branded events, experiences, and marketing. Students learn how these specialized areas are combined into seamless communications programs to communicate with purpose, by combining the creative and analytical components of advertising, public relations, and marketing to promote, build, and advocate for brands, causes, businesses, not-for-profit organizations, and governmental agencies. Students examine what motivates an audience, what they care about, and what key pop culture trends may influence them. Students then create authentic, engaging communications campaigns that feature traditional and digital advertising, publicity, social media, and interactive experiences like pop-up stores, virtual reality apps, and sponsored events.

Academic Policies

All majors must complete a minimum of 60 credits outside communications, and a minimum of 60 credits in courses designated as liberal arts (LA).

Advising Note

Students with a double major in integrated marketing communications and business who are interested in applying to the master of business administration program should contact the dean's office in the School of Business for information on a curriculum bridge of five business courses that can be taken during the summer following graduation, before entrance into the M.B.A. program in the fall.

[\[return to programs\] \(p. 290\)](#)

Minor in Communication Management and Design (p. 298) - *Dennis Charsky, Professor and Minor Coordinator*

A minor in Communication Management and Design enables students to learn about how vital strategic communication is to the success of all organizations. This minor is a wonderful complement to just about any major because it provides you with a broad understanding of the communication functions in organizations and instrumental workplace knowledge and skills.

Applications for the minor are accepted on a rolling basis throughout the academic year. Students must have a minimum cumulative GPA of 2.50 in order to apply to the minor, but this minimum does not guarantee acceptance. This minor is not open to Communication Management and Design majors.

Students accepted in to the minor are strongly encouraged to complete an academic plan with their minor adviser.

[\[return to programs\] \(p. 290\)](#)

Minor in Advertising, Public Relations and Marketing Communications (p. 298) - *Scott R. Hamula, Professor and Minor Coordinator*

The minor in advertising, public relations and marketing communications, offered in cooperation with the School of Business, provides broad-based knowledge of the theories and applications of the newly converged fields of advertising, public relations, brand activation, and marketing. The minor provides knowledge and application of the persuasive processes used when engaging consumers with messaging in digital, social, print, broadcast, and other media.

Applications for the minor are accepted throughout the academic year and are reviewed on a rolling basis. Space is limited and acceptance is competitive. Students must have a 2.75 minimum cumulative GPA to apply, but this minimum is not a guarantee of acceptance. This minor is not open to integrated marketing communications majors.

[\[return to programs\] \(p. 290\)](#)

Minor in Live Event Design and Management (p. 298) - *Dennis Charsky, Professor and Minor Coordinator*

This minor provides students with an initial understanding of the way events affect society, politics, community, economics, and culture.

The students move into learning the conceptual foundations and practices of event management and design that prepares them to pursue opportunities in the live event industry. Students take a core set of courses in event design and management and a selection of electives from various disciplines.

Students must have a minimum cumulative GPA of 2.75 in order to apply to the minor, but that does not guarantee acceptance.

The Live Event Design and Management minor is housed within the Department of Strategic Communication in the Roy H. Park School of Communications. The Program Director for Communication Management and Design major coordinates the minor.

[\[return to programs\] \(p. 290\)](#)

Majors & Minors

- Advertising, Public Relations, and Marketing Communications Major - B.S. (p. 296)
- Communication Management and Design Major — B.S. (p. 297)
- Advertising, Public Relations, and Marketing Communications Minor (p. 298)
- Communication Management and Design Minor (p. 298)
- Live Event Design and Management Minor (p. 298)

STCM 10300 Introduction to Strategic Communication (LA)

Introduction to the fundamental theories, concepts, and applications of strategic communication to meet a variety of organizational goals. Provides an overview of practices in communication management, learning, and design, and integrated marketing communications. Describes how these elements can be combined to create seamless programs that affect the various publics of businesses and not-for-profit organizations, and how such programs increase organizational value and effectiveness. Students investigate issues that challenge contemporary organizations by analyzing case studies, conducting research, and designing possible solutions from multiple perspectives. (F,S)
3 Credits

STCM 10800 Communication in Organizations (LA)

An introductory examination of human communication in organizations, with an opportunity to develop the skills necessary to approach organizational communication situations. Includes the use of mediated communication for skill development and evaluation. (F-S)
Attributes: SS
3 Credits

STCM 11100 Presentation & Graphic Design (NLA)

Introduction to the planning, design, production, and delivery of presentations, posters, graphics, and websites. Emphasis on design and production, critical application of graphic design principles to instructional, informational, and motivational messages. Projects focus on creative use of graphic design practices for strategic communication. Students gain practical experience in graphic design, layout, composition, image manipulation, website design, and presenting. (F-S)
Attributes: CCCS
3 Credits

STCM 12300 Systemic Design (LA)

An introduction to the perspectives and approaches of systems science and design, particularly emphasizing the usefulness of their combination in planned change in organizations. Sample topics include: thinking across and beyond disciplines; systems types and views; complexity; rational and creative (out-of-control) processes; and the consequences of innovation. Most assignments and projects are set in the context of organizational communication and learning, but their relevance and value extend well beyond. (F,S)
Attributes: CA, SO, TIII, TWOS
3 Credits

STCM 13300 Live Events: Spectacles, Festivals, Celebrations, and Society (NLA)

Introduces students to the field of live events. Through case studies, guest presentations, and class projects, students will explore the evolution of events over time and examine the intersectionality of events with society, identity, community, economy, brand, pop culture and more. Students will research and analyze the strategies and outcomes of specific events, providing them with a foundation for understanding how to conceptualize events that are ethical and achieve the desired outcomes. (Y)
3 Credits

STCM 20200 Career Pursuit (NLA)

The course focuses on the development of professional competencies and professional identity, specifically tailored for students in strategic communication fields. Focus on methods of reflective practice and transferring classroom learning into professional practice. An overview of projected developments and trends, especially increasing integration, in various fields of strategic communication is provided. Readings and activities represent various communication occupations, industries, and professional organizations. Enrollment limited to communication management and design majors and minors. This is a block course.
Prerequisite: STCM 10300. (F-S)
1 Credit

STCM 20400 Virtual Teams (NLA)

An exploration of the communication and collaboration challenges faced by hybrid and virtual work teams. A focus on teams as emergent sociotechnical systems is provided. Students develop an understanding of team attributes, dynamics, and processes as well as a practical set of basic facilitation and assessment skills to enhance team effectiveness across remote workspaces. Prerequisites: STCM 10300, STCM 10800, CMST 11500, or permission of the instructor; Sophomore standing. (IRR)
3 Credits

STCM 20600 Web Design (NLA)

An intermediate level course in designing web sites for organizations. Emphasis is placed on web design (languages and tools), site content, navigation, and aesthetics. The course combines lectures, discussions, classroom exercises, and projects. Prerequisites: STCM 11100. (F-S)
Attributes: CCCS
3 Credits

STCM 21000 Instructional Design (NLA)

An introduction to theories, processes, and practices associated with workplace learning and performance. Major topics include learning theory, designing training, organizational learning, employee development, and performance improvement. Prerequisites: STCM 10300. (F)
Attributes: ESE
3 Credits

STCM 21100 Corporate Communication: Strategy and Design (NLA)

This course is intended to give students a strong foundation in the strategy and design of corporate communication programs for internal and external communication. Students will use theories, principles, and practices of corporate communication to assess contemporary strategies and communication efforts and will gain experience in strategic design for both internal communication (e.g., employee communication, change communication, knowledge management) and external communication (e.g., communication with investors and the community, interorganizational communication, crisis communication, customer and government relations). Prerequisites: STCM 10300. (F,S)
3 Credits

STCM 21200 Experience Design (NLA)

Experience design is the practice of designing interactive processes, media services, exhibitions and events for both entertainment and instruction. The focus is placed on design for an audience rather than an individual user, with an emphasis on finding solutions for client needs. It draws from many other disciplines including psychology, theatrical production, communication, and marketing. The course will provide students with a broad overview of the practice and principles that drives the creation of experience in various forms. Student projects will be delivered via professional presentations, but require design and development of elements using 3D printing and virtual reality. Prerequisites: STCM 11100. (S)

3 Credits

STCM 22000 Interactive Media (NLA)

Provides hands-on experience in designing and creating interactive multimedia projects. An examination of the theoretical bases and applications of interactive media will inform projects involving interactive data visualization, augmented reality design, and design for mobile technologies. Student projects focus on instructional, promotional, and informational applications of these web-based technologies.

Prerequisites: COMP 10500 or STCM 11100. (F,S)

Attributes: CCCS

3 Credits

STCM 23000 Meeting and Event Management (NLA)

Provides theoretical grounding and practical skills in meeting and event management. Students learn to design, manage, lead, and critique events that support strategic organizational goals, including meetings and trainings, conferences, online events, and special events. Student groups practice facilitation, decision-making, and event-planning skills through class exercises, tours and guest speaker presentations. Prerequisites: STCM 10300 or STCM 10800 or STCM 13300. (F,S)

Prerequisites: STCM 10300 or STCM 10800 or STCM 13300. (F,S)

3 Credits

STCM 23200 Public Relations (LA)

Defines public relations functions and processes. Examines public relations history, ethics, theories, tactics, specializations, and career opportunities. Prerequisites: Sophomore standing. (F-S)

Attributes: UND

3 Credits

STCM 23400 Promotional and Instructional Video (NLA)

Introduction to the theory and practice of video design and production in corporate and other organizational settings. Emphasis is placed on the nature of corporate, industrial, instructional, and not-for-profit video; program formats; and beginning field production and postproduction using digital video tools. Prerequisites: STCM 10300 or TVR 12400. (F)

Attributes: CCCS

3 Credits

STCM 24100 Advertising (LA)

A survey of the history, organization, operation, and regulation of the advertising industry. Emphasis is placed on the economics of advertising, including rate structures, media analysis, and demographics, and on the creation and evaluation of advertising. Prerequisites: Sophomore standing. (F,S)

3 Credits

STCM 25100 Organizational Culture and Conflict (LA)

Examination of the role communication practice plays as both the foundation of organizational culture and the means by which organizational conflict is expressed and negotiated. Focus is on the role of communication in framing and sustaining organizational culture, as well as how modes of communicating and mediating conflict are manifestations of an organization's culture. Review of the value-based, symbolic, and ritualistic foundations of conflict as it occurs between members of organizations, as well as between organizations and the public. Includes the use of appropriate case studies to amplify communication issues. Prerequisites: STCM 10800 or sophomore standing. (S)

Attributes: SS

3 Credits

STCM 28800 Research and Statistics for Strategic Communication (LA)

Basic research methods (including qualitative, quantitative and mixed methods approaches) examined in diverse organizational, corporate, and marketing communications settings. Emphasis on theoretical bases, procedures, and ethical considerations. Skills developed in application of techniques and in interpretation and criticism of studies of external and internal communications serving organizational, corporate, and marketing functions. Focus on methods used to identify, describe, and evaluate stakeholders, determine message effectiveness, establish communication objectives, plan communication strategies and tactics, and evaluate their impact on stakeholders and organizational goals.

Prerequisites: STCM 10300. (F,S)

Attributes: CCRM, QL

3 Credits

STCM 29200-29202 Minicourses in Communications (NLA)

A series of short courses in specialized areas of communications that do not meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. These courses do not count toward required strategic communication electives. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR)

1 Credit

STCM 29203-29205 Minicourse in Communications (NLA)

A series of short courses in specialized areas of communications that do not meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. These courses do not count toward required strategic communication electives. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR)

1 Credit

STCM 29300 Minicourses in Communications (LA)

A series of short courses in specialized areas of communications that meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. These courses do not count toward required strategic communication electives. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR)

1 Credit

STCM 29600 Audience Research and Media Planning (NLA)

Survey of the major forms of audience research in television and radio, with particular emphasis placed on the Nielson and Arbitron ratings reports. Covers principles of sample surveys; interpretation of audience data; and application to programming, promotion, and sales. Prerequisites: TVR 12100; TVR 26000 or PSYC 20700. (F-S)

3 Credits

STCM 30000 Crisis Communication (NLA)

Emphasizes the process by which individuals and organizations strategically manage various types of social, political, environmental, and organizational disasters or emergencies. The course explores multiple layers and levels of a crisis and the communication issues that develop, especially in terms of rebuilding the community. These communication issues are then applied to a current crisis. Prerequisites: STCM 21100 or STCM 23200. (F)

3 Credits

STCM 30100 Social Media Strategy (NLA)

Explores social media use in marketing and corporate communication. Topics addressed include social media ethics, branding and content strategy, best practices in content creation and management, and social collaboration in the workplace. Enables students to apply social media tools in the design of marketing, advertising and employee communication. Students will analyze and develop social media campaigns and develop plans for leveraging social media for a strategic purpose. Prerequisites: STCM 21100. (S)

Attributes: CCCS

3 Credits

STCM 30300 Games for Marketing & Training (NLA)

Examines the design of and methods for creating games for marketing and training. Emphasis is on applying game design techniques utilizing theories of persuasion, motivation, and learning. Students will also learn about the two different contexts of designing games for marketing and training. Students will create examples and prototypes of their designs. Prerequisites: STCM-22000. (S)

3 Credits

STCM 30600 Advanced Web Design (NLA)

Building on Web Design, an advanced course in website design that provides a hands-on approach to designing dynamic, database driven websites by incorporating a user-based approach in the design and implementation. Core concepts explored include: visual design for the dynamic web, coding and development platforms, relational databases, and content management systems. Prerequisites: STCM 20600. (S)

3 Credits

STCM 30900 Media Planning (NLA)

Advanced application of the qualitative and quantitative study of media audiences, including broadcast, print, out-of-home, online, mobile, and social media, with particular emphasis placed on measures of audience composition, coverage, and engagement, and the interpretation and application of audience data to media planning for integrated marketing communication campaigns. Prerequisites: STCM 24100. (FS)

3 Credits

STCM 31000 Organizational Speech Writing and Interviewing (LA)

The role of the organizational communication specialist includes many functions, two of which are addressed in this course. The organizational interviewing function focuses on dyadic and group situations where information is gathered, evaluated, and sometimes shared, such as selection, appraisal, and focus group interviews. The organizational speech-writing function focuses also on the production and dissemination of information and includes audience analysis and manuscript writing. Students prepare and conduct interviews, write speeches, and critique both the execution and underlying dynamics of each. Prerequisites: STCM 10800, SPCM 11000, or SPCM 11500; two courses in communications, speech communication, or culture and communication. (IRR)

Attributes: CCCS, H, UND

3 Credits

STCM 31100 Communicating with Stakeholders (NLA)

Explores the strategies and tactics employed by communication professionals in engaging and influencing internal and external organizational stakeholders including employees, customers, donors, stockholders, lawmakers and regulators, community neighbors, the press, and business partners. Students will learn and apply legal reporting requirements, current practices, communication and collaboration tools and methods, and ethical considerations related to the various ways that organizations of all types interact with key constituencies. Prerequisites: STCM 21100 or STCM 23200 or any 200-level course in FINA, SMGT, MGMT, or ACCT. (E,Y)

3 Credits

STCM 31200 Information Design (NLA)

Information design is the skill and practice of preparing information for use by the target audience. Topics include examining information graphics, data visualization, wayward signage, and information architecture. Emphasis is on translating data into visual representations in order to improve communication. Prerequisites: STCM 22000. (S,E)

3 Credits

STCM 32000 Leadership Communication (LA)

Examines the theories and practices of participatory leadership in organizational settings. Specific attention is given to communication skills, media applications, and problem-solving and decision-making formats. Prerequisites: Three courses in communications; junior standing. (F)

Attributes: SS

3 Credits

STCM 33000 Advertising Copywriting and Art Direction (NLA)

Focuses on building a strategy to meet marketing communication goals with effective advertising across a variety of media. Students will learn, think, and communicate through both copy and visuals as they gain experience in conceptualizing, designing, and writing messages for media. Students will learn how to create and present such messages, as well as how to analyze and evaluate their persuasiveness. Prerequisites: STCM 24100, STCM 11100. (F-S)

Attributes: CCCS

3 Credits

STCM 33200 Writing for Public Relations (LA)

Fundamentals of writing for public relations. Emphasis is placed on format requirements of materials submitted to the media; writing for a client; persuasion in writing; and clarity, flow, and other elements of proper public relations writing style. Provides applications using news release, feature, article, editorial, and financial report formats. Prerequisites: STCM 23200; WRTG 10600 or ICSM 10800 or ICSM 11800. (FS)

Attributes: CCCS, WI

3 Credits

STCM 33300 Applied Event Management (NLA)

The application of communication and project management principles to complex organizational events such as training seminars, product launches, fund-raising events, and conferences, providing students an opportunity to work on and critique the planning and execution of an actual event. Each student is assigned an event and conducts structured observations of meetings and activities of the event team, reflecting on current issues and trends from readings and lectures. The student is also assigned specific duties in the planning, execution, and/or evaluation stages of the event, and produces a professional portfolio and project notebook that documents and reflects on the competencies they developed. Prerequisites: STCM 23000. (S)

3 Credits

STCM 36500 Communication in International Organizations (LA)

This course explores the relationship between organizational communication and culture in the context of international organizations. In particular, it focuses on communication process and structure, emphasizing the creation and interpretation of messages aimed at persuasion and influence, as well as learning, training, and performance. Prerequisites: Three courses in communications; junior standing. (IRR) Attributes: SS
3 Credits

STCM 36600 Global, Intercultural, and Multicultural Public Relations (NLA)

This course focuses on international, intercultural, and multicultural perspectives of public relations facing public relations firms and in-house communication departments today. It will provide students with an understanding of real-world public relations techniques, as well as viewpoints from scholars, vital to developing effective and ethical communication campaigns targeted to international publics and multicultural publics in the U.S. It also examines the impact of worldwide technological innovations, as well as social, economic, and political changes. Prerequisites: STCM 23200; junior standing. (S) Attributes: DV
3 Credits

STCM 38000 eLearning (NLA)

The theory and practice of designing online learning. Concepts of interactivity, feedback, perception, and learning are studied. Students integrate knowledge of instructional design with development skills in designing, developing, and evaluating an online learning project. Prerequisites: STCM 21000. (S,O)
3 Credits

STCM 39000-39010 Selected Topics in Strategic Communication (LA)

Exploration and analysis of a specific area of communication. Topics vary based on student demand and on faculty expertise and research interest. Course content and pedagogical methods meet the College guidelines for liberal arts designation. May be repeated once. Not a production course. Total number of credits in any combination of STCM 39000, STCM 39010, 22x-41200, and 22x-41210 may not exceed 6. Prerequisites: Junior standing; others vary depending on the topic. Refer to Undergraduate Course Offerings each semester. (IRR)
3 Credits

STCM 40400 Communication Design Lab (NLA)

An advanced course dedicated to the design of a fully functional media-based solution for a client or targeted crowdfunding campaign. Students will navigate the entire design process; including ideation, planning, design creation and testing, implementation, and evaluation. This project may touch on aspects of visual, web, social media, interactive media, information, instructional, and game design. Senior standing or permission of instructor. Prerequisites: STCM 20600 and STCM 22000. (F)
3 Credits

STCM 41200 Workshop in Strategic Communication (NLA)

Individual assignments designed to provide advanced applied experiences based on students' program and career goals. Specific projects may involve production or communication analysis and design; projects are determined jointly by the student and a faculty adviser and must have departmental approval. Students may take a second semester of this course with approval of the instructor. Total for STCM 41200 and STCM 49900 may not exceed Prerequisites: Junior standing. (F,S)
1-6 Credits

STCM 42000 Integrated Marketing Communications Lab (LA)

A capstone course that applies key components of integrated marketing communications including advertising, public relations, brand positioning, and sales promotion. Students complete a client project that requires research and development of integrated strategies to achieve specific marketing objectives. Students will also analyze relevant cases and apply principles and best practices to their client engagement. Prerequisites: TVR 12100; STCM 23200; STCM 24100; MKTG 31200; integrated marketing communications major or minor. (S)
3 Credits

STCM 43000 Brand Design and Communication (NLA)

An advanced course that focuses on the communication process of redesigning a corporate brand for an existing corporation or organization. After defining a company's essence, character, and purpose, students design and execute a corporate image across various forms of internal and external communications. Requires conceptual thinking and creative execution, and culminates in a comprehensive branding campaign for a specific company suitable for inclusion in a creative portfolio. Students need to have prior hands-on experience using graphic design software to create visual images. Prerequisites: Integrated marketing communications major or minor; junior standing; STCM 33000. (F)
3 Credits

STCM 43400 Communication Management Lab (NLA)

Capstone course examining management principles and practices for communication and workplace learning professionals. Topics include developing department operations budgets, strategic planning and organizational alignment, identifying client needs, requests for proposals, senior management relations, communicating value, developing policies and procedures, assessing employee performance, project management, and change management practices. Students carry out a project for a client to investigate a communications/learning problem and design an intervention. Enrollment limited to CMD and IMC majors and minors. Prerequisites: Senior standing. (S)
3 Credits

STCM 44000 Public Relations Lab (NLA)

An advanced workshop dedicated to the planning of an actual public relations case study, including analysis of the publics involved and the media options for the practitioner; planning, budgeting, and scheduling; and development of problem-solving messages, actions, and/or events. For advanced students in business or communications or for those planning a career in public relations. Prerequisites STCM 23200; STCM 33200, STCM 33000, WRTG 31100, or STCM 34000. (FY) Attributes: SL
3 Credits

STCM 44100 Ad Lab (NLA)

The essentials of advertising campaign planning, including media strategy, positioning, and ad design, culminating in a comprehensive plan for a specific product. For advanced students in marketing or communications or for those planning a career in advertising. Prerequisites: STCM 24100; STCM 28800; STCM 30900; STCM 33000; acceptance of portfolio. (S) Attributes: UND
3 Credits

STCM 45000 Critical Issues (LA)

Explores new and emerging issues that impact organizations and society, and how professionals in communication and learning can contribute to understanding and resolving them. Students conduct design inquiries into an issue of their choice. They engage in research to understand the multiple dimensions and perspectives of the issue, and in designing to propose potential resolutions. Enrollment limited to Communication Management and Design, Integrated Marketing Communications, and Culture and Communication majors and minors. Prerequisites: Senior standing, STCM 12300; STCM 28800 or, for Culture & Communication majors, with instructor approval. (F)

3 Credits

STCM 49000 Internship (NLA)

Jointly supervised work experience with a cooperating institution or organization in the field of communications, intended to motivate the intern toward professional growth through observation and participation, to provide an opportunity to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Total may not exceed including London and Los Angeles internships. Enrollment limited to strategic communication majors or minors. Prerequisites: Completion of the Park School internship procedures. (F,S,U,W)

1-12 Credits

STCM 49300 Internship: Live Event Design and Management (NLA)

Jointly supervised work experience with a cooperating institution or organization in the field of live events, intended to motivate the intern toward professional growth through observation and participation, to provide an opportunity to meet active professionals, and to stimulate career planning. Skills and academic knowledge will be put into practice. May be repeated. Total may not exceed Enrollment limited to students enrolled in the Live Event Design and Management minor. Prerequisites: STCM 23000; completion of the Park School internship procedures. (F,S,U,W)

1-12 Credits

STCM 49800 London Communications Internship (NLA)

A limited number of internships with cooperating institutions or organizations are available to communications majors. The jointly supervised work experience offers the opportunity to learn through observation and participation in a professional setting. Prerequisites: Junior or senior standing; completion of Park School internship procedures; approval of the dean in the semester preceding the London registration. Pass/fail only. (F,S)

Attributes: UND

3-6 Credits

STCM 49900 Independent Study (LA)

Intensive study under the supervision of a faculty adviser. Possible topics include instructional design and evaluation, organizational communication analysis and evaluation, and the adoption and evaluation of new technologies such as multimedia or teleconferencing. Comprehensive research paper (not a project) is required. May be repeated for a total of no more than six credits; total of CMD 49900 and CMD 41200 may not exceed six credits. Enrollment limited to strategic communication majors. Prerequisites: Junior standing. (F,S)

1-6 Credits

Advertising, Public Relations, and Marketing Communications - B.S.

Total Credits		24

Interdisciplinary Programs

The Roy H. Park School of Communications offers courses and programs that are not housed in a specific department. The GCOM or General Communication courses leverage perspectives from different Park School areas and blend those in their focus. Our Interdisciplinary programs create unique majors or minors that address the blending of this fast-moving field.

B.S. Sports Media (p. 302) - Mead Loop, Professor and Program Director

The B.S. in sports media prepares students for careers at the college, professional, and amateur levels as media relations directors, event marketers, on-air talent, producers, digital journalists, publicists, social media strategists, and community relations coordinators. The curriculum consists of a sports media core and a required area-of-study comprising strategic communications, journalism, television-radio, and general communications course offerings. As one of the few institutions in the country to award a sports media degree, in 1992 Ithaca College created a sports media-centric program with a focus on experiential-learning opportunities and specialized courses for a career in the sports industry. In addition to liberal arts requirements, students are required to have an internship, and still have the academic flexibility to declare a minor, study abroad, and/or study away.

P (p. 302)ark Pathways (p. 301) - Rob Gearhart, Associate Dean

[Park Pathways provides students an alternative to applying directly into a specific Park School degree program, offering an opportunity to be admitted to the Park School and explore coursework across programs for up to three semesters before declaring their major. Students in the Park Pathways program enroll in the S'Park: Igniting Your Future in Communications course and those faculty become their Park Pathways advisors.](#)

Majors

- Park Pathways (p. 301)
- Sports Media - B.S. (p. 302)

GCOM 10001-10010 Park Scholar Program Special Topics (LA)

Exploring various topics of interest to the field of media studies, this seminar develops the Park Scholar Program's first-year class into a learning community fluent in debates surrounding contemporary issues in communications studies. Open only to Park Scholars. Prerequisites: Permission of instructor. (F)
1 Credit

GCOM 10107 FLEFF: Mapping our Worlds (LA)

Maps can both reveal new territories and hide old secrets, show us multiple views of the world and also chronicle the havoc we wreak. In conjunction with the Finger Lakes Environmental Film Festival and using the "Atlas" works of Rebecca Solnit as our guide, this course will focus on the layered geographies and mappings of the Finger Lakes. Students will be encouraged to blend genres and media to complicate what we think we see and know about this region. As the semester ends, students will "map" a terrain of their choosing as they examine their relationship to a particular place.
1 Credit

GCOM 12500 Safety Training for Film and Video Production (NLA)

Covers film and television industry standards for safety including studio, location, electrical, weapon, lighting, tool, grip, rigging, pyrotechnics, special effects, and environmental safety, as well as other areas as practices and technology evolve. Includes safe practices for working around roadways and traveling to and from location shoots. Online only. Pass/fail. (F-S)
0-1 Credits

GCOM 13000 Spark: Igniting your Future in Communications (NLA)

An exploration of the important themes, radical creative/economic transformations, and disruptive technologies that impact the study and practice of communications. Using a problem-based learning approach, students are exposed to realworld challenges that influence all of the communications disciplines and professions, such as global and virtual enterprises, intellectual property, control and manipulation of information, imagery, and media channels, social and usergenerated media, and emerging economic models. Through discussions and case studies with guest speakers, students will gain an expanded understanding of current realities, interdisciplinary intersections, and future opportunities so that they can better plan their academic experience. Open only to freshmen majors in the Roy H. Park School of Communications and all freshmen in the B.S. in Emerging Media. (F)
1 Credit

GCOM 20100 Water Planet: Perspectives on Water Sustainability (LA)

Understand perspectives on water sustainability issues through an interdisciplinary approach with guest experts in the arts, sciences and humanities. Explore water sustainability topics from the personal to the global through readings, activities, discussion and media analysis. Prerequisites: Sophomore standing. (IRR)
Attributes: 1, G, HM, HU, SS, TPJ, TQSF
3 Credits

GCOM 23928-29327 Minicourses in Communications (LA)

A series of short courses in specialized areas of communications that meet the College guidelines for liberal arts designation. Visiting lecturers and faculty of the school participate in areas of their expertise. May be repeated. Prerequisites: Vary depending on the topic; refer to Undergraduate Course Offerings each semester. Pass/fail. (IRR)
1-2 Credits

GCOM 32600 Media Industries (NLA)

Introductory overview of media and media-related industries (film, television, radio, corporate communications, sound recording, journalism, advertising, and public relations), with an emphasis on the interrelationship between the corporate and economic structures of the Hollywood system and media production. The course combines lectures, classroom exercises, and panel discussions with creative and corporate professionals currently working in the industry. Prerequisites: Junior standing. (Offered in Los Angeles F-S)
1 Credit

GCOM 41200-41210 Selected Topics (LA)

Exploration and analysis of a specific area of communication. Topics vary based on student demand and on faculty expertise and research interest. Course content and pedagogical methods meet College guidelines for liberal arts designation. May be repeated once. Not a production course. Total number of credits in any combination of TVR 41200, TVR 41210, GCOM 41200, GCOM 41210, STCM 39000, and STCM 39010 may not exceed 6. Prerequisites: Junior standing; others vary depending on the topic. Refer to Undergraduate Course Offerings each semester. (IRR)
3 Credits

GCOM 43000 Connecting the Dots: General Education Integration (NLA)

Explores the connections between the components of the general education core and students' major requirements. Students critically analyze their academic experience and other cocurricular and professional activities through online discussion of their overall college experience and how it connects to their majors and career aspirations. In addition, students will produce an extended reflective essay, or other appropriate artifact, that will be included as the framing element of their e-portfolio. This course is only open to majors in the Park School of Communications. Prerequisites: senior standing. (F,S)

Attributes: CP

1 Credit

SPME 11100 Introduction to Sports Media (NLA)

An introductory course that investigates global sport media landscape, including areas of print, broadcast, Internet and evolving social media platforms. Functions of media delivery, skills, and attributes required of industry professionals are discussed. Students become acquainted with career opportunities in the sport media field. (F,S,Y)

3 Credits

SPME 20700 History of Sport (LA)

Focuses on the role of sport in past and contemporary societies. Consideration of sport as a microcosm of society, a mirror of American life. Political, economic, military, and societal issues of sports participation are carefully examined – how sport has shaped culture and has, in turn, been influenced by it. (F,S,Y)

3 Credits

SPME 22500 Sports Media Relations (NLA)

Deals with the workings and process behind executing the proper techniques of media relations in all facets of the sport industry. The media relations offices of college/university athletic departments or professional franchises act as liaisons between the school/team and the media. To better understand how both sides work to form this symbiotic relationship, sport organizations will be analyzed in terms of their organization and execution of promotion and marketing strategies. Prerequisites: Sophomore standing; and Sports Media majors or other Park School majors with instructor permission. (F,Y)

3 Credits

SPME 24200 Sports Video Production (NLA)

Students apply their introductory knowledge of preproduction planning, camera work, scriptwriting, editing, and interview techniques to create video packages dealing with local sport events. Students will complete their packages in a collaborative manner through all phases of fieldwork production. The emphasis is on improving the proper fundamentals and techniques needed for shooting sporting events while creating an interesting audio and visual perspective. Prerequisites: TVR 11500; SPME 11100; sophomore standing. (Y)

3 Credits

SPME 29200-29300 Minicourse in Sports Media (NLA)

A series of short courses in specialized areas of sports media. Visiting lecturers and faculty of the school participate in areas of their expertise. Analyses of actual case studies focusing on sports media problems and issues confronted by sport managers helps students in further developing their critical thinking and problem-solving skills. Students conduct independent research in which they analyze a particular management problem/issue (case study), and develop and write strategies to effectively address the management problem/issue. May be repeated. Additional fee for course materials (see course schedule). Prerequisites: At least one SPME course; refer to "Undergraduate Course Offerings" each semester. Pass/fail only. (IRR)

1-3 Credits

SPME 29500 Social Aspects of Sport (LA)

An investigation of the social significance of sport and the utilization of the sociological perspective for understanding the nature of sport. (F,S,Y)

3 Credits

SPME 29700 Sport: Philosophical Perspectives (LA)

An introduction to several philosophical perspectives on the meaning of sport as a human activity. An examination of selected philosophical issues or topics as they occur in sport. Prerequisites: SPST 20700 or SPST 29500. (F,S,Y)

3 Credits

SPME 29900 The Evolution of Sport Media (LA)

An analysis of the changing landscape of the sport media from the Industrial Revolution of the mid-19th century to its current configuration. Students examine relevant periods and events throughout American history and investigate the role the sport media played on the political, social, and technological climate of that time. The course will also try to debunk the myth that what goes on in today's sport media is dramatically different from bygone eras. (S,Y)

Attributes: MAP

3 Credits

SPME 32400 Youth Sport in America (LA)

Investigation of the social and cultural significance of the ways contemporary American society employs sport to foster moral development in children and adolescents. Focus is on historical antecedents of organized sport for children both in and outside the school setting. Significant attention is devoted to Little League baseball and to high school football and basketball. Prerequisites: SPME 20700, SPME 29500. (IRR)

3 Credits

SPME 33900 Sports Publications (NLA)

Examines the operations and procedures behind the various arms of the print media. Students will learn about newspapers, magazines, and web publications by first analyzing their historical evolution and basic business models. The primary goal is to understand how these media outlets define their target audience, satisfy commercial obligations, and then create relevant and appealing material. Students will analyze the style and tone of the various media outlets by reading different publications and critiquing the presentation along with the substance of the words on the page. After the analytical work is completed, the second half of the semester will be based on students writing copy for newspapers, magazines, and web publications. The final goal is to produce a publication created solely by all the students in the class. Prerequisites: JOUR 11100; SPME 11100; junior standing. (S,Y)

3 Credits

SPME 39000 Gaming in Sports Media (LA)

The intersection of gaming, gambling and fantasy sports in sports media is explored. Gaming's embrace of disruptive technology, analytics, legal decisions and changing mores mean once frowned-upon activities are now mainstream leisure and economic pursuits. (F,S)
3 Credits

SPME 39700 The Olympic Games (LA)

Investigation of the historical, cultural, and sociopolitical significance of the Olympic Games, both ancient and modern. These perspectives further a deeper understanding of the nature of sport. Prerequisites: SPME 20700, SPME 29500, or SPME 29700. (IRR)
3 Credits

SPME 39800 Narratives in Sports Documentaries (LA)

Investigates sporting narratives through the examination of contemporary documentaries. Emphasis on sporting influence on individualistic and societal levels through story, setting and various themes, including forgiveness, regret, pursuit of happiness and structured, calculated rebellion. Prerequisites: Three courses in Sport Media or Sport Studies; Junior or senior standing. (F,S,Y)
Attributes: DV

3 Credits

SPME 39900-39902 Selected Topics: Sports Media (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)
1-3 Credits

SPME 39903 Special Topics: Athletes in the Media: Critical Discourse Surrounding Sports Figures (LA)

The class will discuss the intersection of sport and media during seminal moments in American history and will offer critical perspectives of how media shaped the narrative surrounding primary actors. It is as much an examination of the people as it is the situations they were set in. Prerequisites: JOUR 11100. (Y)

Attributes: CCCS

3 Credits

SPME 44000 Senior Workshop in Sports Media (NLA)

Integrates the various disciplines studies in sports media to develop communications-related plans. Allows students opportunities to create artifacts pertaining to video production, strategic communications, sports journalism, and/or emerging sports media. Prerequisites: Sports Media majors; SPME 11100; SPME 22500; SPME 33900 and senior standing (F-S)

3 Credits

SPME 45000-45100 Independent Study in Sports Media (LA)

Individual study program for the investigation of special issues or topics in the field of sport media that have such breadth of cultural material or psychological material, such rigor and depth of theoretical structure, or such play of broad intellectual and aesthetic themes as to be classified liberal arts. Arranged individually between student and faculty sponsor according to guidelines available from the department. Prerequisites: Sports Media major; permission of the program director. (F-S,Y)
1-3 Credits

SPME 46000 Internship in Sports Media (NLA)

Supervised work experience in amateur or professional sport agencies and community sport organizations. Student assumes a leadership role in various job-related activities and performs administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Prerequisites: Sports Media major; permission of program director; completion of the Park School internship procedures. This course may be repeated for a total of twelve credits. (F-S,Y)
1-12 Credits

Park Pathways

Park Pathways Course Options

Required for all: GCOM 13000 *S'Park: Igniting Your Future in Communications* (offered fall only)

Choose one course from each group below - Group A: Foundational & Group B: Applied - for up to 3 semesters

- Fall / Semester 1 option: declare your major by October 1st
- Spring / Semester 2 option: declare your major by March 1st
- Fall / Semester 3 requirement: declare your major by October 1st

First Year		Credits
Fall		
GCOM 13000	Spark: Igniting your Future in Communications	1
Choose one: Group A (foundational)		3-4
Choose one: Group B (applied)		3-4

School of Health Sciences and Human Performance

Christina Moylan, *Interim Dean*

Julie Dorsey, *Associate Dean*

Jana Waller, *Associate Dean*

Our Mission

Programs in Health Sciences and Human Performance utilize experiential learning to integrate theory and scholarship with professional practice to foster life-long learners who demonstrate integrity and are committed to improving the quality of life for individuals, groups, and populations.

We meet this mission by:

- fostering interdisciplinary collaboration within and between academic and professional settings.
- using experiential learning as a means to integrate theory and scholarship with professional practice.
- using scholarship, in all of its forms, to advance knowledge and practice.

Career Opportunities

Students who graduate from our degree programs have career opportunities including rehabilitating people in clinical, employment, school, or home-based settings; coaching athletes; designing fitness programs for individuals or within corporate settings; working within a sport organization, government health agency, or community setting; managing hospitals and long term care facilities; and supporting public health activities in government, nonprofit, or global settings to improve population health.

Hallmarks for Student Success

Wide Choice of Programs

The School of Health Sciences and Human Performance (HSHP) currently enrolls more than 1,000 full-time students across both undergraduate and graduate programs. In addition, students can choose from a variety of minors and concentrations within some of the undergraduate majors.

The wide breadth of programs ensures that students can find a major in HSHP that will meet their life goals. Upon graduation, students interested in developing further depth in an area can advance to graduate studies in many departments.

The HSHP Pre-Health Professions Program is available for first- and second-year students who are interested in health and human performance careers but are uncertain of the professional major they want to pursue. Students receive intensive guidance and academic advisement concerning program choices before declaring a major.

Faculty as Advisers, Mentors, and Research Partners

The strength of an HSHP degree emerges from a dedicated faculty who believe in and practice their areas of expertise and engage in scholarship and research with their students while fully supporting the integration of the liberal arts and sciences into their professional programs.

National Academic Reputation

HSHP students consistently perform above national averages in all programs that require licensure or certification exams. We strive to produce highly prepared entry-level professionals.

Alpha Eta National Honor Society

In March 2009, the Departments of Exercise Science and Athletic Training, Health Promotion and Physical Education, Occupational Therapy, Physical Therapy, and Speech-Language Pathology and Audiology from the School of HSHP at Ithaca College applied for and received a charter for a chapter of the Alpha Eta Society (AES). Founded in 1975 at the University of Florida, this national scholastic honor society for the allied health professions was formed to promote and recognize significant scholarship in, leadership in, and contributions to the field. Active membership in the Ithaca chapter of the society consists of candidates for a baccalaureate or a graduate degree in an allied health program, candidates for postdegree certificates in allied health programs, faculty in allied health programs, and alumni of such programs. For more information, visit the Alpha Eta National Honor Society website (<http://www.alphaeta.net/>).

Hands-on Learning

Students in HSHP have myriad opportunities to apply the knowledge and skills developed in the classroom. The importance of experiential learning is demonstrated by our affiliation with over 1,200 sites and organizations, located throughout the United States and abroad, where our students complete fieldwork and internships. In addition, the school houses a faculty/staff wellness clinic, an occupational/physical therapy clinic, the Sir Alexander Ewing Speech and Hearing Clinic, athletic training facilities, healthcare simulation lab, and the Center for Life Skills (a center emphasizing an interprofessional team approach to health care). Each year more than 700 HSHP students complete field experiences as part of their academic program. Annual faculty-led short-term study abroad opportunities offer students an optional global experience.

Employment in One's Chosen Field

Over 90 percent of HSHP graduates find employment in their field or a related field or are accepted into graduate schools of their choice within one year of graduation.

Ithaca Seminar

The Ithaca Seminar (4 credits) is required for all incoming first-year students. See Integrative Core Curriculum for details.

International Study

HSHP students are encouraged to pursue international study. One option is the Ithaca College London Center (<https://www.ithaca.edu/oip/london/>). Students should consult with their faculty advisers well in advance to ensure that study abroad is scheduled as compatibly as possible with their professional courses at Ithaca and that they have established an adequate foundation for it through their Ithaca work. Depending on the academic year, faculty in HSHP do offer short-term international study opportunities. The availability of these opportunities is known well in advance for student planning. Also, the staff of the Office of International Programs and Extended Studies, Job Hall 2nd Floor, is available to assist students in their planning.

Internships and Experiential Learning

All of the programs in HSHP have degree requirements in which students must complete one or more field-based experiences. In all instances, students will work with a faculty member to select and arrange appropriate experiences. Students are responsible for the cost and arrangement of transportation and housing associated with their placement. The Office of Experiential Learning serves to coordinate contractual arrangements with sites, as well as insurance billing. Specific departmental requirements can be found on the Office of Experiential Learning website (<https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/office-experiential-learning/>).

Course Offerings

In addition to the courses listed in this catalog, others may be offered on an experimental basis. Details of such courses are given in the Undergraduate Course Offerings for the semester in which they are offered. Students should consult the registrar's website for specific information on the schedule of all courses each semester.

Unless otherwise designated, courses are open to all Ithaca College students on a space-available basis, provided that the prerequisites and restrictions for the course are met.

Professional Eligibility

Many of the programs in HSHP provide the foundational coursework and fieldwork experience to prepare students to sit for professional licensure and/or certification exams. In most cases, licensure and/or certification is not awarded as part of the degree. Licensure and/or certification is typically required *in addition to* graduation from an appropriate degree-bearing program in order to practice. Because these credentialing processes are designed to protect the public from practitioners who are unqualified, unscrupulous, or unable to perform professional services adequately, credentialing agencies may bar individuals from subsequent credentials and/or practice. Activities that may exclude students from licensure and/or certification include, but are not limited to,

1. conviction of, plea of guilty to, or plea of no contest (*nolo contendere*) to a felony or misdemeanor related to professional practice or public health or safety; or
2. any physical, mental, or dependency condition that will or may interfere with the ability to practice the designated specialty.

It is the responsibility of the student to check with the relevant licensing or certifying agencies for requirements in this area early in their academic careers.

Graduate Programs

In addition to the undergraduate degree programs offered by its academic departments, the school offers a variety of graduate opportunities.

- The five-year program in athletic training awards both a B.S. degree in exercise science pre-athletic training and an M.S. degree in athletic training. The fourth year of study will include the final year of undergraduate coursework and the first year of the professional/graduate-level coursework phase of the program.
- The six-year program in clinical health studies/physical therapy awards a B.S. degree in clinical health studies at the end of the fourth year and a doctor of physical therapy (D.P.T.) at the end of the sixth year.
- The graduate curriculum leading to an M.S. degree in exercise and sport sciences with programs in human performance and mental performance is offered as a 1.5 or two-year program for students with a bachelor's degree in a relevant field. Students in the mental performance program complete the prerequisite coursework for the Certified Mental Performance Consultant (CMPS) exam.
- The six-year program in occupational science/occupational therapy awards a B.S. degree in occupational science at the end of the fourth year and a doctor of occupational therapy (O.T. D.) at the end of the sixth year.
- The 27-month physician assistant program awards an M.S. degree in physician assistant studies. The program includes 15 months of didactic classroom work and 12 months of supervised clinical experiences in health care facilities. The didactic phase includes education in the basic science understanding of each organ system, exposure to patients in clinical settings, and simulated practice in the Clinical Learning Center and Simulation Lab. The clinical phase includes seven required rotations, two electives rotations, and a transition to clinical practice course.
- Speech-language pathology majors may apply to continue their studies beyond the B.S. degree through the department's M.S. degree programs in speech-language pathology.

For more information regarding these programs as well as the College's other graduate programs, consult the Ithaca College graduate catalog (p. 671).

Physical Activity, Leisure, and Safety Program

Patrick Lewis, Program Coordinator

The physical activity, leisure, and safety (PALS) program provides diverse, skill-oriented physical activities as part of a general education program promoting the physiological development of students, improving their fitness and motor skills, and enabling them to maintain a suitable recreation program of their choice during and after college. The PALS program offers a variety of activities in the areas of aquatics, individual and dual sports, team sports, and physical fitness. CPR and first aid courses are also offered in the PALS program.

A maximum of 6 credits in PALS courses, taken as open (free) electives, may be counted toward graduation. Each school or department

determines the number that may be counted toward graduation. PALS courses are offered on a pass/fail basis only.

Activity Course Registration Information

Students must register online for activity courses. In order to do so, students must select the appropriate block: block 1 (first 7 weeks of the semester) or block 2 (last 7 weeks of the semester). Students risk being automatically dropped from the course if they do not attend the first class meeting. The only exception to this rule will be with prior notice of the absence. A student who is dropped for nonattendance may apply to be added at the next class meeting. (Note: The instructor is not obligated to drop a student; students who decide not to take the course must follow the regular drop procedures.) All persons who participate in activity courses must have a health clearance on file in the College's health center.

Some of the courses require the student to pay an extra fee to cover various instructor, equipment, and materials costs. The costs associated with these courses are noted in the course descriptions when students register.

Intercollegiate Athletic Course Registration Information

Students participating on an intercollegiate athletic team can register for intercollegiate athletic course credit during the course registration process. Students who do not make the team or who discontinue participation for any reason must drop or withdraw from the course online. Intercollegiate athletic courses are offered on a pass/fail basis only. Credit is granted either in the fall or the spring for any given sport. No late requests for credit will be honored.

Majors

- Clinical Health Studies Major – B.S. (p. 343)
- Exercise Science Major (p. 316)– B.S. (p. 343)
- Exercise Science Pre-Athletic Training – B.S. (p. 318)
- Health Sciences Major – B.S. (p. 329)
- Occupational Science Major – B.S. (p. 337)
- Public and Community Health Major – B.S. (p. 330)
- Speech-Language Pathology Major – B.S. (p. 347)
- Clinical Health Studies/Physical Therapy, B.S./D.P.T., six-year program (p. 768)¹
- Exercise and Sport Sciences – M.S. (p. 741)¹
- Occupational Science/Occupational Therapy, B.S./O.T.D., six-year program (p. 759)¹
- Occupational Therapy Major – M.S. (<https://catalog.ithaca.edu/undergrad/schools/school-health-sciences-human-performance/department-occupational-therapy/occupational-therapy-major-ms/>)¹ (no additional students admitted as of fall 2022)
- Physician Assistant Studies – M.S., 27-month program (p. 777)¹
- Speech-Language Pathology – M.S. (p. 782)¹

Teacher Education Program

- Speech-Language Pathology with Teaching Certification, M.S. (p. 786)¹

¹ For more information, see the Ithaca College graduate catalog (p. 671).

HSHP Pre-Health Professions Program – First- and Second-Year Students Only

As an alternative to being directly admitted to one of the School of Health Sciences and Human Performance (HSHP) professional majors, a student may be admitted to the HSHP Pre-Health Professions Program. The Pre-Health Professions Program is offered for students who are interested in careers related to health, health care, exercise, leisure, health or physical education, or wellness but are uncertain of the professional major they want to pursue. Students enrolled in the program must participate in mandatory advising prior to course registration each semester and complete a course in the Fall semester of the first year which provides an introduction to the health professions. The program is not degree bearing; it is a temporary classification only. After one semester in the program, students are free to apply for transfer to professional majors in HSHP or another school of the College. Transferring into any major is not guaranteed and depends upon capacity, student academic performance, and other department-specific transfer requirements. Students are expected to apply for transfer to a major by the conclusion of their fourth semester or by the time they have earned 60 credits. They must be admitted to a major at the College before their junior year. To ensure meeting these deadlines, students should begin their efforts to decide on a major by spring of freshman year and no later than fall of sophomore year. For more information visit the HSHP Pre-Health Professions Program website (<https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/undergraduate-majors/hshp-pre-professional-program/>).

Minors and Concentrations

Minors

Please note that space in minors may be limited due to course availability

- Aging Studies Minor (p. 331)
- Coaching Minor (p. 331)
- Communication Disorders Minor (p. 348)
- Deaf Studies Minor (p. 348)
- Exercise Science Minor (p. 319)
- Health Minor (p. 331)
- Nutrition Promotion Minor (p. 332)
- Sport and Exercise Psychology Minor (p. 319)

Coaching – For majors in all disciplines. See Department of Health Sciences and Public Health. (p. 319)

Communication Disorders – For majors in all disciplines except speech-language pathology. See Department of Speech-Language Pathology and Audiology (p. 344).

Deaf Studies – For majors in all disciplines. See Department of Speech-Language Pathology and Audiology (p. 344).

Exercise Science – For majors in all disciplines except exercise science and athletic training. See Department of Exercise Science and Athletic Training (p. 307).

Health – For majors in all disciplines except public and community health. See Department of Health Sciences and Public Health. (p. 319)

Nutrition Promotion – For majors in all disciplines except health sciences - food and nutrition emphasis. See Department of Health Sciences and Public Health. (p. 319)

Sport and Exercise Psychology – For majors in all disciplines. See Department of Exercise Science and Athletic Training (p. 307).

Concentrations

- **Medical Sciences** - Open only to exercise science majors
- **Sport Sciences** - Open only to exercise science majors
- **Strength & Conditioning for Performance and Wellness** - Open only to exercise science majors

See Department of Exercise Science and Athletic Training (p. 307).

Requests for the minors and concentrations listed should be made through IC Workflow. Students who have majors in the school and are interested in completing any of these programs should work closely with their adviser and department chair to ensure timely graduation. Students considering a minor or concentration must abide by College policies and regulations for these programs. Students may only select ONE minor in the Department of Health Promotion and Physical Education. Departments reserve the right to limit enrollment in minors.

In accordance with College regulations that relate specifically to minors, all departments in HSHP have determined that a course that is a requirement in a student's major and also a requirement in one of the above minors may count for credit to meet the requirements of both the major and the minor. However, departments do have the right to place limitations on how much overlap between major and minor coursework is permissible. Students should work with their faculty adviser or minor adviser to determine which courses can be counted as both major and minor courses.

Dean's List

At the end of each semester, students who show outstanding academic achievement are placed on the dean's list. To be included on the dean's list in HSHP, a student must meet all of the following criteria:

1. earn a minimum grade point average of 3.70,
2. complete a minimum of 15 credits, of which at least 12 are graded (not pass/fail or Satisfactory/D/F option), and
3. have no final grades of D, F, or I (incomplete).

HSHP Undergraduate Course Grade Appeal Policy

HSHP follows the general Ithaca College policy on grade disputes and students' right to petition, described in the "Academic Information (p. 648)" section of this catalog. See Credit and Grade Information and Academic Affairs Information.

Each student assumes responsibility for presenting all the facts and circumstances concerning a grade appeal. For the procedures for an HSHP undergraduate course grade appeal, see the policy on the "For Current Students (<https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/current-students/grade-appeal/>)" section of the school's website.

Academic Status Policy

The general academic status policy of HSHP follows the College guidelines for good standing, warning, suspension, and dismissal, set out in the "Academic Affairs Information (p. 648)" section of this catalog.

To meet minimum College academic standards, a student must maintain at least a 2.00 GPA, earn and pass at least 24 credits of coursework in

any consecutive 12-month period. Students enrolled full-time must also complete 12 credit hours in a semester. This policy applies to all students in the school, in addition to other standards specifically established by individual programs, except that the requirement of 24 credits with a passing grade in a consecutive 12-month period does not apply to part-time students. Special academic status policies exist for most majors in HSHP.

Academic Warning

A student who fails to meet any of the minimum GPA and credit-hour standards stated above and who is not suspended or dismissed will be placed on academic warning. Any student returning to the College after suspension or dismissal for academic reasons will also have this warning status for the first semester of reinstatement.

A student on warning must earn removal from this status by meeting all of the minimum requirements at the end of the following semester. Where a grade deficiency exists, the student must attain a semester GPA sufficiently above the 2.00 standard to result in a cumulative GPA of at least 2.00 by the end of the following semester.

Suspension and Dismissal

Failure to meet the standards necessary for removal from warning after one semester will render the student subject to suspension or dismissal from both HSHP and Ithaca College.

After an official warning, a student may be dismissed from a degree program for failure to make satisfactory progress toward degree completion. Such a student may be admitted to another degree program in the school or College and will have one semester in which to become enrolled in another major or be subject to suspension from the College.

A student will be suspended (rather than dismissed) only when it appears reasonably likely that previous weaknesses will be remedied and minimum requirements will be attained through the student's successful completion of prescribed remedial measures during suspension. A suspended student is eligible to resume academic work in the school only at the time and under the conditions specified in their letter of suspension.

A student who is dismissed by HSHP will not be readmitted to one of the school's programs under any circumstances.

Attendance Policy

The College's policy regarding attendance applies to students' class absences in HSHP. Professors, however, have discretion in interpreting and implementing this policy. Students who wish to participate in extracurricular or cocurricular activities that may necessitate absence from class should discuss the possibility of absences with their instructor at the beginning of the semester. The course syllabus should be consulted for the attendance policy of a particular class. Students should be certain that they fully understand each instructor's position on absence from classes. For more information see the College's attendance policy in the "Academic Information" section of this catalog. See the "Registration and Course Information (p. 663)" section of this catalog.

Transfer into the School of Health Sciences and Human Performance

Both internal and external transfer applicants are selectively admitted into HSHP. All students intending to transfer should first contact the

department in which their intended major is offered. Those transferring from another Ithaca College department must meet with the appropriate HSHP department chair or designee. Students from other institutions are encouraged to call ahead to arrange for a similar meeting when they visit the College. Satisfactory academic performance is the major requirement for acceptance. On request, a list of courses recommended for potential transfer students is available from the chair of each department or the transfer coordinator for the Department of Physical Therapy.

General Requirements for Internal and External Transfer

The following requirements must be met by students transferring from within Ithaca College. Students transferring from other institutions must satisfy these requirements in addition to the requirements for admission to Ithaca College.

1. The professional requirements in most programs in HSHP demand a precise sequencing of courses. For this reason, early transfer into a program is encouraged. A late transfer may require a student to attend summer sessions or defer graduation. Ithaca College students who wish to transfer into any particular department may complete a change of major/concentration form on IC Workflow. Submitting a change of major/concentration form does not guarantee admission into a degree program.
2. To be admitted to a degree program in HSHP, it is generally required that the student have a cumulative GPA of at least 2.00 and have completed at least 24 credit hours in the preceding 12 months. However, most degree programs are much more competitive than this and may have other requirements that students must meet, aside from GPA, to be considered for admission.

Specific Departmental Transfer Requirements

Specific departmental transfer requirements for the following programs exceed the general requirements.

Pre-Athletic training: For the pre-athletic training major, a minimum GPA of 3.00 overall, and a 3.00 GPA in the specific requirements of the major is required. Additionally, selected courses need to be completed by that time, with no grade below C- in any of those courses. Transfer into pre-athletic training is limited to available openings and is highly competitive.

Occupational therapy: Internal and external transfer applicants are considered for entry after the first semester of the first year and as late as the end of the second semester of the sophomore year when space permits. Applicants seeking transfer into the occupational science/occupational therapy (OT) program should have a 3.0 minimum GPA and grades of C or better in all required prerequisite courses, including biology and chemistry. They should have completed a total of 57 credits applicable to the occupational science degree or be in a position to do so by the end of the fourth semester. Early transfer is encouraged. Students transferring at the end of the sophomore year must have completed all coursework and be eligible to register for the required junior-level courses outlined in the program curriculum guidelines. Students interested in transferring into the department are encouraged to contact the department for an advising appointment as early as possible to receive a list of specific prerequisite courses and assistance in academic planning. Students interested in transferring should refer

to the transfer application process outlined at "Transfer Opportunities (<https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/occupational-therapy/transfer-opportunities/>)". Transfer into the occupational therapy program is limited to available openings.

Physical therapy: Internal transfer applicants are considered for entry after the first semester of the first year and as late as the end of the second semester of the junior year when space permits. Applicants seeking to transfer into the clinical health studies/physical therapy program (D.P.T.) should have a minimum cumulative GPA of 3.00 and a 3.00 or better in natural science coursework. If student is being considered for entry into the program during the junior year, student must achieve a minimum cumulative GPA of 3.2 or better by the end of the spring semester. Students must be in a position to complete all specified prerequisites by the end of the sixth semester. Applicants must also be in a position to complete all Integrative Core Curriculum (ICC) requirements and a minor before entering the professional phase of the program. Specific information on transfer admission requirements — including requirements relating to nonnative speakers, letters of recommendation, and clinical experience — is available from the Office of Admission or the physical therapy department website (<https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/physical-therapy/transfer-opportunities/>).

Speech-language pathology and audiology: Students who are currently enrolled at Ithaca College are welcome to transfer into the speech-language pathology major. It is recommended, but not required, that students transfer prior to beginning the sophomore year. Transferring after the second semester of the first year may extend the student's program of study by at least one year. Requirements for transfer into this department include a minimum cumulative GPA of 2.50 and no grade below C- in any speech-language pathology and audiology course completed. In addition, students must meet all college and departmental requirements for satisfactory academic standing.

Transfer Credit for Occasional Study at Another Institution

HSHP students may take courses at another accredited college or university for transfer credit, provided prior written permission for the credit has been obtained. Petition forms for transfer credit are available on IC Workflow and must be fully completed, submitted, and approved to secure such credit. For regulations on transfer credit, see the "Credit and Grade Information (p. 651)" section of this catalog.

Students who consider taking courses elsewhere should be aware of the Academic Residency Requirement (<https://catalog.ithaca.edu/undergrad/academic-information/credit-grade/>)—"To be eligible to earn an undergraduate degree at Ithaca College, a minimum of 48.0 semester credits must be completed and applied to the degree at Ithaca College. A minimum of 50% of the required course credits for a major must be earned at Ithaca College."

Additional Costs

The curricula of most degree programs in the school involve expenses not covered by tuition for the academic year. These may include the cost of summer tuition, liability insurance, books, off-campus housing, transportation, and equipment. At a minimum, such costs apply to summer internships or placements and clinical education as follows:

- Athletic training majors must pay for malpractice liability insurance as sophomores, juniors, and seniors, as must some

interns in the clinical exercise and wellness, and strength and conditioning concentrations.

- Exercise science students are responsible for transportation, housing, and all other costs associated with their fieldwork and internship placements. Depending on the scope and nature of the placement, some students must also pay for malpractice liability insurance.
- Clinical health studies/physical therapy (D.P.T.) majors must pay tuition and other expenses associated with 7 credits of coursework during the summer prior to the senior (fourth) year. They must pay additional tuition for 4 credits of clinical affiliation during the summer following graduate year 1 and 6 credits of clinical affiliation during the summer at the end of the final year, in addition to other associated costs for each clinical affiliation (room, board, transportation, and liability insurance).
- Health care management majors must pay tuition, room, board, and other expenses associated with the internship credits if they are taken over the summer following the junior year.
- Health sciences and public and community health students must pay room, board, and other expenses associated with fieldwork and internships.
- Occupational science/occupational therapy majors must pay tuition for 5 credits of coursework, room, board, and other expenses during the summer following the junior (third) year. Occupational therapy majors must pay additional tuition for 6 credits of fieldwork during the summer before and 10 credits of fieldwork following coursework in the graduate year, and they are responsible for associated room, board, book, transportation, liability insurance, and other expenses. They are also responsible for the cost of transportation and liability insurance during practicums in their last two undergraduate years and during their graduate study and fieldwork.
- Speech-language pathology and audiology majors are responsible for the cost of malpractice liability insurance, transportation costs associated with off campus clinical placements, a one-time fee for registering for clinical hours database software, and a subscription to clinical simulation software.

For more information see "Expenses" in the "Financial Aid (p. 634)" section. To be eligible to earn an undergraduate degree at Ithaca College, a minimum of 48.0 semester credits must be completed and applied to the degree at Ithaca College. A minimum of 50% of the required course credits for a major must be earned at Ithaca College. To be eligible to earn an undergraduate degree at Ithaca College, a minimum of 48.0 semester credits must be completed and applied to the degree at Ithaca College. A minimum of 50% of the required course credits for a major must be earned at Ithaca College.

Department of Exercise Science and Athletic Training

Chris Hummel, *Clinical Professor and Chairperson*

Deborah King, *Professor and Graduate Program Chairperson*

To prepare students to address society's growing concerns about wellness, fitness, injury prevention, and rehabilitation, the Department of Exercise Science and Athletic Training offers two undergraduate exercise science majors: athletic training and exercise science.

Exercise Science B.S.

The exercise science major offers three concentrations: medical sciences, sport sciences, and strength and conditioning for performance and wellness. Through concentration specific courses, fieldworks, internships, and research experiences, a B.S. in exercise science prepares graduates for careers as exercise specialists for youth, adult, geriatric, and diseased populations, including diabetes and cancer management; exercise technicians; cardiac rehabilitation specialists in hospitals and clinics; strength and conditioning coaches at high schools, colleges, universities, and private training facilities; personal trainers; corporate wellness specialists; and community fitness and education leaders. Graduates also work as business owners, communication specialists, and educators. Additionally, the major prepares students for entry into various professional programs (DC, MD, NP, OD, PA, OT, and PT) and for graduate training in biomechanics, ergonomics, exercise physiology, prosthetics, and sport psychology.

Medical Sciences Concentration

The medical sciences concentration provides students with a theoretical understanding of the biomechanical, neuromuscular, physiological, and psychological responses and adaptations to exercise. Through concentration specific courses, electives, and research experiences, an exercise science degree with a medical sciences concentration specifically prepares students for entry into various professional programs (DC, MD, NP, OD, PA, OT, and PT) and for graduate training in biomechanics, ergonomics, exercise physiology, prosthetics, and sport psychology. The concentration also prepares graduates for employment in exercise- and health-science related research and clinical positions in both public settings and private industry.

Sport Sciences Concentration

The sport sciences concentration provides students with a theoretical understanding of the biomechanical, neuromuscular, physiological, and psychological responses and adaptations to exercise. Through concentration specific courses, electives, and research experiences, an exercise science degree with a sport sciences concentration specifically prepares students for specialized graduate training in such fields as biomechanics, ergonomics, exercise physiology, prosthetics, physiology, and sport psychology. The concentration also prepares students for direct entry into exercise science related careers, such as fitness management, fitness journalism, coaching, and pharmaceutical or medical equipment sales.

Strength & Conditioning for Performance and Wellness Concentration

The strength and conditioning concentration provides students with a theoretical understanding of the biomechanical, neuromuscular, physiological, and psychological responses and adaptations to exercise. Through concentration specific courses, electives, fieldworks, and internships, an exercise science degree with a strength and conditioning concentration provides students with the skills to assess physical function (EXT, ECG) and the knowledge to improve sport performance through advanced strength, speed, power, agility, and balance training.

Students gain unique experiences working with clients across the lifespan. Graduates typically work as strength and conditioning specialists and coaches at high schools, colleges, universities, and private training facilities. They also work as personal trainers and business owners, and successfully enter graduate and professional schools.

Exercise Science Pre-Athletic Training B.S.

Ithaca College offers an accelerated, combined B.S./M.S. in a 5-year dual degree program. This curriculum results in students earning the B.S. in Exercise Science, Pre-Athletic Training and the M.S. in Athletic Training. Students who intend to become certified athletic trainers (ATC) enter Ithaca College as majors in the B.S. in Exercise Science - Pre-Athletic Training curriculum. During the 4th year, students matriculate into the M.S. in Athletic Training program. The B.S. Exercise Science - Pre-Athletic Training Program is the sole entry point into the five-year professional program. Graduates of the dual degree program will be eligible to sit for the national Board of Certification for the Athletic Trainer examination and to apply for professional licensure.

The following degrees are combined to comprise the dual degree program.

B.S., EXERCISE SCIENCE, PRE-ATHLETIC TRAINING (UNDERGRADUATE)

Exercise Science Pre-Athletic Training majors must successfully complete all required courses, maintain a 3.0 GPA, and meet all professional program expectations (see Special Academic Status Policy) in order to matriculate into the professional phase of the dual degree and to continue in the program. Students who do not meet the expectations for admission to the professional phase of the dual degree program will be advised into other majors.

The fourth year of study will include both undergraduate coursework and graduate-level coursework. Completion of the Exercise Science - Pre-Athletic Training (B.S.) alone *does not* provide eligibility for certification as an athletic trainer.

M.S., ATHLETIC TRAINING (GRADUATE/PROFESSIONAL)

During the fourth year of study, students enter the professional phase (M.S. Athletic Training curriculum). Coursework will continue through year 5, consisting of summer, fall and spring semesters, including the completion of a clinical research project. In the spring of the 5th year, students will complete a 4-week clinical immersion experience. Students who complete both the undergraduate (B.S. Exercise Science - Pre-Athletic Training) and graduate (M.S. Athletic Training) curricula will be eligible to sit for the national Board of Certification for the Athletic Trainer examination and to apply for professional licensure.

- At the midpoint of the Exercise Science Pre-Athletic Training junior year (January, year 3), MS-AT intentioned students will need to file and claim their intentions to matriculate into the graduate and professional phase of the full MS-AT program (which begins in year 4).
- Special Academic Status Policy for BS in Exercise Science, Pre-Athletic Training/MS in Athletic Training: At the end of year 3 (May), specific criteria will be assessed for student progression into the professional phase of the program, which includes:
- Valid Certification in Emergency Cardiac Care
 - Examples of certification that fulfill this requirement is CPR/AED for the Professional Rescuer (American Red Cross) or BLS Healthcare Provider (American Heart Association)
 - Each student must have current certification BEFORE starting the professional phase of the dual degree program (year 4). Students without evidence of this requirement during the review (May of Year 3) will need to complete this requirement and demonstrate

proof in-writing before August 1 of year 4 in order to initiate their clinical education in ATEG 50500 (Practicum in AT I).

- Submission of signed, current physical examination and immunization records from a licensed medical professional (MD, DO, PA or NP). The program uses a Health Clearance Certificate form that must be signed and completed in full and submitted prior to beginning the professional phase of the program.
 - Per CAATE accreditation requirements, each student must have current and up to date immunization records and physical examination (within 1 year of initiating clinical education) BEFORE starting the professional phase of the degree program (year 4). Students without evidence of this requirement during the review (May of year 3) will need to complete this requirement and demonstrate in-writing proof before August 1 of year 4 in order to initiate their clinical education in ATEG 50500 (Practicum in AT I).
- Unless waived (submitting a signed waiver), students must submit medical proof of the following:
 - 2-step Tuberculin Skin Test (2 PPDs done in calendar year of application)
 - Rubella, Rubeola and Mumps vaccination
 - Chicken Pox vaccination
 - Physical examination testifying the physical ability to carry out demands of clinical education/practice.
- Overall, cumulative G.P.A. greater than or equal to 3.0
- Combined G.P.A. greater than or equal to 3.0 in EXSS 12000, EXSS 12100, EXSS 24600, EXSS 30600, EXSS 31200, EXSS 32100, EXSS 41100, EXSS 41200.
- Grades of C- or greater in the following courses: EXSS 12000, EXSS 12100, EXSS 12600, EXSS 22000, EXSS 24600, EXSS 30600, EXSS 31100, EXSS 31200, EXSS 32100, EXSS 37500, EXSS 41100, EXSS 41200, CHEM elective, PSYC 10300, HLTH 21700
 - Achieving a grade below C- (D+, or less) in any of these courses will not allow a student to progress into the professional phase of the program.
 - Students may be provisionally advanced if they have deficiencies in this aspect of the portfolio but MUST retake the offending course(s) and achieve a grade of C- or better for each BEFORE the start of the year 4, fall semester. A maximum of 2 such courses is allowable for this provisional status.

Majors & Minors

- Exercise Science - B.S. (p. 316)
- Exercise Science Pre-Athletic Training – B.S. (p. 318)
- Exercise Science Minor (p. 319)
- Sport and Exercise Psychology Minor (p. 319)

ATEG 50100 Biomedical Foundations of Clinical Science in Athletic Training (NLA)

An evidence-based approach to human tissue injury including normal anatomy & physiology, healing and degenerative processes, acute and chronic injury, exercise and movement, and implications for rehabilitation & restoration. Understanding of the relationships among connective tissues specific to sports injuries, issues of aging, and special populations. Examination of principles essential to clinical assessment strategies including diagnostic imaging, as well as intervention for the rehabilitation and prevention of orthopedic injury and dysfunction. Prerequisites: EXSS 32100; EXSS 41100; EXSS 41200. (F) 3 Credits

ATEG 50200 Acute Care and Emergency Management in Athletic Training (NLA)

Gain an understanding of acute care and emergency situations. Examine the epidemiology and etiology of emergent injuries and illnesses. Learn how to evaluate patients with various conditions such as sudden cardiac arrest, concussion, cervical spine injury, heat illness, and other athletic related trauma. Understand and implement standard of care practices. Develop and apply intervention skills to properly prevent and treat these conditions within a hands-on lab-based setting. Prerequisites: EXSS 41100; EXSS 41200. (F) 4 Credits

ATEG 50300 Clinical Pathoanatomy (NLA)

Advanced human anatomy course emphasizing musculoskeletal structure, function, and injury by extending and deepening prior knowledge using human cadaveric laboratory instruction. In-depth examination of common sports and activity-based injuries will be integrated. Students are expected to apply and implement anatomy, biomechanics, and clinical reasoning to common sports-related injuries. Prerequisites: EXSS 22000; EXSS 32100. (F) 3 Credits

ATEG 50400 Professional Practice in Athletic Training (NLA)

Exploration of the athletic training professional practice. Orientation and implementation of athletic training policies and procedures. Acquire and demonstrate standard documentation procedures, including electronic medical records. Understand and utilize effective healthcare related communication. Skill development and application of taping and wrapping skills. Prerequisites: EXSS 41200. (F) 2 Credits

ATEG 50500 Practicum in Athletic Training I (NLA)

Supervised practical experience in a clinical setting focused on the application of clinical skills acquired in previous and current coursework. Clinical milestones include execution of competencies relative to patient management, acute and emergency care, injury prevention, documentation, and professional behaviors. Prerequisites: EXSS 41200. (F) 3 Credits

ATEG 50600 Assessment of Musculoskeletal Conditions and Injuries (NLA)

In-depth analysis of complete assessment theories, procedures, principles and skills related to the evaluation of upper extremity, spine and lower extremity orthopedic injuries and conditions. Emphasis is placed on clinical reasoning, evidence-informed practice, and the anatomical basis and mechanisms of athletic injuries and conditions common in active populations and athletics. Skill instruction and lab-based practice included to develop essential practical skills germane to orthopedic assessment. Prerequisites: ATEG 50100. (S) 4 Credits

ATEG 50700 Clinical Principles of Medical Science (NLA)

Examine the etiology, pathology, process, diagnosis and treatment of diseases of the human body. Emphasis is placed on the immune, cardiovascular, pulmonary, gastrointestinal, endocrine, renal, urogenital, dermatological systems and their associated disorders and conditions. Analysis of pharmacological interventions and their application will be discussed. Lab activities will enhance clinical skills for assessment of common medical conditions. Prerequisites: ATEG 50100; ATEG 50200. (S) 4 Credits

ATEG 50800 Therapeutic Interventions in Athletic Training I (NLA)

Through integrated didactic and laboratory instruction and practice, students will acquire evidence-based theories and techniques for therapeutic interventions commonly utilized during the "Preparation for Healing" phase in the management of acute and chronic injuries and conditions in active populations and sport. Prerequisites: ATEG 50100. (S)

4 Credits

ATEG 51000 Practicum in Athletic Training II (NLA)

Supervised practical experience in a clinical setting focused on the application of clinical skills acquired in previous and current coursework. Clinical milestones include execution of competencies relative to assessment of musculoskeletal injuries, recognition and care of general medical conditions, selection and application of therapeutic interventions, documentation, and professional behaviors. Prerequisites: ATEG 50500. (S)

3 Credits

ATEG 51100 Clinical Research in Athletic Training I (NLA)

This first of a 3-semester clinical research sequence prepares students to be clinician-scientists by addressing key elements of clinical research in athletic training. Students will initiate a clinical research project.

Prerequisites: EXSS 41100. (U)

2 Credits

ATEG 51500 Clinical Capabilities in Athletic Training (NLA)

Examine various aspects of clinical practice common in active and athletic populations including pharmacology, dermatology, and diagnostic imaging. Identify commonly used medications and differentiate various categories of pharmaceuticals used in athletic training. Explore and gain an understanding of diagnostic imaging techniques and laboratory testing. Describe and identify common dermatological conditions and treatment paradigms. Prerequisites: ATEG 51000. (U)

2 Credits

ATEG 60400 Foundations of Health Care Delivery and Administration (NLA)

Addresses the organization and administration of health care delivery systems specific to athletic training. Emphasis on continual quality improvement, patient and clinical outcomes, payor systems and reimbursement, legal aspects, and operational management.

Prerequisites: ATEG 50400. (S)

3 Credits

ATEG 60500 Practicum in Athletic Training III (NLA)

Supervised practical experience in a clinical setting focused on the application of clinical skills acquired in previous and current coursework. Clinical milestones include execution of advanced competencies relative to clinical care and selection and application of therapeutic interventions, demonstration of evidence based practice, documentation, and professional behaviors. Prerequisites: ATEG 51000. (F)

3 Credits

ATEG 60700 Medical and Health Aspects of Athletic Training Practice (NLA)

Develop and apply clinical skills related to special populations, and the multidimensional aspects of health, wellness, and sport performance.

Prerequisites: ATEG 50700. (S)

2 Credits

ATEG 60800 Therapeutic Interventions in Athletic Training II (NLA)

Acquisition and application of essential theories, skills, and practices for the restoration of function and return to participation will be presented. Evidence-based theories, principles and techniques will be utilized to develop, maintain and/or improve components of functional performance. Emphasis will be placed upon therapeutic reasoning related to the dynamics of skill acquisition and rehabilitation of athletic injuries and conditions. Skill instruction and lab-based practice will be included to develop essential practical skills germane to therapeutic interventions for restoring functional performance and participation in physical activity. Prerequisites: ATEG 50800. (F)

4 Credits

ATEG 61000 Practicum in Athletic Training IV (NLA)

Supervised practical experience in a clinical setting focused on the application of clinical skills acquired in previous and current coursework. Students will demonstrate increased autonomy and clinical capability across all domains of professional practice, demonstrating professional behaviors and communication. Includes 4 week, full time clinical immersion rotation either on or off campus. Prerequisites: ATEG 60500. (S)

5 Credits

ATEG 61100 Clinical Research in Athletic Training II (NLA)

This second course of a 3-semester clinical research sequence prepares students to be clinician-scientists by addressing key elements of clinical research in athletic training. Students will continue work on a clinical research projects. Prerequisites: ATEG 51100. (F)

2 Credits

ATEG 61200 Clinical Research in Athletic Training III (NLA)

This final course of a 3-semester clinical research sequence prepares students to be clinician-scientists by addressing key elements of clinical research in athletic training. Students will complete work on a clinical research project. Prerequisites: ATEG 61100. (S)

2 Credits

ATEG 61500 Advanced Clinical Capabilities in Athletic Training (NLA)

Apply evidence-based theory and develop techniques concerning the assessment and treatment of the spine and peripheral joints. Formulate and design rehabilitation interventions for athletes and active populations. Prerequisites: ATEG 60500. (S)

2 Credits

EXSS 12000 Anatomy and Physiology I (LA)

Develops a comprehensive understanding of the close interrelationship between anatomy and physiology as seen in the human organism. Covers the cells and tissues: epithelial, connective, muscle, and nerve. (F,Y)

Attributes: NS

4 Credits

EXSS 12100 Anatomy and Physiology II (LA)

Continuation of EXSS 12000. Covers the circulatory, endocrine, ventilatory, renal, digestive, and reproductive systems. Also reviews the muscular system from both a functional and a structural perspective.

Prerequisites: EXSS 12000. (S,Y)

Attributes: NS

4 Credits

EXSS 12400 Emergency Care for the Health Professional (NLA)

This course is designed to certify students in CPR/AED for the Professional Rescuer. Emphasis will be placed upon technique and execution of required skills. Basics of emergency injury care/first aid will be covered. Time for practice of common techniques will be included so that the students may develop and apply practical skill competencies. (F-S,B,IRR)

1 Credit

EXSS 12500 Foundations of Human Performance and Wellness (NLA)

This course provides students with an introduction to areas of exercise science focused on enhancing human performance and wellness. Details of some applied fields within Exercise Science (e.g. clinical exercise physiology, health & wellness, strength & conditioning) and how they impact human performance are emphasized. The range of human performances, from sports to prevention of disease and rehabilitation are discussed. Students will gain insight into career opportunities within exercise science aimed at enhancing human performance & wellness. Lecture and practical learning experiences will introduce students to skills needed to be a competent exercise instructor and leader. (S,Y)

2 Credits

EXSS 12600 Origins and Literacy of Medical Science (NLA)

Understand how science, research, and healthcare are interrelated, and how humans incorporate a systematic process to explain and predict clinical phenomena. Explore how we have come to rely on science in clinical practice, identify common potential misconceptions, and deepen the understanding of the scientific words we use. (S)

2 Credits

EXSS 17300 Fieldwork in Exercise Science I (NLA)

Practical observational experience in private, university, professional, hospital, corporate, clinical, or a community setting where exercise is used as the primary modality to enhance physical performance. The objective is to observe closely the daily operations and special functions implemented in these settings and the practice of using exercise to improve physical capacity. Prerequisites: Application and permission of exercise science coordinator. (Sum,Y)

1 Credit

EXSS 20200 Sport and Exercise Psychology (LA)

Introduction to the psychological factors that influence individual and group sport and exercise participation. Psychological skills training (PST) techniques used to enhance sport and exercise performance are presented. Topics include exercise and rehabilitation adherence, management of eating disorders and substance abuse, burnout and overtraining, self-confidence, goal setting, anxiety and stress management, concentration and attention control, imagery and visualization, group cohesion, sport and exercise leadership, motivation, and communication. Prerequisites: Any 100-level course. (F,S,Y)

Attributes: 1, SS

3 Credits

EXSS 22000 Kinesiology (LA)

Examines the anatomical structures and mechanical aspects of human movement. Emphasis is placed on the functional anatomy of the musculoskeletal and articular systems. Pathologies of upper and lower extremities and trunk are examined for contributions to abnormal patterns of posture, movement, and locomotion. Basic neuromuscular and biomechanical principles are introduced. Laboratory exercises concentrate on the role of muscle and joint action during basic movements and the adaptations that can result from pathologic conditions. The focus is on individual joint function and the integrated function of several joints during complex activities such as normal human locomotion. (S,Y)

Attributes: NS

4 Credits

EXSS 24600 Prevention and Care of Athletic Injuries (NLA)

Introduction to basic concepts in athletic training, with emphasis on anatomical bases and mechanisms of common athletic injuries. Basics of injury prevention, recognition, and initial care are covered. Prerequisites: EXSS 12000. (S,Y)

3 Credits

EXSS 24800 Acute Care and Emergency Management in Athletic Training (NLA)

An introduction to acute care and emergency situations. Topics include emergency assessment, sudden cardiac death, concussion, cervical spine injury, heat illness, and other athletic related trauma and certification on CPR/AED for the Professional Rescuer. Emphasis will be placed upon technique and execution of required skills. Prerequisites: EXSS 24600. (F,Y).

3 Credits

EXSS 25000 Athletic Training Techniques I (NLA)

Lecture-laboratory course to develop and refine taping and wrapping skills along with basic emergency and therapy techniques. Prerequisites: EXSS 12000; Co-requisites: EXSS 24600; athletic training majors only. (S,Y)

1 Credit

EXSS 25100 Athletic Training Techniques II (NLA)

Lecture-laboratory course to develop and refine comprehensive orthopedic evaluation skills specific to the assessment and evaluation of athletic injuries of the lower extremity and lumbar spine. Prerequisites: EXSS 24600; EXSS 25000. Corequisites: EXSS 25600. (F,Y)

1 Credit

EXSS 25200 Athletic Training Techniques III (NLA)

Lecture-laboratory course to develop and refine comprehensive orthopedic evaluation skills specific to the assessment and evaluation of athletic injuries of the upper extremity and cervical spine. Prerequisites: EXSS 25100, EXSS 25600. Co-requisites: EXSS 25700. (S,Y)

1 Credit

EXSS 25500 Introduction to Evidence Based Medicine and Clinical Reasoning (NLA)

Introduction to the central tenets and practices of evidence based medicine and clinical reasoning. Emphasis on the effective search for, and use of research and evidence that represent best practices relating to the evaluation and treatment of injuries and conditions in active populations in order to promote favorable patient outcomes, and upon the understanding and development of sound clinical reasoning skills specific to diagnostic decision making and patient care. Prerequisites: EXSS 24600. Co-requisites: EXSS 25600. (F,Y)

1 Credit

EXSS 25600 Athletic Injury Assessment I (NLA)

In-depth analysis of complete assessment theories, procedures, principles and skills related to the evaluation of orthopedic injuries and conditions. Emphasis is placed on anatomical bases and mechanisms of athletic injuries to the lower extremities and the lumbar spine. Time for practice is included so that students may develop essential practical skills. Prerequisites: EXSS 24600; Co-Requisites: EXSS 25100. (F,Y)
3 Credits

EXSS 25700 Athletic Injury Assessment II (NLA)

In-depth analysis of complete assessment theories, procedures, principles and skills related to the evaluation of orthopedic injuries and conditions. Emphasis is placed on anatomical bases and mechanisms of athletic injuries to the upper extremities and cervical spine. Time for practice is included so that students may develop essential practical skills. Prerequisites: EXSS 25600; Co-Requisites: EXSS 25200. (S,Y)
3 Credits

EXSS 26200 Personal Training (NLA)

Develop rationale and theory for the development of health-related fitness programs for the adult fitness participant. Understand how to conduct preparticipation health screening through client consultation. Learn how to develop exercise programs from a client's needs analysis. Understand the necessary skills required of the personal trainer and how to develop good client rapport and effective exercise leadership. Develop an understanding of programming for unique populations (i.e. – older adult, obese, etc.). The class format includes lecture and discussion. Material is geared toward meeting learning objectives for personal training certification. Prerequisite: EXSS 12100. (F,Y)
3 Credits

EXSS 26400 Strength and Conditioning Foundations (NLA)

This course examines the building blocks necessary to design, implement, and test a sport specific training program. Assessment tools will be examined and how their results are used to develop training programs for the athlete will be discussed. Determination of training needs through individualized, sport specific needs analyses and performance goal setting is emphasized. Short and long term benefits of training programs and the application of training cycles are discussed. The course develops the theoretical framework for the practice-based application classes that follow. The course helps prepare the student for a national certification exam. Prerequisites: EXSS 12100, EXSS 12500. (F)

3 Credits

EXSS 26500 Practicum in Performance and Wellness I (NLA)

Develop skills in administering health screening, assessments for cardiovascular endurance, muscular fitness, flexibility, body composition, and functional fitness. Majority of learning is fostered through review of video lectures, supervised practice, and arranged experiences in a full-functioning Wellness Clinic. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 12100, EXSS 12500. (F,Y)
1 Credit

EXSS 27200 Practicum in Clinical Exercise and Wellness I (NLA)

A practice-based course emphasizing fitness assessment and prescription of exercise programming for healthy populations. Develop and lead clients through programs to enhance physical fitness. Emphasis on developing strength and flexibility. Learning occurs in full-functioning Wellness Clinic and laboratory settings. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200. Only open to students in Clinical Exercise & Wellness concentration. (F-S,Y)
1 Credit

EXSS 27300 Community Service in Exercise and Sport Sciences (NLA)

Volunteer work in the community. This experience emphasizes donating time to promote community well-being, using skills developed in exercise and sport sciences programs. Examples include working at health fairs, checking blood pressure, measuring body composition, and determining blood lipid profiles. Pass/fail only. Prerequisites: EXSS 26200; permission of the instructor. (F-S,Y)
1 Credit

EXSS 29400 Clinical Experience in Athletic Training I (NLA)

Supervised practical experience in an athletic training setting at Ithaca College. A minimum of 60 clock-hours is required; students apply basic clinical skills taught in previous coursework. Clinical proficiencies emphasized include basic emergency care, protective taping and wrapping, injury evaluation, and basic therapy techniques. Prerequisites: EXSS 24600, EXSS 25000. (F,Y)
0.5 Credit

EXSS 30000 Clinical Experience in Athletic Training II (NLA)

Supervised practical experience in an athletic training setting at Ithaca College. A minimum of 30 clock-hours is required; students apply basic clinical skills taught in previous coursework. Clinical proficiencies emphasized include acute and emergency care, and orthopedic assessment of the lower extremity and lumbar spine. Prerequisites: EXSS 24800, EXSS 25100, EXSS 25600. (S,Y)
0.5 Credit

EXSS 30100 Clinical Experience in Athletic Training III (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required. Clinical proficiencies emphasized include orthopedic assessment of the upper extremity and cervical spine. Prerequisites: EXSS 25700, EXSS 25200, EXSS 30000. (F,Y)
1 Credit

EXSS 30200 Psychology of Injury in Sport and Exercise (NLA)

Designed to provide an in-depth study of the psychological causes and consequences of sport and exercise related injuries. This course will examine issues associated with onset, treatment and rehabilitation of sport injury and the mental training strategies commonly used for injury rehabilitation. Topics include motivation, adherence, return to play, mental health concerns, interview, and assessment. Prerequisites: EXSS 20200. (S,Y)
3 Credits

EXSS 30500 Techniques & Treatment of the Spine in Athletic Training (NLA)

Explores evaluation and treatment techniques for spinal injuries sustained in athletics. Emphasis on understanding a treatment classification system for spinal injuries and application of appropriate treatment, advanced manual therapy techniques and rehabilitation concepts. Pass/Fail only. Prerequisites: EXSS 25700. (S,Y).
2 Credits

EXSS 30600 Biomechanical Principles of Human Movement (LA)

Biomechanics of human movement provides an in-depth exploration of the biomechanics of human motion. Concepts and skills used to perform and interpret biomechanical analyses of human movement including anthropometry, kinematic analysis, and joint kinetics are covered. Biomechanics of fundamental movement skills including running, jumping/landing and lifting are examined in lecture and during hands on laboratory experiences. Prerequisites: PHYS 10100 or PHYS 11700, and EXSS 22000. (F,S,Y)
Attributes: 1, NS
4 Credits

EXSS 31100 Biopsychosocial Foundations of Clinical Practice (LA)

Understanding of human health and illness from a personal context. Identify biological, psychological, and social factors and their complex interactions in order to better understand and formulate more effective approaches to health, illness, and health care delivery. Application of the biopsychosocial model to healthcare studies and clinical practice. Prerequisites: PSYC 10300; EXSS 24600. (F)

Attributes: DV
3 Credits

EXSS 31200 Pre Healthcare Clinical Practicum I (NLA)

Explore the athletic training profession, domains of practice, and interprofessional practice within supervised clinical observations. Examine the education, regulation and governance of athletic training. Gain an understanding of the clinical expectations, operations and responsibilities of athletic trainers. Examine the biopsychosocial model within the athletic training clinical setting. A minimum of 30 experiential hours required. Prerequisites: EXSS 24600. (F)

1 Credit

EXSS 32000 Neuromuscular Control (LA)

Study of sensorimotor and musculoskeletal systems involved in producing coordinated and purposeful movements. Injury, training, practice, learning, and other cognitive-emotional processes are examined as they affect the neuromuscular control of finely coordinated skills and vigorous physical performance. Emphasis is placed on understanding the relevant neurophysiological mechanisms of movement and how training and practice can be used to maximize performance, wellness, and rehabilitation ease. Exploration of theories of motor learning and control, from the general motor program to the dynamic system theory. Prerequisites: EXSS 22000 or PTBS 31300; junior standing. (S,Y)

Attributes: NS
3 Credits

EXSS 32100 Exercise Physiology (LA)

Examines physiological changes during exercise, after exercise, and during a training period. Also considers efficiency, needs, and limitations of body systems, and their interrelationships. Lecture, demonstration, and laboratory. Prerequisites: EXSS 12100; junior standing. (F-S,Y)

4 Credits

EXSS 34000 Therapeutic Interventions in Athletic Training I (NLA)

Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications and contraindications, and clinical application. Prerequisites: EXSS 25700. Co-requisites: EXSS 35100. (F,Y)

3 Credits

EXSS 34200 Therapeutic Interventions in Athletic Training II (NLA)

Basic principles of therapeutic exercise to develop, maintain, and/or improve components of physical fitness. Emphasis is placed on these principles as well as on specific exercise programs for rehabilitation of major athletic injuries. Prerequisites: EXSS 34000. Co-requisites: EXSS 35100. (S,Y)

3 Credits

EXSS 34900 Fieldwork in Exercise and Sport Sciences (NLA)

Practical experience in corporate or clinical settings, amateur and professional sport agencies, and community organizations. Focus is on observation, guided learning, and supervised practical experiences. Prerequisites: Exercise and sport sciences major or minor; junior standing or above; permission of department chair. (F-S,Y)

1-6 Credits

EXSS 35100 Athletic Training Techniques IV (NLA)

Lecture-laboratory course to develop and refine essential skills related to various therapeutic interventions with emphasis on therapeutic modalities in athletic training. Prerequisites: EXSS 25700, EXSS 25200. Corequisites: EXSS 34000. (F,Y)

1 Credit

EXSS 35200 Athletic Training Techniques V (NLA)

Lecture-laboratory course to develop and refine essential skills related to therapeutic interventions with emphasis placed in rehabilitation and exercise in athletic training. Prerequisites: EXSS 34000, EXSS 35100. Corequisites: EXSS 34200. (S,Y)

1 Credit

EXSS 36000 Medical Science (NLA)

An in-depth study of the etiology, process, treatment, and pharmacology of diseases of the human body according to the body systems. Emphasis is placed on infectious, cardiovascular, pulmonary, gastrointestinal, endocrine, and urogenital disorders. Prerequisites: EXSS 12000, EXSS 12100, junior standing. (S,Y)

3 Credits

EXSS 36500 Junior Internship in Athletic Training (NLA)

Provides a supervised clinical experience opportunity for junior AT majors. Relevant clinical experiences must include exposure to upper extremity, lower extremity, and equipment intensive experiences of both genders. A minimum of 60 experiential hours per credit is required. Each student is required to take four credits of this course obtaining a minimum of 240 practical hours, and a minimum of 120 of these hours must be attained under the supervision of an approved clinical instructor. These clinical experiences must be approved by the athletic training clinical coordinator prior to registration. May be repeated up to four credits. Pass/fail only. Prerequisite: EXSS 30000, EXSS 25700; athletic training major, junior standing. (F,S,U,Y)

1-4 Credits

EXSS 37300 Fieldwork in Exercise Science II (NLA)

Practical observational experience in private, university, professional, hospital, corporate, clinical, or a community setting where exercise is used as the primary modality to enhance physical performance. The objective is to observe closely the daily operations and special functions implemented in these settings and the practice of using exercise to improve physical capacity. A clear focus for internship planning should be developed during this fieldwork. May be repeated for one credit. Prerequisites: EXSS 26200; application to and permission of exercise science coordinator. (Sum, Y)

1 Credit

EXSS 37500 Research Methods in Exercise and Sport Sciences (LA)

Examination of the investigative methods used in exercise and sport sciences research. Design of experiments and application of statistical techniques for several types of research are explored. Includes proposal preparation for an original research project. Prerequisites: MATH 14400, MATH 14500, MATH 15500, or PSYC 20700; WRTG 10600 or ICSM equivalent; junior standing. (F,S,Y)

Attributes: 1, 2B, WI

3 Credits

EXSS 38200 Practicum in Clinical Exercise and Wellness II (NLA)

A practice-based course emphasizing fitness assessment and prescription of exercise programming for healthy and patient populations. Develop and lead clients through programs to enhance physical fitness. Emphasis on developing core function, balance, and cardiovascular endurance. Majority of learning occurs in full-functioning Wellness Clinic and laboratory settings. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200. Only open to students in Clinical Exercise & Wellness concentration. (F-S,Y)
1 Credit

EXSS 38400 Practicum in Performance and Wellness II (NLA)

Develop skills to conduct sports specific needs analyses. Students' abilities to implement testing protocols to evaluate athlete / client condition on health- and skill-related components of fitness is enhanced. Statistical analysis is used to identify strengths and weaknesses. Profiles are devised to identify objective program directions. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200 and EXSS 26400. (S,Y)
1 Credit

EXSS 38500 Practicum in Performance and Wellness III (NLA)

Explore and execute training modes to enhance strength and power in active populations. Emphasis is on technique and teaching for development of performance in a variety of active populations. Discussion and demonstration, personal skill development, and leading peers in skill development are the primary means of instruction. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200 and EXSS 26400. (F,Y)
1 Credit

EXSS 38600 Practicum in Performance and Wellness IV (NLA)

Develop skills in the proper execution of exercises to enhance health- and skill-related components of fitness (i.e. flexibility, speed, agility, power and aerobic / anaerobic endurance). Students' abilities to devise and implement field-based conditioning modes will be enhanced. Emphasis is on technique and teaching for development of athletic performance in a variety of athletic populations. Discussion, demonstration, personal skill development, and leading athletes / clients in skill development are the primary means of instruction. Material is geared toward meeting learning objectives for national certification. Prerequisite: EXSS 26200 and EXSS 26400. (S,Y)
1 Credit

EXSS 38700 Practicum in Performance and Wellness Testing (NLA)

Emphasizes skill development in graded exercise testing through practice-based instruction. Assessing the health status of an individual, protocol selection, and utilizing results to guide exercise programming will be discussed. Understanding electrocardiography and safety and emergency procedures will be highlighted. Majority of learning is fostered through arranged experiences in a full-functioning Wellness Clinic and Exercise Physiology Laboratory. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 26200; EXSS 26400; EXSS 32100. (S,Y)
1 Credit

EXSS 39000 Advanced Strength and Conditioning (NLA)

This enhances students understanding of strength and conditioning service provision through examination of more advanced concepts of performance testing, program design and program implementation. Technological advancements and recent developments in the areas of performance testing and athlete monitoring will be examined. Objective determination of athletes' needs will be emphasized further. Student understanding of program design will be enhanced through discussion and application of advanced periodization models. The course helps prepare the student for the national certification exam. Prerequisites: EXSS 26400. (S,Y)
3 Credits

EXSS 39900-39901 Selected Topics in Exercise and Sport Sciences (LA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)
Attributes: NLA
1-3 Credits

EXSS 40000 Clinical Experience in Athletic Training IV (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required. Clinical proficiencies emphasized include basic therapeutic exercise techniques and advanced modality use. Students must be athletic training majors. Prerequisites: EXSS 30100, EXSS 34000, EXSS 35100. (S,Y)
1 Credit

EXSS 40100 Clinical Experience in Athletic Training V (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required. Clinical skills emphasized include advanced therapeutic exercise techniques, therapeutic exercise protocols for major joints, and pre-event management. Prerequisites: EXSS 34200, EXSS 35200, EXSS 40000; athletic training majors only. (F,Y)
1 Credit

EXSS 40400 Leadership and Team Building in Exercise and Sport (LA)

Designed to provide an in-depth study of the principles and applied strategies that influence effective leadership and the building of productive teams. Emphasis is placed on developing high-performing teams through the effective use of individual, team, and corporate sport leadership. Topics include the assessment, training, and implementation of leadership qualities, skills, and "laws" that promote the proper development of leaders and teams. Theoretical foundations will be discussed for situational, transformational, charismatic, and servant leadership as each relates to the building of championship teams. Information is provided via small groups, lectures, role-playings, and student-taught workshop (cooperative learning) formats. Prerequisites: EXSS 30200. (S,Y)
Attributes: NS
3 Credits

EXSS 40500 Applied Techniques in Sport Psychology (NLA)

An in-depth examination of sport psychology techniques and their application to sport performance. Particular attention will be given to the synthesis and application of various mental training techniques to youth and team sport settings. Techniques include motivation, teamwork, communication, goal setting, anxiety/arousal control, imagery, positive self-talk, leadership, and mental toughness. Topics include gaining entry, confidentiality, and providing consultation in youth and team sport settings. Prerequisites: EXSS 30200. (S,Y)
3 Credits

EXSS 40600 Health and Wellness Coaching (NLA)

Presents relevant theory and allows for development of relational skills required for successful health and wellness coaching with the goal to sustainably affect healthy behavior change in patients/clients. Hybrid learning environment utilizes on-line, telephonic, and classroom experiences. Presents most course material via telephonic conferences. Details career options in health coaching and preparation for coaching certification. Prerequisites: Senior standing. Open to HSHP students only. (F,Y)

3 Credits

EXSS 40700 Clinical Pathoanatomy (NLA)

Advanced course that emphasizes musculoskeletal structure, function, and injury by extending and deepening prior knowledge through the use of human anatomic laboratory instruction. There will be in-depth examination of injuries that occur during sports participation. Students will apply knowledge of pathoanatomy, pathomechanics, and pathophysiology towards a deeper understanding of the most common sports-related injuries and their anatomical basis. Prerequisites: Grade of C or better in EXSS 34000; Grade of C or better in EXSS 34200; senior standing or permission of instructor. (F-Y)

3 Credits

EXSS 41100 Principles of Evidence Based Practice and Clinical Reasoning (NLA)

Introduce evidence-based practice and clinical reasoning with emphasis on effective search strategies for evidence of best practices relating to the recognition, rehabilitation, and prevention of injuries and conditions in active populations. Explore patient outcomes to develop sound clinical reasoning skills specific to diagnostic decision making and patient care. Prerequisites: EXSS 37500. (S)

2 Credits

EXSS 41200 Pre-Healthcare Clinical Practicum II (NLA)

Examine athletic training policies and procedures within supervised clinical observations. Recognize the social determinants of health, while interacting with various healthcare professions treating active populations. Identify the various interventions used to treat athletic injury and gain certification in CPR/AED use. A minimum of 30 experiential hours is required. Prerequisites: EXSS 31200. (S)

1 Credit

EXSS 42000 Advanced Biomechanics of Human Movement (LA)

An in-depth exploration of the biomechanics of human motion, focusing on the concepts and skills needed to perform and interpret biomechanical analyses of a variety of human movements. Topics will include anthropometry, kinematics, kinetics, and mechanical work, energy, and power. Select human movement skills from sport, clinical, and occupation settings will be examined in lecture and during hands-on laboratory experiences. Prerequisites: EXSS 22000; EXSS 22100, or PHYS 10100, or PHYS 11700 with C- or better; and EXSS 32100. (S,Y)

Attributes: 1, NS

4 Credits

EXSS 42100 Advanced Study in Exercise Physiology (LA)

An extension of EXSS 32100 Exercise Physiology that goes into greater depth on the physiological mechanisms that regulate the body's responses and adaptations to exercise. Special physiological considerations of gender, development and aging, obesity, pregnancy, and environmental stress (e.g., altitude, pollution, extreme temperature) are emphasized. Popular pharmaceutical and dietary manipulations used to enhance exercise performance are discussed. Experimental research in exercise physiology is introduced, and limited laboratory experiences are scheduled during class time. Prerequisites: EXSS 32100. (F-S,Y)

3 Credits

EXSS 42200 Exercise and Rehabilitation Psychology (LA)

Discussion of the psychological antecedents of exercise, including barriers and adherence to exercise or rehabilitation regimens. Particular attention will also be given to wellness, stress, the biobehavioral basis of coronary heart disease and other illnesses, and the psychodynamics of rehabilitative medicine. Prerequisites: EXSS 20200; EXSS 32100 or EXSS 34200 or EXSS 30200; Junior standing. (F, Y)

Attributes: 1, SS

3 Credits

EXSS 43000 Seminar in Athletic Training (NLA)

Seminar for senior students majoring in athletic training, intended to expand and reinforce learning that has taken place in previous core courses. Major topics include contemporary issues, athletic training administration, budget management, facility design, protective equipment, injury evaluation, modality operation, and treatment and rehabilitation programs. Prerequisites: EXSS 25600; senior standing in athletic training/exercise science. (F-S,Y)

3 Credits

EXSS 44700 Pathophysiology, Limited Capacity and Exercise (NLA)

Study of the pathophysiology of disease or disabling states, the assessment of exercise potential, and the special considerations for prescription of exercise in these cases. Special emphasis is placed on discussion of phase I and phase II cardiac rehabilitation, diabetic patients, pulmonary disease, and working with older adults with limited functional capacity. Additional special populations are discussed as time permits. Material is geared to the learning objectives of the American College of Sports Medicine's exercise specialist certification. Prerequisites: EXSS 24600; EXSS 26200; EXSS 32100. (S,Y)

3 Credits

EXSS 45000-45100 Independent Study in Exercise and Sport Sciences (LA)

Individual study program for the investigation of special issues or topics in the field of exercise or sport science that have such breadth of cultural or psychological material, such rigor and depth of theoretic structure, or such play of broad intellectual and aesthetic themes as to be classified as liberal arts. Arranged individually between student and faculty sponsor according to guidelines available from the department. Prerequisites: Major or minor in the Department of Exercise and Sport Sciences; permission of department chair. (F-S,Y)

0.5-3 Credits

EXSS 45500 Senior Internship in Athletic Training (NLA)

Provides a supervised clinical experience opportunity for senior AT majors. Relevant clinical experiences must include exposure to upper extremity, lower extremity, and equipment intensive, and general medical experiences of both genders. A minimum of 60 experiential hours per credit is required. Each student is required to take four credits of this course obtaining a minimum of 240 practical hours, and a minimum of 120 of these hours must be attained under the supervision of an approved clinical instructor. These clinical experiences must be approved by the athletic training clinical coordinator prior to registration. May be repeated up to four credits. Pass/fail only. Prerequisite: EXSS 36500, senior standing. (F-S, Su, Y)

1-4 Credits

EXSS 45600 Clinical Experience in Athletic Training VI (NLA)

Supervised practical experience in an athletic training setting at Ithaca College or an affiliated site. A minimum of 60 clock-hours is required, and clinical proficiencies emphasized include administrative aspects of athletic training, presentation of season-ending injury reports as well as case histories. Clinical integration proficiencies (CIP) will be assessed. This course will include the ICC Capstone and will include athletic training major content with the integrative core curriculum and self-reflection of learning outcomes also explored. Students must be athletic training majors. Prerequisites: EXSS 40100, EXSS 43000. (S,Y)

Attributes: CP

1 Credit

EXSS 46000 Internship in Exercise and Sport Sciences (NLA)

Supervised work experience in corporate or clinical exercise settings, amateur and professional sport agencies, and community sport organizations. Student assumes a leadership role in various job-related activities and performs administrative tasks in support of such activities under an experienced agency supervisor and faculty sponsor. Prerequisites: EXSS 34900; permission of department chair. 6-(F-S,Y) 6-12 Credits

EXSS 46600 Administration, Mentoring, and Professional Preparation (NLA)

Provides opportunities to develop administrative and leadership skills. Emphasis is on appreciation for excellent leadership, staffing, equipping, and operations of a fully-functioning human performance facility. Majority of learning occurs by leading and working with apprentice students (i.e., underclass) in the program and through the completion of a project that allows the student to design their own facility. Preparation for external certification is emphasized. Prerequisites: EXSS 38200, EXSS 38400, EXSS 38500; and senior standing. (F-S,Y)

3 Credits

EXSS 46700 Practicum in Clinical Exercise and Wellness III (NLA)

A practice-based course emphasizing assessment of cardiovascular capacity and heart health through practical experiences in graded exercise testing. Highlights understanding electrocardiography, test protocol, utilizing results to guide exercise programming, and safety. Students initially collect data on classmates and ultimately work with Clinic clients. Majority of learning occurs in full-functioning Wellness Clinic and laboratory settings. Material is geared toward meeting learning objectives for national certification. Prerequisites: EXSS 46400; EXSS 27200 or EXSS 38200. Only open to students in Clinical Exercise & Wellness concentration. (F-S,Y)

1 Credit

EXSS 47000 Applied Practice in Strength and Conditioning and Wellness (NLA)

Enhance understanding of service provision in strength and conditioning for performance and wellness through applied practice. Students will assist strength and conditioning and health and wellness professionals in the delivery of support services to athletes / clients. Areas of support may include performance testing, program design, exercise leadership, reflective practice and athlete, client and coach education. The objective is to observe closely and have some supervised experiences in the daily operations and special functions of strength and conditioning / health and fitness facilities. A clear focus for internship planning will be developed during this experience. Prerequisites: EXSS 38600; EXSS 38700; EXSS 39000. (F,Y)

2 Credits

EXSS 47300 Internship: Strength and Conditioning (NLA)

A practical learning experience in a setting using exercise for athletic performance enhancement. Sites for internships include strength and conditioning programs in private, university and professional settings. Students are involved with the daily operations of the agency. Prerequisites: EXSS 46600; a minimum GPA of 2.50 in specific major requirements; permission of the exercise science coordinator. (F,S,Y)

Attributes: CP

6-12 Credits

EXSS 47400 Internship: Clinical Exercise and Wellness (NLA)

A practical learning experience in a setting using exercise for rehabilitation purposes, disease prevention, or wellness promotion. Sites such as hospitals, clinics, corporate fitness centers, wellness clinics, and community-based facilities are typical. Students are involved with the daily operations of the agency. Prerequisites: EXSS 46600; a minimum cumulative GPA of 2.75 with a minimum GPA of 3.00 in specific major requirements; permission of the exercise science coordinator. (F,S,Y)

Attributes: CP

6-12 Credits

EXSS 47500 Research Team I: Exercise and Sport Sciences (LA)

First semester of capstone research experience involving synthesis of a research question, development of appropriate experimental design, as well as data collection, analyses, interpretation, and result dissemination by teams of students under the direction of one or more faculty members. Prerequisites: EXSS 37500. (F,Y)

Attributes: UND

3 Credits

EXSS 47600 ICC Capstone in EXSS (NLA)

This course will provide exploration and self-reflection upon the relationship between the Ithaca College core curriculum courses and its application to the field of Exercise Science. Emphasis on the creation of a reflective artifact that demonstrates the changes that have occurred as a result of the ICC experience inside and outside the study of exercise science. Prerequisites: Senior standing, permission of instructor. (S,Y)

Attributes: CP

0 Credit

EXSS 47700 Research Team II (LA)

Second semester of capstone research experience involving data collection, analysis, interpretation, and result dissemination by teams of students under the direction of one or more faculty members.

Prerequisite: EXSS 47500; (S,Y)

Attributes: CP

3 Credits

Exercise Science - B.S.

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

Summary

Code	Title	Credits
	Exercise Science Major Requirements	72-87
	Integrative Core Curriculum and Electives ¹	33-48
Total Credits		120

¹ This major is approved to fulfill the Integrative Core Curriculum (p. 8) requirement for the Natural Sciences perspective.

Code	Title	Credits
Exercise Science Core Requirements		
EXSS 12000	Anatomy and Physiology I	4
EXSS 12100	Anatomy and Physiology II	4
EXSS 12500	Foundations of Human Performance and Wellness	2
EXSS 20200	Sport and Exercise Psychology	3
EXSS 22000	Kinesiology	4

Total Credits		46			

Courses within the M.S. Athletic Training phase of the B.S./M.S. Program

Exercise Science Minor

The exercise science minor provides students with a foundational understanding of human anatomy and physiology. Students will integrate their understanding of human structure and movement to analyze responses and adaptations to exercise. The exercise science minor is open to all students, except majors in the Exercise Science and Athletic Training Department.

Requirements

Code	Title	Credits
EXSS 12000	Anatomy and Physiology I	4
EXSS 12100	Anatomy and Physiology II	4
EXSS 32100	Exercise Physiology	4
Students are required to select 2 courses from the following list:		6-8
EXSS 20200	Sport and Exercise Psychology	
EXSS 22000	Kinesiology ¹	
EXSS 24600	Prevention and Care of Athletic Injuries	
EXSS 26200	Personal Training	
EXSS 30600	Biomechanical Principles of Human Movement ¹	
EXSS 32000	Neuromuscular Control	
Total Credits		18-20

¹ 4 credits with lab

Sport and Exercise Psychology Minor

The sport and exercise psychology minor provides students with a basic understanding of the psychological components of sport and exercise participation and peak performance. Students will acquire practical and applied knowledge for team building, leadership, and goal setting, which may be used in coaching, business, industry, and wellness. The sport and exercise psychology minor is open to students majoring in all disciplines except exercise science with a concentration in sport and exercise psychology.

Code	Title	Credits
Curriculum		
EXSS 20200	Sport and Exercise Psychology	3
EXSS 30200	Psychology of Injury in Sport and Exercise	3
EXSS 40400	Leadership and Team Building in Exercise and Sport	3

Department of Health Sciences and Public Health

Julia Lapp, *Associate Professor and Chairperson*

Kari Brossard Stoos, *Associate Professor and Associate Chairperson*

The Department of Health Sciences and Public Health prepares students to take an active role in the promotion of health as future professionals in clinical healthcare, community health education, public health, and health policy.

Our Mission

To prepare future health professionals as compassionate change agents for equity, sustainability, and health for all.

Through our majors, the department is committed to **six student learning outcomes** that reflect **our values**:

Ecological Sustainability: engage in professional practice and personal life in ways that promote thriving natural ecosystems as an essential foundation for the health of all.

Honor Human Differences: recognize and respect the complexities of human identity, experience and culture as they intersect with environmental contexts.

Ethical Reasoning: assess personal ethical values, recognize issues and dilemmas, and consider ethical implications.

Ability to Analyze: access reliable information, find appropriate data, apply discipline analysis techniques, and identify implications.

Critical Thinking: use skillful reasoning, systematic questioning, and problem-solving abilities from multiple perspectives to reflect sound conclusions and effective solutions.

Civic Engagement: demonstrate skills of advocacy, service, and collaboration to enrich society.

Department Majors

The Department of Health Sciences and Public Health offers two majors that emphasize theory and practice. Each major includes a field-based experience and a capstone course.

The **Health Sciences Major** prepares students for advanced study in graduate or professional schools. This degree is designed to help students meet entry requirements for advanced training in clinical health professions. The Health Sciences major offers options for students to tailor their education to best pursue their career goals. The Health Sciences-Pre-Medical concentration is for those who want to pursue advanced training in medical school, and the Planned Clinical concentration offers a pathway for those who aspire to enter physician assistant, nursing, chiropractic programs, or registered dietician training, just to name a few.

The **Public and Community Health Major** is an attractive option for students who desire to work in community and professional organizations dedicated to health promotion and prevention. Program graduates may work in health departments, medical centers, or community-based organizations or choose to pursue advanced study in Public Health (M.P.H.).

MINORS IN THE DEPARTMENT OF HEALTH sciences and public health

There are four minors in the Department: Aging Studies, Health, Nutrition Promotion, and Coaching. The minors focus on increasing students' understanding in their chosen area of interest. A faculty advisor in the Department of Health Sciences and Public Health is assigned to each student who chooses to minor in one of these areas.

There are several policies governing department minors to try to accommodate the heavy demand. Students may only enroll in ONE of the minors offered by the department. Minor application forms will be reviewed on a rolling basis through the first Block of each semester. After Block I is complete, minor forms will be held until the end of the semester for review. No new minors will be accepted during pre-registration periods (applications will be accepted, and held, but not acted upon). Minor forms will be recorded with a date of receipt and will be reviewed in the order in which they were received at the end of the Spring semester or Summer term. Students will be notified by e-mail of their acceptance into the minor.

Majors & Minors

- Health Sciences Major – B.S. (p. 329)
- Public and Community Health Major – B.S. (p. 330)
- Aging Studies Minor (p. 331)
- Coaching Minor (p. 331)
- Health Minor (p. 331)
- Nutrition Promotion Minor (p. 332)

Subjects in this department include: Health (HLTH) (p. 320) and Physical Education (PHED) (p. 326)

Health (HLTH)

HLTH 10200 Medical Terminology (NLA)

The language of medicine is explored through study of the structure, use, and pronunciation of medical terms used to describe human anatomy, disease conditions, diagnostic tests, and treatment methods. (F-S,Y)

Attributes: HE1

3 Credits

HLTH 11000 War, Hunger, and Genocide: An International Health Perspective (LA)

An investigation of the cost – human and economic – of organized violence, including genocide, and the efforts being made to ameliorate or eliminate the devastation. Particular emphasis is placed on the role that can be played by health care professionals who believe that war may be a preventable phenomenon that can be eradicated by traditional public health methods that have triumphed over other major health problems in the past. (F,Y)

Attributes: AN2, AN3, DV, HE1, HM, LSCO, SO, TPJ, TQSF

3 Credits

HLTH 11300 Personal Health (LA)

Designed to provide expert knowledge about health and health care that is available to the individual. Emphasizes wellness and health promotion in areas that concern students such as exercise, stress, nutrition, weight management, contraception, intimate relationships, HIV infection, drugs, and alcohol. Prerequisites: Freshman or sophomore standing. (F-S,Y)

Attributes: 1, HE1, NS, SC, SO, TE, TIDE, TMBS

3 Credits

HLTH 11700 Foundations of Public Health (LA)

Introductory course that explores the evolution of public health; core and essential functions of public health; current public health policy issues; typical public health careers and responsibilities; and the role of public trust and ethics in public health. Prerequisites: Freshman standing or permission of the instructor. (F,S,Y)

Attributes: SO, TWOS

3 Credits

HLTH 12200 Emergency Health Care (NLA)

Provides emergency health care instruction in cardiopulmonary resuscitation and first aid. This course is strongly recommended for anyone interested in coaching, teaching, or camping. Successful completion of this course can result in American Red Cross certification in cardiopulmonary resuscitation and basic life support and standard first aid. (F-S,Y)

1 Credit

HLTH 13000 Healthy Viewings: Media, Medicine, and Health (LA)

Representations of medicine and health in popular culture. The meanings of these representations are studied in relationship to the building of stereotypes, development of policies, and framing of arguments in public discourse. Course includes extensive screening of examples from the media. (IRR)

3 Credits

HLTH 13901 Technology for the Professional Edge (LA)

Integration of instructional, communication, assessment, and computer concepts and skills necessary for the use of information technology in diverse physical activity and health settings. Includes introduction to the social and ethical issues inherent in the use of computers in health and school settings. A student may receive credit for only one of the following courses: COMP 11000 (<https://catalog.ithaca.edu/search/?P=COMP%2011000>), EXSS 13900, HLTH 13901 (<https://catalog.ithaca.edu/search/?P=HLTH%2013901>). (F-S,Y)

Attributes: HE1, TE

3 Credits

HLTH 14000 Cyborgs, Clones, and Policy: New Technologies in Health and Medicine (LA)

Investigation and analysis of new medical and health technologies in the changing environment of health and medicine and how they affect policies for healing and prevention of illness and disease. Emphasis is given to the discourse of the body as a machine, its impact on health policies, and the effect of new technologies on relationships among health care providers, patients, and their families. Subjects include biotechnology, cloning, the Internet, digital medicine, and eugenics. (S,Y)

Attributes: HE1, LSCO

3 Credits

HLTH 15200 Introduction to Health and Physical Education (NLA)

Introduces students to the related disciplines of health education and physical education in U.S.K-12 public schools and society from historical and contemporary perspectives. Rationales for goals, standards, and national initiatives in each field will be stressed, as well as their relationship to the coordinated school health model. Students will explore the various duties of professionals in these fields as well as the variety of available career options. (F,Y)

Attributes: TE

3 Credits

HLTH 20100 Food and Society (LA)

Explores the significance of food in human life across time and across cultures. Examines the relationship of food to sociocultural, psychobiological, and ecological aspects of human life. Determinants of food choices, food systems, and socioeconomic and ecological implications are explored. Students emerge with insight and appreciation for the role of food as a means of self-expression and social exchange.

Prerequisite: Sophomore standing. (F,Y)

Attributes: AN2, AN3, HE1, SO, TIDE, TWOS

3 Credits

HLTH 20200 Human Nutrition (LA)

An introduction to the field of human nutrition. Includes the study of human nutritional needs and the attainment of health through an adequate diet. Topics such as obesity, sport nutrition, eating disorders, and the use of nutritional supplements are critically reviewed. Issues relating to diet, ethnicity and health, world hunger, nutrition, and disease prevention are explored. The use of a computerized diet analysis database enables students to assess the adequacy of their own diets.

Prerequisites: EXSS 12000 (<https://catalog.ithaca.edu/search/?P=EXSS%2012000>), BIOL 11500 (<https://catalog.ithaca.edu/search/?P=BIOL%2011500>), BIOL 11900 (<https://catalog.ithaca.edu/search/?P=BIOL%2011900>), BIOL 12100 (<https://catalog.ithaca.edu/search/?P=BIOL%2012100>), CHEM 11100, or CHEM 12100 (<https://catalog.ithaca.edu/search/?P=CHEM%2012100>); sophomore standing. (F,S,Y)

Attributes: 1, AN2, ESTS, HE1, NS

3 Credits

HLTH 20300 Consumer Health (LA)

This course prepares students to understand health care from the consumer's perspective, including understanding the role of consumer theories, health behavior models, and the attitudes and activities of consumers in the health care industry. The philosophy and language of consumerism and the social, political, and ethical implications of consumerism in health are explored. The implications for policy and practice of the use of the consumerism model in health care are examined. Attention is given to existing research and theoretical models of insurance concepts, the individual purchase of health care, and newer consumer trends such as self-diagnosing, purchasing health products via the Internet, and the whole-scale industry movement toward consumer-directed health care. (F,Y)

Attributes: SO, TWOS

3 Credits

HLTH 20400 Economics of Health Care (LA)

Peculiar economic characteristics of the health care industry. Supply of and demand for health care services; causal and remedial forces of institutionalized frameworks, market mechanisms, and governmental intrusions. Analysis of pricing in terms of the above forces and productivity. Ideal economic characteristics of medical insurance, as contrasted with several proposals for national health insurance. Production for national health insurance. Production function, cost-effectiveness, and benefit-cost analysis. Cross-listed with ECON 20400 (<https://catalog.ithaca.edu/search/?P=ECON%2020400>); students cannot receive credit for both ECON 20400 (<https://catalog.ithaca.edu/search/?P=ECON%2020400>) and HLTH 20400 (<https://catalog.ithaca.edu/search/?P=HLTH%2020400>).

Prerequisites: ECON 12100 (<https://catalog.ithaca.edu/search/?P=ECON%2012100>) and ECON 12200 (<https://catalog.ithaca.edu/search/?P=ECON%2012200>). (S,Y)

Attributes: LMEL, LSCO

3 Credits

HLTH 20500 Critical Health Issues (LA)

Examination of the health workforce, medical education, medical specialization, the rising cost of care, voluntary and governmental health insurance, health care delivery systems, and health care for the poor. (F,S,Y)

Attributes: CNSL, DV, LAEL, LMEL, LMSP, LSCO, SO, SS, TE, TWOS

3 Credits

HLTH 20800 Viral Diseases of the World (LA)

This course will describe the structure, transmission, replication, prevention and treatment, and associated pathology of viruses. Specific focus on the historical, cultural and economic impact of clinically significant DNA and RNA viruses such as HIV, influenza, HPV, hepatitis, Ebola and norovirus. Prerequisites: Sophomore standing. (S)

Attributes: HE1

3 Credits

HLTH 21300 Wellness: Multicultural Perspectives on Health and Healing (LA)

An overview of the dynamic nature of the wellness movement. Its historical, social, political, cultural, and economic variables are critically examined. A wide range of wellness modalities, including those that fall under manual, mind-body, herbal, movement, and bioelectrical fields of practice, are included. Cross-cultural paradigms of health and healing are examined and compared. Prevention of chronic disease and health promotion are integrated into the concept of wellness, and disease etiologies and treatments are presented from multiple perspectives. The implications of and opportunities for prevention specialists in schools and communities are emphasized. Prerequisites: Sophomore standing. (F,S,Y)

Attributes: AASE, ADPL, ADSE, AN2, HE1, LXME, NASE, RPRE, TE

3 Credits

HLTH 21400 Sustainable Living: A Holistic Approach to Health (LA)

Focuses on holistic health using environmental sustainability approaches with multi-disciplinary perspectives on environmental issues and its relation to public health. Personal, social, economic, political, and environmental aspects of making sustainable choices in everyday life will be explored based on the database inquiry. The principles and practices of behavior change and pedagogies ingrained in theory and principles of environmental sustainability will be explored. The methods used to assess and evaluate the consequences of consumption (included but not limited to food) and lifestyle decisions will be discussed. Students will work individually and in groups by using experiential learning approaches to examine how to make sustainable choices, exercise personal accountability, and promote health. Prerequisites: Sophomore standing. (F,S,Y)

Attributes: HE1, SC, SO, TPJ, TQSF

3 Credits

HLTH 21700 Epidemiological Approaches to Disease Prevention and Control (LA)

Examines the history, principles, and practices in the cause, prevention, and control of diseases. Epidemiologic terminologies and measures such as morbidity, mortality, fertility, descriptive and analytic epidemiology, screening, infectious disease, and occupational epidemiology in public health practice will be covered. Prerequisites: MATH 15500 (<https://catalog.ithaca.edu/search/?P=MATH%2015500>) or MATH 14400 (<https://catalog.ithaca.edu/search/?P=MATH%2014400>) or MATH 14500 (<https://catalog.ithaca.edu/search/?P=MATH%2014500>) or MATH 21600 (<https://catalog.ithaca.edu/search/?P=MATH%2021600>). (F-S,Y)

3 Credits

HLTH 22400 Emergency Health Care Instructor (NLA)

Training for entry-level instructors of American Red Cross cardiopulmonary resuscitation (CPR) for the professional rescuer, of community CPR, and of community first aid and safety. During the semester, students are required to complete the instructor candidate training segment that is offered at a time designated by the instructor. Includes teaching methods, materials, and practice. Prerequisites: Current American Red Cross CPR for the professional rescuer, community CPR, and community first aid and safety certificates. (F-S,Y)

2 Credits

HLTH 22600 Health Communication (LA)

Introduction to the study of health communication, including its origins, development, and status. Introduction to theories of health behavior and communication and to how they relate to one another in practice. Examination of communication between health professionals and clients and of the role media play in the health care industry and the delivery of health services. Prerequisites: Sophomore standing or above. (F,Y)

Attributes: HE1, LSCO, SS

3 Credits

HLTH 22700 Stress: Its Nature and Management (LA)

Overview of the nature and physiology of stress and techniques used to manage stress. Topics include stress physiology, social engineering, cognitive restructuring, conflict resolution, time management, self-help techniques, nutrition, exercise, and relaxation techniques such as meditation, progressive relaxation, and autogenic training. Prerequisites: Sophomore standing. (F,S,Y)

Attributes: HE1, SC, SO, TIDE, TMBS

3 Credits

HLTH 22800 Human Sexuality (LA)

Promotes a critical perspective of contemporary issues associated with human sexuality. The importance of healthy behavioral practices and responsible decision making concerning sexuality is emphasized. Content areas include contraception and birth control, pregnancy and childbirth, sexually transmitted infections, gender and gender roles, ethnicity and sexuality, sexual anatomy and physiology, sexual response, sexual expression, sexual orientation, relationships, and sexuality over the life span. (F,S,Y)

Attributes: 1, AN2, HE1, SO, SS, TIDE, TMBS, WGS, WGS1

3 Credits

HLTH 22900 Disease and Lifestyle (LA)

Focuses on the leading causes of morbidity and mortality in the world, with an emphasis on the United States. Emphasis is on health promotion through awareness of risk factors associated with these diseases. Topics reviewed include etiology, symptoms, morbidity and mortality rates, prevention, and commonly used methods of diagnosis and treatment. The course will include opportunities for hands-on learning and skill development in best practice screening techniques that are used in primary care settings (e.g., blood pressure, cholesterol, glucose monitoring). Prerequisites: Sophomore standing. (F-S, Y)

Attributes: 1, HE1

3 Credits

HLTH 23400 Fitness Applications for Health Promotion (NLA)

Incorporates basic kinesiological, biomechanical, and physiological principles and concepts with practical applications for physical activity, health-related fitness, and health promotion. Clinical procedures include body composition measurement, submaximal oxygen uptake testing, assessing blood pressure, calculating body mass indexes, and cholesterol screening. A major emphasis is the assessment of health-related fitness and the prescription of various types of physical activities for children, adolescents, and adults. Prerequisites: EXSS 12000 (<https://catalog.ithaca.edu/search/?P=EXSS%2012000>); EXSS 12100 (<https://catalog.ithaca.edu/search/?P=EXSS%2012100>). Students can receive credit for HLTH 23400 (<https://catalog.ithaca.edu/search/?P=HLTH%2023400>) or PHED 23400 (<https://catalog.ithaca.edu/search/?P=PHED%2023400>), not both. (S,Y)

4 Credits

HLTH 24000 Health Promotion and the Older Adult (LA)

Health promotion and prevention strategies that allow people to extend and improve the quality of their lives. Through an interdisciplinary approach, health-related factors that affect older persons as they age are studied. Prerequisites: HLTH 11300 (<https://catalog.ithaca.edu/search/?P=HLTH%2011300>) or GERO 10100 (<https://catalog.ithaca.edu/search/?P=GERO%2010100>). (IRR)

Attributes: 1

3 Credits

HLTH 25000 Global Health (LA)

Study of public health and health care issues across national borders and how they affect the entire globe, including the future health of the planet. Public health and health care delivery in certain nations are also studied. Prerequisites: One social science course. (S,Y)

Attributes: AN2, AN3, DV, LMEL, LMSP, LSCO

3 Credits

HLTH 30000 China: Culture, Health, Healing and Sport (LA)

Introduction to the philosophy and practice in health, prevention and rehabilitation, sport and physical education in China from a historical and cultural perspective. Prepares students for a short-term study abroad opportunity in China (optional). Prerequisites: Junior standing or sophomore who has taken a HLTH course at the 20000-level. (S,IRR)

Attributes: AN2, AN3

1 Credit

HLTH 30100 Lifecycle Nutrition (LA)

Explores an ecological perspective on nutrition. Examines the unique needs and concerns of each stage of the human lifespan, including prenatal, infant, child, adolescent, adult, older adult, pregnancy, and lactation. Students examine nutritional issues that are relevant to healthy growth and development, disease prevention, and optimal well-being at all ages. Prerequisites: HLTH 20200. (F,Y)

Attributes: HE1

3 Credits

HLTH 30500 Community Nutrition: Global Perspectives (NLA)

Explores function of community nutrition including monitoring, assessment, and the role of nutrition in health disparities. Students learn to plan interventions and evaluate programs. Prerequisites: HLTH 20200 (<https://catalog.ithaca.edu/search/?P=HLTH%2020200>) and HLTH 30100 (<https://catalog.ithaca.edu/search/?P=HLTH%2030100>). (S,Y)

Attributes: SL

3 Credits

HLTH 30600 Counseling for the Health Professions (NLA)

Theory and application of health counseling with focus on health behavior change, disease and wellness. Explores factors associated with the direction of advice and decision making in the development and maintenance of individual health and wellness. Provides means for incorporating positive health practices, courses of action, and guidance in health promotion programs, health care encounters, and health education. Course draws on base of health content and theory courses to develop a core set of career-specific useable skills. Prerequisites: HLTH 21300 (<https://catalog.ithaca.edu/search/?P=HLTH%2021300>), HLTH 22900 (<https://catalog.ithaca.edu/search/?P=HLTH%2022900>), and junior standing. (S, Y)

Attributes: HE1

3 Credits

HLTH 30900 Study Abroad in China: Culture, Health, Healing and Sport (LA)

This is a study abroad experiential learning course. Students will travel to China and explore and experience Chinese culture, rehabilitation and health promotion in a practical setting. Students will have hands-on learning opportunities under certified traditional Chinese medicine professionals such as acupuncture, massage, cupping, Tai Chi, and calligraphy. Prerequisites: HLTH 30000 (<https://catalog.ithaca.edu/search/?P=HLTH%2030000>). (Sum, IRR)

Attributes: AN2, AN3

2 Credits

HLTH 31000 Microbiology for the Health Sciences (LA)

Explore the world of human-microbe interactions. Study mechanisms of disease transmission and pathogenicity of infectious agents. Understand how antimicrobials work; understand antibiotic, detergent, disinfectant resistance and propose alternative mechanisms for managing microbial growth. Understand basic concepts of bacterial gene expression and its application in the field of biotechnology. Analyze how natural disasters facilitate outbreaks. Understand the mechanisms behind vaccination. Apply principles of metabolism and contamination to analyses of food safety. Prerequisites: BIOL 11900 (<https://catalog.ithaca.edu/search/?P=BIOL%2011900>), BIOL 12100 (<https://catalog.ithaca.edu/search/?P=BIOL%2012100>), or EXSS 12100 (<https://catalog.ithaca.edu/search/?P=EXSS%2012100>); and any 200-level HLTH course. (F,Y)

Attributes: BIEL, HE1

3 Credits

HLTH 31100 Microbiology for Health Sciences Laboratory (LA)

Master basic microbiological laboratory technical skills including aseptic technique, inoculating microbial cultures, enumerating, isolating, and identifying microorganisms. Gain introductory skills in molecular biological techniques. Analyze cases, synthesize data, and select appropriate tools for microbial identification. Prerequisites: BIOL 11900 (<https://catalog.ithaca.edu/search/?P=BIOL%2011900>), BIOL 12100 (<https://catalog.ithaca.edu/search/?P=BIOL%2012100>), or EXSS 12100 (<https://catalog.ithaca.edu/search/?P=EXSS%2012100>); and any 200-level HLTH course; and HLTH 20700 or HLTH 31000 (<https://catalog.ithaca.edu/search/?P=HLTH%2031000>) (may be taken concurrently). (F,Y)

Attributes: BIEL, HE1

1 Credit

HLTH 31200 Inequalities in U.S. Health Care (LA)

Introduces the historical, political, economic, social and environmental factors that drive inequalities in the U.S. health care system. Highlights the role of race, ethnicity and culture; socioeconomic status; geography/residential segregation; gender, sexual preference and identity; immigration status; health literacy and other factors on health inequalities. Enables students to critically analyze the multiple pathways in which discrimination impacts health status, access to, and quality of care and identify conceptual models and frameworks for reducing and/or eliminating health care disparities. Prerequisites: Junior standing or sophomore who has taken a social science or HLTH course at the 200-level. (F,S,Y)

Attributes: ADSE, AN2, AN3, DV, LMEL, LSCO

3 Credits

HLTH 31500 Family Health Problems (LA)

Theory and research on family composition and its dynamic nature are critically examined with research and surveillance data on youth and families. Issues of identity, gender, race, class, sexual orientation, socioeconomic status, and community are related to family health. Preference is given to health education and physical education majors. Prerequisites: Major or minor; junior standing. (S,Y)

Attributes: HE1, SS, WGS, WGS3

3 Credits

HLTH 31600 Health Research and Analysis (LA)

Theoretical and philosophical bases for conducting research in health. Identifies and utilizes research methods in social and behavioral sciences, including quantitative, qualitative, and epidemiological methodologies. The objective is to assist students in the development of active skills, which include identifying key research issues in health, working through their analysis, and understanding the intellectual, practical, ethical, and political implications of different methods of research in health. Prerequisites: MATH 14400 (<https://catalog.ithaca.edu/search/?P=MATH%2014400>), MATH 14500 (<https://catalog.ithaca.edu/search/?P=MATH%2014500>), MATH 15500 (<https://catalog.ithaca.edu/search/?P=MATH%2015500>), or MATH 21600 (<https://catalog.ithaca.edu/search/?P=MATH%2021600>); HLTH 20500 (<https://catalog.ithaca.edu/search/?P=HLTH%2020500>) or HLTH 21300 (<https://catalog.ithaca.edu/search/?P=HLTH%2021300>); and junior standing. (F,S,Y)

Attributes: HE1, QL, SS, TE

3 Credits

HLTH 31700 Community Health (LA)

Provides an overview of community development strategies most frequently used in health promotion and health education programs. Emphasis is placed upon the processes of community organizing and developing critical awareness/consciousness as educational methods in public health. The course is designed to provide students with theoretical foundations, methods, and skills essential to professional community health education practice. Prerequisites: HLTH 21700 (<https://catalog.ithaca.edu/search/?P=HLTH%2021700>) and junior standing. (F,Y)

Attributes: TE, WGS, WGS3

3 Credits

HLTH 32600 Health Planning and Administration (NLA)

Integrates general management principles with strategic planning in health care organizations. Data systems, forecasting, and problem identification and analysis are explored, along with the stages of strategic planning. Emphasis is placed on identifying strategic issues in complex environments and formulating realistic responses. Students prepare actual applications for new programs to regulatory agencies. Prerequisites: HLTH 20500 (<https://catalog.ithaca.edu/search/?P=HLTH%2020500>) and one GBUS or MGMT course. (S,Y)

Attributes: HE1, TE

3 Credits

HLTH 33000 Health Promotion in the Workplace (NLA)

Development of a hierarchy of program needs and objectives for worksite health promotion. Students design needs-assessment instruments and develop work programs based on the needs identified by the population surveyed. The course also addresses issues surrounding program evaluation. Prerequisites: PSYC 33400 (<https://catalog.ithaca.edu/search/?P=PSYC%2033400>), HLTH 11300 (<https://catalog.ithaca.edu/search/?P=HLTH%2011300>), or MKTG 31200 (<https://catalog.ithaca.edu/search/?P=MKTG%2031200>). (IRR)

Attributes: HE1

3 Credits

HLTH 33300 Development and Evaluation of Health Programs (NLA)

Prepares students with background information on how to design, implement, and evaluate health education and health promotion programs. "Quality of life" issues are evaluated to establish links between social problems and specific health problems. Several methods are employed to evaluate these programs. Prerequisites: Junior standing and HLTH 10600 or HLTH 15200 (<https://catalog.ithaca.edu/search/?P=HLTH%2015200>); at least two HLTH 20000 level courses. (Y)

Attributes: TE

3 Credits

HLTH 33510 Legal and Ethical Issues in Health Policy (LA)

An examination of legal and ethical issues related to health care. Topics include the equitable distribution of scarce resources, the relationship between individual consumers and powerful (frequently for-profit) third party payers, and the government's role at all levels in regulating health care and protecting the public from potentially fraudulent or abusive providers. Prerequisites: PHIL 21200 (<https://catalog.ithaca.edu/search/?P=PHIL%2021200>) or PHIL 23000 (<https://catalog.ithaca.edu/search/?P=PHIL%2023000>); HLTH 20500 (<https://catalog.ithaca.edu/search/?P=HLTH%2020500>); WRTG 10600 (<https://catalog.ithaca.edu/search/?P=WRTG%2010600>) or ICSM 108XX, or ICSM 118XX. (F,S,Y)

Attributes: LMS, TE, WI

3 Credits

HLTH 34900-34901 Fieldwork in Health (NLA)

Practical experiences in public, voluntary, or commercial health agencies. Provides the opportunity to become involved in various agency functions. Prerequisites: Junior standing; permission of department chair.

Repeatable for up to (F-S,Y)

Attributes: TE

0.5-6 Credits

HLTH 35000 Drug Use and Abuse (LA)

Promotes critical thinking about many implications of the use of mind-altering drugs within our society. An interdisciplinary approach is used to study aspects of social, cultural, mental, emotional, physical, and spiritual health related to drugs, society, and human behavior. Course content includes, and is not limited to, alcohol, tobacco, legal and illegal substances. Prerequisites: Junior standing. (F-S,Y)

Attributes: HE1, SS

3 Credits

HLTH 36000 Curriculum and Materials in Health Education (NLA)

Examination of the philosophical, theoretical, and practical aspects of curriculum development related to health program planning. Consideration is given to curricular scope and sequence. Students demonstrate their ability to develop unit plans, block calendars, and lesson plans. Existing prepackaged curriculum models are evaluated. Prerequisites: EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>); nine credits in HLTH xxxxx courses. (F,Y)

Attributes: TE

3 Credits

HLTH 39900-39906 Selected Topics in Health (NLA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

1-3 Credits

HLTH 40300 Nutritional Care and Therapeutics (NLA)

Provides overview of role of nutrition professional as a member of the health care team. Students explore best practice techniques for nutrition assessment and health diagnoses; application of theoretical models of nutrition behavior and intervention to individual case studies; guidelines for client education, monitoring and documentation; and frameworks of nutrition practice within allopathic, complementary, and alternative health care models. Nutritional supplement use and diet planning are explored via case study. Students critically analyze the development, effect, method, application, and efficacy of current standards for nutrition intervention. Prerequisites: Senior standing; HLTH 22900 (<https://catalog.ithaca.edu/search/?P=HLTH%2022900>), HLTH 30100 (<https://catalog.ithaca.edu/search/?P=HLTH%2030100>), HLTH 30500 (<https://catalog.ithaca.edu/search/?P=HLTH%2030500>), HLTH 30600 (<https://catalog.ithaca.edu/search/?P=HLTH%2030600>). (F,Y)

3 Credits

HLTH 41700 Front Page Public Health: Policy and Epidemiology (LA)

History and theories of the public health perspective. Detailed analysis of major contemporary public health issues in the context of political, economic, and social factors. Theories and uses of epidemiology as a descriptive, analytical, and political tool of public health. Community, regional, national, and international public health policies are studied and evaluated. Attention is paid to current public health issues in the news. Prerequisites: HLTH 21700 (<https://catalog.ithaca.edu/search/?P=HLTH%2021700>) and HLTH 31700 (<https://catalog.ithaca.edu/search/?P=HLTH%2031700>). (F,Y)

Attributes: WI

3 Credits

HLTH 42000 Teaching Strategies in Health Education (NLA)

Designed for prospective health educators as a comprehensive background for health instruction in elementary, secondary, and community settings. Students acquire the knowledge and skills necessary to plan, deliver, and assess learning experiences and activities incorporating strategies that target multiple intelligences, learner diversity, cooperative education, curriculum integration, and skill acquisition as they relate to health education. Prerequisites: HLTH 33300 (<https://catalog.ithaca.edu/search/?P=HLTH%2033300>) or HLTH 36000 (<https://catalog.ithaca.edu/search/?P=HLTH%2036000>). (S,Y)

Attributes: HE1, TE

3 Credits

HLTH 43900 Assessment in Health Education (NLA)

Prepares class members to assess student learning in K-12 health education settings. Through a combination of lecture, labs, discussion, and field-based activities, opportunities are provided to understand and apply current educational testing and evaluation procedures. Course content includes study of the criteria for selection of tests, application of statistical procedures, construction and analysis of assessment tools, procedures for classification and grading of students, and program assessment techniques. Credit will not be granted for both this course and PHED 43900 (<https://catalog.ithaca.edu/search/?P=PHED%2043900>). Prerequisites: PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>), HLTH 33300 (<https://catalog.ithaca.edu/search/?P=HLTH%2033300>), or HLTH 36000 (<https://catalog.ithaca.edu/search/?P=HLTH%2036000>). (F,Y)

Attributes: TE

3 Credits

HLTH 44100 Student Teaching in Health Education (NLA)

Observation and supervised student teaching. Assignment to approved cooperating schools full-time for one semester in the senior year.

Required of all students preparing to teach health education in elementary or secondary schools. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>); HLTH 42000 (<https://catalog.ithaca.edu/search/?P=HLTH%2042000>); EDUC 34000 (<https://catalog.ithaca.edu/search/?P=EDUC%2034000>). (F-S,Y)

10 Credits

HLTH 44400 Leadership and Health Promotion (LA)

Explores the interconnected nature of leadership operating within the synergy of perspectives involved in health promotion. Examination of collective and interdisciplinary theories and approaches to problem solving, relationship building and transformation in health promotion. Leadership is explored through directed inquiry of case studies.

Challenges to promoting health in individuals, communities, and society are considered. Prerequisites: HLTH 33510 (<https://catalog.ithaca.edu/search/?P=HLTH%2033510>) or HLTH 31600 (<https://catalog.ithaca.edu/search/?P=HLTH%2031600>). (S,Y)

Attributes: CP

3 Credits

HLTH 44500 Student Teaching in Health Education (dual major) (NLA)

Observation and supervised student teaching. Assignment to approved public schools full-time for a half semester in the senior year. Experience in structured observation, classroom assisting, and direct instruction; additional experience in planning, conferencing, and related school duties outside regular class periods. Individual conferences are held with Ithaca College supervisors of field experiences. Required of all dual health education and physical education majors. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>); HLTH 36000 (<https://catalog.ithaca.edu/search/?P=HLTH%2036000>); HLTH 42000 (<https://catalog.ithaca.edu/search/?P=HLTH%2042000>); EDUC 34000 (<https://catalog.ithaca.edu/search/?P=EDUC%2034000>). (F-S,Y)

Attributes: TE

5 Credits

HLTH 44800 Seminar in Health Education (NLA)

An opportunity for student teachers or internship participants to analyze and discuss individual and general problems related to their experiences. Current trends and issues confronting the prospective health education professional, such as issues regarding changes in the profession, teaching credentials, and job opportunities, are also addressed. Corequisites: HLTH 44100 (<https://catalog.ithaca.edu/search/?P=HLTH%2044100>) or HLTH 44900 (<https://catalog.ithaca.edu/search/?P=HLTH%2044900>). (F,S,Y)

Attributes: CP, TE

2 Credits

HLTH 44900-44901 Internship in Health (NLA)

Supervised, full-time experience in a health agency during the summer or regular academic semester. Content of internship should reflect the student's concentration area (i.e., gerontology, substance abuse services, worksite health promotion, nutrition, or PIC). Prerequisites: Current American Red Cross CPR and first aid card; junior or senior standing; permission of department chair. 6-(F-S,Y)

6-12 Credits

HLTH 45200-45203 Independent Study in Health (LA)

An individual study program for the investigation of special problems in the field of health. A written report is required. Prerequisites: Senior standing; permission of instructor and department chair. (F-S,Y)
1-3 Credits

HLTH 45300 Supervised Research (NLA)

Empirical research on a health topic selected in consultation with instructor. A written report is required. Course may be repeated for up to Prerequisites: At least three courses in health; permission of instructor and department chair. (F-S,Y)
1-3 Credits

HLTH 48700 Multicultural Issues in Health (LA)

Addresses the issues of ethnicity, culture, and race as they relate to health. Examines a variety of intercultural issues, including power and oppression, and how they affect the lives of children, adults, and families living in the United States. Prerequisites: HLTH 31700 (<https://catalog.ithaca.edu/search/?P=HLTH%2031700>), HLTH 33510 (<https://catalog.ithaca.edu/search/?P=HLTH%2033510>). (S,Y)
Attributes: AN2, AN3, DV, HE1
3 Credits

Physical Education (PHED)

PHED 10100 Teaching Strategies in Physical Education (NLA)

Introduces students to basic pedagogical skills relative to the successful teaching of physical education in a school setting. Topics include, but are not limited to, lesson planning, voice projection, physical movement in the teaching area, and effective transitions. The use of videotaped mini-lessons throughout the semester will encourage students to practice these teaching techniques, as well as to develop reflective and analytical skills in relation to their teaching. For physical education and health and physical education majors/coaching minors. (S,Y)
Attributes: TE
1 Credit

PHED 14400 Fundamentals of Dance and Movement (NLA)

This course will prepare the future teacher in the area of movement development, through basic dance. Emphasis will be placed on the teaching of dance in the public school setting, in both secondary and primary grades. Although there is a dance skill component, the majority of the class focuses on knowledge about pedagogy of fundamental movements in dance and progressions. Students will learn teaching progressions to be effective in the public school setting. (S,Y)
1 Credit

PHED 17800 Fundamental Movement Concepts Gymnastics (NLA)

This course will prepare the future teacher in the area of movement development, through basic gymnastics. Emphasis will be placed on the teaching of gymnastics in the public school setting, with particular focus on the primary grades. Although there is a movement component, the majority of this course will be cognitively based. Students will learn teaching progressions and deal with learning effectiveness in the public school setting. (S,Y)
1 Credit

PHED 20200 Teaching Goal-Oriented Games in Physical Education (NLA)

Introduces students to a tactical model/approach to higher-level games play, focusing specifically on the offensive and defensive strategies and skills common to goal-oriented games (e.g. soccer, football, lacrosse, basketball, handball). Corequisites: PHED 23000 (<https://catalog.ithaca.edu/search/?P=PHED%2023000>). (S, Y)
1 Credit

PHED 20400 Teaching Net/Wall Games in Physical Education (NLA)

Introduces students to a tactical model/approach to higher-level games play, focusing specifically on the offensive and defensive strategies and skills common to net/wall games (e.g. volleyball, tennis, racquetball, paddleball). Prerequisite: Sophomore standing. (F,Y)
1 Credit

PHED 20500 Teaching Target and Fielding Games in Physical Education (NLA)

Introduces students to a tactical approach to higher-level games play, focusing specifically on the offensive and defensive strategies of target and fielding games (e.g., softball, baseball, archery, golf, bowling). Prerequisites: PHED 10100 (<https://catalog.ithaca.edu/search/?P=PHED%2010100>). (F,Y)
1 Credit

PHED 20700 Teaching Outdoor Pursuits and Contemporary Activities (NLA)

Introduces students to the basic principles involved in teaching outdoor pursuits and adventure education as part of the elementary and secondary physical education programs. Depending on the season, activities include basic rock climbing, mountain biking, cross country skiing, challenge course facilitation and/or backcountry travel techniques for different age groups and diverse populations. Prerequisites: HITH 15200. (S,Y)
1 Credit

PHED 20800 Teaching Individual Activities in Physical Education (NLA)

Introduces students to the basic principles involved in the planning, teaching, and assessment of a variety of individual activities taught as part of the secondary physical education curriculum. Activities include, but are not limited to, yoga, wrestling, personal defense, fencing, and track/field. Prerequisite: Sophomore standing. (F,Y)
1 Credit

PHED 21200 Motor Skills Development (NLA)

Students will be introduced to the fundamental theories and principles related to the motor, cognitive, and affective development of humans throughout the life span, with emphasis on children and adolescents. Detailed analysis of fundamental movement skills and their relationship to effective, developmentally appropriate movement programs will be explored. Students will demonstrate critical analysis of movement programs and compare and contrast them with best practice. Laboratory experiences involving children and adolescents in school settings will allow students to observe the skills and theories in real-life situations. Prerequisites: HLTH 15200 (<https://catalog.ithaca.edu/search/?P=HLTH%2015200>) or PHED 25500 (<https://catalog.ithaca.edu/search/?P=PHED%2025500>). (F-S, Y)
Attributes: TE
3 Credits

PHED 23000 Teaching Physical Activities in Elementary Physical Education (NLA)

Provides physical education teacher candidates with knowledge in the selection, planning, and implementation of developmentally appropriate physical activities for elementary school children. Introduces students to the "skill theme approach" to teaching games, gymnastics, and dance with an emphasis on the development and use of movement concepts in increasing physical activity as outlined by the National Standards for Physical Education. Emphasis is placed on developing an applied understanding of what to teach and practical lab experiences are included in the course. Prerequisites: PHED 10100 (<https://catalog.ithaca.edu/search/?P=PHED%2010100>) and HLTH 15200 (<https://catalog.ithaca.edu/search/?P=HLTH%2015200>). (S, Y)
Attributes: TE
3 Credits

PHED 23400 Fitness Applications for Health Promotion (NLA)

Incorporates basic kinesiological, biomechanical, and physiological principles and concepts with practical applications for physical activity, health-related fitness, and health promotion. Clinical procedures include body composition measurement, submaximal oxygen uptake testing, assessing blood pressure, calculating body mass indexes, and cholesterol screening. A major emphasis is the assessment of health-related fitness and the prescription of various types of physical activities for children, adolescents, and adults. Prerequisites: EXSS 12000 (<https://catalog.ithaca.edu/search/?P=EXSS%2012000>); EXSS 12100 (<https://catalog.ithaca.edu/search/?P=EXSS%2012100>). Students can receive credits for HLTH 23400 (<https://catalog.ithaca.edu/search/?P=HLTH%2023400>) or PHED 23400 (<https://catalog.ithaca.edu/search/?P=PHED%2023400>), not both. (S,Y)
Attributes: HE1
4 Credits

PHED 23500 Teaching Fitness in Physical Education (NLA)

Introduces students to the teaching and assessment of fitness concepts to children in the K-12 school setting. Emphasis is placed on the practical application, teaching, and assessment of the components of physiological aspects of fitness to children. Topics include the contemporary goals of and background to fitness education, developmentally and instructionally appropriate principles for teaching and assessing fitness, the use of technology in the instruction and assessment of fitness, using various testing batteries, the reporting of fitness results, and the use of goal setting as a motivational tool for improving one's fitness. This course will allow students to become nationally certified as a physical best health-fitness specialist. Corequisites: Prior or concurrent enrollment in PHED 23400 (<https://catalog.ithaca.edu/search/?P=PHED%2023400>). (F-S, Y)
1 Credit

PHED 25500 Philosophy and Principles of Coaching (NLA)

The philosophy and principles of coaching young athletes. Emphasis is placed on development of a coaching philosophy through critical examination of issues relating to coaching. Coaching responsibilities, developmental characteristics of children and youth, and their implications for the conduct of athletic programs, instructional and administrative methods, effective design and conduct of practices, and enhancement of contest performance are also discussed. Prerequisites: Sophomore standing. (F-S,Y)
3 Credits

PHED 25600 Health Sciences Applied to Coaching (NLA)

The application of modern principles of the health sciences as they relate to youth coaching (up to 12th grade) including exercise physiology, kinesiology, sport psychology, and nutrition. Human growth and development, safety, first aid, training, and conditioning of youth athletes are covered. Prerequisite: PHED 25500 (<https://catalog.ithaca.edu/search/?P=PHED%2025500>) or concurrent enrollment. (F-S,Y)
3 Credits

PHED 33000 Adapted Physical Education and Sport (NLA)

Provides students with an understanding of individuals with disabilities. Students learn to adapt physical education activities to meet the abilities of an individual with special needs in order to provide a safe and successful learning experience. Topics addressed include, but are not limited to, philosophical approaches to teaching students with disabilities, legislation affecting the adapted physical education program, the process of identifying students with disabilities in the public school system, and development of the individual education plan. Laboratory experiences include working weekly with students with disabilities in an aquatics program. Prerequisites: PHED 21200 (<https://catalog.ithaca.edu/search/?P=PHED%2021200>). Corequisites: PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>) or PHED 33300 (<https://catalog.ithaca.edu/search/?P=PHED%2033300>). (F-S,Y)
3 Credits

PHED 33200 Curriculum and Methods in Elementary School Physical Education (NLA)

Provides students with practical guidelines for the development and assessment of contemporary elementary physical education programs. Pedagogical skills and strategies for successful teaching as they pertain to the elementary school teaching situations are also emphasized. Developmentally appropriate physical education content using a movement framework (movement concepts and skill themes) serves as the basis for the course, which involves practicum teaching experiences in local elementary schools. Prerequisites: EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>); PHED 23000 (<https://catalog.ithaca.edu/search/?P=PHED%2023000>); junior or senior standing. (F,Y)
Attributes: TE
3 Credits

PHED 33300 Curriculum and Methods in Secondary School Physical Education (NLA)

Analysis of the program of physical education in secondary schools; criteria for the selection and grade placement of activities; consideration of methods and teaching techniques; and problems relating to program planning, time allotment, administration of facilities, and program evaluation. Observation and teaching of secondary physical education classes in the Ithaca school system, as well as micro-peer teaching on campus. Prerequisites: Junior or senior standing; EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>). (S,Y)
Attributes: TE
3 Credits

PHED 34900 Fieldwork in Physical Education (NLA)

Practical experience in public, voluntary, or commercial agencies or businesses providing various types of physical education, sports-related activities, or services. Prerequisites: Major or minor in the Department of Health Promotion and Physical Education or the Department of Exercise and Sport Sciences; junior standing or above; permission of department chair. (F-S,Y)
Attributes: TE
1-6 Credits

PHED 37400 Coaching Seminar-Field Hockey (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 37600 Coaching SeminarSwimming (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 38500 Coaching Seminar - Track & Field (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 38600 Coaching Seminar-Soccer (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 38700 Coaching Seminar-Wrestling (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 38800 Coaching Seminar-Lacrosse (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar.

(F-S,Y)
2 Credits

PHED 39900-39903 Selected Topics in Physical Education (LA)

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

Attributes: NLA
1-3 Credits

PHED 42000-42003 Independent Study in Sport Skills (NLA)

Prerequisites: Major or minor in Department of Health Promotion and Physical Education; PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>) or PHED 33300 (<https://catalog.ithaca.edu/search/?P=PHED%2033300>); permission of department chair. 0.5-(F-S,Y)
0.5-1 Credits

PHED 43900 Assessment in Physical Education (NLA)

Prepares students to assess student learning in a K-12 physical education setting. Through a combination of lectures, labs, discussions, and field-based activities, opportunities are provided to understand and apply current educational testing and evaluation procedures. Course content includes study of the criteria for selection of tests, application of statistical procedures, construction and analysis of assessment tools, procedures for classification and grading of students, and program assessment techniques. Credit will not be given for both this course and HLTH43900. Prerequisites: PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>), PHED 33300 (<https://catalog.ithaca.edu/search/?P=PHED%2033300>), or HLTH 36000 (<https://catalog.ithaca.edu/search/?P=HLTH%2036000>). (F,Y)

Attributes: TE
3 Credits

PHED 44000 Organization and Administration of Physical Education (NLA)

Policies and procedures in the organization and administration of physical education and athletics in the public school setting. Directed discussions and investigation of the nature and scope of administrative responsibilities in programs of physical education and athletics. Prerequisites: PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>) or PHED 33300 (<https://catalog.ithaca.edu/search/?P=PHED%2033300>), or permission of instructor. (F,Y)

Attributes: UND
3 Credits

PHED 44100 Student Teaching in Physical Education (NLA)

Observation and supervised student teaching. Assignment to approved, cooperating schools full-time for one semester in the senior year. Experience in classroom observation, participation, teaching, coaching, and intramural and noon-hour supervision. Individual conferences with Ithaca College coordinators of field experiences. Required of all students preparing to teach physical education in elementary or secondary school. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>); PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>); PHED 33300 (<https://catalog.ithaca.edu/search/?P=PHED%2033300>); EDUC 34000 (<https://catalog.ithaca.edu/search/?P=EDUC%2034000>). (F-S,Y)

Attributes: TE, UND
10 Credits

PHED 44500 Student Teaching in Physical Education (dual major) (NLA)

Observation and supervised student teaching. Assignment to approved, public schools full-time for a half semester in the senior year. Experience in structured observation, classroom assisting, and direct instruction; additional experience in planning, conferencing, and related school duties outside regular class periods. Individual conferences are held with Ithaca College supervisors of field experiences. Required of all dual health education and physical education majors. Prerequisites: Current American Red Cross CPR and first-aid card; EDUC 21010 (<https://catalog.ithaca.edu/search/?P=EDUC%2021010>); PHED 33200 (<https://catalog.ithaca.edu/search/?P=PHED%2033200>); PHED 33300 (<https://catalog.ithaca.edu/search/?P=PHED%2033300>); EDUC 34000 (<https://catalog.ithaca.edu/search/?P=EDUC%2034000>). (F-S,Y)

Attributes: TE

5 Credits

PHED 44800 Professional Seminar (NLA)

A field course to be taken in conjunction with PHED 44100 (<https://catalog.ithaca.edu/search/?P=PHED%2044100>) Student Teaching in Physical Education. Examines current trends and developments in teaching and extracurricular activities, as well as situations identified in student teaching. Special interest speakers. (F,S,Y)

Attributes: CP, TE

2 Credits

PHED 45000-45003 Independent Study in Physical Education (LA)

Individual study program for investigation of special problems in the field of physical education. Written report required. Prerequisites: Permission of instructor and department chair. (F-S,Y)

Attributes: TE

1-3 Credits

PHED 46000 Internship in Physical Education (NLA)

Supervised work experience in a sports-related service agency or business during the summer or the regular academic year. Prerequisites: Minimum 2.50 cumulative GPA; junior standing or above; current American Red Cross CPR and first aid card; permission of the instructor and department chair. 6-(F-S,Sum,Y)

6-12 Credits

PHED 47400 Coaching Seminar-Volleyball (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 47500 Coaching Seminar-Gymnastics (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 47700 Coaching Seminar-Softball

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 48400 Coaching Seminar-Football (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. This course is repeatable up to four credits. (F-S,Y)

2 Credits

PHED 48500 Coaching Seminar - Men's Basketball (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

PHED 48800 Coaching Seminar-Baseball (NLA)

Provide an in-depth understanding of strategies, specific to each sport. Students in these seminars will work with experienced coaches to learn the skills necessary to provide guidance, leadership, and inspiration in the development of athletes and teams. It is recommended that you have some experience as a player, or with the sport specific to each seminar. (F-S,Y)

2 Credits

Health Sciences Major – B.S.

Students in health sciences are required to declare one of two concentrations.

1. The premedical concentration is designed to meet the curricular needs of students pursuing premedical graduate education.
2. The planned clinical concentration is designed for students planning to pursue post-baccalaureate education in health fields such as physician assistant, nursing, dietetics, chiropractic, veterinary, and dentistry.

Summary

Code	Title	Credits
	Health Sciences B.S. Major Requirements	71-77
	Integrative Core Curriculum and Electives ¹	43-49
Total Credits		120

¹ This major is approved to fulfill the Integrative Core Curriculum (p. 8) requirement for the Natural Sciences perspective.

Degree Requirements

Note: some required courses include a math placement score prerequisite. Check course prerequisites prior to registration.

Code	Title	Credits
HEALTH COURSES		
HLTH 10100	Introduction to Healthy Aging (Introduction to Healthy Aging)	3
HLTH 20200	Human Nutrition	3
HLTH 20500	Critical Health Issues	3
HLTH 21700	Epidemiological Approaches to Disease Prevention and Control	3
HLTH 22900	Human Disease	3
HLTH 31600	Health Research and Analysis	3
Select 3 credits of the following:		3
HLTH 349xx	Fieldwork in Health	
HLTH 453xx	Supervised Research	
HLTH 41700	Public Health Policy and Justice	3
HLTH 44400	Leadership and Health Promotion	2

Aging Studies Minor

The Aging Studies minor provides students an understanding of the multi-faceted nature of aging through coursework and experiential learning and is appropriate for students across the college. In the core introductory class students will learn about the biological, psychological, and social aspects of aging and relate that knowledge to the lives of older adults in the community. Upper level elective courses allow students to examine specific aspects of aging in more depth.

The minor in Aging Studies requires a minimum of 15 credits, including 3 required credits and 12 elective credits. Some courses have pre-requisites.

Requirement

Code	Title	Credits
CORE REQUIREMENTS		
GERO 1xxxx	Any 100-level GERO course	3
AGING STUDIES ELECTIVES ¹		
Select 12 credits from the following (at least 6 credits must be at the 300 level or above): ²		12
BIOL 20500	Biology of Aging	
GERO 21000	Health and Aging	
GERO 22000	Sociology of Aging	
GERO 23000	Memory Loss and Aging: Myths and Realities	
GERO 25000	Lifespan Creativity	
GERO 29010	Fieldwork in Gerontology	
OTBS 20200	Human Development II	
GERO 31900	Aging and Social Policy	
GERO 32500	The Long-Term Care System	
GERO 37000	Counseling the Older Adult	
GERO 38000	End-of-Life Issues	
GERO 49900	Independent Study	
HLTH 30100	Lifecycle Nutrition	
PSYC 36600	Adulthood and Aging	
SLPA 35900	Communication Disorders in the Aging Population	
Total Credits		15

¹ Upper level classes may have additional prerequisites.

² Courses in this list are all 3 credits.

Coaching Minor

This minor is designed to prepare students to coach one or two specific sports. A required fieldwork experience offers students the opportunity to work directly with a coach and a team.

These courses offer students a background in coaching sports. These courses fulfill the requirements for a minor but the minor does not certify you to coach. Coaching certification requirements are established

by each state. Students should note that each state varies in its requirements for coaching certification. Each state will determine which courses count toward certification. Students are responsible for identifying the coaching requirements in their respective state and submitting required documentation for certification.

Requirements

Code	Title	Credits
PHED xxxxx	Coaching Seminar ¹	2
PHED 21000	Teaching Sport Skills for Coaches	3
PHED 25500	Philosophy and Principles of Coaching	3
PHED 25600	Health Sciences Applied to Coaching	3
PHED 31000	Contemporary Challenges in Sport Coaching	3
	or SMGT 41000 Contemporary Issues in Sport Management	
PHED 34900	Fieldwork in Physical Education	1
EXSS 20200	Sport and Exercise Psychology	3
Total Credits		18

¹ Course must be in the first sport to be registered.

Health Minor

The health minor is open to students majoring in all disciplines except public and community health. Students enrolled in this minor are afforded the opportunity to survey a broad set of health issues impacting individual and population health. Following a required 3-credit theoretical framework course, students can take advantage of the flexibility of this minor to study health issues of interest, be it health care systems, health promotion and disease prevention, or an array of health content areas.

Requirements

Nutrition Promotion Minor

The nutrition promotion minor is open to students majoring in all disciplines except health sciences – food and nutrition emphasis. The nutrition promotion minor enables students to systematically study nutrition in the world and to learn more about the depth and breadth of nutrition in society. The minor provides an introductory level examination of the history, theory and methods of nutrition promotion. Students are given the opportunity to discuss the wide-range of nutritional issues and their relationship to health problems. Students will gain a broad understanding of where nutrition falls within the health care system and how health professions can promote lifelong health through nutritional approaches.

SOCI 20800	Social Change	
Total Credits		18-19

Department of Occupational Therapy

Melinda Cozzolino, *Associate Professor and Chairperson*

Amie Germain, *Associate Professor and Chair of Graduate Studies*

Vision:

The Ithaca College Department of Occupational Therapy will lead the profession in developing engaged practitioners who meet the needs of a diverse society by facilitating access to health, well-being, and occupational participation for all.

Mission:

The mission of the Department of Occupational Therapy is to prepare ethical practitioners who are lifelong learners, leaders, and advocates in the field of occupational therapy. We meet this mission by:

- Promoting the centrality of occupational participation to support health, quality of life, occupational justice, and resilience of individuals, communities and populations.
- Emphasizing theory and evidence driven practice and professional reasoning through experiential learning.
- Creating diverse and integrative learning experiences to develop breadth and depth of student perspectives.
- Fostering collaborative engagement in interprofessional scholarship and service that extends beyond campus to include local and global communities.
- Exploring traditional and emerging areas of knowledge and practice.

The Department of Occupational Therapy offers a six-year combined bachelor's and doctoral program to meet this mission. The curriculum of the six-year combined B.S./O.T.D. program in occupational therapy is designed to provide a strong foundation in the liberal arts, sciences, and humanities; to offer a comprehensive and rigorous professional education; and to develop attitudes and skills for lifelong learning and leadership. Academic instruction is complemented by graduate level fieldwork experiences (24 weeks full-time) and a 14-week (540 hour) doctoral capstone experience. Students are provided with a strong general education and the opportunity to explore special interests in academic, clinical, and research arenas. The B.S./O.T.D. program is six years in length and leads to a doctorate in occupational therapy. Students in this program receive a Bachelor of Science degree in occupational science at the completion of four years of study. They are not eligible for licensure or certification until they complete the graduate years.

The graduate portion of the combined B.S./O.T.D. degree program consists of three academic semesters, two full-time fieldwork experiences (24 weeks total), and a 14-week doctoral capstone experience. Fieldworks and the doctoral capstone experience are completed at sites throughout the country. Travel and housing arrangements for fieldwork and capstone are the responsibility of the student.

Students typically enter the B.S./O.T.D. program as first-year college students, but transfer students may also be accepted. The transfer application process is outlined under the "Policies and Procedures" tab of the School of Health Sciences and Human Performance page. Transfer into the occupational therapy program is limited to available openings.

The entry-level occupational therapy doctoral degree program has applied for accreditation and has been granted Candidacy Status by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number c/o AOTA is (301) 652-AOTA and its web address is www.acoteonline.org. The program must have a preaccreditation review, complete an on-site evaluation, and be granted Accreditation Status before its graduates will be eligible to sit for the national certification examination for the occupational therapist administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR). In addition, all states require licensure in order to practice; however, state licenses are usually based on the results of the NBCOT Certification Examination. Note that a felony conviction may affect a graduate's ability to sit for the NBCOT certification examination or attain state licensure. Students wishing to make a formal complaint against the occupational therapy program should contact ACOTE (<https://acoteonline.org/>) directly.

Graduates of the O.T.D. occupational therapy program are eligible to sit for the national certification examination for the occupational therapist, administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an occupational therapist, registered (OTR). In New York and all other states, a professional license is also required for practice. The NBCOT examination serves as the licensing exam in most states. Students are, however, required to apply separately for licensure and certification upon graduation.

Students must review and sign the Occupational Therapy Technical Standards annually to demonstrate that they are aware of the skills, abilities, and behavioral characteristics required to successfully

complete the Department's academic programs. Technical standards in occupational therapy include the areas of: (1) acquiring fundamental knowledge; (2) developing communication skills; (3) interpreting data and clinical information; (4) integrating knowledge to establish clinical judgment; and (5) developing appropriate professional behaviors and attitudes. <https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/occupational-therapy/technical-standards>

Special Academic Status Policy for Students in the Combined B.S./O.T.D. Occupational Therapy Program

Students majoring in Occupational Science and Occupational Therapy must meet certain academic standards to continue in the major and to be admitted into the graduate portion of the program.

Good Academic Standing: A student is in good academic standing if they have met all academic standards.

Course grade requirement: Students are required to obtain a minimum grade of at least a C in all professional courses, including major courses and required courses outside the major. Please note that students are expected to maintain a minimum B average (3.0 semester and cumulative GPA) and consistent C's will not meet this standard. A student in any year of study who fails to complete a required course with a grade of C or better must repeat the course (see "Repeating a Course" in the "Credit and Grade Information" section). Since many courses are offered once per year and are specifically sequenced, course failure may result in the delay of fieldwork and graduation. Note: This is not a criterion for program warning or dismissal.

GPA requirements: Students must achieve a minimum 3.0 semester and cumulative GPA to remain in good academic standing. Additionally, students must achieve a minimum cumulative GPA of 3.0 by the conclusion of the junior fall in order to continue in the major.

Professional behaviors: Students are evaluated on professional behaviors using departmental procedures and standards. If a student has documented professional behavior concern(s), they will be placed on academic warning and a remediation plan with a timeline will be put in place.

Requirement to progress into the graduate portion of the program: In order to progress into the graduate portion of the B.S./O.T.D. program, students must have maintained a cumulative GPA of 3.00 or better in their major-specific coursework and an overall cumulative 3.0 GPA for all coursework completed. Students must complete all requirements for the B.S. in occupational science and be approved by the faculty before taking fieldwork courses.

Note: In order to be eligible to take OTDR 500 level courses, students must have earned a minimum GPA of 3.0 and have completed at least 60 undergraduate credits.

Program Warning and Dismissal

A student who does not meet criteria for Good Academic Standing (i.e. fails to meet any of the academic standards stated above) may be placed on program warning, suspended, or dismissed from the program (see the discussion in the "Academic Affairs Information" section). Students who have been placed on program warning or suspension will be expected to meet department standards for all subsequent semesters. Students will remain on program warning until the issue that caused the warning is

resolved. A student may not be placed on a program warning for a new violation in a subsequent consecutive semester; should a new violation occur the student will be dismissed from the program.

Undergraduate students in the combined B.S./O.T.D. program will be placed on **program warning** if any of the following occur:

1. A student earns less than a 3.0 semester GPA;
2. A student has documented professional behavior concern(s).

Undergraduate students will be **dismissed** from the program if any of the following occur:

1. A student on program warning violates the aforementioned departmental criteria for good standing in the subsequent semester (i.e. two consecutive semesters on program warning);
2. A student earns less than a 3.0 cumulative GPA at the completion of the fall semester of the junior year;
3. A student has a documented professional behavior concern(s) that has not been resolved within the specified timeframe;
4. A student violates the American Occupational Therapy Association's code of ethics.

A student who is subject to dismissal from the program may, under extenuating circumstances, be granted a suspension from the program in lieu of dismissal. For readmission to the program, the student may have to fulfill certain conditions, such as remedial coursework or fieldwork assignments prescribed by the faculty at the time of suspension. Readmission may be contingent on the availability of space in succeeding classes.

In an exceptional case, a student who has been dismissed may be readmitted to the program upon satisfaction of conditions determined by the department faculty. Dismissal from the occupational therapy program does not always mean dismissal from Ithaca College. In some cases, students may be eligible to pursue other Ithaca College majors. Specifics with regard to these policies and the appeals procedures are available in the Department of Occupational Therapy Student Manual.

A senior in the combined B.S./O.T.D. program who meets the criteria for dismissal will be allowed to continue in the program to earn the B.S. degree with the understanding that continuation into the graduate portion of the program will not be permitted.

Fieldwork

Fieldwork is an essential part of professional training and is required of all occupational therapy students. Students are assigned to Level I and Level II fieldwork sites locally, and at locations around the United States, based on a combination of student interest, setting type, and site availability. Students can expect that at least some of their placements will be at a distance from home. Students are responsible for all fieldwork site related expenses such as health requirements, background checks, and/or drug screenings. Students arrange their own housing and travel for fieldwork experiences.

Level I fieldworks are embedded into specific undergraduate courses and are not a separate tuition cost. Level II fieldworks are standalone courses in the graduate years and tuition is billed to the student (for more details: [link to OT grad catalog](#)). For more information on student expenses, see "Graduate Occupational Therapy" costs under "Graduate Tuition &

Fees" on the Tuition and Financial Aid website. In UG catalog: <https://catalog.ithaca.edu/undergrad/schools/school-health-sciences-human-performance/department-occupational-therapy/occupational-therapy-major-ms/>

Occupational Therapy Doctorate (OTD)

The six-year combined B.S./O.T.D. degree curriculum is designed to provide depth and breadth for students' professional development, liberal arts education, and analytical skills. Combined B.S./O.T.D. students take a total of 120 credits to earn the B.S. degree and 58 credits to earn their O.T.D. degree through didactic coursework, fieldwork (24 weeks full time), and a doctoral capstone experience (14 weeks/540 hours). Graduates of the B.S./O.T.D. program are eligible to apply to take the National Board for Certification in Occupational Therapy (NBCOT) examination upon degree completion.

For information on the graduate portion of the combined B.S./O.T.D. program, please refer to the Graduate Catalog listing.

Majors & Minors

- Occupational Science Major – B.S. (p. 337)
- Occupational Science Minor (p. 337)

OTBS 10000 Introduction to Occupational Therapy (NLA)

Explore how practitioners in the field of occupational therapy use purposeful activity to promote health and wellness at individual and population levels. Investigate current areas of practice for occupational therapists and explore the historical roots of the profession. (S,Y)
1 Credit

OTBS 10600 Introduction to Occupational Science (LA)

An overview of the science of human occupation and theoretical models that are used to describe the impact of occupation on individuals. Includes the personal, physical, psychosocial, cultural, and environmental factors of work, self-care, and play/leisure. An introduction to the domain of occupational therapy is included. (F-S, Y)
3 Credits

OTBS 20100 Human Development I (LA)

Explore developmental theories as they pertain to child development and childhood occupations. Study how children develop by examining theories and principles pertaining to the development of cognition, social and emotional behaviors, sensorimotor skills, play skills, and social identities. Apply developmental theories to developmental patterns and observations of children. Prerequisites: OTBS 10000. (F,S,Y)
Attributes: 1
3 Credits

OTBS 20200 Human Development II (LA)

Explore theories and factors influencing typical developmental progression from adolescence through older adulthood. Study how adolescents and adults develop by examining theories and principles pertaining to the development of cognition, social and emotional behaviors, sensorimotor skills, and social identities. Examine self-care, work, play, and leisure occupations related to development and role performances through older adulthood. Prerequisites: OTBS 20100. (F,S,Y)
Attributes: 1
3 Credits

OTBS 20600 The Culture of Disability (LA)

An examination of the historical and sociocultural construction of disability through readings, discussion, film, and personal narrative. The history of several disability groups will be used as case studies to analyze the ideological, socioeconomic, political, and cultural experience of disability. Prerequisites: Sophomore standing or permission of instructor. (F,Y)

Attributes: 1, DV, H, SS
3 Credits

OTBS 21000 The Cancer Experience (LA)

Introduction to the major types of cancer, impact of cancer on the individual, basic medical terminology, cultural differences in types of cancer, and external and internal influences on cancer, as well as treatment, adjustments, and coping strategies. Prerequisites: Sophomore standing. (IRR)

Attributes: SO, TIDE, TMBS
3 Credits

OTBS 21100 Occupational Therapy in Life Skills (NLA)

Concepts of occupational therapy and other allied health disciplines are applied through observation and direct interaction with the neurologically impaired adult population, attending interdisciplinary team meetings and rounds, and seminar group discussions. Emphasis is on integrating professional behaviors, group activities, basic activity analysis, medical record documentation and client/family interaction within a clinical setting. Prerequisites: OTBS 10600. (S,Y)

1-2 Credits

OTBS 22000 Adult Clinical Practice in Occupational Therapy (NLA)

Observation and participation in clinical treatment provided through the OT/PT clinic at Ithaca College. Treatment of occupational therapy adult clients, as well as participation in other occupational therapy services provided by the clinic. The clinic will provide students with an experiential learning opportunity while serving the needs of adults in the college and local communities. Prerequisites: OTBS 10600. (F,S,U,Y)

1 Credit

OTBS 22100 Pediatric Clinical Practice in Occupational Therapy (NLA)

Observation and participation in clinical treatment provided through the OT/PT clinic at Ithaca College. Treatment of occupational therapy pediatric clients, as well as participation in other occupational therapy services provided by the clinic. The clinic will provide students with an experiential learning opportunity while serving the needs of children in the college and local communities. Prerequisites: OTBS 10600. (F,S,U,Y)

1 Credit

OTBS 30500 Applied Occupations (NLA)

Occupational therapy theory and process are the concentration of this course. Selected theoretical approaches used in occupational therapy are introduced, discussed, compared, and critiqued. Analysis of occupations using occupational therapy models is discussed and practiced. Historical, social, cultural, and political influences on theory development are examined. The teaching-learning process in therapy is applied to the therapeutic process. Prerequisites: OTBS 10600; OTBS 33500. (S,Y)

3 Credits

OTBS 30600 Occupational Apartheid (LA)

Expands on content from OTBS 10600. The premise of occupational justice will be explored: personal, political, historical, sociological, cultural, and environmental influences on individual. Engagement in occupation will be analyzed in relation to occupational apartheid. Application of methods to ameliorate identified problems will be incorporated. Prerequisites: OTBS 10600. (S,O)

Attributes: SS
3 Credits

OTBS 32000 Clinical Psychiatry in Occupational Therapy (NLA)

Study of the basic concepts of identification, definition, and management of psychosocial problems. Major pathological syndromes and their etiologies are examined. Includes an introduction to pharmacology and medical terminology. Emphasis is placed on understanding not only the pathology and medical treatment, but also the effect of the condition on the individual's ability to perform functional activities. Additional emphasis will be placed on children, the elderly, and interdisciplinary teams. Prerequisites: PSYC 32100; OTBS 20200. (S,Y)

3 Credits

OTBS 33500 Individual and Group Work in Health Sciences (LA)

Focuses on therapeutic use of self in individual and group relationships. Emphasis is on an action-based, helping, problem-solving model to guide individual interventions. Provides the cognitive, affective, and occupational basis to helping groups for various client populations and settings across the life span. Presents knowledge and experiential opportunity to gain skill to be a competent group leader. Lecture and lab format. This course includes a Level I Fieldwork experience. Prerequisites: PSYC 10300; OTBS 10600; OTBS 20100; OTBS 20200; and three credits in sociology and/or anthropology. (F,Y)

4 Credits

OTBS 38500 Quantitative Concepts in Professional Reasoning (LA)

An introduction to quantitative concepts as they relate to professional reasoning in clinical contexts. Particular emphasis will be placed on the statistical interpretation of clinical research studies, utilizing the interplay between descriptive and inferential techniques and critical statistical reasoning. Laboratory sessions focus on developing skills for analyzing data using a commercial statistical software package (SPSS), reflecting on concepts related to data analysis, and presenting quantitative information in charts and tables, and written and oral arguments. Corequisite: OTBS 46000. Prerequisites: Math placement group 1 or 2, or successful completion of MATH 10800 or MATH 11000 with a grade of C- or higher; junior standing. (F,Y)

Attributes: QL
3 Credits

OTBS 39900-39907 Selected Topics in Occupational Therapy

Topics of current interest to faculty and students. Experimental courses are offered under this number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

1-3 Credits

OTBS 40000 Functional Human Anatomy (LA)

Study of the gross anatomical components of the human body through the use of lecture and lab activities using models and electronic media. Emphasis is placed on the musculoskeletal, neurological, and vascular systems of the human body. Prerequisites: BIOL 20600, PTBS 31300, or EXSS 12000 and EXSS 12100 with a C or higher. (U,Y)

5 Credits

OTBS 41000 Neuroscience (LA)

Introduction to the science of the nervous system. Provides a framework for understanding the nervous system and the area of applied neurosciences. This course provides a scientific basis for improved patient care by clarifying the relationships between the nervous system and behavior. Selected laboratory and experiential activities enhance lecture, discussion, and reading materials. Prerequisite: OTBS 40000. (F,Y)

Attributes: NS

3 Credits

OTBS 42100 Kinesiology (LA)

The application of gross anatomy to the study of human movement, with emphasis on understanding the interrelated kinetics of normal motion of the musculoskeletal system as they influence functional activities. Evaluation procedures such as manual muscle testing (MMT), joint range of motion (ROM), palpation of surface anatomy, and kinesiological analysis of functional activities are used in laboratory sessions. Prerequisites: OTBS 40000. (F,Y).

Attributes: NS

4 Credits

OTBS 43000 Applied Interventions in Occupational Therapy (NLA)

Emphasis is on selected occupational therapy intervention methods. The use of orthotics as a preparatory method in intervention, the evaluation and intervention of biomechanical components, and prosthetics as an occupation-based activity are explored. Adaptation of methods of instructing activities of daily living and design of equipment are also covered. Prerequisites: OTBS 30500; OTBS 40000; OTBS 42100. (S,Y)

3 Credits

OTBS 44000 Concepts in Adult Occupational Therapy (NLA)

Concepts in occupational therapy for the adult population will be explored. Practice models that are suitable for the adult client population will be addressed within the context of the occupational therapy process. Includes a case based seminar to integrate theory with practice.

Prerequisites: OTBS 30500; OTBS 40000. (F,Y)

4 Credits

OTBS 44500 Concepts in Pediatric Occupational Therapy (NLA)

Concepts in occupational therapy for the pediatric population will be explored. Practice models that are suitable for the pediatric client population will be addressed within the context of the occupational therapy process. Includes a case based seminar to integrate theory with practice. Prerequisites: OTBS 30500; OTBS 40000. (S,Y)

4 Credits

OTBS 45000 Adult Evaluation and Intervention Processes in Occupational Therapy (NLA)

The occupational therapy evaluation and intervention processes for the adult population will be explored. This includes development of an occupational profile of the client and conducting an analysis of occupational performance. The intervention phase involves implementation and re-evaluation of the intervention plan. This course includes a clinical FW experience. Prerequisites: OTBS 30500; OTBS 32000; OTBS 40000. (F,Y)

3 Credits

OTBS 45500 Pediatric Evaluation and Intervention Processes in Occupational Therapy (NLA)

Explores the occupational therapy evaluation and intervention processes for the pediatric population. Emphasis placed on development of an occupational profile of the client, analysis of occupational performance, and implementation and re-evaluation of the intervention plan. Includes a clinical fieldwork experience. Prerequisites: OTBS 30500; OTBS 40000.

(S,Y)

3 Credits

OTBS 46000 Research Methods in Occupational Therapy (LA)

Review of the basic methods and designs used in occupational therapy research and inquiry. Includes conceptual foundations of research, basic research methodology, and analysis and interpretation of data and reading and use of scholarly literature to write effective arguments. Emphasizes critical evaluation of occupational therapy research literature based on both quantitative and qualitative methods in order to develop evidence-based practitioners. Development of the components of the individual thesis proposal and comprehensive literature reviews with emphasis on writing for professional audiences. Prerequisites: WRTG 10600 or ICSM 10800 or ICSM 11800. Corequisite: OTBS 38500.

(F,Y)

Attributes: WI

3 Credits

OTBS 46500 Occupational Therapy Research Seminar (NLA)

A seminar/tutorial-based course that builds on previous classes in research statistics and design, and on clinical/professional courses in the senior year. This course is taken with a faculty member who is conducting research in an area of interest to the student. Construction of a research paper, including the development of a problem statement and research questions suitable for thesis research, and support of these elements with a background, definition, and rationale. Oral presentation of the proposal is required. Prerequisites: OTBS 46000; senior status.

(S,Y)

1 Credit

OTBS 47100 Adult Clinical Conditions in Occupational Therapy (NLA)

A study of selected systemic, medical-surgical, orthopedic, and neurological conditions. Basic concepts in the identification, definition, and medical management of these conditions affecting adults and older persons. Emphasis is placed on understanding not only the etiology, pathology, and medical treatment, but also the effect of the condition and its treatment on the person's ability to perform functional activities. Prerequisites: OTBS 40000. (F,Y)

3 Credits

OTBS 47500 Pediatric Clinical Conditions in Occupational Therapy (NLA)

Exploration of the salient medical background of pediatric diseases and conditions. Principles of medical management of selected systemic diseases in children and young adults as a basis for intervention by an occupational therapist. Prerequisites: OTBS 40000; OTBS 41000. (S,Y)

2 Credits

OTBS 48100 ICC Capstone in OT (LA)

Exploration and reflection upon the relationship between experiences with the Ithaca College core curriculum courses and the individual as an occupational being and emerging occupational therapy professional. Emphasis on the proposal, design, and creation of a reflective artifact that demonstrates the changes that have occurred as a result of the ICC experience inside and outside of the study of occupational therapy. An analysis of how learning in the Integrative Core Curriculum contributes to the preparation of the individual in the study of occupational therapy will be discussed and developed. Prerequisites: Senior, permission of instructor. (S,Y)

Attributes: CP

1 Credit

OTBS 49900-49903 Independent Study in Occupational Therapy (NLA)

Individual research and writing in a particular area of occupational therapy, supervised by a faculty member in the department. An approved design statement is required before registration for this course.

Prerequisites: Permission of supervising faculty member, student's adviser, department chair, and dean. (F-S,Y)

1-3 Credits

Occupational Science Major – B.S.

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

Note: This degree does not provide eligibility for certification or licensure in occupational therapy. It is awarded after four years of study in the six-year BS/OTD program in occupational science/occupational therapy

- The B.S./O.T. D. Program is a combined bachelor of science and doctor of occupational therapy degree. Students graduate with a Bachelor of Science degree in Occupational Science in May of their senior year and continue in graduate coursework for their Doctor of Occupational Therapy degree. See Graduate catalog (<https://nam10.safelinks.protection.outlook.com/?url=https%3A%2F%2Fnextcatalog.ithaca.edu%2Fgraduate%2Foccupational-therapy%2Foccupational-therapy-bsotd-program%2F&data=05%7C01%7Csgamarra%40ithaca.edu%7C9453b103a7d946494d9a08db7719f08c%7Cfa1ac8f65e5448579f0b4aa422c09689%7C0%7C0%7C638234725526657025%7CCTWfPbGZsb3d8eyJWljoimC4wLjAwMDAilCJQjoiV2luMzliLjBTl6lK1haWwllCjXVCl6W0%3D&reserved=0>) for more information.

Summary

Code	Title	Credits
	Occupational Science B.S. Major Requirements	87-88
	Integrative Core Curriculum and Electives	32-33
Total Credits		120

¹ This major is approved to fulfill the Integrative Core Curriculum (p. 8) requirement for the Natural Sciences perspective.

Degree Requirements

Code	Title	Credits
OCCUPATIONAL THERAPY DEGREE REQUIREMENTS		
Natural Science Courses:		

CHEM 11000	General Chemistry	3
BIOL 11900	Fundamentals of Biology: Cells and Bodies	4
Sociology or Anthropology course (choose one):		4
SOCI xxxxx	Sociology elective	
ANTH xxxxx	Anthropology elective	
Anatomy and Physiology courses:		
EXSS 12000	Anatomy and Physiology I	4
EXSS 12100	Anatomy and Physiology II	4
Health Systems Framework course:		
HLTH 20500	Critical Health Issues	3
Statistics course (choose one; fulfills ICC-QL):		3-4
MATH 14500	Statistics for the Health, Life, and Social Sciences	
MATH 21600	Statistical Analysis	
PSYC 20700	Statistics in Psychology	
Psychology courses:		
PSYC 10300	General Psychology	3
PSYC 32100	Abnormal Psychology	3
Occupational Therapy-specific courses:		
OTBS 10000	Introduction to Occupational Therapy	1
OTBS 20100	Human Development I	3
OTBS 20200	Human Development II	3
OTDR 50100	Practice Based Experience I	2
OTDR 50200	Occupational Science	3
OTDR 50300	Occupational Therapy Systems of Practice	3
OTDR 50400	Professional Concepts in Occupational Therapy	4
OTDR 50800	Applied Anatomy & Kinesiology	4
OTDR 51100	Evidence in Occupational Therapy I	3
OTDR 51000	Neuroscience	3
OTDR 51400	The Human Condition	4
OTDR 51500	Disability Culture & Communities	3
OTDR 51500	Occupational Therapy Theory and Process	3
OTDR 50500	Concepts in Mental Health Occupational Therapy	3
OTDR 50600	Concepts in Adult Occupational Therapy	4
OTDR 51200	Evidence in Occupational Therapy II	3
OTDR 51700	Group Process in Occupational Therapy	4
OTDR 51800	Adult Occupational Therapy Seminar	1
OTDR 51900	Modalities, Orthoses, & Protheses in Occupational Therapy	1
OTBS 48100	ICC Capstone in OT	1
Total Credits		87-88

Occupational Science Minor

No additional students are being admitted to this program as of Fall 2021.

Occupations are the activities we do every day that bring meaning to our lives. A minor in occupational science offers students the opportunity to understand the influence of human occupation on development, health,

and wellness for the individual and for society. This minor course of study will enhance understanding of how elements of personal capabilities, in conjunction with the physical and sociocultural environment, affect human occupation. This knowledge has the potential to foster the intellectual growth of the student and contribute to various professional and academic fields (education, speech and language pathology, recreation and leisure studies, physical therapy, psychology, aging studies, sociology, biology, business, athletic training, exercise science, and preprofessional studies), and ultimately to help contribute to the health, equity, and prosperity of communities.

Curriculum

The minor in occupational science requires a minimum of 18 credits, including 15 required credits and 3 elective credits.

Code	Title	Credits
OTBS 10600	Introduction to Occupational Science	3
OTBS 20100	Human Development I	3
OTBS 20200	Human Development II	3
OTBS 20600	The Culture of Disability	3
OTBS 30600	Occupational Apartheid	3
Select 3 credits of the following electives:		3
OTBS 21000	The Cancer Experience	
RLS 10100	Leisure and Society	
SOCI 22000	Sociology of Aging	
HINT 31200	Health Care and Culture	
HINT 31300	Health Care and Culture: An International Field Experience	
PSYC 36600	Adulthood and Aging	
Total Credits		18

Department of Physical Therapy

Laura Z. Gras, Professor, Department Chairperson, Graduate Chairperson and Program Director

Karen V. Lomond, Associate Professor and Associate Department Chairperson

The mission of Ithaca College's Department of Physical Therapy is to graduate physical therapists prepared for autonomous, interprofessional practice who provide compassionate, evidence-based, ethical, legal and culturally sensitive care to maximize the function, health and wellness of their patients, clients, and society. Our program promotes American Physical Therapy Association Core Values along with a commitment to diversity, equity, inclusion, and justice that prepares graduates to become life-long learners.

The Department of Physical Therapy offers a six-year, dual-degree program in clinical health studies/physical therapy. Students receive a B.S. degree in clinical health studies after four years of study and a Doctor of Physical Therapy degree (D.P.T.) after two years of graduate study. Students must complete the D.P.T. degree to be eligible for physical therapy licensure. Students spend the summer semester following the junior year in a 10-week concentrated study of human anatomy. Students gain practical experience through full-time clinical education courses, totaling 30 weeks, at sites throughout the United States. The program is accredited by the Commission on Accreditation in Physical Therapy Education and is approved by the New York State Education Department.

Special Academic Status Policy for Clinical Health Studies and Doctor of Physical Therapy Majors

I. Curricular Requirements

A. Order and Sequence of Completion of Required Courses

- Courses must be satisfactorily completed in the order and timeframe specified in the D.P.T. curriculum made available to each student unless permission to deviate from the sequence or time frame has been approved by the department faculty.
- Students enrolled in the Bachelor of Science Clinical Health Studies program must complete all degree requirements within five years of beginning the program.
- Transfer students who are accepted into the D.P.T. program must satisfactorily complete all courses in the professional phase of the Clinical Health Studies/Physical Therapy program in the order and timeframe specified for the D.P.T. cohort which they are entering. In addition, transfer students admitted to the D.P.T. program may be required to satisfactorily complete additional courses that may be specified on a case-by-case basis by the Department's Transfer Coordinator in order to satisfy requirements normally met by completion of the pre-professional phase (years 1-3) of the Clinical Health Studies curriculum.

B. Completion of a Minor or Second Major

To fulfill degree requirements, students enrolled in the Clinical Health Studies program must complete a minor in a field of their choice or a second major by the end of the spring semester of the professional year 1.

C. Program Acceleration

At times, students in the Clinical Health Studies degree program may enter the program with a substantial number of credits derived from Advanced Placement (AP), International Baccalaureate (IB), College level Examination Program (CLEP) coursework, or courses completed at other colleges or universities that are credited toward the Clinical Health Studies degree requirements. Such students may be able to complete the requirements within the first 2 academic years of the degree program as opposed to the normal three academic years. If such is the case, a student may apply for program acceleration which, if approved, would move the student from their current class to the next class or cohort. To apply for program acceleration:

1. the student completes and submits an acceleration application to the academic advisor who notes a recommendation (approve/deny) with reasons;
2. the advisor forwards the application with recommendation to the Chair; and
3. the Chair reviews the application, approves/denies the request and notifies the student regarding the decision.

II. Student Essential Performance Requirements

Physical therapists must have the physical and mental capacity to safely and effectively evaluate and manage the individuals they serve. A document titled "Essential Functions for Physical Therapy Practice" describes in detail the emotional, communication, cognitive, sensory/

motor, and social-behavioral functions a student should be able to perform in order to practice physical therapy. Students are provided with a printed copy of the essential functions document during pre-professional year 1 and are asked to acknowledge by signature receipt of the document. In addition, for pre-professional year 1 students, the essential functions are discussed in required academic coursework during their first academic year in residence. For students transferring into the program, the essential function document will be provided to them upon entrance into the program. All students will be advised to discuss the essential function document with their academic advisor. For all students, the document is also available on the Physical Therapy Department student Sakai site. Students with documented disability will not be precluded from participating in the program; however, such students will need to be able to perform all functions with reasonable accommodation.

III. Policies and Procedures for Academic Performance

The following sections describe those policies and procedures related to academic status and define categories of academic performance. Criteria for College or School academic status (warning, suspension, or dismissal) are specified in the Undergraduate Catalog (<https://catalog.ithaca.edu/undergrad/academic-information/academic-affairs/>). The criteria below apply to *departmental* academic status.

A. Student Academic Performance Review

Grade point averages will be reviewed upon completion of each academic semester (fall or spring excluding summer term). The faculty will review the records of students with academic deficiencies to determine their academic status. Academic warning, suspension, or dismissal notices will be sent to the student by the Chair of the Department of Physical Therapy. When necessary, these letters will specify criteria for reinstatement of good standing and time limitations.

1. Academic Status Categories

a. *Good Academic Standing*: A student is in good academic standing when they have:

- Met college-wide academic standards as outlined in the Ithaca College Undergraduate Catalog
- Met Clinical Health Studies program-specific standards:
 - cumulative GPA of 3.0 or higher at the end of the spring semester of their second year in the program, and
 - cumulative GPA of 3.2 or higher by the end of the spring semester of the third year, and
 - cumulative GPA and individual semester GPA greater than or equal to 3.2 for each semester taking graduate (500 level or higher) courses. Graduate (500 level) courses taken during the summer session are factored into the cumulative GPA at the end of the following fall semester.

b. *Departmental Academic Warning*: Placement of a student on academic warning indicates that a student has a serious deficiency that, if not corrected, will result in suspension or dismissal from the Clinical Health Studies/Physical Therapy program. Such students may be allowed to progress in the curriculum only under conditions specified and approved by the department faculty. Remediation for removal of academic warning status will be determined by the department faculty.

An undergraduate student in the Clinical Health Studies/Physical Therapy major will be placed on academic warning within the Department of Physical Therapy for any of the following reasons:

- receives less than a C- grade in any required course;
- drops or withdraws from any required course;
- does not complete the required courses in the normal timeframe and sequence of the cohort to which they are assigned;
- fails to remove an incomplete grade by the date specified by the course instructor;
- receives less than a 3.2 GPA during a semester taking required graduate (500 level or higher) courses;
- has a documented pattern of unprofessional behavior
- receives a grade of Unsatisfactory (U) from an ICE course
- dismissed from the program, but reinstated after a successful petition

Students who do not meet good standing at the end of the spring semester of professional year I will be placed on academic warning for the fall semester of graduate year I.

Undergraduate students on academic warning due to unsatisfactory performance in an integrated clinical experience (ICE) may progress with didactic coursework while completing a remediation and repeat ICE course. Removal of academic warning status will occur upon successful completion of the remediation plan AND successful completion of the repeat ICE course.

2. Dismissal from the Program

An undergraduate student is subject to dismissal from the Clinical Health Studies/Physical Therapy program for any of the following reasons:

- receives less than a C- grade in two or more required courses in the same semester;
- is a pre-professional year 1 or pre-professional year 2 student on academic warning who fails to successfully complete (with grades of C- or better) at least 12 credit hours in a semester;
- has less than a 3.0 cumulative GPA at the end of pre-professional year 2;
- has less than a 3.2 cumulative GPA at the end of the pre-professional year 3;
- is a pre-professional year 3 student or professional year 1 student who has been on academic warning for any semester, and who receives less than a C- (or fails to remove a grade of I in the specified time period) in any required course;
- is a professional year 1 student who receives less than a C- grade (or fails to remove a grade of I in the specified time) in any required course;
- fails, drops, or withdraws from any two required courses;

- withdraws from a required course while on academic warning;
- has repeated documented instances of unprofessional conduct;
- fails to successfully complete departmental remediation as prescribed by the faculty within the allotted time; or
- receives an Unsatisfactory (U) in more than one ICE course

3. Suspension

An undergraduate student who is subject to dismissal from the program may, under extenuating circumstances, be granted a suspension from the program by the department faculty. A student who is suspended:

- may not enroll in courses offered within the major;
- may apply for a leave of absence from Ithaca College in accordance with College policy; or
- may be reinstated upon satisfactory completion of conditions specified by the Department of Physical Therapy at the time of suspension.

4. Petition for Waiver of Departmental Academic Policy

Undergraduate students who have been placed on warning, suspended, or dismissed from the program according to policy may petition the faculty of the Department of Physical Therapy to waive Departmental academic policy. Information for filing a petition can be obtained from the Department office. Department faculty review petitions to waive academic policy, make a decision, and notify the student and Dean of HSHP of the decision. Students have the right to petition an academic decision with the Dean of HSHP and the Office of the Provost.

5. Eligibility for Admission into the Doctor of Physical Therapy Program

To be eligible for admission to the Doctor of Physical Therapy Program, undergraduate students must have completed the B.S. degree in Clinical Health Studies with a GPA of 3.2 or higher, *AND a GPA of 3.2 or higher for all professional year 1 PTBS 50000 level courses.*

Majors

- Clinical Health Studies Major – B.S. (p. 343)

PTBS 10100 Introduction to Physical Therapy (NLA)

An overview of the history of the physical therapy profession. Orientation to the responsibilities of a physical therapist and to the practice of physical therapy in a variety of environments, including musculoskeletal, neuromuscular, cardiovascular and pulmonary, integumentary, pediatric, and older adults will be discussed. Information regarding the representative professional association, clinical specialization, residency and fellowship will be presented. (F,S,Y)

1 Credit

PTBS 10200 Introduction to the Profession of Physical Therapy (NLA)

Orientation to the responsibilities and activities of physical therapists, the practice environments, representative professional association, and related professional literature. Experiential activities are included to enhance learning. (F or S,Y)

0.5 Credit

PTBS 20100 Introduction to the Practice of Physical Therapy (LA)

Orientation to the practice of physical therapy, including musculoskeletal, neuromuscular, cardiovascular and pulmonary, integumentary, pediatric, and older adults. Prerequisites: PTBS 10200. (F or S,Y)

0.5 Credit

PTBS 31400 Pathology for Physical Therapists (NLA)

Examines the components of general disease and injury processes and specific components of selected diseases likely to be encountered in physical therapy practice. Describes general pathology topics including cell and tissue injury, inflammation, and the healing and repair process. Focuses specifically on diseases of the musculoskeletal, cardiovascular, pulmonary, integumentary, and nerve systems. Emphasizes understanding the underlying mechanisms of structural and functional disruptions for adults, with secondary comparisons to pathology across the life span. Provides background information necessary for performing differential diagnosis and patient treatments that will be taught in future coursework. Prerequisites: PTBS 10100. (F,Y)

3 Credits

PTBS 39900-39905 Selected Topics in Physical Therapy

Clinical and professional topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. Satisfactory/D/Failure only. 0.(IRR)

0.5-3 Credits

PTBS 40000 Mobility Training (NLA)

Introduces patient/client care techniques related to mobility training including bed mobility, transfer training, gait training with a variety of assistive devices, elevation training, and wheelchair mobility. Familiarizes with the initial steps in the patient-therapist relationship including professional behaviors and oral communication. Review of cardiovascular systems is also included. Develops the skills necessary to ensure the safety of both the patient/client and the student/therapist in a clinical environment. Prerequisite: PTBS 10100. (F,Y)

1 Credit

PTBS 40100 Professional Development I (NLA)

Introduces professionalism including professional and ethical behavior, as well as our professional organization. Develops effective listening skills. Prepares to teach in a variety of settings and formats for academic, clinical, and professional purposes. Includes teaching/learning theories and styles, ability to adapt teaching for a variety of audiences, domains of learning, instructional objectives, teaching methods, instructional technology, and feedback. Prerequisites: PTBS 10100. (F)

1 Credit

PTBS 49900-49903 Independent Study (NLA)

This course, which requires a faculty sponsor, allows students to complete an in-depth study or project in an area of their interest related to physical therapy. Includes a final presentation. Prerequisites: Permission of faculty sponsor, academic adviser, department chair, and dean. May be repeated for a total of six credits. (F,S,Y)

1-6 Credits

PTBS 50000 Documentation for Physical Therapy (NLA)

Introduction to written documentation of physical therapy services using the APTA Patient/Client Management Model and the International Classification of Functioning, Disability and Health Model. Topics include written documentation of initial examinations, progress notes, and discharges; legal guidelines; medical terminology; and electronic health record. (U,Y)

1 Credit

PTBS 50100 Human Anatomy (NLA)

Human Anatomy is the study of the gross anatomical components of the human body through the use of lecture and cadaver dissection. Emphasis is placed on the musculoskeletal and neurovascular systems found in the extremities, trunk, chest, and abdominal walls, and in the head and neck.

Prerequisites: PTBS 31400. (U,Y)

6 Credits

PTBS 50200 Musculoskeletal I (NLA)

Application of the patient/client management model with emphasis on examination, evaluation, and diagnosis of musculoskeletal problems of the extremities. Emphasis is placed on the following skills: patient history, joint integrity and mobility, goniometry, muscle performance testing, flexibility testing, ligament testing, special orthopedic tests, and posture as it relates to the extremities. Prerequisites: PHYS 10100, PHYS 10200, and PTBS 50100. (F,Y)

4 Credits

PTBS 50300 Soft Tissue Examination and Interventions (NLA)

This lecture and laboratory course examines various methods of soft tissue examination and intervention. It is designed to expose the student to a broad spectrum of techniques, while teaching the skills of the most commonly used methods. Some of the techniques are more scientifically evidence based than others. The course will emphasize critical assessment and foster the necessity for research-based analysis. The course is also designed to develop the student's palpation skills, including the examination and evaluation of soft tissue dysfunction.

Prerequisites: PTBS 50100. (F,Y)

2 Credits

PTBS 50400 Applied Biomechanics (LA)

Application of mechanical principles to human movement with particular attention to the effect of forces in producing normal movement. Students are required to apply their knowledge of anatomy to understanding individual joint function, as well as the integrated function of several joints during complex activities such as the normal gait. Prerequisites: PTBS 50100. (F,Y)

3 Credits

PTBS 50500 Professional Development II (NLA)

Introduction to the Practice Act, roles of paraprofessionals, professional and ethical behavior, and effective communication styles. Instruction in clinical education teams, models of clinical education, and assessment of clinical performance. Prerequisites: PTBS 40100. (S,Y)

Attributes: CP

1 Credit

PTBS 50600 Medical Screening I (NLA)

This course covers the principles and interpretation of diagnostic testing. Students will become competent in understanding radiologic interpretations of X-rays, Computed Tomography, MRI, Nuclear, ultrasound imaging and nerve conduction testing. Radiographic anatomy, densities, views, and structural analysis are taught using digital imaging. Patient cases will be used to compare patho-structural diagnosis with actual symptoms and clinical presentation. Prerequisites: PTBS 31400. (F,Y)

1 Credit

PTBS 50700 Integrated Clinical Experience I (NLA)

Work with patients under the supervision of a faculty member. Apply knowledge and skills to assume appropriate responsibilities in direct patient care. (B,S,Y)

1 Credit

PTBS 50800 Evidence Based Practice I (NLA)

Explore how research literature can guide clinical decision making and form the basis for contemporary physical therapist practice. Emphasize how evidence is used to answer clinical questions that affect the examination process, evaluation procedures, and interventions commonly used by physical therapists. Examine the historical background for evidence based practice. Analyze the fundamental components of evidence based practice. Prerequisites: MATH 14400, MATH 14500, MATH 15500, MATH 21600 or PSYC 20700; and PTBS 50100. (S,Y)

3 Credits

PTBS 50900 Integrated Clinical Experience II (NLA)

This second clinical education experience provides students with an opportunity to work with patients under the supervision of a faculty member in a diverse experience. Students will apply knowledge and skills and assume appropriate responsibilities in direct patient care. Pass/Fail only. Prerequisites: PTBS 50700. (S,Y,B)

1 Credit

PTBS 51000 Joint Mobilization (NLA)

Lecture and laboratory course that provides an evidence based manual therapy approach toward evaluation and management of musculoskeletal conditions using joint mobilization. Emphasis will be on enhancing the student's clinical reasoning and manual therapy skills. Prerequisites: PTBS 50200 and PTBS 50300. (S,Y)

2 Credits

PTBS 51002 Human Anatomy

Study of the gross anatomical components of the human body through the use of lecture and cadaver dissection. Emphasis is placed on the musculoskeletal and neurovascular systems found in the extremities, trunk, chest, and abdominal walls, and in the head and neck. Prerequisites: BIOL-20600. (Sum,Y)

6 Credits

PTBS 51100 Therapeutic Exercise (NLA)

A comprehensive analysis of the scientific principles of exercise commonly used in physical therapy practice. Specific exercise programs will be discussed, as well as adaptations of tissue to activity and immobilization. Prerequisites: PTBS 50200 and PTBS 50400. (S,Y)

3 Credits

PTBS 51103 Pathology for Physical Therapists (LA)

Examination of the components of general disease and injury processes and specific components of selected diseases likely to be encountered in physical therapy practice. General pathology topics described include cell and tissue injury, inflammation, and the healing and repair process. Specific focus on diseases of the musculoskeletal, cardiovascular, pulmonary, integumentary, and nerve systems. Emphasis is placed on understanding the underlying mechanisms of structural and functional disruptions for adults, with secondary comparisons to pathology across the life span. This course provides background information necessary for performing differential diagnosis and patient treatments. Prerequisites: PTBS 51002; PTBS 31300. (S,Y)

3 Credits

PTBS 51200 Acute Care (NLA)

This course will provide students with the knowledge related to and skills required in the acute care setting. Students will develop competency in acute care evaluations, interventions, and discharge planning. Both didactic and laboratory activities will be used to integrate curricular content to address the complex patient and dynamic environment encountered in acute care. Prerequisites: PTBS 40000. (F,Y)

2 Credits

PTBS 51300 Electrotherapeutic Modalities and Physical Agents (NLA)

The study of the biophysical, physiological, and clinical principles and procedures associated with the application of electromagnetic and acoustic energy in the clinical management of pathological conditions. Prerequisites: PHYS 10100, PHYS 10200, and PTBS 50100. (S,Y)

3 Credits

PTBS 51400 Medical Screening II (NLA)

Builds on the principles introduced in Medical Screening I allowing the students to integrate these principles into an efficient and effective patient examination. A systematic approach to evaluating a patient's history and performing a systems review allows students to identify risk factors, red flags, visceral pain patterns, and constitutional symptoms that warrant a medical referral. Decisions for recommending lab tests or imaging are based on specific medical conditions and current appropriateness criteria. Prerequisites: PTBS 50600. (S,Y)

2 Credits

PTBS 51500 Health Care Systems (NLA)

This course familiarizes students with the basic constructs of the U.S. health care system, with emphasis on how system components influence patient referrals, delivery of care, reimbursement, and outcomes.

Prerequisites: PTBS 40100. (S,B,Y)

1 Credit

PTBS 51600 Mobility Training (NLA)

Introduces patient/client care techniques related to mobility training including bed mobility, transfer training, gait training with a variety of assistive devices, elevation training, and wheelchair mobility. Familiarizes students with the initial steps in the patient-therapist relationship including professional behaviors and oral communication. Review of cardiovascular systems is also included. Develops the skills necessary to ensure the safety of both the patient/client and the student/therapist in a clinical environment. Prerequisites: PTBS 50100. (F,Y)

1 Credit

PTBS 51700 Professional Development I (NLA)

Introduces professionalism including professional and ethical behavior, as well as our professional organization. Develops effective listening skills. Prepares to teach in a variety of settings and formats for academic, clinical, and professional purposes. Includes teaching/learning theories and styles, ability to adapt teaching for a variety of audiences, domains of learning, instructional objectives, teaching methods, instructional technology, and feedback. Prerequisites: PTBS 50100. (F)

1 Credit

PTBS 51800 Pathology for Physical Therapists (NLA)

Examines the components of general disease and injury processes and specific components of selected diseases likely to be encountered in physical therapy practice. Describes general pathology topics including cell and tissue injury, inflammation, and the healing and repair process. Focuses specifically on diseases of the musculoskeletal, cardiovascular, pulmonary, integumentary, and nerve systems. Emphasizes understanding the underlying mechanisms of structural and functional disruptions for adults, with secondary comparisons to pathology across the life span. Provides background information necessary for performing differential diagnosis and patient treatments that will be taught in future coursework. Prerequisites: PTBS 50100. (F,Y)

3 Credits

PTBS 52102 Musculoskeletal Examination and Evaluation (NLA)

Introduction to the patient/client management model with emphasis on examination, evaluation, and diagnosis of musculoskeletal problems of the extremities. Emphasis is placed on the following skills: patient history, range of motion, goniometry, muscle performance testing, flexibility testing, ligament testing, special orthopedic tests, and posture as it relates to the extremities. Prerequisites: PHYS 10100; PHYS 10200; PTBS 51002. (F,Y)

3 Credits

PTBS 52203 Soft Tissue Palpation and Examination (NLA)

This lecture and laboratory course examines various methods of soft tissue examination and intervention. It covers a broad spectrum of techniques while teaching the skills of the most commonly used methods. Some of the techniques are more scientifically evidence-based than others. The course emphasizes critical assessment and the need for research-based analysis. It develops palpation skills, including the examination and evaluation of soft tissue dysfunction. Prerequisite: PTBS 51002. Corequisites: PTBS 52102; PTBS 53702. (F,Y)

2 Credits

PTBS 52304 Peripheral Joint Mobilization (NLA)

Lecture and laboratory course preparing students to incorporate passive mobility testing into the patient/client examination. Students also learn to use passive joint mobilization interventions for patient/client with peripheral joint pathologies. Prerequisites: PTBS 52102; PTBS 52203. (S,Y)

1.5 Credits

PTBS 52405 Therapeutic Exercise (NLA)

A comprehensive analysis of the scientific principles of exercise commonly used in physical therapy practice. Specific exercise programs address muscle performance, endurance, mobility, and balance impairments. Adaptations of tissue on activity and immobilization are also discussed. Prerequisites: PTBS 31300; PTBS 52102; PTBS 53702. (S,Y)

3 Credits

PTBS 53101 Electrotherapeutic Modalities and Physical Agents (NLA)

The study of the biophysical, physiological, and clinical principles and procedures associated with the application of electromagnetic and acoustic energy in the prevention and treatment of pathological conditions. Prerequisites: PHYS 10100; PHYS 10200; PTBS 51002. (S,Y) 4 Credits

PTBS 53702 Applied Biomechanics (LA)

Application of mechanical principles to human movement. Particular attention to the effect of forces in producing normal movement. Students are required to apply their knowledge of anatomy to understanding individual joint function, as well as the integrated function of several joints during complex activities such as the normal gait. Prerequisites: PHYS 10100; PHYS 10200; PTBS 51002. (F,Y)

Attributes: NS

3 Credits

PTBS 54001 Professional Development I (NLA)

Description of physical therapy as a profession in the United States, including history, professional organization, roles of the physical therapist and related personnel, and scope of practice. Prerequisites: Senior standing. (F,Y)

.5 Credit

PTBS 54102 Preclinical Conference I (NLA)

Series of sessions to explain clinical education policies and procedures and choose sites for clinical affiliations. Prerequisites: Senior standing; clinical health studies major. Pass/fail only. (Su,Y)

0 Credit

PTBS 54203 Professional Development II (NLA)

Introduction to the Practice Act, Code of Ethics, roles of paraprofessionals, professional and ethical behavior, and effective communication styles. Instruction in clinical education teams, models of clinical education, and assessment of clinical performance. Corequisite: PTBS 55501. Prerequisites: PTBS 54001. (S,Y)

Attributes: CP

1 Credit

PTBS 55501 Teaching and Learning in the Clinical Setting (NLA)

Preparation to teach in a variety of settings and formats for academic, clinical, and professional purposes. Content is applicable to community presentations, group in-services, and presentations, as well as patient/family and other individualized teaching. Includes teaching/learning theories and styles, impact of age, culture, environment, and motivation, domains of learning, instructional objectives, teaching methods, and instructional technology. Evaluation, feedback, and outcome measurements are included. (S,Y)

1 Credit

PTBS 59000-59005 Selected Topics in Physical Therapy (NLA)

Clinical and professional topics of current interest to faculty and students. This course may be repeated for credit for different selected topics. Pre-requisites: As appropriate to topics. Pass/fail only. (IRR) 0-3 Credits

PTBS 59800 Honors Seminar in Physical Therapy (NLA)

For students in the honors program. Research proposals completed in PTBS 59900 are presented and critiqued. In addition, examples of good and poor published journal articles are discussed and analyzed. Prerequisites: PTBS 59900. Note: All undergraduates taking this course for graduate credit must satisfy the conditions listed under "Course Levels." (S,Y)

1 Credit

PTBS 59900 Honors Project (NLA)

For the exceptional student who wishes to pursue graduate research. Results will be summarized in a research proposal, which is a preliminary step toward a graduate thesis. Prerequisites: PTBS 41000; permission of department chair. Note: All undergraduates taking this course for graduate credit must satisfy the conditions listed under "Course Levels." (F,Y)

3 Credits

Clinical Health Studies Major – B.S.

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

The CHS/PT Program is a combined bachelor of science and doctor of physical therapy degree. Students graduate with a Bachelor of Science degree in Clinical Health Science along with a *chosen minor* in May of their senior year and continue in graduate coursework for their Doctor of Physical Therapy degree.

Note: The B.S. in clinical health studies does not provide eligibility for licensure to practice physical therapy. This degree is awarded after four years of study in the six-year combined B.S./D.P.T. program in clinical health studies/physical therapy.

Summary

Code	Title	Credits
Major Requirements		90-97
Integrative Core Curriculum and Electives ¹		23-30
Total Credits		120

¹ This major is approved to fulfill the Integrative Core Curriculum (p. 8) requirement for the Natural Sciences perspective.

Degree Requirements

Code	Title	Credits
Physical Therapy Courses		
PTBS 10100	Introduction to Physical Therapy	1
PTBS 50000	Documentation for Physical Therapy	1
PTBS 50100	Human Anatomy	6
PTBS 50200	Musculoskeletal I	4
PTBS 50300	Soft Tissue Examination and Interventions	2
PTBS 50400	Applied Biomechanics	3
PTBS 50500	Professional Development II	1
PTBS 50600	Medical Screening I	1
PTBS 50700	Integrated Clinical Experience I	1

Total Credits		90-97

Department of Speech-Language Pathology and Audiology

Lynne E. Hewitt, *Professor and Chairperson*

Students who select speech-language pathology (SLP) as their major typically are seeking to pursue a career in speech-language pathology or audiology. The Ithaca College undergraduate program in SLP provides the solid academic foundation coupled with hands-on clinical experience essential for achieving these goals. Students who successfully complete the Ithaca College undergraduate program in SLP earn a B.S. degree that provides them with the foundational knowledge and beginning clinical skills that are important for further graduate study in speech-language pathology (note that a Master's degree is required to be certified as a speech-language pathologist by the American Speech-Language-Hearing Association), or audiology (a doctoral degree in audiology is required). Students are also well prepared to enter related areas of study at the graduate level, in a variety of health- and education-related fields.

Core required coursework in the major focuses on basic human communication processes while introducing students to the study of speech, language, and hearing disorders. This core coursework is complemented by the Integrative Core Curriculum. In the senior year,

in addition to taking a capstone clinical methodology course, students participate in a clinical practicum.

Strengths of the Ithaca College program in SLP include the following:

1. classes in the major during the first year;
2. a minimum of 37 credits of coursework in basic communication processes and disordered communication (e.g., basic audiology, child language and speech-sound disorders);
3. teacher education coursework that can be applied toward future certification through the New York State Education Department (*Teaching Students with Speech and Language Disabilities* (TSSL) certificate);
4. 25 hours of clinical observations accompanied by thoughtfully constructed professional writing assignments;
5. clinical experience working directly with clients (clinical hours earned may be applied for future certification);
6. study abroad during the junior year, if desired;
7. a minor area of study (e.g., Psychology, Deaf Studies, Education Studies) if desired; and
8. excellent preparation for graduate school.

Students in the SLP major must complete all required coursework for a grade.

Internal Transfers into the SLP Major

Students who are currently enrolled at Ithaca College are welcome to transfer into the speech-language pathology major. It is recommended, but not required, that students transfer prior to beginning the sophomore year. To be eligible to transfer into the major students must meet with the department chair to discuss the major. In addition, students must meet all college and departmental requirements for satisfactory academic standing. The college's online transfer request may be submitted after the chair approves and as long as all the eligibility requirements have been met.

Auto-acceptance into Graduate Program

Students in the speech-language pathology major at Ithaca College who meet minimum GPA requirements at the time of their application to the graduate program will be automatically accepted. Students who are automatically accepted into the graduate program must apply within two years following graduation from the undergraduate program. Students who meet auto-acceptance requirements still need to submit an application via the CSDCAS application system. Please see the graduate program page for details on applying to the master's degree program (<https://www.ithaca.edu/academics/school-health-sciences-and-human-performance/graduate-programs/graduate-study-speech-language-pathology/application-requirements/>).

Special Academic Status Policy for Speech-Language Pathology Majors

To maintain satisfactory academic standing, a student must

- maintain a cumulative GPA of 2.50 or above,
- complete all courses in the major (SLPA xxxxx) with a grade of C- or better, and

- successfully complete at least 24 credits in any consecutive 12-month period.

Prior to completion of the major, the student is required to repeat required departmental courses in which they receive a grade below C-. No advanced course may be taken until all prerequisites for it have been completed with a grade of C- or better.

Academic warning: A student who fails to meet any of the requirements for satisfactory standing stated above will be placed on academic warning.

Dismissal: A student who fails to meet the requirements for satisfactory standing for two consecutive semesters will be dismissed from the major and also may be suspended or dismissed from the school and from Ithaca College. If remaining at Ithaca College, students must obtain entrance to another major during the semester following their dismissal; obtaining entrance to another major is the responsibility of the student.

Transfer Credit

Students who have completed courses in communication disorders at a regionally accredited institution may Petition for Transfer Credit to have up to 4 of these courses count towards SLP degree requirements. Requests must be accompanied by a copy of the syllabus of the course taken. The department chair will review requests in consultation with the Ithaca College course instructor for the course being requested, and determine if courses are equivalent to required departmental courses; their decision is final. Transfer credit requests must comply with Ithaca College policies for Credit from External Sources (<https://catalog.ithaca.edu/undergrad/academic-information/credit-grade/>).

Majors & Minors

- Speech-Language Pathology Major – B.S. (p. 347)
- Communication Disorders Minor (p. 348)
- Deaf Studies Minor (p. 348)

SLPA 10901 American Sign Language I (LA)

Introduction to the linguistic features and core vocabulary needed to develop basic communicative competence in ASL. Students learn basic ASL grammar and apply this knowledge when using ASL to ask and answer questions, introduce themselves, exchange personal information, talk about family and friends, talk about surroundings, provide descriptions, and discuss activities. Discussion of deaf culture is infused throughout the course. Practicing conversations and active participation in and out of class are required. (F-S,Y)
3 Credits

SLPA 11010 Phonetics (NLA)

An introduction to the study of speech sounds used in the production of American English. Emphasis is placed on (1) sound to symbol transcription using the International Phonetic Alphabet, as well as (2) development of transcription speed and accuracy. Anatomy and physiology of the speech mechanism are introduced for the purpose of describing speech sound production. (F-S,Y)
3 Credits

SLPA 12000 Information Research Strategies for Speech Language Pathology and Audiology (NLA)

Develop information literacy and evidence-based practice research skills within the context of the Speech Language Pathology and Audiology. Apply research skills that include studying and time management strategies, search strategies, critical evaluation of information, information management, documentation, communication, and use of information from a variety of sources and formats in an effective and ethical manner. (S,Y)
2 Credits

SLPA 15000 Introduction to Communication Disorders (LA)

An introduction to speech, language, and hearing disorders. A variety of disorders in both children and adults is surveyed, including articulation and language disorders, stuttering, learning disability, cleft palate, cerebral palsy, voice disorders, and hearing losses. The study of these disorders includes incidence/prevalence, characteristics, causes, cultural and linguistic variations, and the impact of the disorder on the individual and society. The course is designed for and open to all students. (F-S,Y)
Attributes: 1, SS
3 Credits

SLPA 20800 Perspectives on Deafness (LA)

Examination of disability perspectives and alternatives to disability perspectives on deafness in the US. Discussion of issues related to child development (e.g., development of speech, language, and literacy) from an educational perspective. Discussion of intervention from an audiological perspective. Discussion of controversies inside and outside the deaf community related to educational and clinical interventions. Prerequisite: SLPA 10901 with a grade of C- or better. (F,Y)
3 Credits

SLPA 20901 American Sign Language II (LA)

Students learn additional linguistic features, cultural protocols, and core vocabulary. Students practice using ASL grammar for giving directions, describing others, making requests, attributing qualities to others, and talking about family, occupations, and routines. Discussion of Deaf culture is infused throughout the course. Practicing conversations and videotaping use of ASL in and out of class are required. Prerequisites: SLPA 10901 with a grade of C- or better. (F-S,Y)
Attributes: HU
3 Credits

SLPA 21200 Anatomy and Physiology of the Speech and Hearing Mechanisms (LA)

Anatomy and physiology of the speech and hearing mechanisms; respiration, phonation, resonance, articulation, and basic neurological concepts underlying the communication process. Prerequisites: Second-semester freshman status. (F,Y)
Attributes: NS
3 Credits

SLPA 21600 Child Language and Literacy Development (LA)

Introduces the student to the study of language and literacy development in children. Topics include prelinguistic development, components of language, theoretical models of language acquisition, individual differences, relationships between oral and written language, and cultural and linguistic variations in language development. (F,Y)
Attributes: SS
3 Credits

SLPA 23500 Language and Speech Sound Disorders in Children (NLA)

Exploration of developmental speech and language disorders, including comparison of typical and disordered development. Identify, critically evaluate, and apply evidence-based practices in speech and language assessment and intervention, using clinical case studies. Prerequisites: SLPA 11010 and SLPA 21600 with a grade of C- or better. (S)

4 Credits

SLPA 24000 Basic Audiology (NLA)

Study of anatomy and physiology of the hearing mechanism, acoustics, auditory pathologies, classification of hearing disorders, and the profession of audiology. Additional topics covered include pure-tone and speech audiometry, immittance measures, and material of current interest. Prerequisites: Sophomore standing. (F,Y)

3 Credits

SLPA 24200 Aural Rehabilitation (NLA)

Study of the perceptual, psychological, and educational implications of hearing loss. The course will focus on areas significant to the (re)habilitation of individuals with hearing loss, such as identification, evaluation, remediation, and counseling. Prerequisites: SLPA 24000 with a grade of C- or better. (S,Y)

3 Credits

SLPA 30901 American Sign Language III (LA)

Emphasis is placed on development of communicative competencies in ASL conversations beyond the basic level including telling life events, describing events in time, asking for clarification, correcting, conforming, elaboration on information, agreeing and disagreeing, resolving conflicts, and giving directions. Classroom and outside activities include practicing dialogues, short stories, narratives, and short conversation. Discussion of Deaf culture is infused throughout the course. Practicing conversations and videotaping use of ASL in and out of class are required. Prerequisites: SLPA 20901 with a grade of C- or better. This course is only open to Deaf Studies minors. (F,Y)

3 Credits

SLPA 31000 Deaf Culture (LA)

Examination of deaf heritage including contributions and perspectives of leaders in the Deaf community. Examination of deafness as portrayed in literature and movies. Examination of artistic expression within the Deaf community including contemporary visual artists and the National Theatre for the Deaf. A guided project is required, and travel to a theatrical production may be required. (S,Y)

3 Credits

SLPA 32500 Voice and Swallowing Disorders (NLA)

Examine and understand the nature, etiology, and physiology of normal and abnormal voice and swallowing patterns. Learn about the variety of clinical procedures involved in voice and swallowing evaluations. Gain knowledge in the available instrumental procedures used in the study of voice and swallowing disorders. Explore a variety of intervention strategies for voice and swallowing disorders. Prerequisite: SLPA 21200. (S,Y)

3 Credits

SLPA 33000 Advanced Clinical Audiology (NLA)

An in-depth exploration of clinical audiology with hands on experiential learning. Topics include but are not limited to diagnostic procedures, hearing technology, special populations, and patient-centered practice. Students engage in active learning through integrating lecture materials, hands-on activities, lab work, and group projects. Prerequisites: SLPA 24000 with a grade of B or higher; SLPA 24200 with a grade of B or higher. (F,Y)

3 Credits

SLPA 35900 Communication Disorders in the Aging Population (LA)

Introduces the communication disorders common to older persons. Speech and language disorders, hearing disorders, and the role of allied health professionals are examined. Prerequisites: Any 10000-level GERO course or BIOL 20500 or SLPA 21200, at least one of which must be completed with a grade of C- or better. (S,Y)

Attributes: SS

3 Credits

SLPA 36000 Brain Science (LA)

Addresses the basic structure and function of the brain with a special focus on the neuroscience of communication. Relationships between different lesion sites in the brain and the communication breakdowns that they produce will be introduced. Prerequisites: SLPA 21200 with a grade of C- or better. (F,Y)

3 Credits

SLPA 36500 Basic Speech Science (LA)

Introduces the undergraduate student in speech-language pathology to topics in speech science. Areas covered include an overview of the acoustics of sound, the glottal spectrum, acoustics of consonant and vowel production and perception, suprasegmentals, and instrumentation. Prerequisites: SLPA 21200 with a grade of C- or better. (S,Y)

Attributes: NS

3 Credits

SLPA 37000 Clinical Observation (NLA)

Provides an intensive clinical observation experience in conjunction with classroom instruction focusing on designing individualized intervention programs, writing behavioral objectives, and general case management strategies. This course is only open to students in the Speech-Language Pathology major. Prerequisites: SLPA 23500 with a grade of C- or better. (F,S,Y)

3 Credits

SLPA 39900-39904 Selected Topics in Speech-Language Pathology and Audiology

Topics of current interest to faculty and students. Experimental courses are offered under this course number and title. This course may be repeated for credit for different selected topics. Prerequisites: As appropriate to topics. (IRR)

1-3 Credits

SLPA 42900 Tutorial in Speech-Language Pathology (NLA)

Intensive study in speech-language pathology for advanced students. The student presents a written proposal to an instructor who is chosen by the student to direct the tutorial. After the instructor agrees to direct the tutorial, copies of the proposal are forwarded to the student's adviser and chairperson for final approval. This procedure must be completed prior to registration. Prerequisites: Junior standing; permission of adviser and department chair. (F-S,Y)

1-3 Credits

SLPA 44900 Tutorial in Audiology (NLA)

Intensive study in audiology for advanced students. The student presents a written proposal to an instructor who is chosen by the student to direct the tutorial. After the instructor agrees to direct the tutorial, copies of the proposal are forwarded to the student's adviser and chairperson for final approval. This procedure must be completed prior to registration. Prerequisites: Junior standing; permission of adviser and department chair. (F-S,Y)

1-3 Credits

SLPA 45900 Communication Disorders in Culturally Diverse Populations (NLA)

Cultural pluralism as it relates to communication disorders in the United States; its impact on the professions of speech-language pathology and audiology; and sociolinguistic issues of dialect, communication style, and attitudes toward them. Discussion includes cultural factors that may influence the acquisition of speech and language; incidence and variation of specific speech and language disorders among diverse populations; assessment and treatment procedures that accommodate cultural differences; goal selection strategies; selection of unlisted materials; educational implications; and specific intervention cases.

Prerequisites: Senior standing or permission of instructor; only open to Speech-Language Pathology majors. (S,Y)

3 Credits

SLPA 47200 Clinical Methods (NLA)

This capstone course provides in-depth discussion of the clinical process with emphasis on assessment and intervention strategies, therapy approaches, and principles. This course is open only to Speech-Language Pathology majors. Prerequisites: SLPA 37000 with a grade of C- or better; senior standing. Corequisites: SLPA 47300. (F,S,Y)

Attributes: CP

3 Credits

SLPA 47300 Clinical Practicum (NLA)

Applied, supervised clinical practicum experience in speech-language pathology that provides the opportunity to interact with clients. Involves developing and implementing a program of therapy, preparing lesson plans, and writing progress reports. Prerequisites: SLPA 37000 with a grade of C- or better. Corequisites: SLPA 47200. This course is only open to Speech-Language Pathology majors. (F-S, Y)

1 Credit

SLPA 49900-49902 Independent Study in Speech-Language Pathology/Audiology (NLA)

Individual investigations (in-depth study, research, reading) related to Speech-Language Pathology or Audiology that are not fully covered by regular coursework. Arranged individually between the student and faculty sponsor according to the guidelines set forth by the school of HSHP. Prerequisites: Approval of the faculty sponsor, advisor, department chair, and dean. (F-S,IRR)

1-3 Credits

Speech-Language Pathology Major – B.S.

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

Summary

Code	Title	Credits
	Major Requirements	61-71
	Integrative Core Curriculum and Electives ¹	50-59
	Total Credits	120

¹ This major is approved to fulfill the Integrative Core Curriculum (p. 8) requirement for the Social Sciences perspective.

Degree Requirements

Code	Title	Credits

This B.S. degree requires 60 liberal arts credits out of the 120 credits required for graduation.

Communication Disorders Minor

Open to students in all majors except speech-language pathology. The minor is designed to increase students' understanding of communication disorders.

Prior to registering for the minor, students must meet with the Department of Speech-Language Pathology and Audiology faculty member who serves as the Communication Disorders Minor advisor. A faculty advisor in the Department of Speech-Language Pathology and Audiology will be assigned to each student in the minor.

Requirements

Code	Title	Credits
All students must take the following course:		
SLPA 15000	Introduction to Communication Disorders	3

ELECTIVES	Credits
Students must take at least 12 credits from the lists below: at least 3 of these credits must be taken from the speech-language and hearing disorders course list.	12-13

BASIC HUMAN COMMUNICATION PROCESSES AND DEVELOPMENT

SLPA 11010	Phonetics	
SLPA 21200	Anatomy and Physiology of the Speech and Hearing Mechanisms	
SLPA 21600	Child Language and Literacy Development	
SLPA 24000	Basic Audiology	
SLPA 36000	Brain Science	
SLPA 36500	Basic Speech Science	

SPEECH-LANGUAGE AND HEARING DISORDERS COURSES

SLPA 24200	Aural Rehabilitation	
SLPA 23500	Language and Speech Sound Disorders in Children	
SLPA 32500	Voice and Swallowing Disorders	
SLPA 35900	Communication Disorders in the Aging Population	

Total Credits		15-16
----------------------	--	--------------

Note: The above courses may have prerequisites; refer to the course descriptions.

Guidelines on course sequencing and other requirements are available at the department office, Smiddy Hall 301.

Deaf Studies Minor

The Deaf Studies minor is designed to develop the use of American Sign Language and increase the student's understanding of deafness and Deaf culture. Students majoring in all disciplines are eligible to apply for this minor; however, a limited number of students are accepted based on course availability.

Entrance requirements to this minor include: completion of SLPA 10901 and a cumulative GPA of 3.0 or above. Students interested in the minor should submit their application upon completion of American Sign Language I.

Prior to registering for the minor, students from outside the Speech-Language Pathology major must meet with the Department of Speech-Language Pathology and Audiology faculty member who serves as the Deaf Studies Minor advisor. After registering for the minor, students will be assigned a minor advisor. Students who are Speech-Language Pathology majors must meet with their departmental faculty advisors prior to registering for the minor; the student's major advisor also serves as the minor advisor.

All courses for the minor, with the exception of ASL I, must be completed at Ithaca College.

Requirements

Code	Title	Credits
SLPA 10901	American Sign Language I	3
SLPA 20901	American Sign Language II	3
SLPA 30901	American Sign Language III	3
SLPA 20800	Perspectives on Deafness	3
SLPA 31000	Deaf Culture	3
Total Credits		15

NOTE: The above courses may have prerequisites; refer to the course descriptions.

Application and acceptance into the Deaf Studies minor is required prior to enrolling in American Sign Language III. Guidelines on course sequencing and other requirements are available at the department office in Smiddy Hall 301.

Physical Activity, Leisure, and Safety Programs

Department of Health Sciences and Public Health, Hill Center G56
HSPH@ithaca.edu

The physical activity, leisure, and safety (PALS) program provides diverse, skill-oriented physical activities as part of a general education program promoting the physiological development of students, improving their fitness and motor skills, and enabling them to maintain a suitable recreation program of their choice during and after college. The PALS program offers a variety of activities in the areas of aquatics, individual and dual sports, team sports, and physical fitness. CPR and first aid courses are offered through the health education program (HLTH).

A maximum of 6 credits in PALS courses, taken as open (free) electives, may be counted toward graduation. Each school or department determines the number that may be counted toward graduation. PALS courses are offered on a pass/fail basis only.

Activity Course Registration Information

Students must register online for activity courses. In order to do so, students must select the appropriate block: block 1 (first 7 weeks of the semester) or block 2 (last 7 weeks of the semester). Students risk being automatically dropped from the course if they do not attend the first class meeting. The only exception to this rule will be with prior notice of the absence. A student who is dropped for nonattendance may apply to be added at the next class meeting. (Note: The instructor is not obligated to drop a student; students who decide not to take the course must follow the regular drop procedures.) All persons who participate in activity courses must have a health clearance on file in the College's health center.

Some of the courses require the student to pay an extra fee to cover various instructor, equipment, and materials costs. The costs associated with these courses are noted in the course descriptions when students register.

Intercollegiate Athletic Course Registration Information

Students participating on an intercollegiate athletic team can register online for intercollegiate athletic course credit. Students who do not make the team or who discontinue participation for any reason must drop or withdraw from the course online. Intercollegiate athletic courses are offered on a pass/fail basis only. Credit is granted either in the fall or the spring for any given sport. No late requests for credit will be honored.

PALS 00070 Women's Intercollegiate Varsity Basketball (NLA)
0-0.5 Credits

PALS 00073 Womens Intercollegiate Varsity Gymnastics (NLA)
Students participating on an intercollegiate athletic team can register online for intercollegiate athletic course credit.
